The AMDP System

Manual for Assessment and Documentation of Psychopathology in Psychiatry

Edited by

Matthew R. Broome Ronald Bottlender Michael Rösler Rolf-Dieter Stieglitz

About the Editors

Matthew R. Broome, PhD, MRCPsych, is Professor of Psychiatry and Youth Mental Health and Director at the Institute for Mental Health at the University of Birmingham, UK and Senior Clinical Research Fellow in the Department of Psychiatry and Faculty of Philosophy at the University of Oxford, UK. Matthew is a founding member of the Maudsley Philosophy Group. Matthew's research interests include the prodromal phase of psychosis, delusion formation, functional neuroimaging, the role of GABA in psychotic symptoms, mood instability, early intervention services, and the philosophy of psychiatry.

Ronald Bottlender, MD, PhD, is the Clinical Director of the Department of Psychiatry and Psychotherapy at Märkische Kliniken, Lüdenscheid, Germany, assistant professor at the University of Bochum and lecturer at the University of Bonn, Germany. He has held positions as consultant psychiatrist and senior lecturer at Ludwig-Maximilians-University of Munich, Germany and East London NHS Foundation Trust and Queen Mary University of London, UK. He has published more than 100 peer reviewed articles on psychosis, affective disorders, amongst others.

Michael Rösler, MD, PhD, is the Head of the Institute of forensic Psychiatry at Homburg/Saarland, Germany and Emeritus Professor at the University of the Saarland, Germany. During the last decades he has been engaged in adult ADHD research. He has performed studies regarding the development of rating scales for the detection of psychopathology in adults with ADHD, pharmacological

treatment programmes, and psychotherapeutic treatment strategies. He is the current Chair of the Association of Methodology and Documentation in Psychiatry (AMDP).

Rolf-Dieter Stieglitz, PhD, is Professor of Clinical Psychology and Psychiatry and the Head of the Department of Clinical Psychology and Psychiatry, University of Basel, Switzerland. He has published more than 600 papers and books, especially in the field of psychopathology and clinical assessment. He was previously the Chair of the AMDP 2006–2012.

№ Preface

I was delighted to be asked by the editors of the ninth edition of the AMDP System to support the translation of the manual for an English-speaking audience. Psychopathology is having something of a resurgence in contemporary psychiatry, and it will be a great benefit to clinicians and researchers to have this manual at their disposal. There have been concerns expressed about the existing taxonomies of mental disorders (Insel et al., 2010), and how they may limit scientific and clinical progress. As part of this concern, psychopathology and the experiences of our patients are seen to be once again an increasingly important area of investigation to be combined with other levels of study. Empirically, clinicians and researchers have become more interested in transdiagnostic areas of psychopathology, for example, mood instability (Broome, Saunders, Harrison, & Marwaha, 2015), which span traditional categories, and in the subtle experiences that herald the development of psychiatric illness, and which may wax and wane with time, and interact with the normal developmental processes of adolescence and young adulthood (Nelson, McGorry, Wichers, Wigman, & Hartmann, 2017; Marwaha, Thompson, Upthegrove, & Broome, 2016). Psychopathology is by no means a subject which should remain wholly in textbooks, but a vibrant area of research where there is new knowledge to be found.

To develop new insights in psychopathology requires clinicians and researchers to have a strong and comprehensive grasp of those experiences that patients have reported to clinicians over the years. A focus in psychiatry and in training that equates its knowledge of symptoms as only those that are contained in lists required for diagnoses in international classifications will lead to the theoretical foundations of our discipline being diluted (Andreasen, 2006), and limit future developments. Hence, there is a strong impetus for clinicians and researchers to develop a robust grasp of psychopathology, over and beyond the constraints of ICD-10 and DSM-5. The AMDP System, alongside the Schedules for Clinical Assessment in Neuropsychiatry (SCAN; World Health Organization, 1994), offers a systematic account of psychopathology, with examples of the experiences, will and clear guidance on how to elicit, rate and score the items. As such, the AMDP manual will be a valuable tool for trainers and trainees in learning clinical psychiatry and in how they may develop their skills in interviewing and assessment. Further, psychopathology has an important role in not only diagnosis and nosography, but it is also a person-oriented discipline as well as being illness-oriented (Stanghellini & Broome 2014). Psychopathology is an important source of personal meaning to be explored with our patients in a therapeutic relationship. These two modes of psychopathology both aid the ethics of clinical work with those with psychiatric illness and support delineating and elucidating the subjective changes in mental disorder which will aid the search for

subpersonal causal mechanisms and, in turn, better treatments.

I commend the AMDP System as a clear, coherent, and comprehensive account of psychopathology and as a great resource for clinicians and researchers, whether novices or experienced interviewers. Alongside the German, French, Brazilian-Portuguese and other planned language editions, this English edition will now allow the manual to reach those who train and work outside the German-speaking countries so they can reap the benefits of the European tradition of psychiatry and psychopathology.

The editors would like to thank Mrs Ursula Drew for her excellent work on translating the German edition into English, and the staff of Hogrefe Publishing, namely Robert Dimbleby, Christin Wozniak, and Lisa Bennett, for their professionalism and support in bringing this project to fruition.

□ Preface to the Ninth German Edition

The publication of this ninth revised and expanded edition of the AMDP System coincides with the 50th anniversary of the foundation of the Association for Methodology and Documentation in Psychiatry (AMDP) in 1965. Since the formation of the association, psychiatry and, in particular, the field of psychopathology, have experienced significant change and development. The AMDP System was initially created by a German–Swiss working group to systematically measure psychopathology in order to assess reliably and validly the effect of pharmacological interventions on psychopathology.

Whilst the initial rapid advances within psychopharmacology of the mid-20th century have not been maintained, the development of a growing number of increasingly specialised rating scales for psychiatric disorders and psychopathology has continued. The advantages of using such rating scales are undisputed but their use may come at the expense of a comprehensive psychiatric assessment, including a detailed mental state examination, and hence there is the risk of subtle, yet important, symptoms being missed.

The AMDP System, in contrast, pursues a decidedly comprehensive descriptive psychopathological approach to

minimise the danger of significant symptoms being overlooked during initial examination. Thus, the AMDP System assumes a crucial role in the acquisition of fundamental knowledge in the field of psychopathology. When students of medicine and psychology encounter people with mental health disorders for the first time, it is challenging for them to describe the experiences patients relate to them in appropriate, concise and comprehensive terms, and it is here the AMDP System demonstrates its utility. Throughout clinical training and beyond, the AMDP System is a central tool in the classification and description of psychopathology in clinical records and communication. Unsurprisingly, therefore, the AMDP System is regularly cited and referred to in the majority of contemporary German textbooks on psychiatry and psychotherapy.

psychopathological and 40 somatic core symptoms contained in the AMDP System have been linguistically and descriptively refined. The Appendix contains a new section on syndrome formation. The manual's core register of individual symptoms, however, remains, as in previous editions, unchanged to facilitate comparative research and to ensure the continued successful employment of the manual's established syndrome rating scales. Taking account of developments in recent years in the description and rating of psychopathological symptoms, this latest edition of the AMDP System has been extended by an additional eleven psychopathological and three somatic symptoms. These symptoms may, where appropriate, be

used to supplement the manual's core register of individual symptoms.

The physical appearance of the ninth revised edition of the AMDP manual has also changed with an improved cover design, binding, paper quality and colour scheme. In this respect, we are especially indebted to Hogrefe Company (Germany), our publishers, in whose portfolio the AMDP manual has featured as a long-standing title for many years.

Preface to the Ninth German Edition

Introduction

AMP Founding Members

AMP/AMDP System Chair

AMDP Registered Association Chair

AMDP Revision Group (9th edition)

1 General Introduction

- 1.1 Overall Structure of the AMDP System
- 1.2 Representation of Individual Symptoms in the Manual
- 1.3 Requirements for Use
 - 1.3.1 General Requirements for Use
 - 1.3.2 AMDP Training Seminars

1.4	Recording	Basics

- 1.4.1 General Considerations
- 1.4.2 Assessment Basics
- 1.4.3 Time Frame of Assessment Period
- 1.4.4 Documentation

1.5 The Formal Logic of the Decision-Making Process

- 1.5.1 Evaluation Level 1: Assessability and Nonassessability
- 1.5.2 Evaluation Level 2: Degree of Certainty Over Presence or Absence of a Symptom
- 1.5.3 Evaluation Level 3: Presence
- 1.5.4 Evaluation Level 4: Degree of Severity
- 1.6 Data Processing
- 1.7 The AMDP Personal History
- 2 Psychopathological Findings
 - 2.1 Preliminary Notes
 - 2.2 Disorders of Consciousness

Preliminary Notes

- 1. Lowered Vigilance (O)
- 2. Clouded Consciousness (O)
- 3. Narrowed Consciousness (SO)
- 4. Expanded Consciousness (S)

2.3 Disturbances of Orientation

Preliminary Notes

- 5. Disorientation for Time (S)
- 6. Disorientation for Place (S)
- 7. Disorientation for Situation (S)
- 8. Disorientation for Person (S)

2.4 Disturbances of Attention and Memory

Preliminary Notes

- Disturbed Apperception (SO)
- 10. Disturbed Concentration (SO)
- 11. Disturbed Short-Term Memory (SO)
- 12. Disturbed Long-Term Memory (SO)
- 13. Confabulation (O)
- 14. Paramnesias (S)

2.5 Formal Thought Disorders

Preliminary Notes

- 15. Inhibited Thinking (S)
- 16. Retarded Thinking (O)
- 17. Circumstantial Thinking (O)
- 18. Restricted Thinking (O)
- 19. Perseverative Thinking (O)
- 20. Rumination (S)
- 21. Pressured Thinking (S)
- 22. Flight of Ideas (O)

- 23. Tangential Thinking (O)
- 24. Thought Blocking/Disruption of Thought (SO)
- 25. Incoherence/Derailment (O)
- 26. Neologisms (O)

2.6 Worries and Compulsions

Preliminary Notes

- 27. Suspiciousness (SO)
- 28. Hypochondriasis (S)
- 29. Phobias (S)
- 30. Obsessive Thoughts (S)
- 31. Compulsive Impulses (S)
- 32. Compulsive Actions (S)

2.7 Delusions

Preliminary Notes

Preliminary Notes on Evaluating Symptoms Relating to Content of Delusions (Symptoms 39–46)

- 33. Delusional Mood (S)
- 34. Delusional Perception (S)
- 35. Sudden Delusional Ideas (S)
- 36. Delusional Ideas (S)
- 37. Systematized Delusions (S)
- 38. Delusional Dynamics (SO)
- 39. Delusions of Reference (S)
- 40. Delusions of Persecution (S)

- 41. Delusions of Jealousy (S)
- 42. Delusions of Guilt (S)
- 43. Delusions of Impoverishment (S)
- 44. Hypochondriacal Delusions (S)
- 45. Delusions of Grandiosity (S)
- 46. Other Delusions (S)

2.8 Disorders of Perception

Preliminary Notes

- 47. Illusions (S)
- 48. Hearing Voices (S)
- 49. Other Auditory Hallucinations (S)
- 50. Visual Hallucinations (S)
- 51. Bodily Hallucinations (S)
- 52. Olfactory and Gustatory Hallucinations (S)

2.9 Ego (Boundary) Disturbances

Preliminary Notes

- 53. Derealization (S)
- 54. Depersonalization (S)
- 55. Thought Broadcasting (S)
- 56. Thought Withdrawal (S)
- 57. Thought Insertion (S)
- 58. Other Feelings of Alien Influence (S)

2.10 Disturbances of Affect

Preliminary Notes

- 59. Perplexity (O)
- 60. Feeling of Loss of Feeling (S)
- 61. Blunted Affect (O)
- 62. Felt Loss of Vitality (S)
- 63. Depressed Mood (SO)
- 64. Hopelessness (S)
- 65. Anxiety (SO)
- 66. Euphoria (SO)
- 67. Dysphoria (SO)
- 68. Irritability (SO)
- 69. Inner Restlessness (S)
- 70. Complaintiveness (O)
- 71. Feelings of Inadequacy (S)
- 72. Exaggerated Self-Esteem (S)
- 73. Feelings of Guilt (S)
- 74. Feelings of Impoverishment (S)
- 75. Ambivalence (S)
- 76. Parathymia (Incongruent Affect) (O)
- 77. Affective Lability (SO)
- 78. Affective Incontinence (SO)
- 79. Affective Rigidity (O)
- 2.11 Disorders of Drive and Psychomotor Activity

Preliminary Notes

- 80. Lack of Drive (SO)
- 81. Inhibition of Drive (S)

- 82. Increased Drive (SO)
- 83. Motor Restlessness (SO)
- 84. Parakinesia (O)
- 85. Mannerisms (O)
- 86. Histrionics (O)
- 87. Mutism (O)
- 88. Logorrhoea (O)

2.12 Circadian Disturbances

Preliminary Notes

- 89. Worse in the Morning (SO)
- 90. Worse in the Evening (SO)
- 91. Better in the Evening (SO)

2.13 Other Disturbances

Preliminary Notes

- 92. Social Withdrawal (SO)
- 93. Excessive Social Contact (SO)
- 94. Aggressiveness (SO)
- 95. Suicidal Behaviour (SO)
- 96. Self-Harm (SO)
- 97. Lack of Feeling III (S)
- 98. Lack of Insight Into Illness (S)
- 99. Uncooperativeness (SO)
- 100. Need for Care (SO)

Supplementary Items

Unreliability of the Assessment

2.14 Additional Psychopathological Items (ZP1-ZP11)

Preliminary Notes

- ZP1 Attacks of Anxiety (SO)
- ZP2 Acceleration of Thinking (S)
- ZP3 Ideas of Reference (S)
- ZP4 Disorganised (SO)
- ZP5 Obtrusive Behaviour (O)
- ZP6 Hearing One's Own Thoughts (S)
- ZP7 Impulsive (SO)
- ZP8 Disturbance of Body Image (S)
- ZP9 Feelings of Shame (S)
- ZP10 Overvalued Ideas (S)
- ZP11 Anomic Aphasia (SO)

3 Somatic Findings

3.1 Disturbances of Sleep and Vigilance

Preliminary Notes

- 101. Difficulty Falling Asleep (S)
- 102. Interrupted Sleep (S)
- 103. Shortened Sleep (S)
- 104. Early Morning Awakening (S)
- 105. Tiredness (SO)

3.2 Appetitive Disturbances

Preliminary Notes

- 106. Decreased Appetite (S)
- 107. Excessive Appetite (S)
- 108. Excessive Thirst (S)
- 109. Decreased Libido (S)

3.3 Gastrointestinal Disturbances

Preliminary Notes

- 110. Hypersalivation (SO)
- 111. Dry Mouth (S)
- 112. Nausea (S)
- 113. Vomiting (SO)
- 114. Gastric Discomfort (S)
- 115. Constipation (S)
- 116. Diarrhoea (S)

3.4 Cardiac-Respiratory Disturbances

- 117. Breathing Difficulties (SO)
- 118. Dizziness (SO)
- 119. Palpitations (S)
- 120. Cardiac Pain (S)

3.5 Other Autonomic Disturbances

- 121. Blurred Vision (S)
- 122. Increased Perspiration (SO)
- 123. Seborrhoea (SO)
- 124. Micturition Difficulties (S)

125. Menstrual Difficulties (S)

3.6 Other Somatic Disturbances

- 126. Head Pressure (S)
- 127. Backache (S)
- 128. Heaviness in the Legs (S)
- 129. Hot Flashes (S)
- 130. Chills (S)
- 131. Conversion Symptoms (SO)

3.7 Neurological Disturbances

Preliminary Notes

- 132. Rigor (O)
- 133. Muscle Hypotonia (SO)
- 134. Tremor (SO)
- 135. Acute Dyskinesia (SO)
- 136. Hypokinesia (SO)
- 137. Akathisia (SO)
- 138. Ataxia (SO)
- 139. Nystagmus (O)
- 140. Paresthesia (S)

Laterality

Convulsions

Supplementary Items
