# Impact of Government Bonds Spreads on Credit Derivatives

Analysis of Increasing Spreads  
Developments within  
the European Area

Springer Gabler

---

# BestMasters

Springer awards „BestMasters“ to the best master’s theses which have been completed at renowned Universities in Germany, Austria, and Switzerland.

The studies received highest marks and were recommended for publication by supervisors. They address current issues from various fields of research in natural sciences, psychology, technology, and economics.

The series addresses practitioners as well as scientists and, in particular, offers guidance for early stage researchers.

## **Acknowledgements**

I would like to thank my thesis supervisor, Mr. Hans Aubauer, who guided me along the path to completion of this thesis. Moreover, I thank my student colleagues as well as my friends, in particular Christina.

Most of all, I would like to thank my family. In particular, I am grateful for my parents, who supported me during my whole study time and who enabled me to go my way. My sincere thanks to my partner Alexander for his patient especially during the preparation of this work. Furthermore, I would like to thank my grandparents for their moral support during my study time.

## **Institute's profile**

### **Master programme „Quantitative Asset and Risk Management (ARIMA)“ at the University of Applied Science BFI Vienna**

The University of Applied Sciences BFI Vienna offers the master's programme, "Quantitative Asset and Risk Management (ARIMA)", with the aim of providing students with an all-round understanding of the interaction between asset and risk management. Each of these functions helps create value for a company, but from different points of view. The functions should work together to find an optimal balance between risk and potential reward (or profit). Mutual understanding is thus essential. ARIMA graduates are awarded the academic title of "Master of Arts in Business" (MA) by the University of Applied Sciences BFI Vienna.

Graduates also have the opportunity of qualifying with a Double Degree from our university and one of its partner universities: University of Bologna (Italy), University of Economics in Katowice (Poland) and Alexandru Ioan Cuza University (Iași, Romania).

The programme lasts four semesters and is run in English as it is geared toward students wishing to expand their career prospects both locally and abroad. The programme is a part-time study programme, thereby providing an excellent opportunity for working professionals to further their studies. The second year involves an obligatory stay abroad, for example a two-week stay at one of the aforementioned partner universities.

The UAS BFI Vienna offers 25 new study places per year.

# Table of Contents

- 1 Introduction ..... 1**
  - 1.1 Research questions ..... 2
  - 1.2 Methodology ..... 3
  - 1.3 Structure ..... 4
  - 1.4 Acknowledgment of previous work on the subject ..... 5
- 2 Theoretical underpinnings ..... 7**
  - 2.1 Bonds ..... 7
  - 2.2 Credit derivatives ..... 8
  - 2.3 Spreads in general ..... 13
  - 2.4 Relationship between bond yield differentials and credit default swaps spreads ..... 15
  - 2.5 Models for pricing CDSs ..... 18
- 3 Modelling credit default swap prices ..... 27**
  - 3.1 Classification of models ..... 27
  - 3.2 Classification of data ..... 33
  - 3.3 Implementing models ..... 37
- 4 Simulation of government bond spread increase ..... 45**
  - 4.1 Calibration of model ..... 45
  - 4.2 Simulation with varying increase levels ..... 46
  - 4.3 Simulation with varying interest levels ..... 56
  - 4.4 Simulation with varying interest levels and varying increase levels ..... 60
- 5 Results ..... 71**
- 6 Concluding remarks ..... 79**
- References ..... 83**

The appendices A - E are freely available to download on the product site of this book on [springer.com](http://springer.com).

## List of Figures

<b>Figure 1</b>	Payments within a CDS agreement.....	12
<b>Figure 2</b>	Payments within a CDS agreement when credit event occurred .....	12
<b>Figure 3</b>	Development of the three month Euribor from 1999 to 2016.....	34
<b>Figure 4</b>	Parallel shift of interest rate curves for both sample periods.....	56
<b>Figure 5</b>	Twist of interest rate curves for both sample periods .....	57

## List of Tables

<b>Table 1</b>	Obtained CDS spreads in BPS applying model of Hull and White.....	38
<b>Table 2</b>	Results of first simulation for 2010-2012_ Varying increase levels using all parameters .....	48
<b>Table 3</b>	Results of first simulation for 2010-2012_ Varying increase levels using five parameters .....	50
<b>Table 4</b>	Results of first simulation for 2013-2015_ Varying increase levels using all parameters .....	52
<b>Table 5</b>	Results of first simulation for 2013-2015_ Varying increase levels using five parameters .....	54
<b>Table 6</b>	Results of second simulation for 2010-2012_ Parallel shift of interest rate .....	57
<b>Table 7</b>	Results of second simulation for 2010-2012_ Twist of interest rate.....	58
<b>Table 8</b>	Results of second simulation for 2013-2015_ Parallel shift of interest rate .....	59
<b>Table 9</b>	Results of second simulation for 2013-2015_ Twist of interest rate.....	59
<b>Table 10</b>	Results of third simulation for 2010-2012_ Optimisation and parallel shift of interest rate .....	61
<b>Table 11</b>	Results of third simulation for 2010-2012_ Optimisation and twist of interest rate.....	63
<b>Table 12</b>	Results of third simulation for 2013-2015_ Parallel shift of interest rate .....	66
<b>Table 13</b>	Results of third simulation for 2013-2015_ Twist of interest rate.....	68
<b>Table 14</b>	Selected bond indices with maturity of one to three years for the Hull and White model .....	App
<b>Table 15</b>	Selected bond indices with maturity of four to six years for the Hull and White model .....	App
<b>Table 16</b>	Selected indices for the debt factor for the Fontana and Scheicher model.....	App
