Library of Congress Cataloging-in-Publication Data applied for

ISBN: 9781118945575

Cover Design: Wiley

Cover Image: The cover art, prepared by Matthew A. Bertone (North Carolina State University, Raleigh), shows the vast morphological diversity among treehoppers based on plates by Edwin Wilson from the *Biologia Centrali-Americana* (sections by W. W. Fowler 1894–1896).

Set in 10/12pt Warnock by SPi Global, Chennai, India

Printed in the UK by Bell & Bain Ltd, Glasgow.

10 9 8 7 6 5 4 3 2 1

Brief Table of Contents

- 1 Introduction – A Brief History of Revolutions in the Study of Insect Biodiversity 1

- Part I Habitats and Regions 13
- 2 Insect Biodiversity in the Arctic 15
- 3 Insect Biodiversity in Indochina: A Window into the Riches of the Oriental Region 59
- 4 Biodiversity of Arthropods on Islands 81
- 5 Beneficial Insects in Agriculture: Enhancement of Biodiversity and Ecosystem Services 105
- 6 Insects in Caves 123

- Part II Taxa 153
- 7 Biodiversity of the Thysanurans (Microcoryphia and Zygentoma) 155
- 8 Biodiversity of Zoraptera and Their Little-Known Biology 199
- 9 Biodiversity of Embiodea 219
- 10 Biodiversity of Orthoptera 245
- 11 Biodiversity of Phasmatodea 281
- 12 Biodiversity of Dermaptera 315
- 13 Biodiversity of Grylloblattodea and Mantophasmatodea 335
- 14 Biodiversity of Blattodea – the Cockroaches and Termites 359
- 15 Biodiversity of Mantodea 389

16	Biodiversity of Psocoptera	<i>417</i>
17	Biodiversity of Ectoparasites: Lice (Phthiraptera) and Fleas (Siphonaptera)	<i>457</i>
18	Biodiversity of Thysanoptera	<i>483</i>
19	The Diversity of the True Hoppers (Hemiptera: Auchenorrhyncha)	<i>501</i>
20	The Biodiversity of Sternorrhyncha: Scale Insects, Aphids, Psyllids, and Whiteflies	<i>591</i>
21	Biodiversity of the Neuropterida (Insecta: Neuroptera, Megaloptera, and Raphidioptera)	<i>627</i>
22	Biodiversity of Strepsiptera	<i>673</i>
23	Biodiversity of Mecoptera	<i>705</i>
	Part III Perspectives	<i>721</i>
24	The Fossil History of Insect Diversity	<i>723</i>
25	Phenotypes in Insect Biodiversity Research	<i>789</i>
26	Global Change and Insect Biodiversity in Agroecosystems	<i>801</i>
27	Digital Photography and the Democratization of Biodiversity Information	<i>839</i>
28	Bee (Hymenoptera: Apoidea: Anthophila) Diversity Through Time	<i>851</i>
29	Insect Biodiversity in Culture and Art	<i>869</i>
	Index of Arthropod Taxa Arranged by Order and Family	<i>899</i>
	Index of Arthropod Taxa Arranged Alphabetically	<i>943</i>
	Index of non-Arthropod Taxa Arranged Alphabetically	<i>975</i>
	Subject Index	<i>979</i>

Detailed Table of Contents

	List of Contributors	<i>xxiii</i>
	Foreword	<i>xxix</i>
	Preface, Volume II	<i>xxxiii</i>
	Acknowledgments	<i>xxxv</i>
1	Introduction – A Brief History of Revolutions in the Study of Insect Biodiversity	1
	<i>Peter H. Adler and Robert G. Foottit</i>	
1.1	Discovery	1
1.2	Conceptual Development	5
1.3	Information Management	6
1.4	Conclusions	7
	Acknowledgments	8
	References	8
	Part I Habitats and Regions	13
2	Insect Biodiversity in the Arctic	15
	<i>Ian D. Hodkinson</i>	
2.1	Documenting Biodiversity – Traditional Taxonomy Versus DNA Barcoding	17
2.2	Insect Species Diversity in the Arctic	18
2.2.1	Composition of the Arctic Insect Fauna	18
2.2.2	Species Richness Trends Along Latitudinal Gradients	25
2.2.3	Geographical and Regional Variations in Species Richness	27
2.2.4	Diversity Oases Within the Arctic	28
2.3	Historical Insect Biodiversity in the Arctic – the Time Perspective	29
2.3.1	Nunataks and Glacial Refugia as Generators of Biodiversity	30
2.3.2	Endemism	31
2.4	Biodiversity on the Landscape Scale	32
2.4.1	Variation in Biodiversity on a Landscape Scale	32
2.4.2	Local Effects on Biodiversity – Predation and Natural Disturbance	34
2.5	Important Characteristics of Arctic Insect Biodiversity	35
2.5.1	Specialist Versus Generalist Species	35
2.5.2	Life-History Adaptation	35
2.5.3	Genetic Diversity Within Species and Groups	36
2.5.4	Reproductive Variation and Parthenogenesis	36

2.5.5	A Diversity of Adaptations for Maximizing Heat Absorption	37
2.6	Cold Tolerance – a Diversity of Adaptations	38
2.6.1	Brachyptery and Wing Polymorphism	39
2.7	Dispersal, Immigration, and Biodiversity	39
2.8	Pollinator Networks and Pollinator Biodiversity	40
2.9	A Biodiversity Paradise for Parasites?	41
2.10	Biodiversity and the Changing Arctic Climate	42
	References	44
3	Insect Biodiversity in Indochina: A Window into the Riches of the Oriental Region	59
	<i>Seunghwan Lee and Ram Keshari Duwal</i>	
3.1	Physical Geography and Climate	62
3.2	Features of Insect Biodiversity in the Lower Mekong Subregion	62
3.2.1	Blattodea	70
3.2.2	Coleoptera	70
3.2.3	Dermaptera	71
3.2.4	Diptera	72
3.2.5	Embiodea	72
3.2.6	Ephemeroptera	72
3.2.7	Hemiptera	72
3.2.8	Hymenoptera	72
3.2.9	“Isoptera”	72
3.2.10	Lepidoptera	72
3.2.11	Mantodea	73
3.2.12	Mecoptera	73
3.2.13	Megaloptera	73
3.2.14	Microcoryphia and Zygentoma	73
3.2.15	Neuroptera	73
3.2.16	Notoptera (Grylloblattodea and Mantophasmatodea)	73
3.2.17	Odonata	73
3.2.18	Orthoptera	73
3.2.19	Phasmatodea	73
3.2.20	Phthiraptera	73
3.2.21	Plecoptera	74
3.2.22	Psocoptera	74
3.2.23	Raphidioptera	74
3.2.24	Siphonaptera	74
3.2.25	Strepsiptera	74
3.2.26	Thysanoptera	74
3.2.27	Trichoptera	74
3.2.28	Zoraptera	74
3.3	Insect Biodiversity and Society in Indochina	74
3.3.1	Entomophagy in the Lower Mekong Subregion	74
3.3.2	Research Initiatives	76
3.4	Conclusions	77
