## Credits and Acknowledgments

The MIHOUSE team wants to thank the Faculties of Engineering, Economic Sciences and Social Communication at the Universidad Autónoma de Occidente (UAO) and Architecture at the Universidad de San Buenaventura (USB) that supported the development of the project:

- The Energetic and Mechanics Department at UAO, which provided the electrical, environmental, and waste and water management solutions.
- The Architecture Program at USB, which leded the project, developed the design strategy and managed MIHOUSES´s research and building processes.
- The Faculty of Engineering at USB, which helped with industrial and agro industrial solutions and in the preparation of most of the multimedia content used in social networks, website, and public releases.
- The Communications Departments, which contributed to the team´s communications project.
- The Research & Technological Development Departments.
- The deans of the Faculties of Engineering and Architecture, Arts & Design for their constant support and encouragement.
- The heads of each of the study programs involved in the project who facilitated the participation of an

interdisciplinary group of students and professors.

- The Language Center and Language Institute for their constant support with translations used in every delivery during the SDLAC2015 contest.
- The FabLab at UAO, which facilitated the construction of urban and architectural models.
- The Broadcasting Coordination at USB that helped with the preparation of all audiovisuals.
- Costume Design students who designed the uniforms of MIHOUSE decathletes.
- Arch. Liliana Carvajal for helping with the financial aspects of the project and for her unconditional support.
- Professors José Salazar and Jerfenzon Vidarte for their advice on the project's economic feasibility.
- Professor Luis Alberto Buitrago for his advice on urban orchards and home gardens.
- Arch. Lucas Arango and his team; Eng. Carlos Castang and his group of students; and Arch. Carlos Giraldo for their contributions with the bioclimatic aspects and calculations.
- Teacher Carlos Ortega for his support with translations.
- The Maestría en Bioclimática at Universidad de San Buenaventura Medellín.

The MIHOUSE team also recognizes the enormous support from its sponsoring companies and hopes that the established relations can continue being fruitful over the next years and in future projects:

It is also important to thank USB and UAO for their valuable efforts that made possible the disassembly of the MIHOUSE prototype constructed at the Solar Villa and its reassembly at USB campus, where it is being turn into a Sustainable Housing Laboratory. In the next years, the MIHOUSE Laboratory will serve as a place for research and experimentation with solar panels, furniture and other innovative technologies related to energy efficiency, indoor air quality, humidity, water management and sustainability. Undoubtedly, this laboratory will be a milestone that will allow the training of architecture and engineering students in future Solar Decathlons.

Last but not least, the MIHOUSE team wants to thank the Solar Decathlon organizers for making possible this event, and the people of Cali that kindly selected our housing prototype as the second favorite house in the Solar Villa.

# List of the Mihouse Team

MIHOUSE TEAM					
#	TITLE IN TEAM	CATEGORY	SUBGROUP	NAME	PSAI
1	Faculty Advisor	Faculty Advisor	Architecture	Olga Lucía Montoya Flórez	USB
2	Project Manager	Faculty Advisor	Energy	Yuri Uliyanov López Castrillón	UAO
3	Contest Captain & Communications	Faculty Advisor	Communications	Margarita María Villalobos Ayala	USB
4	Site Operations Coordinator	Student	Logística	Juliana Alexandra Muñoz Lombo	USB
5	Construction Manager	Faculty Advisor	Water - Waste	Javier Ernesto Hoigúin Gonzalez	UAO
6	Student Team Leader	Student	Gray Water	Alejandro Beltrán Márquez	UAO
7	Decathlete	Student	Solid Waste	Maria Camila Calle Mena	UAO
8	Safety Officer	Student	Rain Water	Javier Eduardo López Giraldo	UAO
9	Decathlete	Student	EHSP	Ana María Rubiano	UAO
10	Decathlete	Student	Drinking Water	Juan Pablo Trujillo Chaparro	UAO
11	Decathlete	Student	Waste Water	Nicolas Noreña Leal	UAO
12	Decathlete	Student	Solid Waste	Eliana Melissa Morales Rivera	UAO
13	Decathlete	Student	Gray Water	Jeffer Steven Mosquera Castillo	UAO
14	Decathlete	Student	Water - Waste	Isabella Tello Gómez	UAO
15	Decathlete	Student	Rain Water	Daniel Mauricio Gonzalez Naranjo	UAO
16	Electrical Engineer	Student	Energy	Wilson Eduardo Pabón Álvarez	UAO
17	Student Team Leader	Student	Energy	Juan Manuel Luna Rodríguez	UAO
18	Safety Officer	Student	Energy	Fabián Andres Gaviria Cataño	UAO
19	Decathlete	Student	Energy	Andrea Maria Quintero Osorio	UAO
20	Decathlete	Student	Energy	Andrés Felipe Ramirez Vélez	UAO
21	Decathlete	Faculty Advisor	Energy	Hugo Andrés Macías Ferro	UAO
22	Project Architect	Faculty Advisor	Architecture	Constanza Cobo Fray	USB
23	Student Team Leader	Student	Architecture	Marlon Andrés Duarte García	USB
24	Safety Officer	Student	Architecture	Juan Pablo Aguirre Martínez	USB
25	Decathlete	Student	Architecture	John Harold Motta Carvajal	USB
26	Project Engineer	Faculty Advisor	Arch. & Engineering	Diego Fernando Gómez Etayo	USB
27	Student Team Leader	Student	Arch. & Engineering	Laura Cristina Sadovnik Sterling	USB
28	Safety Officer	Student	Arch. & Budget	Luisa Lizeth Peña Perea	USB
29	Decathlete	Student	Arch. & Engineering	Alfonso José Madiedo Echeverri	USB
30	Health & Safety Coordinator	Faculty Advisor	Arch. & Furniture	Viviana Polo Flórez	USB
31	Student Team Leader	Student	Arch. & Furniture	Mariana González Zuluaga	USB
32	Safety Officer	Student	Arch. & Budget	Angie Daniela Pabón Montilla	USB
33	Decathlete	Student	Arch. & Furniture	Jessica Andrea Rojas Benavides	USB
34	Student Team Leader	Student	Materials	Alejandra Vargas Piedrahita	USB
35	Safety Officer	Student	Materials	Jaime Andrés Viveros Grueso	USB
36	Decathlete	Student	Agroindustrial	Luis Fernando Vásquez Castillo	USB
37	Student Team Leader	Student	Communications	David Torres Agudelo	UAO
38	Decathlete	Student	Confort Térmico	Ana María Ramirez Tovar	UAO
39	Decathlete	Student	Architecture	Alejandro Angee Giraldo	USB
40	Instrumentation Contact	Faculty Advisor	Architecture	Liliana Carvajal Camacho	USB

# Contents

List of Figures

List of Tables

Introduction

## **Chapter 1** - Construction Design

Urban Scale

Prototype Scale

## **Chapter 2** - Water Management System

System Design

Design Criteria

Storage

Rainwater Volume Calculation

Ground Water System

Drinking Water Tanks

Plumbing System

Water Budget

## **Chapter 3** - Energy Management System

Electrical System Design

Solar Energy Resource

Energy Efficiency Design Narrative

Technical Project Manual

Project Dimensions:

AC Systems

Domestic Hot Water

Electrical Energy production

Energy Consumption

Energy Balance

List of singular and innovative materials and systems

#### **Chapter 4 - Innovation**

Innovation in Engineering and Construction

Lightweight Concrete

Thermal Conductivity

Water Use Reduction

Innovation in Energy Efficiency

Innovation Through Energy Efficiency.

Benefits of efficient selection of components of the electrical and photovoltaic system equipment.

Benefits of deployment of control sensors step.

Use of Natural Light

Use of Led Lighting

#### **Chapter 5 - Sustainability**

Introduction

Water Strategies

Water Cycle

Catchment

Distribution and use

Reuse

Outputs

Solid Waste Management

Rainwater

Greywater

Solid waste

Materials

Lightweight Concrete with Addition of Stone Coal (PC)

Calculation of Ecological Footprint

Life Cycle Stage Analysis

Making of materials

Solar Facilities
