Contents

1	The Operational Risk	1
1.1	Introduction	1
1.2	Models for Operational Risk	2
1.2.1	Basic Indicator Approach	4
1.2.2	Standardized Approach	4
1.2.3	Advanced Measurement Approach	5
1.3	Loss Distribution Approach	7
1.4	DIPO Consortium	8
	References	10
2	Identification of the Risk Classes	11
2.1	Introduction	11
2.2	Distributional Tests	11
2.3	Application to DIPO Data	15
	References	17
3	Severity Analysis	19
3.1	Introduction	19
3.2	Mixture of Three-Parameter Log-Normal Distributions	20
3.3	Extreme Value Theory	21
3.4	Application to DIPO Data	23
3.4.1	Mixture of k Log-Normal Distributions	23
3.4.2	Log-Normal–GPD Distribution	37
3.4.3	Comparison	47
	References	50
4	Frequency Analysis	51
4.1	Introduction	51
4.2	Mixture of Poisson Distributions	51
4.2.1	The Poisson Distribution	51
4.2.2	Finite Poisson Mixture	52

4.3	Mixture of Negative Binomial Distributions	53
4.3.1	The Negative Binomial Distribution	53
4.3.2	Relationship with Poisson Distribution	54
4.3.3	Maximum Likelihood Estimation	56
4.3.4	Finite Negative Binomial Mixture	57
4.4	Application to DIPO Data	57
	References	69
5	Convolution and Risk Class Aggregation	71
5.1	Introduction	71
5.2	Overall Loss Distribution	71
5.3	Risk Class Aggregation and Copula Functions	73
5.3.1	Tail Dependence	74
5.3.2	Elliptical Copulae	75
5.3.3	Archimedean Copulae	77
5.4	Value-at-Risk Estimates Considering t -Copula	78
	References	82
6	Conclusions	83

List of Tables

Table 2.1	Pooling results using KS and AD tests for business lines 3, 4, 8 and percentages within each of the three business lines	15
Table 2.2	Operational risk classes and percentages	16
Table 3.1	Estimated mixtures according to the following criteria: BIC, argmin (p -value > 0.05)	24
Table 3.2	Estimated mixtures according to the proposed criterion	26
Table 3.3	GPD estimation on DIPO data	38
Table 3.4	AD goodness-of-fit comparison between a mixture of k Log-normal distributions and a Log-normal and GPD combination	49
Table 4.1	Number of components and KS p -values for Poisson and Negative Binomial distributions.	59
Table 4.2	Adjusted KS p -values for Poisson and Negative Binomial mixtures	60
Table 4.3	Selected distribution and number of components for the risk classes	61
Table 5.1	Correlation between Severities and Frequencies	72
Table 5.2	Pearson's linear correlation matrix	79
Table 5.3	Kendall's rank correlation matrix	80
Table 5.4	Years with maximum aggregated losses, maximum frequencies, and maximum single loss among risk classes.	81
Table 5.5	Value-at-Risk results using different correlation hypotheses	82
