About the Authors	xliv

PART 1

Ethics Regulations and ESG

CHAPTER 1

Asset Manager Code	3
1.1 General Principles of Conduct	3
1.2 Asset Manager Code	3
1.3 Notification of Compliance	5
1.4 Additional Guidance for the Asset Manager Code	6
1.4.1 Defining a Firm	6
1.4.2 Claiming Compliance	6
1.4.3 Suitability	6
1.4.4 Protecting Client Interests	7
1.4.5 Best Execution	7
1.4.6 Third-Party Confirmation of Client Information	7
1.4.7 Risk Management	8
1.4.8 Valuation of Assets	8
1.4.9 Disclosures	8
1.4.10 Soft Dollars	8
1.4.11 Investment Process	9
1.4.12 Additional Q&As	9

CHAPTER 2

Recommendations and Guidance	11
-------------------------------------	-----------

CHAPTER 3

Global Regulation	27
3.1 Overview of Financial Market Regulation	27
3.1.1 Theories of Regulation	27
3.1.2 Principles of Securities Economic Regulation	27
3.1.3 Importance of Regulation to Some Trading Strategies	28

3.2	Regulation of Alternative Investments Within the United States	28
3.2.1	Overview of Regulatory Bodies in the US	28
3.2.2	Regulatory Framework	29
3.2.3	Regulation of Private Funds: Registration as an Investment Adviser	30
3.2.4	Regulation of Private Funds: Investment Adviser Obligations	32
3.2.5	Hedge Fund Registration in the United States	33
3.2.6	Public Securities, Private Securities, and Securities Act Registration	34
3.2.7	Investment Company Act Registration	34
3.2.8	Compliance Culture and the Role of the Chief Compliance Officer	35
3.2.9	Review of Marketing Materials	36
3.2.10	SEC Exams	36
3.2.11	Reporting Requirements	36
3.3	Alternative Investment Regulation in Europe	38
3.3.1	An Overview of the Supervisory Framework	38
3.3.2	The European Regulatory Framework	39
3.3.3	Registration and Exemptions in European Regulation	40
3.3.4	Disclosures and Marketing	41
3.3.5	Formal Risk Management	41
3.3.6	Required Reporting in European Regulation	42
3.3.7	Legal Structures	43
3.3.8	Enforcement of European Regulation	43
3.3.9	Non-EU Managers in Europe	44
3.4	Hedge Fund Regulation in Asia	45
3.4.1	Hong Kong	45
3.4.2	Singapore	46
3.4.3	South Korea	47
3.4.4	Japan	47

CHAPTER 4

ESG and Alternative Investments

4.1	Background on ESG and Alternative Investing	49
4.1.1	Growth in Alternatives Assets	49
4.1.2	ESG and Institutional Investors	49
4.1.3	ESG Challenges	50
4.2	ESG and Real Assets: Natural Resources	51
4.2.1	Natural Resources and Environmental Issues	51
4.2.2	Natural Resources and Social Issues	52
4.2.3	Natural Resources and Governance Issues	53
4.3	ESG and Real Assets: Commodities	53
4.3.1	Commodity Derivatives and Speculation	53
4.3.2	Commodity Speculation and Volatility	54
4.3.3	Physical Commodities and ESG	54
4.4	ESG and Real Assets: Real Estate	55
4.4.1	Real Estate Development and ESG	55
4.4.2	Real Estate Use and ESG	56

4.4.3	ESG Issues in the Treatment of Tenants, Community, and Workers	58
4.4.4	ESG Issues in Recovery and Disposal	59
4.4.5	ESG Issues in Refurbishment and Retro-fitting	60
4.4.6	Waste Management, Resource Conservation, and Recycling During Demolition	60
4.4.7	Land Recovery and Rehabilitation	61
4.5	ESG and Hedge Funds	61
4.5.1	Hedge Fund Investment Strategies and ESG	61
4.5.2	Hedge Fund Governance and ESG	62
4.5.3	Hedge Fund Transparency and ESG	62
4.5.4	Hedge Fund Investment Techniques and Instruments and ESG	63
4.5.5	Hedge Fund Strategies and Underlying Investments	65
4.5.6	Hedge Fund Strategies and Activism	65
4.5.7	Hedge Fund Strategies and Avoidance	66
4.6	ESG and Private Equity	66
4.6.1	ESG within a Partnership Organization and the GP–LP Relationship	66
4.6.2	ESG and the Private Equity Investment Process	67
4.6.3	ESG and the Monitoring Process	68

CHAPTER 5

	ESG Analysis and Application	71
5.1	Background on ESG	71
5.1.1	History of ESG	71
5.1.2	The Global Reporting Initiative (GRI) Standards	71
5.1.3	Social Responsibility, ESG, and Evidence Regarding Stakeholder Wealth	72
5.2	ESG Ratings and Scores	73
5.3	ESG Materiality and Disclosure	74
5.3.1	ESG Materiality, ESG Disclosure, and the Global Reporting Initiative	74
5.3.2	A Framework for ESG Materiality Assessment	75
5.3.3	ESG Materiality Maps	75
5.3.4	ESG Materiality Measurement	76
5.4	The United Nations Role in ESG Issues	76
5.4.1	The Six Principles for Responsible Investment (PRI)	77
5.4.2	The Sustainable Development Goals (SDGs)	77
5.5	ESG Fiduciary Responsibilities and Regulation	78
5.5.1	ESG and Fiduciary Responsibilities in the US	78
5.5.2	ESG and Fiduciary Responsibilities in Europe	79
5.5.3	ESG and Fiduciary Responsibilities in Asia	79
5.5.4	ESG Compliance and Risk Management for Asset Managers	80
5.6	Methods of ESG Investing	80
5.6.1	Negative versus Positive Screening	80
5.6.2	Engagement and Proxy Voting	81

5.6.3	Impact Investing	81
5.6.3.1	Two Categories Of Impact Investments	82
5.6.3.2	The Five Steps of Implementing Impact Investing	83
5.6.3.3	Evidence from Research on Impact Investing in Illiquid Investments	84
5.7	Market-Based Methods of Addressing ESG Issues	85
5.7.1	Background on Externalities and Markets	86
5.7.2	The Coase Theorem	86
5.7.3	Cap and Trade Programs	87
5.8	ESG and Special Investment Consideration	87
5.8.1	Special Consideration, Cash Flows, Returns, and Risk	87
5.8.2	The Case for Special Consideration of ESG Issues	87
5.8.3	The Case Against Special Consideration of ESG Issues	88

PART 2

Models

CHAPTER 6

Modeling Overview and Interest Rate Models

93

6.1	Types of Models Underlying Investment Strategies	93
6.1.1	Normative Strategies versus Positive Strategies	93
6.1.2	Theoretical versus Empirical Approaches	94
6.1.3	Applied versus Abstract Approaches	95
6.1.4	Cross-Sectional versus Time-Series Approaches	95
6.1.5	Importance of Methodology	96
6.2	Equilibrium Fixed-Income Models	96
6.2.1	Vasicek's Short-Term Interest Rate Process	96
6.2.2	Vasicek's Model and Expected Interest Rates	97
6.2.3	Vasicek's Model and the Term Structure of Interest Rates	98
6.2.4	Robustness of Vasicek's Model of the Term Structure of Interest Rates	98
6.2.5	The Cox, Ingersoll, and Ross Model of Interest Rates	99
6.3	Arbitrage-Free Models of the Term Structure	99
6.3.1	Overview of Arbitrage-Free Interest Rate Models	99
6.3.2	A Single-Factor Arbitrage-Free Model of Interest Rates	99
6.3.3	The Ho and Lee Model in a Binomial Framework	100
6.3.4	Evaluation of the Ho and Lee Model of Interest Rates	100
6.4	The Black–Derman–Toy Model	100
6.4.1	Evolution of a Binomial BDT Tree	101
6.4.2	Calibrating the Level of Rates Based on Average Returns	101
6.4.3	Calibrating the Spread of Rates Based on Volatilities	102
6.4.4	Summary of BDT Calibration	103
6.5	P-Measures and Q-Measures	103

CHAPTER 7

Credit Risk Models

105

7.1	The Economics of Credit Risk	105
7.1.1	Adverse Selection and Credit Risk	106
7.1.2	Moral Hazard and Credit Risk	106

7.1.3	Probability of Default	107
7.1.4	Expected Credit Loss	107
7.2	Overview of Credit Risk Modeling	109
7.3	The Merton Model	110
7.3.1	Capital Structure in the Merton Model	110
7.3.2	The Merton Model and the Black–Scholes Option Pricing Model	110
7.3.3	The Role of the Credit Spread in the Structural Model	111
7.3.4	Evaluation of the Merton Model	112
7.3.5	Four Important Properties of the Merton Model	112
7.4	Other Structural Models: KMV	117
7.4.1	Overview of the KMV Credit Risk Model	117
7.4.2	Using the KMV Model to Estimate a Credit Score	118
7.4.3	Using the KMV Model to Estimate an Expected Default Frequency	119
7.5	Reduced-Form Models	120
7.5.1	Default Intensity in Reduced-Form Models	120
7.5.2	Default Intensity and the Probabilities of Default	120
7.5.3	Valuing Risky Debt with Default Intensity	121
7.5.4	Relating the Credit Spread to Default Intensity and the Recovery Rate	122
7.5.5	The Two Predominant Reduced-Form Credit Models	123
7.6	Empirical Credit Models	123
7.6.1	Two Features of Empirical Credit Models	123
7.6.2	The Purpose of Altman’s Z-Score Model	124
7.6.3	The Five Determinants of Altman’s Z-Scores	124
7.6.4	Solving for the Z-Score in Altman’s Credit Scoring Model	125
7.6.5	Interpreting Z-Scores in Altman’s Credit Scoring Model	125

CHAPTER 8

	Multi-Factor Equity Pricing Models	127
8.1	Multi-Factor Asset Pricing Models	127
8.1.1	Multi-factor Asset Pricing	127
8.1.2	Asset Factors and the Role of Marginal Investor Utility in the CAPM	128
8.1.3	Multiple Factors and “Bad Times”	128
8.1.4	Factors Based on Expected Utility or Anomalies	129
8.1.5	Three Major Categories of Factors	129
8.1.6	Theoretically versus Empirically Derived Multifactor Return Models	129
8.1.7	Fundamentals of Empirical Models	130
8.1.8	The Tradability of Factors and the Intercept	130
8.2	FAMA–French Models	131
8.2.1	The Original Fama–French Model	131
8.2.2	The Fama–French–Carhart Model	131
8.2.3	Models with Numerous Factors	132
8.3	Three Challenges of Empirical Multi-Factor Models	133
8.3.1	False Identification of Factors	133
8.3.2	Factor Return Correlation versus Causation	134
8.3.3	Why the CAPM May Not Be Sufficient	134

8.4	Factor Investing	135
8.4.1	The Emergence of Return Factor Analysis and Three Important Observations	135
8.4.2	How Return Factors Are Described	136
8.4.3	Risk Premiums Vary across Return Factors	138
8.4.4	Factor Returns Vary across Market Conditions	138
8.4.5	Return Factors and Investability	139
8.4.6	Risk Allocation Based on Return Factors	140
8.4.7	Performance with Allocations Based on Return Factors	140
8.5	The Adaptive Markets Hypothesis	141
8.6	Time-Varying Volatility	142
8.6.1	Equity Market Volatility is Predictable	142
8.6.2	Volatility is Negatively Correlated with Average Returns	142
8.6.3	Time-Varying Volatility and Multiple Factors	143
8.6.4	Time-Varying Volatility and Higher Moments	143
8.7	Stochastic Discount Factors	143
8.7.1	Traditional Discount Factors	144
8.7.2	Stochastic Discount Factors Example	144
8.7.3	Stochastic Discount Factors Present Value Formula	144
8.7.4	The Importance of Stochastic Discount Factors	145
8.8	Summary of Multiple-Factor Asset Allocation	145

CHAPTER 9

	Asset Allocation Processes and the Mean-Variance Model	147
9.1	Asset Allocation Processes and the Mean-Variance Model	147
9.1.1	Origin of Mean-Variance Optimization	147
9.1.2	The Tradeoff Between Expected Return and Volatility	148
9.1.3	Evaluating Risk and Return with Utility	149
9.1.4	Risk Aversion and the Shape of the Utility Function	150
9.1.5	Expressing Utility Functions in Terms of Expected Return and Variance	151
9.1.6	Expressing Utility Functions with Higher Moments	152
9.1.7	Expressing Utility Functions with Value at Risk	153
9.1.8	Finding Investor Risk Aversion from the Asset Allocation Decision	153
9.1.9	Managing Assets with Risk Aversion and Growing Liabilities	155
9.2	Implementation of Mean-Variance Optimization	155
9.2.1	Mean-Variance Optimization	155
9.2.2	Mean-Variance Optimization with a Risky and Riskless Asset	157
9.2.3	Mean-Variance Optimization with Growing Liabilities	157
9.2.4	Mean-Variance Optimization and λ	158
9.3	Mean-Variance Optimization with Multiple Risky Assets	160
9.3.1	A Riskless Asset and the Linearity of Efficient Frontier	160
9.3.2	A Riskless Asset with Multiple Risky Assets	160
9.3.3	Unconstrained Optimization and Unrealistic Weights	161
9.4	Mean-Variance Optimization and Hurdle Rates	162

9.5	Issues in Using Optimization for Portfolio Selection	163
9.5.1	Optimizers as Error Maximizers	163
9.5.2	Portfolio Optimization and Smoothing of Illiquid Returns	164
9.5.3	Data Issues for Large-Scale Optimization	165
9.5.4	Mean-Variance Ignores Higher Moments	165
9.5.5	Three Ways to Address Skewness and Kurtosis	166
9.6	Adjustment of the Mean-Variance Approach for Illiquidity	166
9.6.1	The Liquidity Penalty Function	166
9.6.2	Examples of Adjusting for Illiquidity	167
9.6.3	Takeaway Points on Illiquidity Adjustments	167
9.7	Adjustment of the Mean-Variance Approach for Factor Exposure	168
9.8	Mitigating Estimation Error Risk in Mean-Variance Optimization	168
9.8.1	Estimation Error Risk Reduction through Objective Measures of Estimation Error Risk	169
9.8.2	Resampling to Reduce the Effect of Estimation Error	169
9.8.3	Shrinkage to Reduce the Effect of Estimation Error	170
9.8.4	Mean-Variance Optimization and the Black–Litterman Approach	172
9.8.5	Mean-Variance Optimization and the Use Of Constraints	172

CHAPTER 10

	Other Asset Allocation Approaches	175
10.1	The Core–Satellite Approach	175
10.2	Top-Down and Bottom-Up Asset Allocation Approaches	176
10.2.1	Overview of Bottom-Up and Top-Down Approaches	176
10.2.2	Bottom-Up Approach	176
10.2.3	Top-Down Approach	177
10.2.4	Mixed Approach	177
10.3	Risk Budgeting	178
10.3.1	Overview of Risk Budgeting	178
10.3.2	Specifications in Risk Budgeting	179
10.3.3	Defining Risk in Risk Budgeting and Risk Buckets	179
10.3.4	Defining an Objective to Obtain a Unique Solution	180
10.3.5	Including Correlations and Viewing Marginal Risks	180
10.3.6	Including Expected Returns with Risk Budgeting	180
10.4	A Factor-Based Example of Implementing A Risk Budgeting Approach	181
10.4.1	Attributing the Risk of a Portfolio to Three Attributes of Each Asset	181
10.4.2	Using Factor-Based Returns and Factor-Based Risk Buckets	182
10.4.3	Calculating the Risk Contribution to Each Factor	183
10.5	Risk Parity	183
10.5.1	Overview of Risk Parity	184
10.5.2	Risk Parity with Two Risky Assets	184
10.5.3	Risk Parity, Leverage, and Sharpe Ratios	185

10.5.4	Three Steps in Implementing the Risk-Parity Approach	186
10.5.5	An Example of Creating a Portfolio Using the Risk-Parity Approach	186
10.5.6	The Primary Economic Rationale for the Risk-Parity Approach	187
10.5.7	The Volatility Anomaly and Risk Parity	188
10.5.8	Criticisms of Three Popular Rationales for Risk Parity	188
10.6	Other Quantitative Portfolio Allocation Strategies	189
10.6.1	The Market-Weighted Strategy	189
10.6.2	An Equally Weighted or 1/N Diversification Strategy	190
10.6.3	Inverse Volatility-Weighted Portfolio Strategies	190
10.6.4	Minimum Volatility Portfolio Allocation Strategies	191
10.6.5	Equivalence Between Allocation Strategies	191
10.6.6	Risk Allocation Based on Return Factors	192
10.6.7	Four Practical Issues with Allocating Based on Return Factors	192
10.7	The New Investment Model	193

PART 3

Institutional Asset Owners and Investment Policies

CHAPTER 11

	Types of Asset Owners and the Investment Policy Statement	197
11.1	Endowments and Foundations	197
11.2	Pension Funds	198
11.3	Sovereign Wealth Funds	199
11.4	Family Offices	199
11.5	Strategic Asset Allocation: Risk and Return	199
11.5.1	Basing Strategic Asset Allocations on Observation and Reasoning	199
11.5.2	Reasons That Alternative Assets Raise Return Estimation Challenges	200
11.5.3	Reasons for Placing Caps and Floors on Asset Allocations	201
11.6	Asset Allocation Objectives	202
11.7	Investment Policy Constraints	202
11.7.1	Internal and External Constraints	202
11.7.2	Three Types of Internal Constraints	202
11.7.3	Two Types of External Constraints	203
11.8	Investment Policy Statements for Institutional Asset Owners	204
11.8.1	Six Benefits to a Thoughtfully Developed IPS	204
11.8.2	Introduction, Scope, and Purpose	205
11.8.3	Roles and Responsibilities	207
11.8.4	Investment Objectives	209
11.8.5	Time Horizon	210
11.8.6	Risk Tolerance	211

11.8.7	Spending Policy	212
11.8.8	Asset Allocation Guidelines	213
11.8.9	Selection and Retention Criteria for Investment Managers or Funds	214
11.8.10	Strategic Investment Guidelines	215
11.8.11	Performance Measurement and Evaluation	216
11.8.12	Additional Considerations	217
11.8.13	Conclusion	218
CHAPTER 12		
	Foundations and the Endowment Model	221
12.1	Defining Endowments and Foundations	221
12.2	Intergenerational Equity, Inflation, and Spending Challenges	224
12.3	The Endowment Model	226
12.3.1	Asset Allocation in the Endowment Model	226
12.3.2	The Endowment Model's Case Against Bonds	227
12.3.3	Alternative Investments in the Endowment Models	228
12.4	Why Might Large Endowments Outperform?	228
12.4.1	Six Attributes of the Endowment Model	229
12.4.2	An Aggressive Asset Allocation	229
12.4.3	Effective Investment Manager Research	230
12.4.4	First-Mover Advantage	231
12.4.5	Access to a Network of Talented Alumni	232
12.4.6	Acceptance of Liquidity Risk	232
12.4.7	Sophisticated Investment Staff and Board Oversight	233
12.4.8	Outsourced CIO Model	233
12.5	Risks of the Endowment Model	234
12.5.1	Spending Rates and Spending Rules	234
12.5.2	Spending Rates and Inflation	235
12.5.3	Spending Rates and Liquidity Issues	236
12.5.4	Spending Rates and Liquidity-Driven Investors	237
12.5.5	Avoiding Liquidity Losses from a Financial Crisis	238
12.5.6	Leverage Risk and the Endowment Model	238
12.6	Liquidity Rebalancing and Tactical Asset Allocation	239
12.7	Tail Risk	240
12.8	Conclusion	242
CHAPTER 13		
	Pension Fund Portfolio Management	245
13.1	Development, Motivations, and Types of Pension Plans	245
13.1.1	Development of Pension Plans	245
13.1.2	Motivations for Using Pension Plans	245
13.1.3	Three Basic Types of Pension Plans	247
13.2	Risk Tolerance and Asset Allocation	247
13.2.1	Three Approaches to Managing the Assets of Defined Benefit Plans	247
13.2.2	Four Factors Driving the Impact of Liabilities on a Plan's Risk	248

13.2.3	Five Major Factors Affecting the Risk Tolerance of the Plan Sponsor	249
13.2.4	Strategic Asset Allocation of a Pension Plan Using Two Buckets	250
13.3	Defined Benefit Plans	251
13.3.1	Pension Plan Portability and Job Mobility	251
13.3.2	Defining Liabilities: Accumulated Benefit Obligation and Projected Benefit Obligation	252
13.3.3	Funded Status and Surplus Risk	253
13.3.4	Why Defined Benefit Plans Are Withering	255
13.3.5	Asset Allocation and Liability-Driven Investing	257
13.3.6	Liability-Driven Pension Investing	257
13.4	Governmental Social Security Plans	258
13.5	Contrasting Defined Benefit and Contribution Plans	259
13.5.1	Defined Contribution Plans	259
13.5.2	Plan Differences in Portability, Longevity Risk, and Investment Options	259
13.5.3	Asset Allocation in Defined Contribution Plans	260
13.5.4	Target-Date Funds and Alternative Investments within Pension Plans	261
13.6	Annuities for Retirement Income	262
13.6.1	Financial Phases Relative to Retirement	262
13.6.2	Three Important Risks to Retirees	263
13.6.3	Estimating Exposure to Longevity Risk	263
13.6.4	Two Major Types of Annuities	264
13.6.5	Analysis of the Value of a Growth Annuity	264
13.7	Conclusion	266

CHAPTER 14

	Sovereign Wealth Funds	269
14.1	Sources of Sovereign Wealth	269
14.1.1	Accounting for Changes in the Reserve Account	269
14.1.2	Changes in the Reserve Account and Five Drivers of Currency Exchange Rates	270
14.1.3	Fixed versus Floating Rule Policies	271
14.1.4	Commodity Exports and the Reserve Account	271
14.2	Four Types of Sovereign Wealth Funds	272
14.2.1	Stabilization Funds	272
14.2.2	Savings Funds	273
14.2.3	Reserve Funds	273
14.2.4	Development Funds	274
14.3	Establishment and Management of Sovereign Wealth Funds	274
14.3.1	Four Common Motivations to Establishing a Sovereign Wealth Fund	275
14.3.2	Investment Management of Sovereign Wealth Funds	275

14.3.3	Dutch Disease and Sterilization Policies	276
14.3.4	Managing the Size of a Sovereign Wealth Fund	277
14.4	Governance and Political Risks of SWFs	277
14.4.1	Governance of SWFs	277
14.4.2	Impact of SWF Investments on Portfolio Companies	278
14.4.3	Ten Principles of the Linaburg–Maduell Transparency Index	278
14.4.4	Santiago Principles	278
14.5	Analysis of Three Sovereign Wealth Funds	279
14.5.1	Government Pension Fund Global (Norway)	279
14.5.2	China Investment Corporation	280
14.5.3	Temasek Holdings (Singapore)	281
14.6	Conclusion	282

CHAPTER 15

	Family Offices and the Family Office Model	285
15.1	Identifying Family Offices	285
15.2	Goals, Benefits, and Business Models of Family Offices	286
15.2.1	General Goals of the Family Office	286
15.2.2	Benefits of the Family Office	286
15.2.3	Models and Structure of the Family Office	287
15.3	Family Office Goals by Generations	290
15.3.1	First-Generation Wealth	290
15.3.2	Risk Management of First-Generation Wealth	290
15.3.3	Benchmarking First-Generation Wealth	292
15.3.4	Goals of the Second Generation and Beyond	292
15.4	Macroeconomic Exposures of Family Offices	295
15.5	Income Taxes of Family Offices	297
15.5.1	Tax Efficiency and Wealth Management	297
15.5.2	Taxability of Short-Term and Long-Term Capital Gains	298
15.5.3	Tax Efficiency and Hedge Fund Investment Strategies	299
15.6	Lifestyle Assets of Family Offices	300
15.6.1	Art as a Lifestyle Asset	300
15.6.2	Lifestyle Wealth Storage and Other Costs	301
15.6.3	Lifestyle Assets and Portfolio Management	302
15.6.4	Concierge Services	302
15.7	Family Office Governance	304
15.7.1	Governance Structures of Family Offices	304
15.7.2	The Challenges of Family Wealth Sustainability	305
15.7.3	Strategies to Maintain Family Wealth	305
15.7.4	Family Office Inheritance and Succession Strategies	306
15.8	Charity, Philanthropy, and Impact Investing	307
15.8.1	Charity and Philanthropy	307
15.8.2	Impact Investing	308
15.9	Ten Competitive Advantages of Family Offices	310

PART 4**Risk and Risk Management****CHAPTER 16**

Cases in Tail Risk	315
16.1 Problems Driven by Market Losses	315
16.1.1 Amaranth Advisors, LLC	315
16.1.2 Long-Term Capital Management	318
16.1.3 Carlyle Capital Corporation	319
16.1.4 Declining Investment Opportunities and Leverage	320
16.1.5 Behavioral Biases and Risk Taking	321
16.1.6 Volatility of Volatility Derivatives in February 2018	322
16.2 Trading Technology and Financial Crises	324
16.2.1 Quant Crisis, August 2007	324
16.2.2 The Flash Crash of 2010	325
16.2.3 Knight Capital Group	325
16.3 Failures Driven by Fraud	326
16.3.1 Bayou Management	327
16.3.2 Bernie Madoff	329
16.3.3 Lancer Group	331
16.3.4 Venture Capital Startup: Theranos	333
16.4 Four Major lessons From cases in Tail Events	334

CHAPTER 17

Benchmarking and Performance Attribution	337
17.1 Benchmarking and Performance Attribution Overview	337
17.1.1 Active Return in Benchmarking	337
17.1.2 The Bailey Criteria for a Useful Benchmark	338
17.1.3 Selecting a Benchmark for Alternative Investments	338
17.1.4 Benchmarking Liquid Alternative Investments	339
17.2 Single-Factor Benchmarking and Performance Attribution	340
17.2.1 An Example of Single-Factor Benchmarking	340
17.2.2 Three Considerations in Benchmarking	341
17.2.3 Single-Factor Market Model Performance Attribution	341
17.2.4 Examining Time-Series Returns with a Single-Factor Market-Based Regression Model	343
17.2.5 Application of Single-Factor Benchmarking	343
17.3 Multi-Factor Benchmarking	344
17.3.1 An Example of Multi-factor Benchmarking	344
17.3.2 The Bias from Omitted Factors in Benchmarking	345
17.3.3 Multi-factor versus Single-factor Methods	345
17.4 Distinctions Regarding Alternative Asset Benchmarking	346
17.4.1 Why Not Apply the CAPM to Alternative Assets?	346
17.4.2 Reason 1: Multi-period Issues	346
17.4.3 Reason 2: Nonnormality	347
17.4.4 Reason 3: Illiquidity of Returns and Other Barriers to Diversification	347

17.4.5	Reason 4: Investor-Specific Assets or Liabilities	348
17.4.6	Summary of Why Multiple-Factor Models May be Preferable	348
17.5	Benchmarking of Commodities	348
17.5.1	Weighting All Positions on Value versus Quantity	349
17.5.2	The Three Schemes Used to Weight Commodities Sectors and Components	349
17.5.3	Total Return versus Excess Return	349
17.5.4	Roll Method	350
17.5.5	Three Generations of Commodity Indices	350
17.6	Three Approaches to Benchmarking Managed Futures Funds	351
17.6.1	Benchmarking with Long-Only Futures Contracts	351
17.6.2	Benchmarking CTAs with Peer Groups	351
17.6.3	Benchmarking CTAs with Algorithmic Indices	351
17.6.4	Five Conclusions from Evidence on CTA Benchmarking	352
17.7	Benchmarking Private Equity Funds	352
17.7.1	Listed Asset-Based Benchmarks	352
17.7.2	Public Equity Indices and the Public Market Equivalent (PME) Method	353
17.7.3	Key Computations in the Public Market Equivalent (PME) Method	355
17.7.4	Extensions to the PME Method and Other Related Performance Metrics	357
17.8	Group Peer Returns as Benchmarks	357
17.9	Benchmarking Real Estate	358
17.9.1	Benchmarking Core Real Estate with Cap Rates	358
17.9.2	Benchmarking Core Real Estate with a Risk Premium Formula	358
17.9.3	Three Approaches to Benchmarking Noncore Real Estate	359
17.9.4	Examples of Benchmark Return Estimates for Noncore Style Assets	360

CHAPTER 18

Liquidity and Funding Risks

363

18.1	Margin Accounts and Collateral Management	363
18.1.1	Three Specialized Terms for Futures Account Levels	363
18.1.2	Collateral and Margin for Futures Portfolios	364
18.1.3	Margin Across Multiple Clearinghouses	365
18.1.4	Capital at Risk for Managed Futures	366
18.2	Value at Risk for Managed Futures	367
18.2.1	Value at Risk for a Portfolio as a Quantile	367
18.2.2	VaR Using a Parametric Approach with Variance Based on Equal Return Weighting	368
18.2.3	Parametric VaR Using a Variance based on Unequal Return Weighting	368
18.2.4	Confidence Intervals with Parametric VaR	369

18.3	Other Methods of Estimating Liquidity Needs	369
18.3.1	Simulation Analysis and Potential Managed Futures Losses	370
18.3.2	Omega Ratio and Managed Futures	371
18.3.3	Interpreting the Omega Ratio	372
18.4	Smoothed Returns on Illiquid Funds	373
18.4.1	Smoothed Asset Returns and Unsmoothing	373
18.4.2	Price Smoothing and Arbitrage in a Perfect Market	374
18.4.3	Persistence in Price Smoothing	374
18.4.4	Problems Resulting from Price Smoothing	375
18.5	Modeling Price and Return Smoothing	375
18.5.1	Reported Prices as Lags of True Prices	376
18.5.2	Modeling True Returns from Smoothed Returns	377
18.5.3	Four Reasons for Smoothed Prices and Delayed Price Changes in an Index	377
18.6	Unsmoothing a Hypothetical Return Series	378
18.6.1	Unsmoothing Returns Based on First-Order Autocorrelation	378
18.6.2	The Three Steps of Unsmoothing	379
18.6.3	An Example of Unsmoothing with the Three Steps	379
18.7	Unsmoothing Actual Real Estate Return Data	380
18.7.1	The Smoothed Data and the Market Data	381
18.7.2	Estimating the First-Order Autocorrelation Coefficient	382
18.7.3	Unsmoothing the Smoothed Return Series	383
18.7.4	The Relation between the Variances of True and Reported Returns	383
18.7.5	The Relation between the Betas of True and Reported Returns	384
18.7.6	Interpreting the Results of Unsmoothing	386

CHAPTER 19

	Hedging, Rebalancing, and Monitoring	389
19.1	Managing Alpha and Systematic Risk	389
19.1.1	Separating Alpha and Beta	389
19.1.2	Hedging Systematic Risk	389
19.1.3	Porting Alpha	390
19.2	Managing the Risk of a Portfolio with Options	391
19.2.1	Put–Call Parity as a Foundation for Risk Analysis	391
19.2.2	Option Sensitivities	392
19.2.3	Delta of a Simple Call Option and Put Option	393
19.2.4	Viewing Options as Volatility Bets	393
19.3	Delta-Hedging of Option Positions	394
19.3.1	Construction of a Binomial Stock and Call Option Tree in a Risk-Neutral World	394
19.3.2	Performing Arbitrage on a Properly Priced Option	395
19.3.3	Performing Arbitrage on a Mispriced Option	396
19.3.4	Geometric Motion and Delta-Hedging	398
19.4	Three Key Observations on Delta-Hedging	399

19.5	Three Observations on Rebalancing Delta-Neutral Option Portfolios	400
19.6	Rebalancing Portfolios with Directional Exposures	401
19.6.1	Rebalancing, Mean-Reversion, Trending, and Randomness	401
19.6.2	Rebalancing When Assets Follow a Random Walk	402
19.6.3	Rebalancing When Individual Assets Trend	403
19.6.4	Rebalancing When Individual Asset Prices Mean-Revert	404
19.6.5	Empirical Evidence on the Effect of Rebalancing on Return	405
19.6.6	The Effects of Rebalancing When Prices Do Not Mean-Revert	406
19.7	Mean-Reversion and Diversification Return	407
19.7.1	Benefits of Mean-Reversion in Commodity Investing	407
19.7.2	Benefiting from Mean-Reversion through Portfolio Rebalancing	407
19.7.3	Volatility Reduction Enhances Geometric Mean Returns, Not Expected Values	408
19.7.4	Summary of Rebalancing	408
19.8	Investment Monitoring	409
19.8.1	Portfolio and Individual Asset Monitoring	409
19.8.2	Six Activities of Monitoring Private Partnerships	410
19.8.3	Monitoring Objectives	410
19.8.4	Forms of Active Involvement in the Fund's Governance Process	410
19.8.5	Forms of Active Involvement Outside the Fund's Governance Process	411
19.8.6	Three Ways to Create Value through Monitoring	411
19.8.7	Two Limits to the Detail and Extent of Information Available from Monitoring	412

CHAPTER 20

	Risk Measurement, Risk Management, and Risk Systems	413
20.1	Overview of Risk Measurement and Aggregation	413
20.1.1	Risk and the Investment Mandate	413
20.1.2	The Five Components of Risk Measurement	414
20.1.3	Risk Measurement at the Investment/Position Level	414
20.1.4	Risk Measurement and Frequency of Data Collection	416
20.1.5	Risk Aggregation and Systems Development	417
20.1.6	Risk Measurement and Dimensions of Risk	419
20.1.7	An Example of Dimensions of Risk Reporting for an Alternative Investment	420
20.2	Categories of Information to be Considered	422
20.2.1	Quantitative Information Categories and Associated Statistics	422
20.2.2	Due Diligence Tracking Matrices	423
20.2.3	Qualitative Information Categories	423
20.3	Risk Measurement with Daily Frequency of Data Collection	424

20.4	Risk Measurement with Weekly Frequency of Data Collection	425
20.5	Risk Measurement with Monthly Frequency of Data Collection	426
20.6	Risk Measurement with Quarterly Frequency of Data Collection	427
20.7	Risk Measurement with Annual Frequency of Data Collection or Rolling Time Periods	427
20.8	Cybersecurity for Fund Managers	429
20.8.1	Vulnerability of Investment Organizations to Cybersecurity Issues	430
20.8.2	Achieving a State of Preparedness Regarding Cybersecurity	430
20.8.3	Evidence on Regularity with Which Cybersecurity Functions Were Observed	430
20.8.4	Evidence on Areas Requiring Improved Policies	431
20.8.5	Evidence on Robust Policies and Procedures Worth Emulating	431
20.8.6	Cybersecurity and EU Regulation	432
20.8.7	Cybersecurity and Asian Regulation	432
20.9	Risk Management Structure and Process	432
20.9.1	Three Models of Risk Management Structure	433
20.9.2	The Investment Process as Primarily a Risk Process	433
20.9.3	The Evolution of Risk Reporting	434

PART 5

Methods for Alternative Investing

CHAPTER 21

	Valuation and Hedging Using Binomial Trees	439
21.1	A One-Period Binomial Tree and Risk-Neutral Modeling	439
21.1.1	A One-Period Model of Default Risk with Risk-Neutrality	439
21.1.2	A One-Period Model With A Risk Premium For Default	440
21.1.3	P-measures, Q-measures, and the Power of Risk-Neutral Modeling	441
21.1.4	Four Key Concepts of Risk-Neutral Modeling	441
21.2	Multi-Period Binomial Trees, Values, and Mean Rates	442
21.2.1	A Trinomial Tree Model Based on Prices	442
21.2.2	Two-Period Binomial Tree Model with Compounded Returns	443
21.2.3	Three Fallacies Generated by Averaging Compounded Rates of Return	444
21.3	Valuation of Convertible Securities with a Binomial Tree Model	445
21.3.1	Forming a Tree of Stock Prices	445
21.3.2	The Tree of Prices for a Call Option on an Equity	448
21.3.3	The Tree of Prices for the Bond's Underlying Stock	449

21.3.4	The Tree of Prices for the Convertible Bond's Underlying Stock	450
21.3.5	Valuing the Convertible Bond One Period Prior to Its Maturity	451
21.3.6	Determining the Current Value of the Convertible Bond	452
21.4	Valuing Callable Bonds with a Tree Model	452
21.4.1	A Two-Period Binomial Tree	453
21.4.2	Modeling the Spread Between Upward and Downward Shifting Rates	454
21.4.3	Calculating a Two-Period Straight Bond Price with a Binomial Tree	454
21.4.4	Calculating a Two-Period Callable Bond Price with a Binomial Tree	456
21.5	Tree Models, Visualization, and Two Benefits to Spreadsheets	458

CHAPTER 22

	Directional Strategies and Methods	459
22.1	Efficiently Inefficient Markets	459
22.2	Technical Directional Strategies Overview	460
22.2.1	Metrics of Technical Analysis	460
22.2.2	Trend-Following or Momentum Models	461
22.2.3	Market Divergence	462
22.2.4	Measuring Market Divergence of an Individual Asset	463
22.2.5	Interpreting Market Divergence	463
22.2.6	Measuring Market Divergence	465
22.2.7	Technical Strategies Based on Machine Learning	466
22.2.8	Risks of Directional Technical Strategies	467
22.3	Fundamental Directional Strategies	467
22.3.1	Overview of Fundamental Directional Strategies	468
22.3.2	The Bottom-Up Approach of Fundamental Analysis	468
22.3.3	Fundamental Bottom-Up Equity Valuation Models	468
22.3.4	Four Procedures within the Fundamental Investment Process	470
22.3.5	Four Mechanics of Fundamental Strategies	471
22.3.6	The Top-Down Approach of Fundamental Analysis	471
22.3.7	Top-Down Managers and Schools of Thought	472
22.3.8	Two Risks of Directional Fundamental Strategies	472
22.4	Directional Strategies and Behavioral Finance	473
22.4.1	Sentiment Sensitivity	473
22.4.2	Overconfidence	474
22.4.3	Behavioral Biases From Over-Reliance on the Past	474
22.4.4	Other Potential Sources of Pricing Anomalies	476
22.5	Directional Trading and Factors	476
22.5.1	Emphasis on Value versus Growth Investing	476
22.5.2	Directional Trading Based on Momentum	477
22.5.3	Emphasis on Illiquidity Premiums	477

CHAPTER 23

Multivariate Empirical Methods and Performance Persistence	479
23.1 Statistical Factors and Principal Component Analysis	479
23.1.1 Principal Component Analysis and Types of Factors	479
23.1.2 The Basics of Principal Component Analysis	480
23.1.3 The Two Primary Outputs of Principal Component Analysis	480
23.1.4 An Example of Applying and Interpreting a Principal Component Analysis	481
23.1.5 Three Key Differences Between Principal Component Analysis and Factor Analysis	483
23.2 Multi-Factor Models and Regression	483
23.2.1 Selecting Factors for Multi-factor Regression	483
23.2.2 Multicollinearity	484
23.2.3 Selecting the Number of Factors and Overfitting	485
23.3 Partial Autocorrelations and Regression	485
23.3.1 Intuition of Partial Autocorrelations	485
23.3.2 Estimation of Partial Autocorrelations	486
23.3.3 Partial Autocorrelations of a Return Series Based on Appraisals	486
23.4 Three Dynamic Risk Exposure Models	487
23.4.1 The Nonlinear Exposure of Perfect Market-Timing Foresight	487
23.4.2 The Dummy Variable Approach to Dynamic Risk Exposures	488
23.4.3 The Separate Regression Approach to Dynamic Risk Exposures	489
23.4.4 The Quadratic Approach to Dynamic Risk Exposures	489
23.5 Two Approaches to Modeling Changing Correlation	489
23.5.1 Conditional Correlation Modeling Approach	490
23.5.2 Interpreting an Example of Conditional Correlations	490
23.5.3 Variations on Conditional Empirical Analyses	491
23.5.4 Rolling Window Modeling Approach	492
23.6 Four Multi-Factor Approaches to Understanding Returns	493
23.6.1 Understanding Style Analysis and Fund Groupings Based on Asset Classes	493
23.6.2 Understanding Funds Based on Strategies	494
23.6.3 Understanding Funds Based on Market-wide Factors	495
23.6.4 Understanding Funds Based on Specialized Market Factors	496
23.7 Evidence on Fund Performance Persistence	496
23.7.1 Performance Persistence Based on Return Correlations	497
23.7.2 Performance Persistence Based on Risk-Adjusted Returns	497
23.7.3 Performance Persistence Based on Portfolio Returns	498

CHAPTER 24

Relative Value Methods	499
24.1 Overview of Relative Value Methods	499
24.1.1 Arbitrage and Risks in Relative Value Strategies	500
24.1.2 Pure Arbitrage and Risk Arbitrage	500
24.1.3 Limits to Arbitrage	500
24.1.4 Two Examples of Nearly Pure Arbitrage	501
24.1.5 Two Examples of Risk Arbitrage	501
24.2 Types of Pairs Trading and the Four Typical Steps	502
24.3 Statistical Pairs Trading of Equities	503
24.3.1 Statistical Pairing using the Co-Integration Approach	504
24.3.2 Identification and Timing of Trade Entry Opportunities	505
24.3.3 The Nature and Performance of Pairs-Trading Strategies	505
24.4 Pairs Trading in Commodity Markets Based on Spreads	506
24.4.1 Commodity Derivatives Calendar Spreads	506
24.4.2 Estimating the Profitability of Calendar Spread Trading	507
24.4.3 Processing Spreads	508
24.4.4 The Economics of Processing Spreads to Producers and Speculators	509
24.4.5 Substitution Commodity Spreads	509
24.4.6 Quality and Location Spreads	511
24.4.7 Intramarket Relative Value Strategies	512
24.5 Pairs Trading in Rates from Fixed Income and Currency Markets	512
24.6 Relative Value Market-Neutral Strategies and Portfolio Risks	514
24.6.1 Risks of Pairs-Trading Strategies	514
24.6.2 Equity Market-Neutral Strategy	516
24.6.3 Risks Related to Equity Market Neutrality	517

CHAPTER 25

Valuation Methods for Private Assets: The Case of Real Estate	519
25.1 Depreciation Tax Shields	519
25.1.1 Valuation of the Depreciation Tax Shield	520
25.1.2 Computation of the Depreciation Tax Shield	520
25.1.3 Viewing Depreciation as Generating an Interest-Free Loan	521
25.2 Deferral of Taxation of Gains	522
25.2.1 Return with Annual Taxation of Gains	522
25.2.2 Return with Deferred Taxation of Gains	522
25.2.3 Depreciation, Deferral, and Leverage Combined	523
25.3 Comparing After-Tax Returns for Various Taxation Scenarios	524
25.3.1 Real Estate Example without Taxation	524
25.3.2 After-Tax Returns When Depreciation Is Not Allowed	524
25.3.3 Return When Accounting Depreciation Equals Economic Depreciation	526
25.3.4 Return When Accounting Depreciation Is Accelerated	526

25.3.5	Return When Capital Expenditures Can Be Expensed	527
25.3.6	Depreciation and Heterogenous Marginal Tax Rates Among Investors	529
25.4	Transaction-Based Indices: Repeat-Sales	529
25.4.1	Overview and Example of the Repeat-Sales Method	530
25.4.2	Two Advantages of the Repeat-Sales Method	531
25.4.3	Three Disadvantages of the Repeat-Sales Method	531
25.5	Transaction-Based Indices: Hedonic	532
25.5.1	Overview of the Hedonic-Pricing Method	532
25.5.2	Three Steps to Calculating a Hedonic Price Index	532
25.5.3	A Simplified Example of the Hedonic-Pricing Approach	533
25.5.4	Three Primary Advantages of the Hedonic-Pricing Model	534
25.5.5	Three Primary Disadvantages of the Hedonic-Pricing Model	535
25.6	Sample Bias and the Repeat-Sales and Hedonic-Price Methods	535
25.7	Appraisal-Based Indices	536
25.7.1	Approaches to Appraisals	536
25.7.2	Two Advantages of Appraisal-Based Models	536
25.7.3	Three Disadvantages of Appraisal-Based Models	537
25.8	Noisy Pricing	537
25.8.1	Random Pricing Errors and Reservation Prices	537
25.8.2	Appraisals and Appraisal Error	538
25.8.3	The Square Root of N Rule	539

PART 6

Accessing Alternative Investments

CHAPTER 26

Hedge Fund Replication

		543
26.1	An Overview of Replication Products	543
26.2	Potential Benefits of Replication Products	544
26.3	The Case for Hedge Fund Replication	545
26.3.1	Estimating the Risk and Return of Funds of Funds	545
26.3.2	Three Theories for Increased Beta and Decreased Alpha in Hedge Fund Returns	545
26.3.3	The Aggregate Alpha of the Hedge Fund Industry	547
26.3.4	Replication Products as a Source of Alpha	548
26.3.5	Replication Products as a Source of Alternative Beta	548
26.4	Unique Benefits of Replication Products	549
26.4.1	Two Reasons to Use Replication Products	549
26.4.2	Two Key Issues Regarding Fund Replication Benefits	549
26.4.3	Eight Potential Unique Benefits from Hedge Fund Replication	550
26.5	Factor-Based Approach to Replication	552
26.5.1	Four Primary Issues in Constructing a Factor-Based Replication Product	553

26.5.2	Three Steps to Factor-Based Replication	554
26.5.3	Two Key Concepts Regarding Factor-Based Replication	555
26.5.4	Research on Factor-Based Replication	556
26.5.5	Comparison of Factor-Based Approaches to Payoff-Distribution Approaches	556
26.6	The Algorithmic (Bottom-Up) Approach	558
26.7	Three Illustrations of the Algorithmic (Bottom-Up) Approach	558
26.7.1	An Illustration of the Algorithmic Approach: Merger Arbitrage	559
26.7.2	An Illustration of the Algorithmic Approach: Convertible Arbitrage	560
26.7.3	An Illustration of the Algorithmic Approach: Momentum Strategies	561

CHAPTER 27

	Diversified Access to Hedge Funds	565
27.1	Evidence Regarding Hedge Fund Risk and Returns	565
27.1.1	Evidence Regarding Performance of Hedge Funds by Strategies	565
27.1.2	Evidence Regarding the Systematic and Total Risk of Hedge Funds	567
27.1.3	Evidence Regarding Correlations and Diversification of Hedge Funds	569
27.2	Approaches to Accessing Hedge Funds	569
27.2.1	The Direct Approach and Its Three Advantages	569
27.2.2	The Delegated Approach and Its Five Services	569
27.2.3	The Indexed Approach	572
27.3	Characteristics of Funds of Hedge Funds	573
27.3.1	Approach to Manager Selection	573
27.3.2	Four Types of Funds of Hedge Funds Based on Diversification	574
27.3.3	Exposure of Funds of Hedge Funds Returns to Four Potential Biases	574
27.3.4	Four Key Issues Comparing Funds of Hedge Funds and Multi-strategy Funds	575
27.4	Fund of Hedge Funds Portfolio Construction	577
27.4.1	Assets-Under-Management Weighted Approach and its Three Challenges	577
27.4.2	Equally Weighted Approach	578
27.4.3	Equal Risk-Weighted Approach	578
27.4.4	Mean-Variance (Unconstrained and Constrained) Approach	579
27.4.5	Mean-Variance Approach with Constraints on Higher-Moments	580
27.4.6	Personal Allocation Biases Approach	580
27.5	Ways that Funds of Hedge Funds Can Add Value	580
27.5.1	Evidence on the Three Levels at Which Funds of Hedge Funds Can Add Value	582

27.5.2	General Evidence on the Performance of Funds of Hedge Funds	584
27.6	Investable Hedge Fund Indices	584
27.7	Alternative Mutual Funds	585
27.7.1	Three Potential Benefits of Offering Alternative Mutual Funds	585
27.7.2	Three Benefits of Alternative Mutual Funds to Investors	586
27.7.3	Three Risks of Alternative Mutual Funds	586
27.7.4	Three Advantages of Exchange-Traded Alternative Funds	587

CHAPTER 28

Access to Real Estate and Commodities **589**

28.1	Unlisted Real Estate Funds	589
28.1.1	Open-End Funds	589
28.1.2	Closed-End Real Estate Funds	590
28.1.3	Real Estate Funds of Funds	591
28.1.4	Nontraded REITs	591
28.1.5	Four Potential Advantages of Unlisted Real Estate Funds	593
28.1.6	Three Potential Disadvantages of Unlisted Real Estate Funds	593
28.2	Listed Real Estate Funds	594
28.2.1	REITs and REOCs	594
28.2.2	Exchange-Traded Funds Based on Real Estate Indices	594
28.2.3	Four Potential Advantages of Listed Real Estate Funds	595
28.2.4	Two Potential Disadvantages of Listed Real Estate Funds	596
28.2.5	Global REITs	596
28.3	Commodities	598
28.3.1	Direct Physical Ownership of Commodities	598
28.3.2	Indirect Ownership of Commodities	599
28.3.3	Commodity Index Swaps	599
28.3.4	Public Commodity-Based Equities	600
28.3.5	Bonds Issued by Commodity Firms	601
28.3.6	Commodity-Based Mutual Funds and Exchange-Traded Products	601
28.3.7	Public and Private Commodity Partnerships	602
28.3.8	Commodity-Linked Investments	603
28.3.9	Commodity-Based Hedge Funds	605
28.4	Commodity Trade Financing and Production Financing	606
28.5	Leveraged and Option-Based Structured Commodity Exposures	606
28.5.1	Leveraged and Inverse Commodity Index-Based Products	607
28.5.2	Leveraged Notes	608
28.5.3	Principal-Guaranteed Notes	608
28.6	Key Concepts in Managing Commodity Exposure	609
28.6.1	Roll Return	609
28.6.2	Commodity Prices and Cycles	609
28.6.3	Commodity Prices and Key Economic Variables	610

CHAPTER 29**Access Through Private Structures 613**

29.1	Overview of Issues in Private Versus Listed Investment Access	613
29.1.1	Financial Market Segmentation	613
29.1.2	Major Potential Advantages of Listed Assets	614
29.1.3	Major Potential Advantages of Privately Organized Assets	614
29.1.4	Rational Investing with High Fees	615
29.1.5	Private Structures as a Superior Governance Paradigm	615
29.2	Unlisted Manager–Investor Relationships	616
29.2.1	GP and Fund Economics	616
29.2.2	Fund Term and Structure	617
29.2.3	Key Person	617
29.2.4	Fund Governance	617
29.2.5	Financial Disclosures	618
29.2.6	Notification and Policy Disclosures	619
29.3	Side Letters to Limited Partnership Agreements	619
29.4	Co-Investments	621
29.4.1	Overview of Co-Investing	621
29.4.2	Investment Processes for Co-Investing	622
29.4.3	Evidence on the Performance of Co-Investments	623
29.4.4	Potential Advantages of Co-Investing	624
29.4.5	Potential Expected Disadvantages of Co-Investing	625
29.5	Cash Commitments and Illiquidity	626
29.5.1	The Costs of Excess Liquidity	626
29.5.2	The Costs of Illiquidity	626
29.5.3	Overcommitment Strategies	627
29.5.4	The Challenge of Identifying Illiquidity and Managing Cash Flows	627
29.5.5	Four Benefits of Private Equity Cash Flow Models	627
29.5.6	The Overcommitment Ratio	628
29.5.7	The Optimal Overcommitment Ratio	628
29.5.8	Commitments, the Global Financial Crisis, and Liquidity	629
29.6	The Secondary Market for PE Partnerships	629
29.6.1	Secondary PE Market Development	629
29.6.2	PE Secondary Market Size	630
29.6.3	PE Buyer Motivations	632
29.6.4	PE Seller Motivations	632
29.6.5	The Secondary Market PE Investment Process	633
29.6.6	Sourcing PE Secondary Opportunities	633
29.6.7	Valuing Secondary PE Stakes	634
29.6.8	Limitations of the PE Secondary Market	635

CHAPTER 30**The Risk and Performance of Private and Listed Assets 637**

30.1	Evidence on an Illiquidity Premium from Listed Assets	637
30.1.1	A Factor-Pricing-Based Explanation for an Illiquidity Premium	638

30.1.2	Empirical Evidence of an Illiquidity Premium in US Treasuries	638
30.1.3	Empirical Evidence of an Illiquidity Premium in US Equities	638
30.2	Private Versus Listed Real Performance: The Case of Real Estate	639
30.2.1	The Case Against Unlisted Real Estate Pools based on Historical Performance	639
30.2.2	Listing: Increased Risk or the Appearance of Increased Risk?	640
30.2.3	The Case Against Unlisted Real Estate Pools Based on Risk-Adjusted Performance	641
30.3	Challenges with the PME Method to Evaluating Private Asset Performance	641
30.3.1	The Interim Internal Rate of Return (IIRR) and Multiple Solutions	642
30.3.2	The IRRs under the PME Method Cannot be Calculated in Some Cases	643
30.3.3	IRR Does not Adjust for Scale and Timing	644
30.3.4	The PME Method Can be Effective in Evaluating Performance	644
30.3.5	The PME Method Can be Manipulated	646
30.4	Multiple Evaluation Tools	648
30.4.1	Simple Cash Flow Multiples	648
30.4.2	Multiples based on the PME Method	650
30.4.3	Private Equity Fund Benchmark Analysis	651
30.4.4	Applying a PME Analysis to the Example PE Funds	652
30.4.5	Summary of Results Using Multiple Evaluation Tools	652
30.5	IRR Aggregation Problems for Portfolios	653
30.5.1	Equally Weighting IRRs or IIRRs	653
30.5.2	Commitment-Weighting IRRs or IIRRs	654
30.5.3	Pooled Cash Flows for Weighting IRRs or IIRRs	655
30.5.4	Time-Zero-Based Pooling	656
30.5.5	Contrasting the Weighting Approaches for IRR and IIRR	656
30.6	The Case Against Private Equity	657
30.7	Two Propositions Regarding Access Through Private Versus Listed Structures	658

PART 7

Due Diligence & Selecting Managers

CHAPTER 31

	Active Management and New Investments	663
31.1	Tactical Asset Allocation	663
31.2	The Fundamental Law of Active Management	664
31.2.1	The Central Relation of the FLOAM	664
31.2.2	The FLOAM and the Transfer Coefficient	665
