

# ANALYTICS STORIES

USING DATA TO MAKE  
GOOD THINGS HAPPEN

Wayne L. Winston

WILEY

# Table of Contents

[Cover](#)

[About the Author](#)

[About the Technical Editor](#)

[Acknowledgments](#)

[Introduction](#)

[What Happened?](#)

[What Will Happen?](#)

[Why Did It Happen?](#)

[How Do I Make Good Things Happen?](#)

[How to Read This Book](#)

[Reader Support for This Book](#)

[Part I: What Happened?](#)

[CHAPTER 1: Preliminaries](#)

[Basic Concepts in Data Analysis](#)

[What Is a Random Variable?](#)

[Excel Calculations](#)

[CHAPTER 2: Was the 1969 Draft Lottery Fair?](#)

[The Data](#)

[The Analysis](#)

[Excel Calculations](#)

[CHAPTER 3: Who Won the 2000 Election: Bush or Gore?](#)

[Projecting the Undervotes](#)

[What Happened with the Overvotes?](#)

[The Butterfly Did It!](#)

[Excel Calculations](#)

## CHAPTER 4: Was Liverpool Over Barcelona the Greatest Upset in Sports History?

How Should We Rank Upsets?

Leicester Wins the 2015-2016 Premier League

#16 Seed UMBC Beats #1 Seed Virginia

The Jets Win Super Bowl III

Other Big Upsets

## CHAPTER 5: How Did Bernie Madoff Keep His Fund Going?

The Mathematics of Ponzi Schemes

Madoff's Purported Strategy

The Sharpe Ratio Proves Madoff Was a Fraud

Benford's Law and Madoff's Fraud

Excel Calculations

## CHAPTER 6: Is the Lot of the American Worker Improving?

Is U.S. Family Income Skewed?

Median Income and Politics

Causes of Increasing U.S. Income Inequality

Money Isn't Everything: The Human Development Index

Create Your Own Ranking of Well-Being

Are Other Countries Catching Up to the U.S.?

Excel Calculations

## CHAPTER 7: Measuring Income Inequality with the Gini, Palma, and Atkinson Indices

The Gini Index

The Palma Index

The Atkinson Index

[Excel Calculations](#)

[CHAPTER 8: Modeling Relationships Between Two Variables](#)

[Examples of Relationships Between Two Variables](#)

[Finding the Best-Fitting \(Least Squares\) Line](#)

[Computing the Beta of a Stock](#)

[What Is a Good  \$R^2\$ ?](#)

[Correlation and  \$R^2\$](#)

[We Are Not Living in a Linear World](#)

[Excel Calculations](#)

[CHAPTER 9: Intergenerational Mobility](#)

[Absolute Intergenerational Mobility](#)

[Intergenerational Elasticity](#)

[Rank-Rank Mobility](#)

[Comparing IGE and Rank-Rank Mobility](#)

[Measuring Mobility with Quintiles](#)

[The Great Gatsby Curve](#)

[Excel Calculations](#)

[CHAPTER 10: Is Anderson Elementary School a Bad School?](#)

[How Can We Adjust for Family Income?](#)

[Estimating the Least Squares Line](#)

[Can We Compare Standardized Test](#)

[Performance for Students in Different States?](#)

[Excel Calculations](#)

[CHAPTER 11: Value-Added Assessments of Teacher Effectiveness](#)

[Simple Gain Score Assessment](#)

[Covariate Adjustment Assessment](#)

[Layered Assessment Model](#)

[Cross-Classified Constant Growth Assessment](#)

[Problems with VAA](#)

[How Much Is a Good Teacher Worth?](#)

[Excel Calculations](#)

[CHAPTER 12: Berkeley, Buses, Cars, and Planes](#)

[Simpson's Paradox and College Admissions](#)

[The Waiting Time Paradox](#)

[When Is the Average of 40 and 80 Not 60?](#)

[Why Pre COVID Were There Never Empty Seats on My Flight?](#)

[Excel Calculations](#)

[CHAPTER 13: Is Carmelo Anthony a Hall of Famer?](#)

[What Metric Defines Basketball Ability?](#)

[Wins Above Replacement Player \(WARP\)](#)

[Manu, Melo, Dirk, and Dwayne](#)

[How Do 25,000 Points Lead to So Few Wins?](#)

[CHAPTER 14: Was Derek Jeter a Great Fielder?](#)

[Fielding Statistics: The First Hundred Years](#)

[Range Factor](#)

[The Fielding Bible: A Great Leap Forward](#)

[The Next Frontier](#)

[CHAPTER 15: "Drive for Show and Putt for Dough?"](#)

[Strokes Gained](#)

[The Myth Exposed](#)

[CHAPTER 16: What's Wrong with the NFL QB Rating?](#)

[NFL Quarterback Rating](#)

[ESPN's Total Quarterback Rating](#)

[Excel Calculations](#)

[CHAPTER 17: Some Sports Have All the Luck](#)

[Skill vs. Luck: The Key Idea](#)

[The Results](#)

[CHAPTER 18: Gerrymandering](#)

[A Stylized Example](#)

[The Mathematics of Gerrymandering](#)

[CHAPTER 19: Evidence-Based Medicine](#)

[James Lind and Scurvy: The Birth of Evidence-Based Medicine](#)

[The Randomized Streptomycin Tuberculosis Trial](#)

[Excel Calculations](#)

[Hormone Replacement: Good or Bad?](#)

[CHAPTER 20: How Do We Compare Hospitals?](#)

[Ratings Criteria](#)

[Conclusion](#)

[Excel Calculations](#)

[CHAPTER 21: What Is the Worst Health Care Problem in My Country?](#)

[Disability-Adjusted Life Years](#)

[Determination of Disability Weights](#)

[To Age Weight or Discount, That Is the Question](#)

[Key Facts About World Health](#)

[Part II: What Will Happen?](#)

[CHAPTER 22: Does a Mutual Fund's Past Performance Predict Future Performance?](#)

[Mutual Fund Basics](#)

[Morningstar Ratings](#)

[Risk-Adjusting Fund Returns](#)

[How Well Do Morningstar Star Ratings Predict a Fund's Future Performance?](#)

[The Effect of Expense Ratio on Long-Term Performance](#)

[Excel Calculations](#)

[CHAPTER 23: Is Vegas Good at Picking NFL Games?](#)

[How NFL Betting Works](#)

[Bias and Accuracy](#)

[Vegas Forecasts Are Unbiased](#)

[Totals Predictions and Money Line Predictions Are Unbiased](#)

[NFL Accuracy: The Line vs. the Computers](#)

[A System Works Until It Doesn't](#)

[CHAPTER 24: Will My New Hires Be Good Employees?](#)

[What Data Do We Need to Determine Attributes That Best Predict Employee Performance?](#)

[Besides GMA, Not Much Affects Job Performance](#)

[Excel Calculations](#)

[CHAPTER 25: Should I Go to State U or Princeton?](#)

[Analyzing Princeton vs. Penn State](#)

[Excel Calculations](#)

[CHAPTER 26: Will My Favorite Sports Team Be Great Next Year?](#)

[Francis Galton and Regression to the Mean](#)

[Regression to the Mean in the NFL and the NBA](#)

[Excel Calculations](#)

[CHAPTER 27: How Did Central Bankers Fail to Predict the 2008 Recession?](#)

[The Inverted Yield Curve](#)

[The Sahm Rule: Early Warning Signal for Recession](#)

[Control Charts and the Housing Price/Rent Ratio](#)

[Excel Calculations](#)

[CHAPTER 28: How Does Target Know If You're Pregnant?](#)

[What Available Data Can Be Used to Identify Pregnant Women?](#)

[Problems Arise](#)

[An Example of a Pregnancy Prediction Score](#)

[CHAPTER 29: How Does Netflix Recommend Movies and TV Shows?](#)

[User-Based Collaborative Filtering](#)

[Item-Based Filtering](#)

[CHAPTER 30: Can We Predict Heart Attacks in Real Time?](#)

[Posterior Probability](#)

[Sensitivity and Specificity](#)

[ROC Curve](#)

[Back to the Apple Heart Study](#)

[AliveCor and KardiaBand](#)

[CHAPTER 31: Is Proactive Policing Effective?](#)

[Hot Spots Policing](#)

[Predictive Policing](#)

[CCTV](#)

[Stop and Frisk](#)

[Broken Windows](#)

[Excel Calculations](#)

[CHAPTER 32: Guess How Many Are Coming to Dinner?](#)

[Which Parameters Must Be Estimated?](#)

[The Data](#)

[The Results](#)

[Which Factor Really Matters?](#)

[Excel Calculations](#)

[CHAPTER 33: Can Prediction Markets Predict the Future?](#)

[Examples of Trade Contracts](#)

[Prediction Market Trading Mechanisms](#)

[Accuracy of Prediction Markets and Wisdom of Crowds](#)

[CHAPTER 34: The ABCs of Polling](#)

[Why Are 1,112 People Enough to Represent U.S. Voters?](#)

[Why Doesn't a Larger Population Require a Larger Sample Size?](#)

[So, What Can Go Wrong?](#)

[Rating Polls](#)

[CHAPTER 35: How Did Buzzfeed Make the Dress Go Viral?](#)

[Measuring Instagram Engagement](#)

[Tweets Do Not Always Go Viral Immediately](#)

[Do the First Few Days Predict the Future of a Meme?](#)

[CHAPTER 36: Predicting \*Game of Thrones\* TV Ratings](#)

[What Does Google Trends Tell Us?](#)

[Predicting the Present with Google Trends](#)

[Using Google Trends to Forecast GOT Ratings](#)

[Excel Calculations](#)

[Part III: Why Did It Happened?](#)

[CHAPTER 37: Does Smoking Cause Lung Cancer?](#)

[Correlation and Causation Redux](#)

[The Key Evidence](#)

[Could Air Pollution Have Caused Lung Cancer?](#)

[The Cigarette Companies Hit Back](#)

[Excel Calculations](#)

[CHAPTER 38: Why Are the Houston Rockets a Good Basketball Team?](#)

[NBA Shooting Math 101](#)

[Zach LaVine Battles the Bulls' Analytics Department](#)

[Conclusion](#)

[Excel Calculations](#)

[CHAPTER 39: Why Have Sacrifice Bunts and Intentional Walks Nearly Disappeared?](#)

[The Case Against Bunting](#)

[Bunting Against the Shift](#)

[Why Are Intentional Walks on the Decline?](#)

[CHAPTER 40: Do NFL Teams Pass Too Much and Go for It Often Enough on Fourth Down?](#)

[The Ascent of Passing](#)

[Fourth Down Strategy](#)

[New Data Partially Vindicates the Coaches](#)

[Teams Should Go for Two More Often](#)

[CHAPTER 41: What Caused the 1854 London Cholera Outbreak?](#)

[Cholera](#)

[Snow and the Broad Street Pump](#)

[Snow's Randomized Controlled Trial](#)

[Conclusion](#)

[Excel Calculations](#)

[CHAPTER 42: What Affects the Sales of a Retail Product?](#)

[Painter's Tape](#)

[Estimating the Model Parameters](#)

[Excel Calculations](#)

[CHAPTER 43: Why Does the Pareto Principle Explain So Many Things?](#)

[Power Laws](#)

[Why Do Incomes Follow the Pareto Principle?](#)

[Why Do a Few Websites Get Most of the Hits?](#)

[Excel Calculations](#)

[CHAPTER 44: Does Where You Grow Up Matter?](#)

[Quasi-Experimental Design vs. Randomized Controlled Trials](#)

[What Drives Neighborhood Differences in Upward Mobility?](#)

[How Can We Make Things Better?](#)

[CHAPTER 45: The Waiting is the Hardest Part](#)

[Which Factors Influence the Performance of a Queueing System?](#)

[Operating Characteristics of a Queueing System](#)

[How Does Variability Degrade the Performance of a Queueing System?](#)

[Calculating the Operating Characteristics of a Queueing System](#)

[Excel Calculations](#)

[CHAPTER 46: Are Roundabouts a Good Idea?](#)

[What Is a Roundabout?](#)

[History of Roundabouts](#)

[Benefits of Roundabouts](#)

[Disadvantages of Roundabouts](#)

[Roundabout Capacity](#)

[Roundabouts and Revolutions](#)

[CHAPTER 47: Red Light, Green Light, or No Light?](#)

[What Causes Traffic Jams?](#)

[How Should We Set the Lights?](#)

[Ramp Meters and Equity](#)

[Measuring the Impact of Ramp Meters](#)

[The Twin Cities Metering Holiday](#)

[Part IV: How Do I Make Good Things Happen?](#)

[CHAPTER 48: How Can We Improve K-12 Education?](#)

[Tennessee's STAR Study on K-2 Class Size](#)

[Cost-Benefit Analysis](#)

[Can Predictive Analytics Increase Enrollment and Performance in Eighth-Grade Algebra I?](#)

[Excel Calculations](#)

[CHAPTER 49: Can A/B Testing Improve My Website's Performance?](#)

[Improving Obama's Fundraising in 2008](#)

[The Mechanics of Resampling](#)

[Excel Calculations](#)

[CHAPTER 50: How Should I Allocate My Retirement Portfolio?](#)

[The Basic Portfolio Optimization Model](#)

[The Efficient Frontier](#)

[Difficulties in Implementing the Markowitz Model](#)

[Excel Calculations](#)

[CHAPTER 51: How Do Hedge Funds Work?](#)

[Growth in Hedge Funds and Hedge Fund Fee Structure](#)

[Shorting a Stock](#)

[Long/Short and Market-Neutral Strategies](#)

[Convertible Arbitrage](#)

[Merger Arbitrage](#)

[Global Macro Strategy](#)

[Hedge Fund Performance](#)

[The George Costanza Portfolio](#)

[Excel Calculations](#)

[CHAPTER 52: How Much Should We Order and When Should We Order?](#)

[The Economic Order Quantity Model](#)

[Reorder Points, Service Levels, and Safety Stock](#)

[Excel Calculations](#)

[CHAPTER 53: How Does the UPS Driver Know the Order to Deliver Packages?](#)

[Why Is the Traveling Salesperson Problem So Hard?](#)

[Solving the Traveling Salesperson Problem](#)

[The Traveling Salesperson Problem in the Real World](#)

[Excel Calculations](#)

[CHAPTER 54: Can Data Win a Presidential Election?](#)

[Democratic Presidential Analytics](#)

[The GOP Strikes Back](#)

[Cambridge Analytica and the 2016 Election](#)

[Excel Calculations](#)

[CHAPTER 55: Can Analytics Save Our Republic?](#)

[Arrow's Impossibility Theorem](#)

[It's Not Easy to Pick a Winner!](#)

[Ranked-Choice Voting](#)

[Approval Voting](#)

[Quadratic Voting](#)

[Excel Calculations](#)

[CHAPTER 56: Why Do I Pay Too Much on eBay?](#)

[How Many Pennies in the Jar?](#)

[The Importance of Asymmetric Information](#)

[The Winner's Curse and Offshore Oil Leases](#)

[Sports Free Agents and the Winner's Curse](#)

[Can You Avoid the Winner's Curse?](#)

[Excel Calculations](#)

[CHAPTER 57: Can Analytics Recognize, Predict, or Write a Hit Song?](#)

[How Does Shazam Know What Song You Are Listening To?](#)

[How Did Hit Song Science Know Norah Jones's Album Would Be a Smash?](#)

[Can Artificial Intelligence Write a Good Song?](#)

[CHAPTER 58: Can an Algorithm Improve Parole Decisions?](#)

[An Example of Risk Scores](#)

[ProPublica Criticizes Risk Scores](#)

[Skeem and Lowenkamp and PCRA](#)

[Machine Learning and Parole Decisions](#)

[CHAPTER 59: How Do Baseball Teams Decide Where to Shift Fielders?](#)

[The Debut of the Shift](#)

[The Return of the Shift](#)

[Empirical Evidence on the Shift](#)

[Why Not Just Beat the Shift?](#)

[Excel Calculations](#)

[CHAPTER 60: Did Analytics Help the Mavericks Win the 2011 NBA Title?](#)

[How Can You Evaluate a Basketball Player?](#)

[From Player Ratings to Lineup Ratings](#)

[CHAPTER 61: Who Gets the House in the Hamptons?](#)

[The Basic Idea](#)

[What Asset Division Is Best?](#)

[Excel Calculations](#)

[Index](#)

[End User License Agreement](#)

# List of Tables

## Chapter 6

[Table 6.1: Real household median income 1977-1980](#)

[Table 6.2: Median income 2007-2012](#)

## Chapter 8

[Table 8.1: Examples of relationships between two variables](#)

[Table 8.2: Galton height correlations](#)

[Table 8.3: Product elasticities](#)

## Chapter 11

[Table 11.1: Teacher adjusted gains](#)

[Table 11.2: Final teacher ratings](#)

## Chapter 13

[Table 13.1: WARP based on minutes and RPM](#)

[Table 13.2: WARP during peak years](#)

[Table 13.3: Shooting stats for 2018-2019 NBA, Manu and Melo](#)

## Chapter 14

[Table 14.1: Jeter and league average fielding percentages](#)

[Table 14.2: Jeter's range factors](#)

[Table 14.3: Jeter's runs above or below average](#)

## Chapter 15

[Table 15.1: Example of strokes gained](#)

## Chapter 16

[Table 16.1: Examples of points gained](#)

Chapter 17

[Table 17.1: Skill vs. luck](#)

Chapter 18

[Table 18.1: Fraction of incumbent House members winning reelection](#)

Chapter 20

[Table 20.1: Medicare weightings for star ratings](#)

[Table 20.2: Distribution of Medicare.gov star ratings](#)

Chapter 21

[Table 21.1: 2010 Disability Weights](#)

[Table 21.2: Percentage of 2010 DALYs by Major Cause](#)

Chapter 22

[Table 22-1: Ten-year average Morningstar ratings](#)

Chapter 24

[Table 24.1: Correlation between selection procedures and job performance](#)

Chapter 27

[Table 27.1: Inverted yield curve signaling a recession](#)

[Table 27.2: Comparison of Sahm predictions to actual start date of recessions](#)

[Table 27.3: Tests for out-of-control process](#)

Chapter 28

[Table 28.1: Examples of logistic regression](#)

## Chapter 30

[Table 30.1: 2 × 2 Contingency table for hypothetical disease test](#)

[Table 30.2: 2 × 2 Contingency table for Apple Heart Study](#)

[Table 30.3: Examples of sensitivity and specificity](#)

## Chapter 31

[Table 31.1: Disparate impact of SQF on blacks based on different population defin...](#)

## Chapter 32

[Table 32.1: Parameters needed to predict Super Bowl Sunday customer count](#)

[Table 32.2: Factors that most affect our forecasts](#)

## Chapter 33

[Table 33.1: Examples of prediction market contracts](#)

## Chapter 40

[Table 40.1: Expected points added on fourth and 1](#)

## Chapter 44

[Table 44.1: Effect on Anna's income based on age she moves](#)

[Table 44.2: Results of housing voucher study](#)

## Chapter 46

[Table 46.1: Improvement in Traffic Congestion Due to Roundabouts](#)

[Table 46.2: Arrivals to a Roundabout](#)

## Chapter 49

[Table 49.1: Examples of A/B tests](#)

## Chapter 51

[Table 51.1: Stock market scenarios for long/short strategy](#)

[Table 51.2: Returns from long/short strategy](#)

[Table 51.3: Scenario returns on convertible bonds and stocks](#)

[Table 51.4: George's maxmin portfolio](#)

## Chapter 52

[Table 52.1: Examples of service level and reorder point](#)

## Chapter 53

[Table 53.1: All tours for 4-city TSP](#)

[Table 53.2: Two tours breed a "child"](#)

## Chapter 55

[Table 55.1: Five candidates, six results](#)

[Table 55.2: Ranked voting example](#)

[Table 55.3: No Condorcet winner](#)

## Chapter 57

[Table 57.1: Probability Mass Function for Next Chord After an F](#)

## Chapter 58

[Table 58.1: Average prediction for chance of crime vs. actual crime percentage](#)

[Table 58.2: Logistic regression confusion matrix](#)

[Table 58.3: Random forest confusion matrix](#)

## Chapter 60

[Table 60.1: Top 5 NBA Players 2000–2009](#)

[Table 60.2: Top 5 NBA Players 2010–2019](#)

## List of Illustrations

### Chapter 1

[Figure 1.1: U.S. state populations](#)

[Figure 1.2: Heights of 200 adult U.S. women](#)

[Figure 1.3: Histogram of state populations](#)

[Figure 1.4: Histogram of women's heights](#)

[Figure 1.5: Histogram of annual investment returns](#)

[Figure 1.6: PDF for height of American woman](#)

[Figure 1.7: Chance of winning the Super Bowl](#)

[Figure 1.8: Statistical chart icon](#)

[Figure 1.9: Histogram chart icon](#)

[Figure 1.10: Settings for histogram bin ranges](#)

[Figure 1.11: Computing descriptive statistics](#)

### Chapter 2

[Figure 2.1: Average draft lottery number by month](#)

[Figure 2.2: Results of two-sample Z-test](#)

[Figure 2.3: Computing average lottery number by month](#)

[Figure 2.4: Settings for two-sample t-test](#)

### Chapter 3

[Figure 3.1: The butterfly ballot](#)

[Figure 3.2: Predicting Buchanan vote from Perot vote using all counties](#)

[Figure 3.3: Predicting Buchanan vote from Perot vote omitting Palm Beach Cou...](#)

## Chapter 4

[Figure 4.1: 2015-2016 Premier League Odds](#)

## Chapter 5

[Figure 5.1: Ponzi scheme model](#)

[Figure 5.2: Benford's law for country populations](#)

[Figure 5.3: Benford's law and Madoff returns](#)

## Chapter 6

[Figure 6.1: Trends in U.S. income inequality.](#)

[Figure 6.2: HDI indices 1980-2017](#)

[Figure 6.3: Attribute ranks for ranking countries](#)

[Figure 6-4: Ratio of national mean incomes to U.S.](#)

## Chapter 7

[Figure 7.1: Data for computing the Gini index](#)

[Figure 7.2: Gini index chart when income is proportional to n](#)

[Figure 7.3: Gini index chart with complete inequality](#)

[Figure 7.4: 2020 Gini indices](#)

[Figure 7.5 : The Palma index 2014-2015](#)

[Figure 7.6: Computation of the Atkinson index](#)

## Chapter 8

[Figure 8.1: Least squares line for demand](#)

[Figure 8.2: Betas July 2019](#)

[Figure 8.3: Beta Madoff returns](#)

[Figure 8.4: Galton height data](#)

[Figure 8.5: Estimating a power curve](#)

[Figure 8.6: Using array formulas to compute Galton correlations](#)

## Chapter 9

[Figure 9.1: Median income for parent and child, birth year 1940-1980](#)

[Figure 9.2: IGE and rank-rank mobility for an unequal immobile society](#)

[Figure 9.3: IGE and rank-rank mobility for an equalized immobile society](#)

[Figure 9.4: IGE and rank-rank mobility for an unequal mobile society](#)

[Figure 9.5: U.S. intergenerational mobility quintile chart](#)

[Figure 9.6: The Great Gatsby Curve](#)

[Figure 9.7: Mankiw's rebuttal to the Gatsby Curve](#)

## Chapter 11

[Figure 11.1: Example of simple gain score model](#)

[Figure 11.2: Cross-classified growth model](#)

## Chapter 12

[Figure 12.1: Overall admission rate by gender](#)

[Figure 12.2: Overall admission rate by major and gender](#)

[Figure 12.3: Overall fraction by gender, applying to each major](#)

## Chapter 16

[Figure 16.1: 2018 NFL QB statistics](#)

[Figure 16.2: NFL QB rating regression output](#)

[Figure 16.3: Expected points per passing attempt](#)

[Figure 16.4: 2018 ESPN QBR ratings](#)

## Chapter 17

[Figure 17.1: A lot of luck](#)

[Figure 17.2: Not much luck](#)

## Chapter 18

[Figure 18.1: North Carolina's 12th district](#)

[Figure 18.2: Fifteen voter distribution in  
Gerryberry.](#)

[Figure 18.3: Democrats win six seats in Gerryberry.](#)

[Figure 18.4: Actual North Carolina congressional  
districts](#)

[Figure 18.5: Math alternative to North Carolina  
congressional district bound...](#)

[Figure 18.6: Generating random maps](#)

[Figure 18.7: Three measures of compactness](#)

[Figure 18.8: Population equality.](#)

## Chapter 19

[Figure 19.1: Shuffling the 19 deaths among the  
streptomycin and bed rest gro...](#)

[Figure 19.2: Counting times  \$\leq 4\$  deaths in  
streptomycin group](#)

## Chapter 20

[Figure 20.1: ER is better than CH](#)

[Figure 20.2: Bloomington, IN hospital performance  
on hip and knee replacemen...](#)

[Figure 20.3: Bloomington, IN hospital ratings](#)

## Chapter 21

[Figure 21.1: Age weighting curve for DALY](#)

[Figure 21.2: DALY, YLL, and YLD by region \(2004\)](#)

[Figure 21.3: Causes of DALY in El Salvador during 2017](#)

## Chapter 22

[Figure 22-1: Morningstar data on MGIAX fund](#)

[Figure 22-2: Data on Renaissance Medallion Fund 2000-2018](#)

[Figure 22-3: Computation of the Sortino ratio](#)

[Figure 22-4: Obtaining stock betas with Office 365](#)

[Figure 22-5: Morningstar ratings in 3 years](#)

[Figure 22-6:](#)

[Figure 22-7: Dependence of final 30-year cash position on annual expense rat...](#)

[Figure 22-8: Fraction of funds experiencing a net outflow during a three-yea...](#)

## Chapter 23

[Figure 23-1: Using a normal random variable to estimate the chance the Patri...](#)

[Figure 23-2: Example of forecast accuracy and bias](#)

[Figure 23-3: Calculation of NFL forecast bias in predicting game margins](#)

[Figure 23-4: Analysis of Vegas bias as a function of point spread](#)

## Chapter 24

[Figure 24.1: The restricted range problem](#)

[Figure 24.2: Cancer example of meta-analysis](#)

## Chapter 25

[Figure 25.1: Data on Princeton and Penn State graduates](#)

[Figure 25.2: Average salaries and SAT scores of PSU and Princeton graduates...](#)

[Figure 25.3: Average salaries and SAT scores of students accepted to PSU and...](#)

## Chapter 26

[Figure 26.1: Galton's correlations](#)

[Figure 26.2: NFL regression to the mean](#)

[Figure 26.3: NBA regression to the mean](#)

## Chapter 27

[Figure 27.1: 1987 Housing and rent indices](#)

[Figure 27.2: June-October 2002 HRR indicating a housing price bubble](#)

[Figure 27.3: Conditional formatting rule for highlighting a row if more than...](#)

[Figure 27.4: Conditional formatting rule highlighting a row if at least 4 of...](#)

## Chapter 28

[Figure 28.1: Subset of fictitious Target data set](#)

[Figure 28.2: Logistic prediction of women being in second trimester of pregn...](#)

[Figure 28.3: The chance a woman is in second trimester of pregnancy given lo...](#)

## Chapter 29

[Figure 29.1: Movie ratings](#)

[Figure 29.2: User similarities](#)

[Figure 29.3: Estimating Theresa's user-based rating for \*Still Alice\*](#)

[Figure 29.4: Item correlations](#)

[Figure 29.5: Calculation of estimate for Theresa's item-based rating of \*Stil...\*](#)

## Chapter 30

[Figure 30.1: Examples of ROC curves](#)

[Figure 30.2: ROC curve for PSA test](#)

[Figure 30.3: Subset of PSA data](#)

## Chapter 31

[Figure 31.1: Hot spots changes in crime rate](#)

[Figure 31.2: Dialog box for two-sample z-Test](#)

## Chapter 32

[Figure 32.1: Estimates of dinner forecast parameters](#)

[Figure 32.2: Dinner data and forecasts](#)

[Figure 32.3: Solver settings for forecast model](#)

## Chapter 34

[Figure 34.1: Illustrating a political poll](#)

## Chapter 35

[Figure 35.1: Searches for Internet memes during the first three and four day...](#)

## Chapter 36

[Figure 36.1: Google Trends results for Taylor Swift and Meghan Markle](#)

[Figure 36.2: GOT web searches and ratings](#)

[Figure 36.3: Prediction equation for GOT ratings based on web searches](#)

## Chapter 38

[Figure 38.1: Trends in NBA 3-point shooting](#)

[Figure 38.2: 2017-2018 NBA shooting](#)

[Figure 38.3: Zach LaVine's shooting statistics](#)

## Chapter 39

[Figure 39.1: SH, IBB, and HR trends: 1995-2019](#)

[Figure 39.2: 2019 run expectancy matrix](#)

## Chapter 40

[Figure 40.1: Fraction of pass plays](#)

[Figure 40.2: Average points added on rushing and passing attempts 2015-2019...](#)

[Figure 40.3: Chance of going for first down and converting on fourth down ba...](#)

## Chapter 41

[Figure 41.1: Location of 1854 cholera deaths](#)

[Figure 41.2: Deaths by closest pump](#)

## Chapter 42

[Figure 42.1: Painter's tape data](#)

[Figure 42.2: Optimal painter's tape parameters](#)

[Figure 42.3: Solver Parameters dialog box settings](#)

## Chapter 43

[Figure 43.1: Probability customer buys between 1 and 20 units](#)

[Figure 43.2: Pareto chart for units bought by 100 customers](#)

[Figure 43.3: Rank \\* Population for five largest U.S. cities](#)

[Figure 43.4: Chance SN1 beats out SN2](#)

## Chapter 45

[Figure 45.1: Queueing calculator](#)

[Figure 45.2: Interarrival time and service time data](#)

[Figure 45.3: Sensitivity of L and W to number of servers](#)

## Chapter 46

[Figure 46.1: A roundabout in Carmel, Indiana](#)

## Chapter 48

[Figure 48.1: PISA math scores](#)

[Figure 48.2: PISA reading scores](#)

[Figure 48.3: Primary education spending\\_\(2015\).](#)

[Figure 48.4: Secondary education spending\\_\(2015\).](#)

[Figure 48.5: Example of NPV and IRR](#)

[Figure 48.6: Cost-benefit analysis of smaller classes](#)

## Chapter 49

[Figure 49.1: Obama donation results](#)

[Figure 49.2: Results of A/B/C Obama website test](#)

[Figure 49.3: One iteration of resampling](#)

[Figure 49.4: 1,000 iterations of resampling](#)

## Chapter 50

[Figure 50.1: Portfolio optimization model: trial solution](#)

[Figure 50.2: Correlation matrix: trial solution](#)

[Figure 50.3: Portfolio optimization model: optimal solution](#)

[Figure 50.4: Efficient frontier](#)

[Figure 50.5: Optimal asset allocation](#)

[Figure 50.6: Solver model for portfolio optimization](#)

## Chapter 51

[Figure 51.1: Analysis of convertible bond arbitrage](#)

[Figure 51.2: George Costanza 6% portfolio](#)

[Figure 51.3: Solver Parameters dialog box for George Costanza's 6% portfolio...](#)

## Chapter 52

[Figure 52.1: Computation of EOQ](#)

[Figure 52.2: The Power of Two Rule](#)

[Figure 52.3: Computation of reorder point for 95% service level](#)

[Figure 52.4: Evolution of inventory for  \$Q = 1,000\$](#)

[Figure 52.5: Solver settings](#)

## Chapter 53

[Figure 53.1: Number of tours as a function of number of cities](#)

[Figure 53.2: Solution to NBA TSP](#)

[Figure 53.3: Starting solution to NBA TSP](#)

[Figure 53.4: Solver settings for NBA TSP](#)

## Chapter 54

[Figure 54.1: Data to predict whether a person is a Democrat](#)

[Figure 54.2: Solver settings for logistic regression](#)

## Chapter 55

[Figure 55.1: Candidate D wins by Borda count](#)

## Chapter 56

[Figure 56.1: Avoiding the winner's curse](#)

[Figure 56.2: Bidding \\$82 maximizes expected profit.](#)

## Chapter 58

[Figure 58.1: Calculation of risk scores with logistic regression](#)

[Figure 58.2: Risk score bias vs. risk score](#)

[Figure 58.3: Age at first arrest and number of arrests by race](#)

[Figure 58.4: Actual ProPublica data](#)

[Figure 58.5: Example of classification tree](#)

## Chapter 59

[Figure 59.1: Comparison of the shift and normal fielding alignments](#)

[Figure 59.2: The power of the shift](#)

[Figure 59.3: Not shifting fails](#)

[Figure 59.4: Solver parameters for optimal shift](#)

## Chapter 61

[Figure 61.1: Denny and Irene's assets](#)

[Figure 61.2: A better division](#)
