

SPRINGER BRIEFS IN LINGUISTICS

Shobhana L. Chelliah

Why Language Documentation Matters

 Springer

SpringerBriefs in Linguistics

A platform for peer-reviewed short research monographs on all topics in the study of language, including syntax, semantics, philosophy of language, sociolinguistics, psycholinguistics, cognitive linguistics, translation studies, languages and literature, computational linguistics, as well as cross- and interdisciplinary studies in linguistics, and across all schools of thought and all methodologies. Volumes offer concise summaries of cutting-edge research and practical applications across a wide spectrum of fields within linguistics. Compact volumes of 50 to 125 pages cover a range of content from theoretical to experimental and applied research in linguistics. Typical topics might include: • A timely report of state-of-the art analytical techniques • A bridge between new research results published in journal articles and a contextual literature review • A snapshot of a hot or emerging topic • An in-depth case study or fieldwork results • A presentation of core concepts that students must understand in order to make independent contributions The publishing editor, Christopher Coughlin, welcomes your proposals and ideas for monographs that fit in this series.

For more information on how to submit your proposal, please contact the assistant editor, Anita Rachmat, E-mail: Anita.Rachmat@springer.com

About the Author

Shobhana L. Chelliah is Distinguished Research Professor of Linguistics and Associate Dean of Research and Advancement at the College of Information, University of North Texas. She is a 2021–2022 Nehru-Fulbright Chair awardee. She was a Program Director for the US National Science Foundation’s Documenting Endangered Languages Program from 2012–2015 and continues to serve the Foundation as an external expert. Her research on Tibeto-Burman languages has been funded by the National Science Foundation and she has held fellowships from the American Institute of Indian Studies, National Endowment for the Humanities, and American Council of Learned Societies. She is the director of the Computational Resource for South Asian Language Archive (CoRSAL) at the University of North Texas Digital Library. She continues to work on long-term documentation projects on languages of northeast India with collaborators in Manipur and Assam.

Chapter 1

Introduction

Abstract The eight chapters of this book provide an overview of practical, humanistic, and scientific applications of Documentary Linguistics, a subfield of linguistics that aims to create a lasting and accessible record of under-resourced languages. Through case studies, we see how language users seek healing from historical trauma through engagement with community linguistic and cultural materials. We review examples from low-resourced languages that shed light on new aspects of human cognition and creativity. We consider how linguistic diversity continues to be weakened through natural disasters, genocide, disease, resettlement, political instability, and language policies, and how language users and linguists engage in language revitalization, documentation, and description to intervene and strengthen languages. Finally, we consider professional and personal motivations for engaging in these activities and the impact of language documentation on society, the discipline, and the individual.

Keywords Language documentation · Documentary linguistics · UN year of indigenous languages · Documenting endangered languages · Descriptive linguistics · Language revitalization · Language reclamation

An all too common scenario: Jenny belongs to an Indigenous community of 3,000 people spread over 20 villages. An earthquake makes the region uninhabitable, forcing families to move from the villages to adjacent larger cities. Jenny slowly forgets much about village life, including how to use her language for day-to-day communication. A second all too common scenario: Sumit grew up in a posh New Delhi neighborhood. As a young boy, Sumit spoke Bengali at home, but with his friends he spoke English and Hindi. Now 40 years later, a professor at a university in New Zealand, he can no longer speak Bengali with ease. He's forgotten many of the words and is embarrassed to speak because his lack of fluency is obvious. These two scenarios, Jenny's and Sumit's, are radically different due to the simple fact that while Sumit can reengage with Bengali in literally hundreds of ways (films, books, the internet, communities of speakers), there is no way for Jenny to engage with her heritage language. Why? Unlike Bengali, which has many resources, Jenny's
