<b>INTRODUCTION</b> .....	1
About This Book .....	1
Foolish Assumptions .....	2
Icons Used in This Book .....	3
Beyond the Book .....	4
Where to Go from Here .....	4
<b>BOOK 1: GETTING STARTED WITH YOUR MAC</b> .....	5
<b>CHAPTER 1: Starting to Use Your Mac</b> .....	7
Examining Different Mac Models .....	7
The Mac mini and Mac Pro .....	9
The iMac .....	9
The MacBook Air and MacBook Pro .....	10
Starting Your Mac .....	11
Turning Off Your Mac .....	13
Putting your Mac to sleep .....	13
Shutting down your Mac .....	16
Restarting your Mac .....	18
Understanding Mac Processors .....	19
Exploring Your Mac's Inner Workings .....	20
<b>CHAPTER 2: Getting Acquainted with the Mac User Interface</b> .....	23
Looking at Menus, Dialogs, and Windows .....	24
Exploring the menu bar .....	25
Understanding menu commands .....	26
Working with dialogs .....	26
Managing windows .....	27
Mastering the Mouse, Trackpad, and Keyboard .....	32
Using the mouse .....	33
Operating the trackpad .....	34
Examining the parts of the keyboard .....	36
Getting to Know the Parts of the Desktop .....	43
The Dock .....	44
The Finder .....	46
Getting to Know Siri .....	48
Exploring a basic Siri interaction .....	49
Using complex Siri commands .....	51
Configuring Siri .....	53
Empowering Siri .....	53
Getting Help .....	54

<b>CHAPTER 3: Making Your First Connections</b> .....	57
Setting Up an Internet Connection .....	58
Ethernet connection .....	58
Wireless (Wi-Fi) access .....	59
Establishing Your Apple Identity .....	63
Creating an Apple ID during Mac setup .....	64
Using two-factor authentication .....	65
Creating an Apple ID in iCloud .....	66
Keeping Your Data in iCloud .....	71
Configuring iCloud preferences .....	72
Syncing with your other devices .....	74
Using the iCloud website .....	75
Setting Up Email and Social Network Accounts .....	77
Adding accounts .....	77
Gathering your account information .....	78
Configuring your account .....	79
<b>CHAPTER 4: Working with Files and Folders</b> .....	83
Getting to Know the Finder .....	84
Handling devices .....	85
Understanding folders .....	86
Setting Finder preferences .....	88
Navigating the Finder .....	90
Opening a folder .....	90
Working with tabs .....	90
Jumping to a specific folder .....	91
Jumping back and forth .....	92
Moving to a higher folder .....	92
Following the folder path .....	93
Organizing and Viewing Folders .....	93
Selecting items in the Finder .....	94
Using Icon view .....	94
Using List view .....	96
Using Column view .....	97
Using Gallery view .....	98
Changing your view options .....	99
Using Quick Look to view file contents .....	100
Creating Folders .....	102
Creating a folder from the Finder menu .....	102
Creating a folder from Save or Save As .....	102
Playing Tag: Classify Files and Folders for Quick Access .....	105
Setting tag preferences .....	105
Tagging existing files and folders .....	105
Tagging new files .....	107
Finding your tagged files .....	107

Manipulating Files and Folders . . . . .	107
Renaming files and folders . . . . .	108
Copying a file or folder . . . . .	110
Moving a file or folder . . . . .	111
Grouping files . . . . .	112
Archiving Files and Folders . . . . .	112
Creating a Zip file . . . . .	113
Creating a DMG file . . . . .	114
Deleting files and folders . . . . .	116
Searching Files . . . . .	117
Using Spotlight . . . . .	118
Spotlight Preferences . . . . .	120
Using Smart Folders . . . . .	121
Creating a Smart Folder with Spotlight . . . . .	122
Deleting a File or Folder . . . . .	123
Retrieving a file or folder from the Trash . . . . .	124
Emptying the Trash . . . . .	124
<b>CHAPTER 5: Managing Apps on the Dock, Launchpad,</b>	
<b>and Desktop . . . . .</b>	<b>127</b>
Launching an App . . . . .	128
From the Dock . . . . .	129
From Launchpad . . . . .	131
From the Apple menu's Recent Items . . . . .	132
From the Finder . . . . .	133
With Spotlight . . . . .	134
Opening documents . . . . .	134
Switching among Applications . . . . .	137
Quitting Apps . . . . .	139
Closing a document . . . . .	139
Shutting down an app . . . . .	139
Force-quitting an app . . . . .	140
Creating Alias Icons . . . . .	142
Working with Dock Aliases . . . . .	143
Adding file and folder aliases to the Dock . . . . .	144
Rearranging icons on the Dock . . . . .	146
Removing icons from the Dock . . . . .	147
Organizing Multiple Desktops with Spaces . . . . .	148
Creating Desktops . . . . .	148
Switching Desktops . . . . .	150
Moving app windows to different Desktops . . . . .	150
Setting Mission Control preferences . . . . .	151
Acquiring New Apps . . . . .	152
Shopping in the App Store . . . . .	153
Downloading apps from the App Store . . . . .	156

Installing Applications . . . . .	158
Updating Applications and System Software . . . . .	158
Uninstalling Applications . . . . .	160
Uninstalling an app . . . . .	160
Removing app alias icons from the Dock and Desktop . . . . .	162
Removing user setting files . . . . .	162
Paying Attention to App Security . . . . .	163
<b>CHAPTER 6: Changing How Your Mac Looks, Sounds, and Feels . . . . .</b>	<b>165</b>
Changing the Desktop and Screen Saver . . . . .	166
Choosing a Desktop image . . . . .	166
Customizing the screen saver . . . . .	168
Changing the Display and Appearance . . . . .	171
Changing the screen resolution . . . . .	171
Using Night Shift . . . . .	172
Changing the colors of the user interface . . . . .	173
Changing the Date and Time . . . . .	175
Adjusting Sounds . . . . .	178
Noticing Notifications . . . . .	181
Working in Split-View Mode . . . . .	186
Using Your Mac's Accessibility Features . . . . .	187
Mitigating vision limitations . . . . .	188
Compensating for hearing limitations . . . . .	191
Interacting with ease . . . . .	192
Enabling Switch Control . . . . .	198
Speaking with Your Mac . . . . .	199
Setting up the microphone . . . . .	200
Setting up Speakable Items . . . . .	201
<b>BOOK 2: USING THE INTERNET . . . . .</b>	<b>205</b>
<b>CHAPTER 1: Browsing the Web with Safari . . . . .</b>	<b>207</b>
Browsing Websites . . . . .	208
Going on Safari . . . . .	208
Visiting websites . . . . .	209
Reading in Reader . . . . .	217
Using tabbed browsing . . . . .	218
Setting your Safari home page . . . . .	222
Searching within a web page . . . . .	223
Organizing Your Website Experience . . . . .	223
Using bookmarks . . . . .	224
Creating a Reading List . . . . .	230
Displaying favorites in Top Sites . . . . .	232

Storing Personal Info and Keeping It Private . . . . .	234
Using AutoFill to track passwords and more . . . . .	234
Protecting your web-browsing privacy . . . . .	236
Saving and Sharing Web Pages . . . . .	238
Saving a web page as a file . . . . .	239
Saving a photo from the web . . . . .	240
Sharing a web page . . . . .	241
Printing a web page . . . . .	242
Viewing and Playing Multimedia Files . . . . .	243
Listening to streaming audio . . . . .	243
Viewing PDF files . . . . .	243
Downloading Files . . . . .	244
Using Extensions . . . . .	246
<b>CHAPTER 2: Corresponding with Mail . . . . .</b>	<b>249</b>
Adding an Email Account to Mail . . . . .	250
Looking at the Mail Window . . . . .	254
Writing Emails . . . . .	257
Creating a new email . . . . .	257
Replying to or forwarding a message . . . . .	259
Customizing your messages . . . . .	261
Sending a file or photo attachment . . . . .	266
Spelling and grammar checking . . . . .	270
Receiving and Reading Email . . . . .	271
Retrieving email . . . . .	271
Reading email . . . . .	273
Viewing and saving file attachments . . . . .	274
Adding an email address to Contacts . . . . .	275
Adding an email contact to your VIPs list . . . . .	276
Organizing Email . . . . .	276
Searching through email . . . . .	277
Organizing email with mailbox folders . . . . .	278
Deleting a mailbox folder . . . . .	280
Automatically organizing email with smart mailboxes . . . . .	280
Automatically organizing email with rules . . . . .	282
Flagging your messages . . . . .	283
Dealing with Junk Email . . . . .	284
Filtering junk email . . . . .	285
Using advanced filter rules . . . . .	287
Using blocked sender rules . . . . .	289
Deleting and Archiving Messages . . . . .	290
Deleting messages . . . . .	290
Retrieving messages from the Trash folder . . . . .	291
Emptying the Trash folder . . . . .	292
Archiving messages . . . . .	292

<b>CHAPTER 3: Chatting with Messages and FaceTime</b> .....	293
Getting Started in Messages .....	294
Setting up a Messages account .....	294
Keeping up appearances .....	294
Chatting with Others .....	296
Initiating a text chat .....	297
Initiating an audio or a video chat .....	299
Sharing files and photos .....	301
Saving or deleting your conversations .....	301
Making Calls with FaceTime .....	302
Signing in to FaceTime .....	303
Making a call with FaceTime .....	303
Receiving a FaceTime call .....	305
<b>CHAPTER 4: Using Apple Pay and Apple Card</b> .....	307
Paying for Purchases with Apple Pay .....	308
Using Apple Card .....	309
<b>CHAPTER 5: Moving Around with Maps</b> .....	311
Wherever You Go, There You Are .....	312
Finding your location .....	312
Navigating the Maps interface .....	314
Asking for Directions .....	315
Finding what you seek .....	315
Sharing what you find .....	318
Dropping a pin .....	320
Getting directions .....	320
<b>BOOK 3: BEYOND THE BASICS</b> .....	323
<b>CHAPTER 1: Backing Up and Restoring Your Data</b> .....	325
Using iCloud for Your Data .....	326
Understanding Different Backup Options .....	328
Backing up with external hard drives .....	329
Storing backups on USB flash drives .....	330
Storing backups off-site .....	331
Blasting into the Past with Time Machine .....	332
Setting up Time Machine .....	332
Skipping files you don't want to back up .....	336
Retrieving files and folders .....	337
Understanding Versions .....	342
Restoring your entire backup .....	342
Moving Your Backup from an Old Mac to a New Mac .....	344
Working with Data-Recovery Programs .....	345
Getting Rid of What You No Longer Need .....	348

<b>CHAPTER 2:</b>	<b>Protecting Your Mac against Local and Remote Threats</b>	349
	Locking Down Your Mac	350
	Using Passwords	350
	Changing your password	351
	Applying password protection	353
	Using Touch ID	356
	Setting up Touch ID	357
	Using Touch ID	357
	Encrypting Data with FileVault	358
	Setting up FileVault	358
	Turning off FileVault	361
	Using Firewalls	362
	Configuring the Mac firewall	362
	Buying a more robust firewall	365
	Selecting Privacy Settings	366
	Creating Multiple Accounts	368
	Adding a new user account	369
	Defining Parental Controls	371
	Activating a Sharing Only account	377
	Switching between accounts	379
	Deleting an account	381
	A Few Final Security Tips	383
<b>CHAPTER 3:</b>	<b>Networking Your Mac and Connecting Peripherals</b>	385
	Creating a Wired Network	386
	Creating a Wireless Network with a Router	390
	Connecting and Choosing a Printer	393
	Biting into Bluetooth	395
	Configuring Bluetooth on your Mac	396
	Pairing a Bluetooth device	398
	Sharing through Bluetooth	400
<b>CHAPTER 4:</b>	<b>Sharing Files and Resources on a Network</b>	403
	Sharing Files with People Near and Far	404
	Using AirDrop	404
	Using a network	407
	Sharing Printers	415
	Seeing Your Screen from Afar	416
	Enabling screen sharing	416
	Starting a screen-sharing session with another Mac	417

<b>CHAPTER 5: Running Windows on a Mac</b> .....	421
Working with BYOD and a Heterogeneous Computer Environment .....	422
Using Boot Camp .....	423
Setting up Boot Camp Assistant .....	423
<b>CHAPTER 6: Maintenance and Troubleshooting</b> .....	427
Shutting Down Frozen or Hung-Up Programs .....	428
Handling Startup Troubles .....	430
Resetting the System Management Controller .....	430
Resetting NVRAM and PRAM .....	431
Booting up in Safe Mode .....	431
Uninstalling apps .....	433
Repairing and Maintaining Storage Drives .....	434
Running First Aid .....	434
Booting from another Mac through a Thunderbolt cable .....	436
Using the Recovery Disk .....	437
Removing Jammed CDs or DVDs .....	438
<b>BOOK 4: USING YOUR MAC AS A MEDIA CENTER</b> .....	441
<b>CHAPTER 1: Getting Acquainted with Media on Your Mac</b> ....	443
Using Your Apple ID to Enjoy and Share Media .....	443
Media Sharing .....	444
Family Sharing .....	445
Getting into the Media Apps in macOS Catalina .....	453
<b>CHAPTER 2: Tuning In and Listening with Music</b> .....	455
Getting to Know the Music App .....	456
The sidebar .....	457
The Music window .....	458
Working with Playlists .....	458
Ordinary playlists .....	459
Smart Playlists .....	461
Genius playlists, shuffles, or mixes .....	466
Organizing Your Music .....	468
Adjusting Music Preferences .....	470
Playing Audio with Music .....	474
Listening to CDs .....	474
Importing a CD's audio tracks into Music .....	476
Importing digital audio files .....	478
Searching your Music library .....	478
Playing digital audio files .....	479
Burning an audio CD .....	482

	Listening to the Radio . . . . .	484
	Playing Music Radio. . . . .	484
	Shopping at the iTunes Store . . . . .	485
	Downloading media from Music. . . . .	488
<b>CHAPTER 3:</b>	<b>Enjoying Podcasts, News, and TV . . . . .</b>	<b>491</b>
	Finding and Playing Podcasts . . . . .	491
	Exploring podcasts . . . . .	492
	Listening to or watching podcasts . . . . .	492
	Setting Podcast Preferences . . . . .	494
	Reading the News: Extra, Extra, Read All about It! . . . . .	496
	Reading the daily news. . . . .	496
	Following a publisher or channel . . . . .	498
	Saving and sharing stories. . . . .	498
	Setting News preferences . . . . .	499
	Watching TV on Your Mac . . . . .	500
<b>CHAPTER 4:</b>	<b>Reading and Listening to Books on Your Mac . . . . .</b>	<b>505</b>
	Thumbing through Books . . . . .	505
	Finding something to read at Apple Books . . . . .	507
	Adding books and files from other sources . . . . .	509
	Reading by screen light. . . . .	510
	Sorting your books . . . . .	513
<b>CHAPTER 5:</b>	<b>Looking at Photos . . . . .</b>	<b>515</b>
	Understanding Digital Photography . . . . .	515
	Transferring Digital Images to the Mac . . . . .	517
	Retrieving photos using Photos. . . . .	518
	Moving photos from other folders into Photos . . . . .	520
	Organizing Your Photo Library . . . . .	521
	Tagging images . . . . .	521
	Using the Keyword Manager . . . . .	523
	Manually adding information to photos . . . . .	524
	Creating a Smart Album . . . . .	525
	Creating folders . . . . .	526
	Deleting photos, albums, and folders . . . . .	527
	Mapping your images . . . . .	528
	Creating Memories . . . . .	530
	Finding images. . . . .	531
	Creating a slideshow. . . . .	531
	Capturing Photos with Photo Booth. . . . .	534
	Editing Photos with Photos . . . . .	537
	Sharing Photos. . . . .	541
	Printing photos . . . . .	541
	Sending photos in a message . . . . .	542
	Using Photo Stream . . . . .	543

<b>BOOK 5: TAKING CARE OF BUSINESS</b> .....	547
<b>CHAPTER 1: Managing Contacts</b> .....	549
Setting Up Contacts.....	550
Viewing Contacts.....	550
Designing your Contacts template.....	551
Entering contacts.....	553
Working with Contacts.....	560
Searching contacts.....	561
Editing a card.....	561
Deleting a contact.....	562
Creating groups.....	562
Sharing Your Contacts.....	568
Sending one contact at a time.....	568
Exporting multiple cards.....	569
Printing your Contacts.....	570
<b>CHAPTER 2: Staying on Schedule with Calendar</b> .....	573
Getting Acquainted with Calendar.....	574
Working with Multiple Calendars.....	576
Creating a new calendar.....	577
Accessing calendars from other accounts.....	578
Subscribing to online calendars.....	580
Importing Calendar data.....	582
Creating a new calendar group.....	582
Moving a calendar or group.....	584
Renaming and deleting calendars and groups.....	584
Creating and Modifying Events.....	585
Viewing events.....	585
Creating an event.....	585
Editing an event.....	587
Moving an event.....	594
Deleting an event.....	595
Finding Events.....	595
Color-coding events.....	595
Selectively hiding events.....	595
Checking for today's events.....	596
Checking events for a specific date.....	596
Searching for an event.....	597
Exporting Calendar data.....	598
Sharing your calendars.....	598
Backing up Calendar data and restoring a backup file.....	600
Printing a Calendar file.....	601

Organizing Tasks with Reminders . . . . .	602
Creating new Reminders tasks . . . . .	602
Making new lists . . . . .	605
<b>CHAPTER 3: Creating Documents with Pages . . . . .</b>	<b>607</b>
Working with Document Templates . . . . .	608
Choosing a template . . . . .	608
Replacing placeholder text . . . . .	610
Replacing placeholder photos and graphics . . . . .	611
Adding pages or sections to your document . . . . .	614
Moving around your document . . . . .	616
Working with Text . . . . .	617
Editing text . . . . .	617
Formatting text . . . . .	618
Adjusting line spacing, justification, and margins . . . . .	620
Creating and Placing Text Boxes . . . . .	629
Creating a text box . . . . .	629
Moving a text box . . . . .	630
Resizing a text box . . . . .	630
Uniting text boxes . . . . .	631
Using Styles . . . . .	631
Using a paragraph style . . . . .	632
Using an image style . . . . .	633
Using a text box style . . . . .	634
Creating Charts and Tables . . . . .	635
Adding and removing a chart . . . . .	635
Adding a table . . . . .	637
Adding shapes . . . . .	638
Arranging objects . . . . .	640
Wrapping text around an object . . . . .	641
Polishing Your Document . . . . .	642
Spell-checking a document . . . . .	642
Finding and replacing text . . . . .	644
Saving Your Documents on Your Mac or iCloud . . . . .	645
Printing Your Documents . . . . .	646
Exporting to a Different File Format . . . . .	646
<b>CHAPTER 4: Presenting with Keynote . . . . .</b>	<b>649</b>
Creating a Presentation . . . . .	650
Choosing a theme and saving your presentation . . . . .	651
Opening an existing file . . . . .	653
Finding your way around Keynote . . . . .	654
Adding slides . . . . .	656

Manipulating Text . . . . .	658
Entering text . . . . .	658
Inserting text boxes . . . . .	659
Editing text . . . . .	659
Formatting text and text boxes . . . . .	660
Adding Shapes, Charts, and Tables . . . . .	667
Inserting predefined shapes . . . . .	667

# Introduction

---

Whether you're a beginner, an intermediate user, or a seasoned computer expert, you can find something in *Macs All-in-One For Dummies*, 5th Edition. This book is divided into five minibooks so you can focus on the topics that interest you and skip over the ones that don't. We explored every menu and button of the Mac, its operating system, as well as Apple's Pages, Numbers, and Keynote applications and other built-in applications and wrote about most of them, focusing on the functions and features we think you'll use frequently or that will help you get the most out of your Mac and the applications.

## About This Book

---

This book begins by focusing on the basics for all the aspects of using a Mac with the latest operating system, macOS Catalina. We start at the very beginning, from turning on your Mac, using the mouse and trackpad with multitouch gestures, and organizing your virtual desktop. We segue to creating your Apple ID and connecting your Mac to the Internet. In true *For Dummies* style, we show you step by step how to conduct all your online activities from setting up email accounts to having video chats. We introduce you to more advanced but important tasks, such as protecting your Mac and your personal information; networking your Mac with other Macs, peripherals, and devices; and installing Windows on your Mac!

The fun begins when we explore Apple's apps to manage tasks, such as editing and organizing your digital photos and videos, adding music to your Mac, and even reading books and watching movies. Along the way, we tell you how to share your finds and creations with people you know.

This book also shows you how to use and take advantage of the applications included with Catalina, which provides word processing, desktop publishing, a presentation app, and a spreadsheet app for calculating formulas and displaying your data as 3D charts. Whether you use a Mac for work, school, or just for fun, you'll find that with the right software apps, your Mac can meet all your computing needs.

If you're migrating to a Mac from a Windows PC, this book can ease you into the Mac way of computing and show you how to install Windows on your Mac so you can still use your favorite Windows programs. By running Windows on a Mac, you can turn your Mac into two computers for the price of one.

If you're new to the Mac, you'll find that this book introduces you to all the main features of your Mac. If you're already a Mac user, you'll find information on topics you might not know much about. After reading this book, you'll have the foundation and confidence to delve deeper into your Mac's bundled apps as well as others you can find at the App Store.

This book is a reference, which means you don't need to read the chapters in order from front cover to back, and you're not expected to commit anything to memory — there won't be a test on Friday. You can dip into the book wherever you want, to find answers to your most pressing questions. If you're short on time, you can safely skip sidebars (the text in gray boxes) and anything marked with the Technical Stuff icon without missing anything essential to the topic at hand.

To help you navigate this book efficiently, we use a few style conventions:

- » *Control-click* means to hold the Control key and click the mouse. If you're using a mouse that has a left and right button, you can right-click rather than Control-click. If you have one of Apple's trackpads, tap with two fingers. You find complete explanations of the multitouch gestures in Book 1, Chapter 2.
- » When we refer to the Apple menu — the menu that appears when you click the Apple icon in the very upper-left corner of your Mac's screen — we use this apple symbol: . When we talk about menu commands, we use a command arrow, like this: Choose  ⇨ Recent Items ⇨ Calendar. That just means to click the Apple menu; then, when it appears, slide your pointer down to Recent Items and drag slightly to the right to open a submenu from which we want you to click Calendar.

Finally, within this book, you may note that some web addresses break across two lines of text. If you're reading this book in print and want to visit one of these web pages, simply key in the web address exactly as it's noted in the text, pretending as though the line break doesn't exist. If you're reading this as an e-book, you've got it easy — just click the web address to be taken directly to the web page.

## Foolish Assumptions

In writing this book, we made a few assumptions about you, dear reader. To make sure that we're on the same page, we assume that

- » You know something, but not necessarily a whole lot, about computers, and you want to find out the basics of using a Mac or doing more with your Mac than you are already.

- » You have at least a general concept of this wild and crazy thing called the Internet — or more precisely, the phenomenon known as *the web* (or, more formally, the World Wide Web).
- » You'll turn to the introductory chapters if you find yourself scratching your head at such terms as *double-click*, *drag and drop*, *scroll*, and *Control-click* — or any other terms that sound like things we assume that you know but you don't.
- » You appreciate the speed at which technology-based products like the Mac (and the programs you can run on it) can change in as little as a few months, with newer, sleeker, faster models and app versions replacing previous versions.
- » You can traverse the web to find updated information about the products described throughout this book.
- » You know that keeping up with the topic of all things high-tech and Mac (even as a full-time job, as it is for us) still can't make a guy or gal the be-all and end-all Mac Genius of the World. You will, therefore, alert us to cool stuff you discover in your Mac odyssey so that we can consider including it in the next edition of this book.
- » You're here to have fun, or at least try to have fun, as you dive into The Wonderful World of Mac.

## Icons Used in This Book

To help emphasize certain information, this book displays different icons in the page margins.

TIP

The Tip icon marks tips (duh!) and points out useful nuggets of information that can help you get things done more efficiently or direct you to something helpful that you might not know. Sometimes Tips give you a second, or even third, way of doing the task that was pointed out in the step.

REMEMBER

Remember icons mark the information that's been mentioned previously but is useful for the task at hand. This icon often points out useful information that isn't quite as important as a Tip but not as threatening as a Warning. If you ignore this information, you can't hurt your files or your Mac, but it may make the task at hand easier.

TECHNICAL  
STUFF

This icon highlights interesting information that isn't necessary to know but can help explain why certain things work the way they do on a Mac. Feel free to skip this information if you're in a hurry, but browse through this information when you have time. You might find out something interesting that can help you use your Mac.

Watch out! This icon highlights something that can go terribly wrong if you're not careful, such as wiping out your important files or messing up your Mac. Make sure that you read any Warning information before following any instructions.

## Beyond the Book

In addition to the material in the print or e-book you're reading right now, this product also comes with some access-anywhere goodies on the web. Although the Mac uses menus for just about everything, the menu commands have key combination counterparts. We put together a table of the most common key commands that you can print and keep near your Mac. You also find a table that shows you how to type foreign letters and common symbols and one that summarizes the multitouch gestures. To help you stay up to date with the latest Mac news, we provide a list of Mac websites with hot links, which you can simply click to go to the site. To find the Cheat Sheet for this book, just go to [www.dummies.com](http://www.dummies.com) and type **Macs All-in-One For Dummies Cheat Sheet** in the Search box.

## Where to Go from Here

*For Dummies* books aren't meant to be read cover to cover. However, this book flows from task to task, chapter to chapter, in an order that would be logical if you're learning the Mac for the first time. In that case, feel free to start at Book 1, Chapter 1 and go through the Book 1 chapters to familiarize yourself with how the Mac is organized and how you can make it do what you want it to do. Then mix it up, moving on to fun tasks, such as making FaceTime video calls (Book 2, Chapter 3) or designing a flyer with Pages (Book 5, Chapter 3), and then bounce back to a crucial task, such as backing up (Book 3, Chapter 1).

If you're computer intuitive, you could start with Book 1, Chapter 3 to get your Apple ID and Internet connection set up, and then move in the direction you want, whether it's learning about more advanced system functions in Book 3 or organizing and editing your images using Photos.

If you're familiar with the Mac but want to brush up on the latest macOS — Catalina — read about Notification Center in Book 1, Chapter 6; Maps in Book 2, Chapter 5; Books in Book 4, Chapter 4; and the completely updated Pages, Numbers, and Keynote apps in Book 5, Chapters 3–6.

- » Powering on and off
- » Getting to know your Mac

## Chapter **1**

# Starting to Use Your Mac

**A**pple offers several different kinds of Macs, and understanding how your Mac is different from the others can help you navigate this book more quickly, gathering the information you need and skipping the rest. Before you can use your Mac, you have to start it up — which makes perfect sense — so we tell you how to do that. Now, get ready for the counterintuitive part: After you have your Mac up and running, you can just leave it on.

In this chapter, we cover current Mac models and how they're different and alike, show you how to start and restart your Mac (and give you an idea of what goes on behind the scenes), and then tell you how to put it to sleep and shut it down completely. Sprinkled throughout this chapter is technical information about the various Mac models and what goes on inside that makes your Mac tick, but we make our explanations as clear and simple as possible. At the end of the chapter, we introduce you to Mac processors and show you how to find out precisely which features your Mac has.

## Examining Different Mac Models

Apple's Macintosh computer — Mac for short — enjoys the reputation of being the easiest computer to use in the world. Macs are so dependable, durable, and beautifully designed that they incite techno-lust in gadget geeks like us and ordinary Joes alike. For those doubly good reasons, you probably won't buy a new Mac to replace your old one because you *have* to, but because you *want* to.

The Macintosh has been around since 1984, and since that time, Apple has produced a wide variety of Mac models. Although you can still find and use older Macs (although many are not compatible with the latest and greatest OS or applications), chances are, if you buy a newer Mac, it will fall into one of three categories:

- » **Desktop:** Mac mini or Mac Pro, which require a separate display (monitor), keyboard, and mouse or trackpad.
- » **All-in-one desktop:** iMac or iMac Pro, which house the display and computer in one unit and require a keyboard and mouse or trackpad.
- » **Notebook:** MacBook Air or MacBook Pro, which have built-in keyboards, trackpads that work like a mouse at the touch of your fingertips, and bright displays. A clamshell design lets you close and tote them in your backpack, messenger bag, or briefcase.

All the newest Mac models have at least one Thunderbolt/USB port to connect peripheral hardware, such as external drives and displays. They're also engineered for Wi-Fi and Bluetooth connections, which are used for data transfer and peripheral connectivity.

The Thunderbolt port, standard on all newer Macs, is a data-transfer protocol used to connect peripheral devices, such as displays, speakers, or hard drives. Thunderbolt transfers data faster than either USB or FireWire. The latest iteration, Thunderbolt 3, uses the same ports and connectors as the new version of USB (called USB-C).

Because most data transfer and storage happens online or with flash drives, optical disc drives (which play CDs and DVDs) have become almost obsolete and have been removed from all the Mac models sold today. If you still use CDs or DVDs, you can buy an external CD/DVD drive. You can also connect to an older computer on a network and access its optical disc drive.

Mac mini, Mac Pro, and iMac models use an external wireless or wired (usually USB) keyboard and a mouse or trackpad (sold separately from the mini and Pro). Apple's Magic Trackpad lets you use the multitouch gestures — such as swipe, pinch, and flick — to control the cursor and windows on whichever Mac desktop model you choose. If you use a trackpad, you don't need a mouse, but you can use both if you prefer.

By understanding the particular type of Mac that you have and its capabilities, you'll have a better idea of what your Mac can do. We highlight those capabilities in the sections that follow. No matter what the capabilities of your Mac are, chances are, it will work reliably for as long as you own it.

## The Mac mini and Mac Pro

The biggest advantages desktop Macs (the Mac mini and Mac Pro) offer are that you can choose the type of display to use and place it anywhere you want on your desk — as long as you have a cable that can reach. The Mac mini, however, is small enough to hide under your desk or situate in a corner of your desktop.

The Mac mini started as a lower-priced version of the Mac, designed for people who wanted an inexpensive Mac for ordinary uses, such as word processing and writing, sending email, browsing the web, and playing video games. At the same time, it packs a fast Intel Core i3, i5 or i7 processor, with up to 64GB of memory, and between 128 gigabytes (GB) and 2 terabytes (TB) of storage, and an assortment of the latest ports and slots for audio, video, and USB connections — nothing to sneeze at. Alternatively, it can function as a terrific, cost-effective server for home or small-business networks. With the latest iterations of the Mac mini, everything has been updated to the latest hardware with power to manage industrial-strength tasks, including everything from home automation to sound and image editing (including artificial reality).

The Mac Pro was completely remodeled and released in December 2013 with a new model coming in the fall of 2019. The 2013 version of this higher-priced professional-version Mac boasts ports to connect multiple monitors and lots of expandability for up to 64GB of memory and up to 1TB of flash storage, as well as greater graphics and processing capabilities with the latest Intel Xeon processor and dual graphics processors.

## The iMac

The all-in-one design of the iMac is an evolutionary result of the original — 1984-era — Mac design. The iMac is available in two varieties — iMac 21 with a 21-inch monitor, and iMac 27 with a 27-inch monitor. Both models feature a built-in display, speakers, and FaceTime camera. The standard display is LED-backlit, but you can specify a Retina 4K display. You can configure up to 1TB of storage for an iMac 21 or 3TB of storage for an iMac 27. You choose flash storage instead of a hard drive, or a fusion drive, which combines a flash drive with a conventional hard drive, depending on your need for speed or space. On iMac models, you can connect external speakers and a second external display.

Recently, Apple launched a high-powered extension to the iMac line: iMac Pro. The iMac Pro is a powerhouse that features a more vibrant 5K Retina display, a faster processor, and more memory, with up to 4TB of storage.

The advantage of the iMac's all-in-one design is that you have everything you need in a single unit. The disadvantage is that if one part of your iMac fails (such

as the display or speaker), you can't easily replace the failed part, although in our experience, Apple responds quickly and professionally to problems with its products.

## The MacBook Air and MacBook Pro

MacBook Air and MacBook Pro are the notebook members of the Mac family. All the MacBook models run on rechargeable battery packs or external power. If you need to take your Mac everywhere you go, you can choose from the ultralight MacBook Air or one of the MacBook Pro models.

Although both MacBook Air and MacBook Pro have full-size keyboards, neither includes the extra numeric keypad found on most external keyboards (but not on Apple's standard wireless keyboard) or on larger Windows notebooks. Also, instead of a mouse, the MacBook uses a built-in trackpad, which responds to all the multitouch gestures you can use to control the cursor and windows on your Mac.

TIP

If you find the keyboard or trackpad of your notebook Mac too clumsy to use, you can always plug an external keyboard and mouse into your notebook, or use a wireless keyboard and mouse.

The MacBook Air is a featherweight computer with a 1.66 GHz i5 processor, and can be configured with up to 1TB of flash storage and up to 16GB of memory.

The MacBook Pro models can be configured to include up to a 2.4 GHz 8-core i9 processor, up to 32GB of memory, and up to 4TB of flash storage. MacBook Pro computers now include a Touch Bar above the keyboard. It lets you tap icons that change as you work with your Mac so that the function button or tools that you need appear when you need them.

The MacBook Air comes with a 13-inch LED-backlit screen, and the MacBook Pro models come in two screen sizes: 13 inch and 15 inch.

TECHNICAL  
STUFF

Apple's Retina display uses a liquid crystal display (LCD) with a pixel density of 227 pixels per inch (PPI). At this density, the human eye doesn't distinguish the individual pixels at a normal distance. All MacBook Pros have the Retina display, as do some iPad and iPhone models. The MacBook Air and other desktop models sport an LED-backlit screen.
