LIST OF BOXED FEATURES

TIMELINES

1.1	Major pre-Enlightenment influences and events from the Enlightenment to the establishment of sociology	2
1.1	Major events spanning Marx's lifetime (1818–1883)	33
2.1	Major events spanning Durkheim's lifetime (1858–1917)	76
3.1	Major events spanning Weber's lifetime (1864–1920)	114
3.2	The emergence of Protestantism and the expansion of capitalism	118
5.1	Major events from the end of World War I to the present	180
10.1	Major events in the achievement of women's equality (1865–present)	306
12.1	Major events in the historical evolution of racial equality (1791–present)	366
14.1	Major globalizing economic and political events (1450–present)	416

CONCEPTUAL BOXES

1.1	Georg Simmel: The coldness of money	44
1.2	Alienation inheres in capitalism	53
2.1	Georg Simmel: Urbanism as a way of acting, thinking, and feeling	90
2.2	Analytical contrasts between traditional and modern society	94
3.1	Types of meaningful social action	128
4.1	The functional requirements (A, G, I, L) of society as an action system composed of four subsystems of action	154
4.2	Parsons's five sets of patterned value-orientations (pattern variables)	160
4.3	Robert Merton: The sociology of science amid social disorder	169
4.4	Modes of individual adaptation to societal conditions	172
5.1	Antonio Gramsci and the concept of hegemony	194
6.1	Donald Black: Conflict in social space	214
9.1	Pardon the interruption: Conversation differences between women and men	299
10.1	Woman as the Other	314

11.1	Keeping a tab on bodies: Census categories	347
12.1	Slavery as social death	368
12.2	Facts of blackness	382
13.1	Erotic capital	398
13.2	Norbert Elias: The civilizing process	404

CONTEMPORARY TOPICAL APPLICATIONS

I.1	Hotel rooms get plushier, adding to maids' injuries	3
I.2	"Post-truth" society, and what to call untruths	15
1.1	Contemporary China: Consumer capitalism in a state-controlled society	35
1.2	The sharing, on-demand economy	46
1.3	Scouting new football recruits	47
1.4	Occupational injuries in the meat-packing industry	49
1.5	"If I had a perfect place to die, I would die on the field."	50
1.6	Laboring in the poultry factory	56
1.7	The uberization of corporate political influence	66
2.1	Born on the Bayou and barely feeling any urge to roam	79
2.2	Opioid addiction	82
2.3	Resilience and change	100
2.4	The anomie of economic globalization	101
2.5	When tragedy brings strangers together	103
2.6	Flags and anthems	104
3.1	Explaining Brexit with Weber: Rational and Nonrational Action	126
3.2	Muslim women and virginity: Two worlds collide	129
3.3	Egg donors wanted	130
3.4	"Why is she wearing that?" Ski-masks as beach fashion in China	130
3.5	Bureaucratic rationality: Bringing order to chaos at the White House	135
4.1	Contemporary China in systemic action	155
4.2	Blurring the lines between medical diagnoses and economic profit	163
4.3	Creating an inclusive workplace: Achievement versus ascription at Google	167
4.4	Apple orchards and immigration restrictions: A case of anticipated and dysfunctional consequences	170
5.1	Social media: Political empowerment and government control	187
5.2	Technology and the changing contours of control in everyday life	189
5.3	Advertising, advertising everywhere	195
5.4	Walmart shoppers	196
5.5	Social media in populist politics	199
6.1	Ethnic conflict in India ... amplified by social media	215
6.2	Women in the economic power elite	220
7.1	Depleted trust: Drunken abuse of the police in South Korea	239
7.2	Steroid report depicts a two-player domino effect	241
7.3	Birds of a feather flock together	241
7.4	Heterosexual romance and the marriage market in China	247
8.1	Talking mirrors and style assistant robotic cameras	259

8.2	Directions for performing the role of the (considerate) airline passenger	265
8.3	Body appearance and body surgery	266
8.4	Disruptive team performances at the White House and Downing Street	270
9.1	Homecoming strangers: "After war, love can be a battlefield"	290
9.2	"I am Cait": Naming reality	292
10.1	Gender gaps	316
10.2	Intersectionality, activist knowledge, and social justice	328
11.1	The birth of obesity	348
11.2	The normalization of sexual equality	355
11.3	Gay sexual freedom in China	357
11.4	The muxe as a separate gender category	358
12.1	Muslims as Others	371
12.2	Affirmative action in Brazil	376
12.3	The postracial vision and racial awareness of Barack Obama	383
13.1	College education, economic mobility, and social well-being	400
13.2	"I'm First-Gen"	402
14.1	Global flows	419
14.2	Global openness	430
14.3	Class polarization in India	433
14.4	Curbing excess in the financial sector	445
15.1	Is China changing the world?	457
15.2	Risk and resentment in the digital economy	459
15.3	Empathy walls and opportunity barriers in Europe	463
15.4	One Love: Bob Marley, a cosmopolitan figure	465
15.5	Smart water: Liquid gold	469
15.6	Dubai: The aesthetic commodification of culture and place	471

LIST OF ANALYTICAL PHOTOS

I.1	With social progress comes a preoccupation with social order.	13
I.2	Sociology is and for science	18
1.1	Walmart is a fast-growing global retail corporation with over 10,000 stores in 27 countries (with Asda its store title in the UK). Its employee policies epitomize the low-wage, cost-reduction strategies required by contemporary capitalism.	43
1.2	Financial crises and evidence of economic inequality motivated the Occupy Wall Street movement in New York City in 2011. Similar Occupy protests occurred in over 200 cities across the world.	59
1.3	The freedom to shop is at the heart of everyday life in capitalist society.	64
2.1	Small towns and rural communities have different characteristics, different constraints, and different types of social relations than those found in urban or metropolitan areas.	88
2.2	The specialized division of labor makes individuals dependent on one another; interdependence creates social ties or solidarity.	93
2.3	Hurricanes, earthquakes, and other natural disasters create social anomie; they unexpectedly rupture the normalcy of everyday routines for individuals, families, and whole communities.	98
2.4	Sports arenas can function as sacred space.	106
3.1	Traditions and symbols of tradition still matter and exert authority in modern society.	131
3.2	In modern society, even those not working in bureaucratic organizations are subject to rational legal authority; mobile food vendors must be licensed to sell food.	137
3.3	In many societies, success in sports is rewarded with social prestige and economic rewards, including for the Norwegian women's soccer team (pictured here) who since 2018 have pay parity with their male counterparts.	140
4.1	Institutional differentiation and specialization characterize modern society. The tasks of economic productivity (e.g., corporate offices) and values transmission (e.g., church) have their own particular spaces, amicably coexisting side by side.	158
5.1	Technology companies are among the world's most recognizable and successful brands today.	186
5.2	Smartphones allow us to keep a track on our own and others' movements.	190
5.3	Customers wait patiently in line to buy the latest iPhone, even though the differences between it and earlier iPhone models and other smartphone brands are relatively small.	193
5.4	According to critical theorists, the sameness or homogenization that characterizes mass media content also extends to a sameness in individual appearance and personality.	197
6.1	Conflict and protest are a normal part of democratic society.	215

6.2	Although changes have occurred in recent years in the gender composition of the power elite, the hierarchy of the Catholic Church remains a bastion of male power.	222
7.1	In giving we expect to receive ... something in return ... sometime in the future.	236
8.1	Prince William and the Duchess of York juggle ritualized work and family roles	267
8.2	World leaders dress down, appearing in informal attire, in the more relaxed backstage setting of Camp David, the US president's mountain retreat. This orchestrated self-presentation, however, is still audience(s)-driven and expected role-playing behavior: the performance of the relaxed politician (notwithstanding the serious economic and geopolitical issues that dominate the G8 leaders' meetings).	271
9.1	Coming home means negotiating the transition from one here-and-now reality to a different here-and-now reality, realities that are made different both by our presence and our absence	289
10.1	Despite advances in women's equality with men, women and men are reminded to see women as objects for men.	313
10.2	Theresa May and Nicole Sturgeon: Despite their achievements, women leaders still must contend with sexist expectations.	319
11.1	The disciplined body. Church, state, mass media, social media, and everyday conversation regulate bodies, body talk, and body desire.	350
11.2	The legalization of same-sex marriage in many countries reflects a transformation in the understanding of sexual orientation and in society's acceptance of the normalcy of gay and lesbian relationships.	354
12.1	Nadiya Hussein, winner of the Great British Baking Contest, featured here with Queen Elizabeth, conveys the symbolic power (and reality) of being black and British.	378
12.2	African American sports stars such as LeBron James play a prominent role in highlighting racial injustice.	383
12.3	Drawing on the lived experience of economic and racial inequality, many popular rappers with cross-racial appeal like Fabolous celebrate their rise "From Nothin' to Somethin'."	385
13.1	What looks good, smells good, and tastes good is conditioned by our everyday social class and family habits and practices.	405
14.1	Coca-Cola – a quintessentially American brand – is among the world's largest and most recognizable transnational corporations, with business operations, staff, and sales in more than 200 countries.	428
14.2	The expansion of financial capitalism is reflected in the prominent visibility of new financial offices in global cities.	429
14.3	Despite the success of the European Union in building a more integrated political, economic, and cultural community of nations, it is frayed by tensions between national and transnational interests.	437
15.1	Although the manifestations of modernity vary across the world, the sites and symbols of consumer choice are increasingly universal.	454
15.2	The cosmopolitan imperative requires us to think of ourselves and of local and distant Others as all part of the one shared humanity.	464
15.3	Cultural globalization often means cultural homogenization. The ideal for many Asian women is a Caucasian face, a standard of beauty promoted by the cosmetics industry globally, as advertised by Chanel in Seoul, South Korea.	466
15.4	In Las Vegas, newly built, lavish replicas of unique world-famous sites dazzle us. They prompt us to wonder which one is true, more real, more impressive – the original or its recreated spectacle?	469
15.5	Simulated trees in the mall enhance the naturalness of the mall as an aesthetic and cultural experience, as well as conveying the illusion that shopping is as natural as nature itself.	472

ACKNOWLEDGMENTS

I am very grateful to Justin Vaughan at Wiley-Blackwell for persuading me to write this book and to embark on subsequent revised editions. I appreciate his support throughout the process. I also appreciate the editorial production assistance of Annie Rose and Ben Thatcher and Sandra Kerka's attentive copyediting. I am very grateful to James Tucker, Jennifer Esala, Jared del Rosso, Erin Anderson, Inger Furseth, Erin Steuter, and anonymous reviewers for their helpful comments; and to Jordan Burke for his editorial assistance and suggestions. I also benefited greatly from Andrew Wink's photography skills.

The information in the timelines is derived from various sources including: Colin McEvedy (1985), *The Macmillan World History Factfinder*, New York: Macmillan; H. E. L. Mellersh (1999), *Chronology of World History*, volumes 1–4, Santa Barbara, CA: BC-CLIO; Derrick Mercer, ed. (1996), *Chronicle of the World*, London: Dorling Kindersley; Hans-Albrecht Schraepler (1997), *Directory of International Economic Organizations*, Washington, DC: Georgetown University Press; and Caroline Zilborg and Susan Gall, eds. (1997), *Women's Firsts*, Detroit, MI: Gale.

HOW TO USE THIS BOOK

As you read through the individual chapters in this book, you will find the following features designed to help you to develop a clear understanding of sociological theory and to apply it to everyday life.

Key Concepts Each chapter opens with a list of its key concepts, presented in the order in which they appear in the chapter. They are printed in blue when they first appear in the text, and are defined in the glossaries at the end of each chapter and at the end of the book.

Chapter Menu A menu gives you the main headings of the chapter that follows.

Biographical Note These provide background information on the main theorists discussed in the chapter. Their names are given in bold when they first appear in the chapter.

Theorists' Writings Each of the first three chapters has a chronological list of the major writings of the theorists discussed: Marx, Durkheim, and Weber.

Timelines Where a historical framework will aid your understanding of the chapter, timelines list major events with their dates.

Conceptual Boxes These introduce additional theoretical ideas or summarize points relevant to the chapter.

Contemporary Topical Applications These features draw on information reported in the news about an event or issue that has particular salience for the concepts being discussed in the chapter. The stories highlight how particular everyday events can be used to illustrate or probe larger social processes.

Summary The text of the chapter is summarized in a final paragraph or two.

Points to Remember These list in bullet note form the main learning points of the chapter.

Glossary At the end of each chapter its key concepts are listed again, this time in alphabetical order, and defined. The glossary at the end of the book combines the end-of-chapter glossaries to define all the key concepts covered in the book.

Questions for Review At the end of each chapter, questions are listed that prompt you to discuss some of the overarching points of the chapter.

ABOUT THE WEBSITE

The *Introduction to Sociological Theory: Theorists, Concepts, and Their Applicability to the Twenty-First Century* companion website contains a range of resources created by the author for instructors teaching this book in university courses. Features include:

- Instructor's manual for each chapter, including
 - Note to the Instructor
 - News Resources that can be used to stimulate classroom discussion
 - Essay Assignment Questions
 - Exam Short Answer Questions
 - Multiple choice questions (and answers)
- PowerPoint teaching slides with contemporary analytical photographs and video links
- List of complementary primary readings
- Quote Bank

Instructors can access these resources at www.wiley.com/go/dillon

INTRODUCTION

SOCIOLOGICAL THEORY: A VIBRANT, LIVING TRADITION

KEY CONCEPTS		
sociological theory	classical theory	scientific reasoning
concepts	canon	empiricism
conceptual frameworks	contemporary theory	positivist
pluralistic	Enlightenment	objectivity
macro	democracy	interpretive understanding
social structures	reason	emancipatory knowledge
micro	rationality	double-consciousness
culture	inalienable rights	
culture	utilitarianism	

CHAPTER MENU

Analyzing Everyday Social Life	4
Immersion in Theory	9
Classical and Contemporary Theory	9
Societal Transformation and the Origins of Sociology	10
The Enlightenment: The Elevation of Reason, Democracy, and Science	11
The Individual and Society	12
Scientific Reasoning	13
The Establishment of Sociology as Science: Auguste Comte and Harriet Martineau	14
Evolutionary Progress and Auguste Comte’s Vision of Sociology	16
Harriet Martineau: Sociology as the Science of Morals and Manners	18
Interpretive Understanding	19

Social Inequality and Contextual Standpoints: Du Bois, De Tocqueville,
and Martineau 20

[William E.B. Du Bois: Slavery and Racial Inequality](#) 20

[Racial And Gender Equality](#) 22

Timeline I.1 Major pre-Enlightenment influences, and events from the Enlightenment to the establishment of sociology	
500 BC–AD 999 The Classical World	
1000–1490 The Feudal Age	
1490–1664 The Age of Discovery	
1599	Francis Bacon, <i>Essays</i>
1620	English Pilgrims arrive at Plymouth Rock, Massachusetts
1633	Galileo summoned by the Inquisition to defend his theory that the earth moves around the sun
1636	Harvard College founded
1637	René Descartes, “I think, therefore, I am”
1665–1774 The Enlightenment	
1670	Blaise Pascal, “Man is only a reed, the weakest thing in nature; but he is a thinking reed”
1687	Isaac Newton explains laws of motion and theories of gravitation
1689	John Locke, <i>On Civil Government</i>
1702	Cambridge University establishes faculty chairs in the sciences
1733	Voltaire praises British liberalism
1752	Benjamin Franklin invents a lightning conductor; demonstrates the identity of lightning and electricity
1762	Jean-Jacques Rousseau, <i>The Social Contract</i>
1771	The right to report parliamentary debates established in Britain
1775–1814 The Age of Revolution	
1775	American War of Independence; battles of Lexington and Concord (Massachusetts)
1776	British troops evacuate Boston; Declaration of Independence
1776	Adam Smith, <i>The Wealth of Nations</i>
1788	Bread riots in France

1789	Fall of the Bastille; beginning of the French Revolution; new French Constituent Assembly abolishes feudal rights and privileges
1791	Bill of Rights in America; first 10 amendments to the US Constitution
1792	Mary Wollstonecraft, <i>Vindication of the Rights of Woman</i>
1796	Freedom of the press established in France
1805	First factory to be lit by gaslight (in Manchester, England)
1807	Air pump developed for use in mines
1813	Jane Austen, <i>Pride and Prejudice</i>
1823	Jeremy Bentham, utilitarianism
1831	John Stuart Mill, <i>The Spirit of the Age</i>
1835–1840	Alexis de Tocqueville, <i>Democracy in America</i>
1837	Harriet Martineau, <i>Society in America</i>
1839	Comte gives sociology its name
1855	Harriet Martineau translates Comte's <i>Positive Philosophy</i>
1859	Charles Darwin, <i>The Origin of Species</i> (modern evolutionary theory)
1861–1865	American Civil War, the South (Confederates) versus the North (Union)
1865	US president Abraham Lincoln assassinated
1865	Thirteenth amendment to the US Constitution, abolishing slavery

Welcome to **sociological theory**. Theory, by definition, is abstract. This book illustrates the richness of sociological theory by emphasizing how its breadth of **concepts** or analytical ideas have practical application and explanatory relevance to daily life. It will introduce you to the major theorists whose writings and **conceptual frameworks** inform sociological thinking. It will equip you with the theoretical vocabulary necessary to appreciate the range of perspectives found in sociological theory. It will give you confidence to apply these ideas to the many sociological topics you study (e.g., inequality, crime, medical sociology, race, political sociology, family, gender, sexuality, culture, religion, community, globalization, etc.) and help you to think analytically about the many occurrences in daily life far beyond the classroom.

Topic I.1 Hotel rooms get plusher, adding to maids' injuries

“Some call it the ‘amenities arms race,’ some ‘the battle of the beds.’ It is a competition in which the nation’s premier hotels are trying to have their accommodations resemble royal bedrooms. Superthick mattresses, plush duvets and decorative bed skirts have been added, and five pillows rather than the pedestrian three now rest on a king-size bed. Hilton markets these rooms as Suite Dreams, while Westin boasts of its heavenly beds. The beds may mean sweet dreams to hotel guests, but they mean pain to many of the nation’s 350,000 hotel housekeepers. Several new studies [by unions and health scientists] have found that thousands of housekeepers are suffering arm,

shoulder, and lower-back injuries ... it is so strenuous a job that [housekeepers have] a higher risk of back disorders than autoworkers who assemble car doors ... The problem, housekeepers say, is not just a heavier mattress, but having to rush because they are assigned the same number of rooms as before while being required to deal with far more per room: more pillows, more sheets, more amenities like bathrobes to hang up and coffee pots to wash. Ms. Reyes [a hotel housekeeper] complained that some days she must make 25 double beds, a task that entails taking off, and putting on, 100 pillowcases ... Housekeepers who earn \$17,300 a year on average, invariably stoop over to lift mattresses, some of which are only 14 inches off the floor. They frequently twist their backs as they tuck in the sheets, often three of them rather than the two of yesteryear. Since it can take 10 to 12 minutes a bed, a housekeeper who makes 25 beds a day frequently spends four to five hours on the task, lifting mattresses 150 to 200 times ... [A Hilton spokesman] said the company had increased training to try to minimize harm to housekeepers ... [and to ease] workloads ... [and said that the unions are] pushing the injury issue as a smoke screen, largely to pressure hotel companies to agree to procedures making it easier to unionize workers.”

ANALYZING EVERYDAY SOCIAL LIFE

This short excerpt (Topic I.1) on housekeepers and hotel mattresses provides a single snapshot of contemporary society, but its elements can be used to highlight the different ways that sociological theorists approach the study of society. Karl Marx (1818–1883), a towering figure in the analysis of modern capitalism (see chapter 1), would focus on the forces of economic inequality and exploitation that underlie hotel maids’ injuries. Marx’s theory would highlight the extent to which capitalist pursuit of profit structures the service production process: Corporate executives develop efficient work practices that dictate how maids will work, and they also determine the low wage paid for such work. Ultimately, Marx would say, the pursuit of profit consolidates the economic or class inequality that is part and parcel of capitalism (see also Romero 1992; Sherman 2007). You might suggest that if the maids are unhappy, they should leave the hotel. But if they leave, what are their options? Very limited, Marx would respond. Because hotel maids (and other workers) have to live, they need money in order to survive (especially in a “welfare-to-work” society in which there is very little government economic support available to those who are unemployed long term). Therefore, although the maids are free to leave a particular hotel they are not free to withhold labor from every hotel – they must work someplace. Hence wage-workers must sell their labor on the job market, even if what they receive in exchange for their labor will always be significantly less than the profit the capitalist will make from their work. Although hotel owners must pay the many costs associated with the upkeep and running of a hotel, a large gap remains between the hotel maids’ minimum wage (and waitresses, etc.; approx. \$7 an hour) and the price paid by hotel guests for a one-night stay in the luxury hotel room (\$399 and upwards) the maids clean.

Further, the competitive nature of capitalism and the economic competition between hotels mean that the profit-driven working conditions in one luxury hotel will not vary much from those in another. If a hotel company were to lose “the battle of the beds” in the competition for affluent customers, a decline in the hotel’s profit may spell its demise. Low wages and occupational injuries, therefore, are what maids can expect, regardless of the particular hotel (whether the Westin or the Hilton). Moreover, if hotel maids aren’t able to work as a result of their injuries, there will always be others waiting to take

their place; one of the effects of globalization (a topic discussed in chapter 14) is to increase the competition between low-wage workers whose pool is expanded by the increasing numbers of immigrant and migrant workers available to the low-paying service industries (e.g., Chen 2015; Ehrenreich and Hochschild 2002; Sassen 2007).

In focusing on the profit and economic relations within capitalist societies, Marx also alerts us to how ideology, that is, a society's taken-for-granted ideas about work, achievement, freedom, consumption, luxury, etc., determines how we explain and justify all sorts of social phenomena, whether social inequality, the Olympic Games, or the latest consumer fad. Marx – and more recent theorists influenced partly by Marx, such as Critical Theorists (see chapter 5) – would argue that the ideology of freedom – typically used to denote political freedom and democracy – has in today's world become the freedom to shop. We all (more or less) want the plush consumer lifestyle that we associate with luxury hotels, a pursuit promoted by the (globalizing) capitalist class, and especially by advertising, mass media, and pop culture industries. Thus the popularity of, for example, “Louie,” a Blood Raw/Young Jeezy song celebrating Louis Vuitton merchandise. Similarly, Kanye West's “Flashing Lights” reminds us that consumption trumps everything else. Indeed, Marx would argue that it is largely because hotel housekeepers (and their families and neighbors) buy into the allure of consumption that they consent to work as hard as they do, despite their injuries, and without fully realizing or acknowledging the inequality of the capitalist system with its ever-growing gap between the rich and the poor.

Max Weber (1864–1920) (his last name is pronounced *vayber*), also offers an analysis of modern capitalism. But unlike Marx, he orients us to the various subjective motivations and meanings that lead social actors – either individually, or collectively as workers, hotel companies, trade unions, religious organizations, states, or transnational alliances (e.g., the European Union [EU]) – to behave as they do (see chapter 3). Weber, like Marx, highlights strategic or instrumental interests among other motivating forces underlying social behavior. In particular, hotel owners and unions pursue their own economic and political interests by making cost–benefit assessments of which courses of action are the most expedient given the respective objectives of each group. Hotel companies, for example, are suspicious of the union's objectives beyond the specific issue of housekeeper injuries: The companies are concerned that their strategic interests (in making money, hiring particular workers, and competing with other hotel chains) will be undermined if their work force is unionized. And union leaders, too, are concerned if they think that workers can garner a good wage deal without the union's intervention. Not surprisingly, as some contemporary theorists highlight (e.g., Ralph Dahrendorf; see chapter 6), intergroup conflict is common in democratic societies as various economic and other interest groups compete for greater recognition of their respective agendas.

Life, however, is not all about economic and strategic interests. One of Weber's theoretical achievements was to demonstrate that values and beliefs also matter. Values orient social action, a point subsequently emphasized by Talcott Parsons, an American theorist who was highly influential from the 1940s to the 1980s in shaping sociological thinking and research (see chapter 4). Individuals, groups, organizations, and whole countries are motivated by values – by commitments to particular understandings of friendship, family, patriotism, environmental sustainability, education, religion, etc. Subjective values, such as commitment to their family and providing for their children, may explain why hotel housekeepers work as hard as they do; indeed many immigrant women leave their children and families in their home country while they work abroad earning money to send home so their children can have a more economically secure life (e.g., England 2005; Sassen 2007). The strong cultural value of individualism in the US, for example, also helps to explain why labor unions have a much harder time gaining members and wielding influence in the US than in Western European countries such as the UK, Ireland, and France. The historical-cultural influence of Protestantism in the US and its emphasis on self-reliance and individual responsibility means that Americans tend to believe that

being poor is largely an individual's own responsibility (and a sign of moral weakness), a belief that impedes the expansion of state-funded social welfare programs.

As recognized by both Marx and Weber, differences in economic resources are a major source of inequality (or of stratification) in society, determining individuals' and groups' rankings relative to one another (e.g., upper-class, middle-class, lower-class strata). Additionally, Weber, unlike Marx, argues that social inequality is not only based on differences in income but also associated with differences in lifestyle or social status. Weber and contemporary theorists influenced by his conceptualization of the multiple sources of inequality – such as Pierre Bourdieu (see chapter 13) – argue that individuals and groups acquire particular habits that demonstrate and solidify social class differences. Such differences are evident not only between the upper and lower classes but also between those who are closely aligned economically. This helps to explain why affluent people stay in premier rather than economy hotels and why some affluent people prefer the Ritz Carlton to the Westin. For similar status reasons, some women will spend hundreds of dollars on a Louis Vuitton handbag rather than buy a cheaper, though equally functional one by Coach.

The cultural goals (e.g., consumption, economic success) affirmed in society are not always readily attainable. Children who grow up in poor neighborhoods with underfunded schools are disadvantaged by their limited access to the social institutions (e.g., school) that provide the culturally approved means or pathways to academic, occupational, and economic success (e.g., MacLeod 2008). Thus, as the American sociologist Robert Merton (see chapter 4) shows, society creates deviance (e.g., stealing) as a result of the mismatch between cultural goals (e.g., consumer lifestyle) and blocked access to the acceptable institutional means to attain those goals.

Deviance is a social fact and is “normal” – as classical theorist Emile Durkheim (1858–1917) emphasizes, that is, normal because it comes from society and exists in all societies as indicated by crime rates. Yet “too much” deviance (or crime) may threaten the social order. Social order and cohesion are Durkheim's core theoretical preoccupation (see chapter 2). He is basically interested in what knits society together, that is, what binds and ties individuals into society. Therefore, rather than focusing on what Marx, for example, would see as exploitation, Durkheim would highlight the social interdependence suggested in our story of the hotel maids. For Durkheim, hotel owners, workers, guests, unions, and occupational health scientists are all part of the social collectivity, a collectivity whose effective functioning is dependent on all doing their part in the social order. In like manner, Talcott Parsons sees social institutions such as the economy, the family, and the political and legal systems as working separately but also interdependently to produce an effectively functioning society (see chapter 4).

Social interdependence for Durkheim is underscored by the fact that without guests, for example, there would be no hotel maids and no hotel owners. This is well understood by people living in seaside towns; business is seasonal and when hotels/restaurants close for the winter, there are fewer work opportunities. Durkheim is not interested in analyzing (unequal) economic relations in the hotel industry or the historical origins of tourism. Rather, what is relevant is how collective social forces (e.g., occupations, hotels, tourism, consumption patterns, and all other social things) shape, constrain, and regulate individual, group, and institutional behavior. In the process, these social forces tie individuals, groups, and institutions into interdependent social relationships.

Tipping hotel maids and restaurant servers is not required by law. But we are nudged into doing so – even though no one other than the maid can tell whether or not you left money for her in the hotel room – by the strong collective force of social custom. As Durkheim would stress, all social customs (and laws) both come from society and function to affirm and bolster the interdependence of social relations. Moreover, as contemporary network theorists demonstrate, even *weak* ties among individuals, among acquaintances who occasionally share information either on Facebook or when they run into each other on the street, are socially beneficial to individuals (in finding a good restaurant, or a
