Handbook of Trace Evidence Analysis

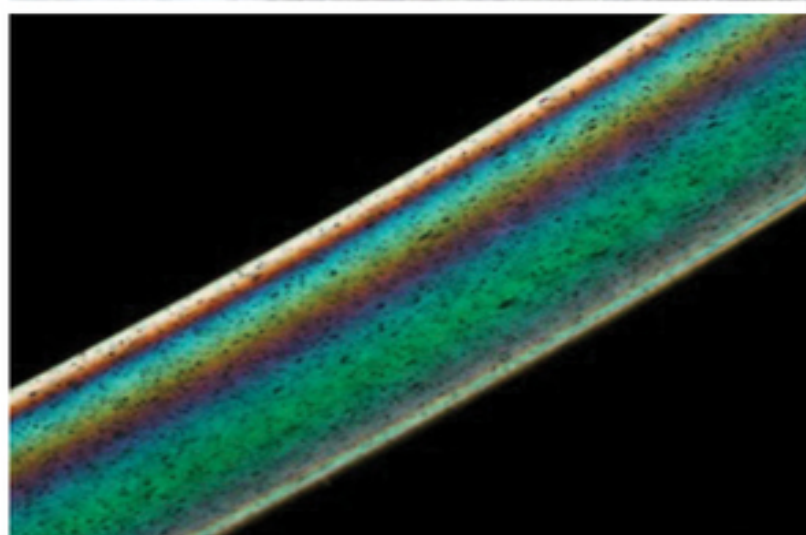

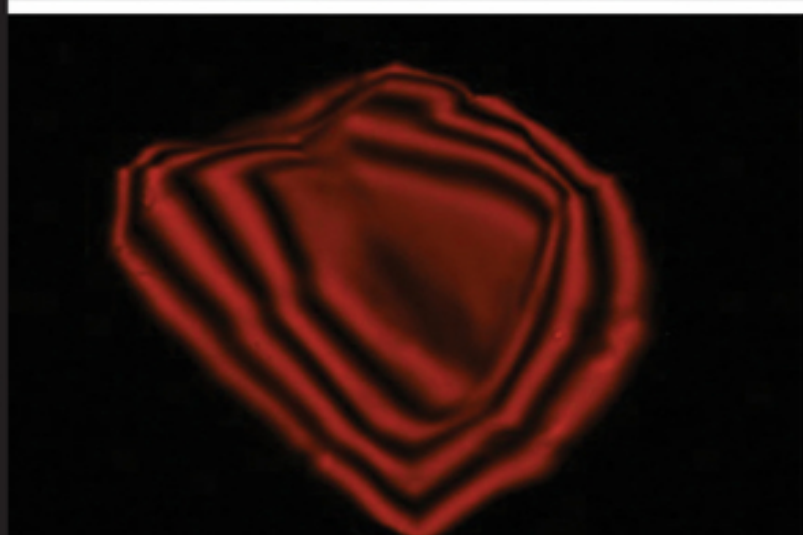

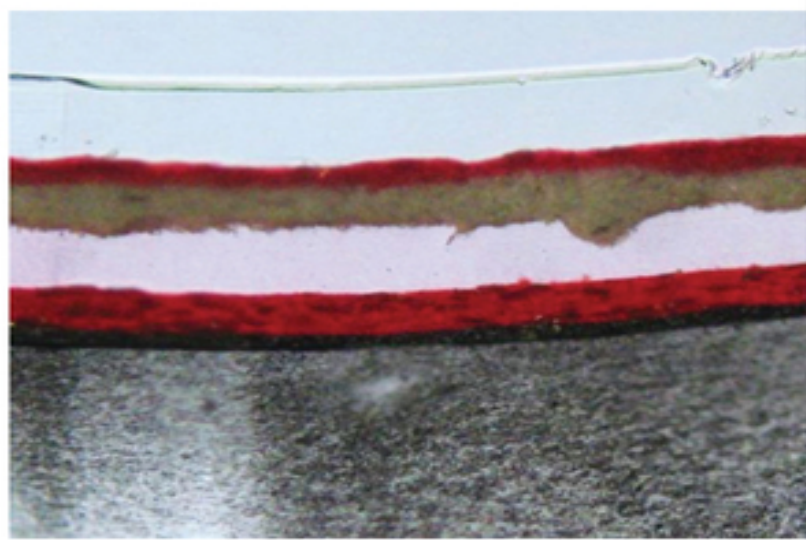

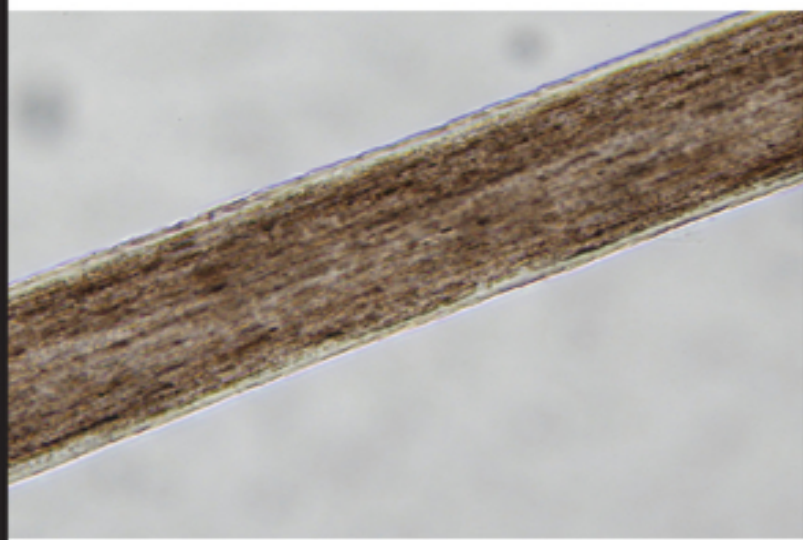

Table of Contents

[Cover](#)

[List of Contributors](#)

[Preface](#)

[1 Trace Evidence Recognition, Collection, and Preservation](#)

[1.1 Introduction](#)

[1.2 Theories of Transfer and Persistence](#)

[1.3 Proper Evidence Handling Practices](#)

[1.4 Recognition, Collection, and Preservation of Trace Evidence at the Crime Scene](#)

[1.5 Recognition, Collection, and Preservation of Trace Evidence in the Laboratory](#)

[1.6 Summary](#)

[Acknowledgments](#)

[References](#)

[Further Reading](#)

[2 Polarized Light Microscopy for the Trace Evidence Examiner](#)

[2.1 Introduction](#)

[2.2 The Nature of Light](#)

[2.3 Light Microscopy](#)

[2.4 Introduction to Crystallography](#)

[2.5 Introduction to Optical Crystallography](#)

[2.6 Measurement of Optical Properties](#)

[2.7 Identification of an Unknown Using Optical Properties](#)

References

3 Paints and Polymers

3.1 Introduction to the Paint and Polymer Discipline

3.2 Overview of Polymer Chemistry

3.3 Overview of Coatings

3.4 Forensic Examination

3.5 Paint Databases

3.6 Interpretation and Report Considerations

References

4 Forensic Hair Microscopy

4.1 Introduction

4.2 Chemistry and Histology

4.3 Physiology

4.4 Collection and Isolation

4.5 General Hair

4.6 Human Hair Examinations

4.7 Human Hair Comparisons

4.8 Transfer and Persistence

4.9 Animal Hair

4.10 Specialized Techniques

4.11 Practical Considerations

4.12 Criticisms

4.13 Summary: The Value of Forensic Hair
Microscopy

References

5 Fibers

5.1 Introduction to Forensic Fiber Analysis

5.2 Fiber Overview

[5.3 Forensic Fiber Examination Background](#)

[5.4 Microscopical Analysis](#)

[5.5 Instrumental Analysis](#)

[5.6 Microscopic Characteristics to Note in Forensic Fiber Examinations](#)

[5.7 Optical Properties](#)

[5.8 Chemistry](#)

[5.9 Forensic Examination](#)

[5.10 Interpretation and Reporting](#)

[5.11 Testimony](#)
