ADS AND ANNOUNCEMENTS

Pythagorean views about the roots of Creation correspond precisely with the first thesis of the Aquarius Genesis: Number, good measure, good proportions and rhythm contained in NOUS (Spiritus Mundi, Mind) and Soul (inner perception) - all these ruled and harmonized by the One Universal Law: <KARMA>. (Image source: Internet).

## ***Introduction by the Editor***

The present book brings the «*Aquarius Genesis*»- an inspired text with in-depth commentaries combining <scientific> tenets, primary symbols, spiritual perceptions and old myths so as to give a true «*Compendium Creationis*» in a holistic synopsis. - How can such a multidimensional view be made acceptable to our poor intellect?

More and more scientific discoveries during the past three centuries led ordinary people to adopt an <illuminated> contempt for all mystic teachings: Myths - once the cultural, moral and ethical pillars of human societies - were smudged, smirked at and disposed of as being «*merely symbolic*». - But: is not everything in this world <*merely symbolic*> - namely: *a symbol of the Godhead?*

The new millennium brought with it - right from the beginning and even shortly before - wide spiritual openings demonstrating that *a New Era* has begun: Many a process in this world will soon produce results quite different than expected! Already the language of numbers explains the new impacts on a human plane:

*The Number 1* of the *past millennium* lead humanity from its prime *collective soul* to an *individual Ego*, beginning with personal individualization since the 11<sup>th</sup> through the mystic 13<sup>th</sup> centuries (3 = NEPTUNE: mystical endeavours and Alchemy), and the inventive *century* of the number 14 (4 = URANUS), with its discovery of forgotten continents. The male EGO reached its apex at the end of the century with the leading number 19 torturing the World with constant wars (9=MARS, 10 = PLUTO; - see [Appendix 1](#)).

*The Number 2* of the *new millennium* calls up *and* the soul *and* the *female Ego* which, *if lived adequately*, fosters development of the *You* - i.e. synergy and understanding - and deep spiritual development of the soul. Such astrosophical aspects could be enhanced considerably, but at this point they are just meant to waken the understanding for the development of human consciousness.

The same new psychic aspects promptly showed up even in academic Science - especially in theoretical Physics named *Quantum Physics*: Purely physical (materialistic) understanding of the Universe was *transcended* in favor of a more spiritual view - promptly birthing *Quantum-Philosophy* as well.

Many physical experiments challenge classical theoretical Physics in a most appalling manner. They prove our almost complete ignorance concerning matter and its behaviour, dramatically relativizing conventional <knowledge>: Highly developed measuring methods led to objective perception of *Spirit* <inside> so-called <dead matter>: Particles of matter and energy show a *learning capacity* (hence a memory), a certain *freedom of choice* (i.e. some sort of <will>) - and thus a kind of *consciousness*! - It is now only a question of time until also the *soul-life* of <dead things> will be detected. - However: *What truly is* a <SOUL>? - And <LIFE>?

This means that our thinking and learning behaviour *must* be greatly widened! It means that finally the moment has arrived where mankind - after thousands of generations, after centuries of *fake-knowledge* and *research lies* - begins to truly *cognize* our Universe, so as to fulfill the original task given to Man according to classical accounts of Creation of several cultures, namely: Not just to «multiply», and dominate and exploit the Universe, but also to realize, and *physically fulfill in Love*, the high *spiritual and mental responsibility* towards Creator, Creation and creatures!

This higher perception and consciousness also asks for a new world picture - in other words: new ways of contemplation, experimentation and formulation regarding this world so greatly misunderstood by most humans. The present book may spark such a new understanding. Outside of personal, family related, romantic and atavistic concepts, it develops an *almost intellectual* view. But if lecturers will follow its outwardly strict and sober Symbolism not only with their intellect but also with an inner, blood-related understanding: with the *Reason of the Heart* - they will revive a reality soulfully spiritual and therefore intensely alive. Earlier views are not all wrong, really, but in many ways inadequate. And some are not just «*merely symbolical*», but even *complete nonsense!* - The new - the *Aquarius View* arises from *well-founded insight, inner perception* and a *well-reasoned choice in freedom of will on the basis of a new, truly human consciousness!*

Thus, the *Aquarius Genesis* is not meant to wipe out earlier concepts and myths about Creation: Authors of *relatively young biblical Genesis* didn't do that either, when combining the essence of oldest precursor-myths. The *Aquarius Genesis* may serve as an enlargement of insight into the Mysteries of the Universe, quoting old myths and their *purely spiritual essence* on the level of Symbolism - and so we come back to antique Initiation to the Mysteries as revealed and understood *merely on a symbolical level.* - The *twelve Theses* of *Aquarius Genesis* were conveyed to the author by way of a dream as he says, and so it is through sort of a *dream-consciousness* that really *modern*, i.e. open minded and well-prepared lecturers may and will understand this new garment.

The *Book of Genesis* best known throughout today's <civilized> world (as publicized by Jews, Moslem and Christians alike) stems from a Babylonian Tradition of at least 4500 years ago. Its text was laid down only from ca.

350 b.C. onwards, and <definitively fixed> around 150 a.C. It was no new invention or inspiration but developed from much older Traditions with in parts exactly the same wording: in Old India of the Rishis, the Veda and Upanishads, and besides Sumer and China also in Old Egypt, in the Mayan Popol-Vuj, among the Hopi's, in Polynesia, and so forth ... - Some of them are quoted in the present book.

However, each of said traditions got its own character in harmony with its time and culture, with the ideals and religious teachings their priests wanted to promote - and of course according to their relative language and Symbolism: the colorful image-language of the <Indio's> of Central America: the <charla>, amiable chat among gods; - the awesome Mesopotamian tale of wonders; - the most juicy imagination after Nature in Egypt ... - The judeo-christian Bible instead makes a parallel and inevitably inconsequent attempt to insinuate an *anthropomorphic Monotheism since the Beginning* - an effort clearly doomed from the start: Scripture shows that this was achieved during the 4<sup>th</sup> century b.C. at the earliest. The dream since Antiquity of a national identity of Judea (based on a clan's blunt hegemonic claim openly declared in the Talmud), is forcibly implemented by brutal transformation of the *region of Canaan* with its coast-line abundant in resources and fertile land: Old *Philistina*, today named *Palestine*. - During the 20<sup>th</sup> century this led to a world-wide dominion by this same single Clan. The final goal would then have been: *One <Elite> - a selected blood-line governing the world!*

Looked at it cosmologically and astrosophically, the biblical clan story evolves during the Eras of *Taurus*, *Aries* and *Pisces*. Its origin however is much earlier - probably in the last period of *Capricorn*, well 20'000 years ago.<sup>1</sup> The era of *Aquarius* will soon show what decision *the True Lords of*

*Destiny* will take - on the grounds of consciousness developed by *the new humanity*.

At the end of the era of Pisces, families, clans and nations were zealously built up - and decomposed again in order to replace them by an *elitary ideal of oligarchic globalization*: This is the old dream of a *«Reign of Thousand Years»* to be established during the era of Aquarius, according to some prophecies - but conceived in its basest form. Concurrently, the same forces ignite nationalism, racism and religious fanaticism. But in parallel, and thanks to humans awakening to true consciousness and sane mental capacities, activities developed in a decisive way to unmask this Great Power-play: On one hand, archeology, space research and academic science have almost completely *«de-mythologized»* the Universe. - On the other, esoterical movements and modern Quantum Philosophy define a completely new spiritual consciousness: During the 20<sup>th</sup> century, acknowledged Sciences cried: *«Who will still believe the fabulous stories of old!?»* - while at the same time presenting new *«historical facts»* and *«scientific models»* openly offending natural common sense: Idle modern myths!

Since the beginning of the 21<sup>st</sup> century instead, quantum-physical observation has *«reanimated»* archaic legends related to appearance, essence and main goal of the Universe as seen from a different point of view. - Immediately after this, above mentioned *objective recognition* of the presence of *«Spirit»* in *«Matter»* set in. - But if we look closer, suggestions in the sense of Quantum Philosophy occur already in the *Corpus Hermeticum* (1<sup>st</sup> century b.C. until 1<sup>st</sup> century a.C. approximately), and in the Veda's!

Such developments re-animated the old questions of humanity: *«Where from ...? - Whereto...? - What for...?»* . -

Today, the answers to these questions are no exclusive task for people on an esoterically spiritual quest any more, and even less for the <elites> originally formed to the purpose: Theologists, Sociologists, Anthropologists etc. – Today these answers are the *duty and responsibility* of *philosophico-scientific institutions* yet to be formed. – Part of them are going to be religious groupings and serious independent esoteric researchers: All those who are on a sincere quest for Light, for The Spirit, for Truth and for Life: Those who <*hermetically open*> (Ritman) strive for the highest spiritual, moral and scientific goal, growing in *true spiritual Knowledge – Gnosis – through experienced spiritual facts!*

The *Aquarius Genesis* we present here offers a basis for such new, valid and plausible answers. Like all earlier creation myths, it is connected to elder versions, the roots of which in turn stretch back as far as *Atlantis*, viz. to even older *Lemurian eras*. –

These names designate not just some geographical regions but two so-called <prehistoric> world periods<sup>2-A</sup>. Therefore, the present book includes the old classic Symbolism with its *silent significations*. And even the Mesopotamian family tale about Adam and Eve, Cain and Abel, Isaac and Ismael find here their relative significance – but now as symbolic images along modern psychological conceptions and thought-strings showing that whatever exists is WAVES: Material and immaterial things – thoughts, words and deeds – if in time or in Eternity – if in human disgrace or divine glory: All can be perceived as a specific vibrational quality, and on this basis all may be understood in a deeper, more adequate way. Thus above mentioned *primary human questions* may be answered in a more definite factual manner.

Now, the title *Compendium Creationis* – i.e. *a summary and <Musæum>* of different myths and models relating the

appearance of Creation - has a profound double meaning:

Firstly, the *twelve Theses* of the *Aquarius Genesis* do not present themselves as a pleasant story, but as an extremely condensed kaleidoscope, rotating in different speeds at a time. And each of these theses needs deep individual meditation.

The *twelve <Schollia>* interpreting the Theses are a most needed help to understand the latter. At the same time they contain the complete <Universal Doctrine> of world-wide *Spiritual Science*. The present book thus develops - irrespective of *preconceived visions and traditions* - an *independent*, i.e. *autonomous* conception put down in the highest possible density of information: It attempts to develop sort of a *hologram* of the spiritual structure of the Universe - scarcely lifting the symbolical robe by present-day explanations, tailored as it were from a tissue of interwoven blunt facts and holy Mysteries ... - in one word: a *Compendium*.

Secondly, the center of gravity and focal point of this <*Compendium*> is Man: Once, Man as the *Compendium* of the whole Creation, and «*in likeness of God*» as once we were, and are meant to become again. - Then also Man as *degenerated creatures* amidst today's world - both completely non-paradisiac due to human demeanour: a mere shadow of themselves; - and lastly: Man as a Mediator between Creation and Creator; *pioneer and servant* to universal Creation on *its way back*: A *pioneer*, for Man precedes all other creatures in the development of *individual consciousness* as well as of *global consciousness* of the whole Universe and - as a last consequence - in *new likeness to God!* - And as *servants* in so far as Man will no longer antagonize the divine Plan of the Universe and its creatures as pompous and arrogant <Mister Adam>, but now

further the *One Path of all creatures* in loving brotherly devotion, achieving renewed godliness.

Such is the actual *Path of Redemption* which today is in reach of anybody, anywhere in the world - thanks to world-wide communication and to the universal impact of The Christos - *whatever His local denomination*; and this has almost nothing to do with official Christianity! This Path is real for *every creature*. It is - expressed in occidental wording - the *Imitation of Christ*, as heralded since eons: *in pre-christian and non-christian* <gospels>, proverbs, <acts> and myths. Many such texts were excluded from acknowledged Sacred Scriptures: some at the time of the latter's first canonization, some in later and even very recent times - as e.g. the four *Books of Maccabees* and the *Book Jesus Ben Sirah*.

*The commentaries to the Aquarius Genesis* - i.e. explanations relative to its *twelve Theses* - show the <first> surging of the Universe along with its <fall> and <redemption> as *scientific realities*. They shed a new light on the fact that Creation - especially that of *True Man* - is no myth parched by time, but an *everlasting Presence*. - Yes, there is, as already alluded to, a responsibility that today *must and can be understood* «*by all humans of good will*»: Divine GRACE and LOVE give us the opportunity of a new start. The *macrocosmic vibration of the UNIVERSAL CHRIST* donates us with the capacity and force to persevere. - *Individual efforts of every human* will finally lead *each creature* to its dignity; and Spirit will produce the final result: *Unity of All-in-All!*

Now, what indeed is the precise meaning of all this?

High academic Science today finds itself back at the threshold that centuries ago it crossed in an opposed direction - namely: the doorstep where once again in a

*philosophically scientific* way will be given the proof, that the only real driving force in the Universe - since *<The Beginning>* and until the *<End of Days>* - is THE unconditional, all-embracing, all-nourishing, all-protecting and all-renewing LOVE! - The present book will at several occasions emphasize this fact, and more in detail.

Deep insight into inter-relations of all creatures - from a neutrino over a bee *<up>* to a human - this *insight*, and the faint notion of an *absolute reality flowing from it* will produce a *<new>* understanding of God and the World, culminating in a *consciousness* finally worthy to be called *human*. Only few pioneers will dive into this new *Kratèr* of Wisdom, says the *Corpus Hermeticum*. But they will encourage more and more others to follow - just as the universal plan of God intends it for Man and Nature.

This dynamic may seem to be set for a very far future but really is just a recurrence on a gigantic, for human conception *<infinite>* spire. - Nothing really new is it; but *<only>* a renewal issuing from the plenitude of today's conditions, possibilities, and processes.

Acknowledging this cyclic pattern the text of the *Compendium* in a speech freed of stiff conventional conceptions speaks even of *<future things>* as of a *<past>*. Seemingly without motive, it changes from one temporal form to another, crossfading from mythical metaphors to real images a.s.f. - This should neither confuse nor irritate readers: In fact, each moment here is past already ere we can perceive it; and thus, what to one person appears as an obvious presence, others will see as already past - or else as a far-off and dubious future. All these impressions are true as much as they are false. For in the perspective of an unrestrained view, *everything is Presence - everything happens NOW!*

Thus we like to share this book with renewed open minds and courageous hearts of all those readers who already have found the answers to said primal questions of Humanity. And we like to hand it over also to those who only have the questions, but no conclusive, satisfying answer as yet: Not that *<the final answer>* could be given here: Silly and arrogant would be an author daring to state that he himself possesses it: Every *<last answer>* can be valid only individually and for short moments. And as a logical consequence, it can disclose itself only as an individual *revelation*. -

Innumerous changing *<realities>* and *<truths>* swarm through the microcosmic universe of every single creature! - But the *One Last Truth* so much hoped for by every typical seeker - it will never be found in human hands. Blessed are those who from time to time are hit by a divine spark of which they *must know* - because *«it cannot be otherwise»* - that this or that reality *has to be* an impregnable truth. But this, then, is no intellectual understanding anymore, nor either some *<esoteric knowledge>*: It is a *<blood-certainty>* that cannot be shared but among those who are *tinged* by the same *blood*: By the true blood of the intercosmic CHRISTOS irradiating this World. - This *eternal blood* flows to all *bona-fide seekers* of all cultures who *receive Him*:

*To all who received HIM ... HE gave the power to become <Sons of God> again!*

## **Interlude**

### **Creation of the World as exposed by Hermes Trismegistos (Corpus Hermeticum - ‹The Sacred Speech of Hermes› ) <sup>2</sup>**

*The glory of All is God. He is the divinity of whatever is divine, the universal Beginning: God, Spirit, Essence, Deed, Destiny, End, and renewal of all.*

*Namely, there were in the Abyss an immeasurable shadow, and beyond it: Water and a subtle spirit like a thought: These were contained in the Chaos, by divine omnipotence. - But then, there blossomed up a sacred gleam of light: this blended into the sandy masses and amongst the moist force of Nature the Elements. And all gods revered these seminal natural forces - for they were not yet perceptible. But soon all that is subtle soared up to the heights; while all that is heavy instead stayed beneath the moist sands.*

*When all things were separated from each other, receiving their momentum, they were carried along by a fiery spirit. - Up sprang there Heaven in seven steady orbs: Within the star constellations with their signs, the gods became visible. - Calculated were then the stars in accordance with those who inhabit them. - Stronger on its orbit did Heaven move the gods in lofty circles, in harmony with divine Spirit. Each god out of inner virtue fulfilled the work attributed to them. - And now were born all living beings: Quadrupeds, reptants, aquatic animals as well, and the flying ones. - The sowings also - all the green that multiplies by seeds; - and herbs as well and sprouting flowers. - And all those carried*

*in them the seeds for their rebirth. - Evenly generation of Man: for knowledge about the divine works, and as a testimony for Nature - as sovereigns over whatever is roofed by Heaven; for discernment of the Good; for the thriving of all generation, and for numerous proliferation. - And each and every soul, veiled by the light shadow of the flesh, so that they should have a subtle notion of the orbiting of heavenly gods, and comprehend the works of God, and progression of Nature, the auspices of what is good, as well as the strength and potency of God.*

*Some are much too confused to be capable of discerning Good and Evil, and to acquire artful skills for manifold good things. - And yet it comes to life within them, so that step by step they become aware of the wisdom of the motions of orbiting gods - and that moreover they themselves are involved with them: - Thereof, abundant memorials will be found, and admonitions by Masters of Arts from throughout the world to their elect in the course of times, through bringing forth herbs, and generating live flesh. - All that is rotten will from the seeds of fruits - and thanks to the Workmaster of Nature and Art - rejuvenate itself. -*

*Finally, born of the need to survive, and during renewal of the gods as well as of the cycles of multiple Nature, reappeared Divinity and, mediating Spirit, conflated, so to speak, the complete assembly of the world, while Nature, once more, flourished again.*

*And, soon, in its true divinity Nature was again established. [2-B](#)*

Figure from Kircher's *Œdipus Ægyptiacus* (1652). — The inscriptions say:

*Explicit hieroglyphic image elucidating the movement of the World-Soul. // Hieroglyphic image of the sphere of the scarab // spiral of advancement of the Mundane Spirit // Spirit moves the mass, and a physical [?] lodestone mixes // spreading of Spirit by stirring up what is insensible, it to become sensible (i.e. sensually perceptible) // Return of Spirit curved back to [its? origin?]. -*

Idea hieroglyphica explicita / Anima mundi processum indicans // Idea pilæ Scarabæi hieroglyphica. // Spiritūs mundani helicus progressūs // mens agit moem et magneta corporea(?) miscet // diffusio Spiritūs ex insensibili ad sensibilem agitando // reditus Spiritūs ad iniciata (?) suæ contortūs (?) —

According to the image source on internet, this image represents a stele in memory of the restoration of the Temple of S<sub>IN</sub> (Moon-God) by the «last king of Babylon -

*Nabonid* {Nebo = planet Mercurius ☿}, around 550 b. C.» . - In fact we rather recognize there an old priest-king: terrestrial representative of the Governor of the World, with his rod of power. His Left holds the same secret object (power tool) as seen in Egyptian Statues of Horus, Ramses, etc. - In front of him (left to right): MOON (Sin); second: MARDUK: The <unfinished> cross stands as a hieroglyph for the SOLAR SON - the CHRISTOS, hinted at by a soaring <crucified> *Eagle* (a solar God or Angel) descending from the Heavens. - And, third: The SUN, resp. SIRIUS-SOTHIS (as a leading star with eight rays, and a Sun Symbol in its heart). These three symbols together - arranged in a different way - add up to the symbol for Mercury again: ☿

## THE 12 THESES

1. *In the Beginning, when there was nothing created yet at all, God created NUMBER.*
2. *In the second place, God created the UNIVERSE OF PLENITUDE: - this was the pure, absolutely divine, completely spiritual Universe: Space without forms, without thoughts or words, with neither light nor darkness. Its figure is the Circle ○, that is All-in-All; for God was One with this World, and this World was in God, and God was this World, and there was no single limitation - neither of Space nor of Time: All was God; All was WISDOM, STRENGTH, LOVE and SPIRIT; - and All was perfectly good.*
3. *Within the UNIVERSE OF PLENITUDE shone up now the LIGHT-CROSS ✕: This is the Love Force of the CHRISTOS. - And thus was inspired a first PARADISE: ⊗. - There was just Spirit, Plenitude of potentialities, and Light. It was the all-one Sphere of Existence - all Light, Goodness and Harmony. No Evil dwelled therein, for no Evil existed; - and there could not dwell any Evil outside either, for there was no outside yet. - All was One. All was Spirit, Love and Light. God was in All, and All was in God.*
4. *Thirdly, God made the RHOMBUS ◇. And with the RHOMBUS was created also the CROSS + always contained within the RHOMBUS: ◇. - This is the spiritual potentiality of the FOUR ELEMENTS. In the RHOMBUS ◇ the Triangle of FIRE △ and the Triangle of WATER ▽ were still united - but lacking consciousness. - AIR and EARTH instead were still*

*dwelling in Secrecy. – This was the Plenitude of potentialities within the wholly spiritual FIRST PARADISE:*

5. *Fourth, God made the SQUARE – ever-maidenly Mother of all material manifestations: □. And inside the SQUARE again flashed up the CROSS always concealed in the Square ☒ – the LIGHT-CROSS × of the CHRISTOS.*
6. *Within the harmony of primary paradisiac occurrences, a FIRST SEPARATION happened : The Elohim of the archaic Trinity △ created EVE, and with her they engendered CAIN AND NORIYA (another cosmic Triangle, △! ). The ELOHIM OF THE TETRAD □ instead formed ADAM. As The One of them ordered ADAM to mate with EVE, sprang up for him ABEL ▽ . CAIN was a son of the ELOHIM OF FIRE: divine. – ABEL instead was engendered (at the directive of the Seventh – <The One>), as a son of ADAM and EVE: an Earthling as it were – still spiritual, but elemental according to the ◇.- This elemental separation became the FIRST FALL*
7. *From the separation into a spiritual and an elemental Creation, there resulted contrarities between the Light Creatures among them, and in each of them as well. And thereof arose – as a dominant Spirit – the GREAT DISTRATOR – alienated of the paradisiac harmony of the divine World of Love, albeit yet dwelling in it. For: from the separation into ADAM and EVE, into CAIN and ABEL, the World experienced envy – and also gleeful gloating, anger and sufferings, violence and Death. This was the SECOND SEPARATION – the SECOND FALL. Thus, the FIRST PARADISE ⊗, within the all-one, divine spiritual Light-World was transformed into an etherically elemental SECOND PARADISE – ⊕.*
8. *The DISTRATOR – issued from negative thoughts, emotions and desires of elemental creatures as he was –*

*out of himself now generated negative thoughts, emotions and desires as well. In him arose the lust of power. – And so <EVIL> was born. – In order to establish his own kingdom he misled the dwellers in Paradise to follow his will: So, from the ⊕ came forward – in a THIRD SEPARATION – the physical World ⚡ with its properties known so well to all humans. This was the so-called EXPULSION FROM PARADISE – the THIRD FALL.*

*Physical creatures as well as the DISTRACTOR were expelled from Paradise; and thus the DISTRACTOR got his own kingdom <outside> the paradisiac divine world. – Thus appeared the dark KINGDOM OF WRATH.*

9. *The dwellers in the KINGDOM OF WRATH were completely subdued and dominated by the latter's Lord. They were separated from the Sole Good like he, in quarrel and anger like he, in Darkness and Death like he. – In one thing however they differed from him: Abel's sons as well as Cain's sons preserved – hidden in the innermost core of their hearts, but more and more unconsciously – and imperceptible for most of them – a divine core-vibration issued from the Kingdom of Light and Love. This divine core-vibration the Lord of the Kingdom of Wrath did not have, him being of no divine origin but emerged as a consequence of division – from negative thoughts, emotions and acts by the creatures within his reign as well as by himself.*
10. *Those others however, albeit being immersed completely in the darkness of ignorance, were touched from time to time by the luminous, fiery love-vibrations issued from the pure divine world ⊗ that irradiates and penetrates the Kingdom of Wrath, any time. Whenever such a beacon of Love-Light hit one of said kernels of remembrance, the latter flared up – for a short instant or longer. – Such flashes of reminiscence of the original*
