SpringerBriefs in Molecular Science

Chemistry of Foods

Series Editor

Salvatore Parisi, Al-Balqa Applied University, Al-Salt, Jordan

The series Springer Briefs in Molecular Science: Chemistry of Foods presents compact topical volumes in the area of food chemistry. The series has a clear focus on the chemistry and chemical aspects of foods, topics such as the physics or biology of foods are not part of its scope. The Briefs volumes in the series aim at presenting chemical background information or an introduction and clear-cut overview on the chemistry related to specific topics in this area. Typical topics thus include:

- Compound classes in foods—their chemistry and properties with respect to the foods (e.g. sugars, proteins, fats, minerals, ...)
- Contaminants and additives in foods—their chemistry and chemical transformations
- Chemical analysis and monitoring of foods
- Chemical transformations in foods, evolution and alterations of chemicals in foods, interactions between food and its packaging materials, chemical aspects of the food production processes
- Chemistry and the food industry—from safety protocols to modern food production.

The treated subjects will particularly appeal to professionals and researchers concerned with food chemistry. Many volume topics address professionals and current problems in the food industry, but will also be interesting for readers generally concerned with the chemistry of foods. With the unique format and character of SpringerBriefs (50 to 125 pages), the volumes are compact and easily digestible. Briefs allow authors to present their ideas and readers to absorb them with minimal time investment. Briefs will be published as part of Springer's eBook collection, with millions of users worldwide. In addition, Briefs will be available for individual print and electronic purchase. Briefs are characterized by fast, global electronic dissemination, standard publishing contracts, easy-to-use manuscript preparation and formatting guidelines, and expedited production schedules.

Both solicited and unsolicited manuscripts focusing on food chemistry are considered for publication in this series. Submitted manuscripts will be reviewed and decided by the series editor, Dr. Salvatore Parisi.

To submit a proposal or request further information, please contact Tanja Weyandt, Publishing Editor, via tanja.weyandt@springer.com or Dr. Salvatore Parisi, Book Series Editor, via drparisi@inwind.it or drsalparisi5@gmail.com.

Contents

1 Food Gases: Classification and Allowed Uses	1
1.1 Food Gases. Why?	2
1.2 Regulatory Bases in the European Union	2
1.3 Food Gases. Basic Features	4
1.4 Food Gases and HACCP	5
1.5 Classification of Food Gases and Permitted Uses	6
1.5.1 FG Classification	6
1.5.2 FG Uses... and Conditions for Use!	8
References	12
2 Food Gases in the European Union: The Legislation	19
2.1 Gases Versus Food Gases in the European Union: Reasons for Differentiation	20
2.1.1 Food Gases in the EU	20
2.1.2 Non-food Gases in the EU	23
References	25
3 Food Gases in the Industry: Chemical and Physical Features	31
3.1 Food Gases: Physical and Chemical Features	32
3.1.1 Liquefied Gases	33
3.1.2 Non-liquefied Gases	33
3.1.3 Dissolved Gases	34
3.1.4 Cryogenic Liquids	34
3.1.5 Inert Gases	34
3.1.6 Flammable Gases	35
3.1.7 Oxidising Gases	36
References	36
