# WORKING WITH THE FEET

MOVEMENT WORK TO COMBINE  
MENTAL AND PHYSICAL HEALTH

---

Institute of Personal Development and Social Competence Vienna

This book was written by the author to the best of his knowledge and belief and has been reviewed by several authorities. No guarantee can be given by the client and author for the topicality, correctness, completeness and quality of the information in this book. Liability claims against the author and the publisher, which refer to damages of material or idealistic kind, which were caused by the use or disuse of the presented information or were caused by the use of incorrect and incomplete information, are in principle impossible, if on the part of the author or the publisher no as can be prove deliberate or roughly negligent being to blame for is present.

*In this diploma thesis of 2019/19/11 the connection of psychophysical aspects in foot reflexology on humans is shown and explained. With the pedagogical approach of the so-called movement work it is tried to achieve the greatest possible success in the pedagogical field in order to relieve the health system and to increase health promotion in the private sector.*
