Section I Introduction 1

1 Demystifying the Impacts of the Fourth Industrial Revolution on Logistics: An Introduction 3

Mac Sullivan
Introduction 3
Future of Work in the Fourth Industrial Revolution 3
The Role of Digital Transformation 4
Hub Economy Companies Leading the Way 5
Current State of the Logistics Industry 5
Effects of the Second and Third Industrial Revolutions on Logistics 5
Technology Is Easy; But People Are Hard 6
The Role of Startups in the Logistics Community 6
Logistics Companies Under Pressure 7
Technology Investments by Logistics on the Rise 7
New Entrants Threaten Status Quo 8
Disintermediation Threat Looming 8
Navigating a Digital Transformation 9
Budget Considerations for Technological Upgrades 9
Lessons Learned from Other B2B Industries 10
Automation Leading in Terms of Return on Investment 10
Winners and Losers of a Digital Transformation 11
The Necessity of Economies of Scale 11
Foundations of a Digital Transformation 12
Prioritization of Technology Exploration 12
Connectivity Standardization in Logistics 12
   New Business Models Emerging 13
   Participation in Platforms and Marketplaces 14
   Zoom Out/Zoom In Approach 14
   The Time Is Now 15
Conclusion 16
Key Takeaways 17
References 17

Section II Technologies 21

2 Technologies Driving Digital Transformation 23

   References 25

3 Logistics Management in an IoT World 27
   Axel Neher
   Introduction 27
   Logistics Management in an IoT World 29
      Get Connected 29
      Criteria for Defining the Right Things 30
      Sensors and Identification 30
   Means of Connection 31
      Triggers 31
      Standards 31
      Security 32
   Get Decisions 33
   Get Prepared 34
      Data Quality 34
      Organization 35
      Skills 35
      Ecosystem 36
   Conclusion 36
   Key Takeaways 38
   References 39

4 Additive Manufacturing: Shaping the Supply Chain Revolution? 41
   Johannes Kern
   Introduction 41
   AM Supply Chain 42
   Evaluation 43
      Advantages 43
      Bottlenecks 44
The Role of Robotic Process Automation (RPA) in Logistics

Mac Sullivan, Walter Simpson, and Wesley Li

Introduction 61
Companies Under Pressure 61
RPA as a Solution 62
Evaluating Heavyweight IT to Lightweight IT Automation 62
Achieving Operational Excellence 63
Process Improvement on the Rise 63
Outsourcing Versus Automation 64
Center of Excellence as a Leader of RPA 64
RPA: Hype or Realistic Solution 65
The Facts 65
Rote, Repetitive Tasks Ripe for Automation 65
Process Considerations of Implementing RPA 66
Motivating Example: Konica Minolta Using RPA 67
Konica Minolta’s RPA Roadmap 68
Use Cases for RPA in Logistics 70
Track and Trace 70
RPA Adoption at DHL 71
Navigating Your RPA Journey 71
Who Should Own This RPA Journey? 71
Process Mining and Process Mapping 72
Choosing the Right RPA Provider 72
Change Management Considerations 73
RPA Implementation Announcement 73
Liberated Knowledge Workers 74
Interacting with RPA 74
Training the Bot 74
Next Evolution of RPA Training 75
Conclusion 75
Key Takeaways 76
References 76
6 Blockchain Will Animate Tomorrow's Integrated Global Logistics Systems 79
Nicholas Krapels
Introduction 79
The Origins of Blockchain Technology 81
The Potential of Blockchain Technology 84
  Revolution via Protocol 84
  Essential Properties of Blockchain 85
Blockchain Applications in Logistics 88
  Public Blockchain Applications in Logistics 88
  Private Blockchain Applications in Logistics 89
Conclusion 92
  From Trusted Actors to Trustless Networks 92
Key Takeaways 94
References 94

7 Digitalization Solutions in the Competitive CEP Industry – Experiences from a Global Player in China 97
Scott Wang and Johannes Kern
Introduction 97
Challenges in Key Logistics Segments 97
Digitalization Solutions Today 98
E-Commerce in China and Its CEP Market 100
A New Competitive Environment 101
Digitalization Solutions of the Future 102
  Internet of Things (IoT) 102
    Artificial Intelligence (AI) 103
  Blockchain 104
Case Study: Enhanced Address Translation Through AI 106
Conclusion 109
Key Takeaways 109
Acknowledgements 110
References 110

8 Understanding the Impacts of Autonomous Vehicles in Logistics 113
Lionel Willems
Introduction 113
Evolution of AGVs 114
  Intelligent Logistics 116
The Automation of Indoor Transport Systems 116
  Opportunities for AGVs 117
  Challenges of Adopting AGVs 118
The Automation of Outdoor Transport Systems  119
  History of the Automation of Outdoor Transport Systems  119
  Opportunities and Challenges in Logistics  120
Drones and Their Use in Logistics  122
Conclusion  124
Key Takeaways  124
References  125

9 Logistics in the Cloud-Powered Workplace  129
John Berry
The Cloud Revolution  129
  Growing Dominance of Cloud Computing  130
    Infrastructure as a Service (IaaS)  130
    Platform as a Service (PaaS)  131
    Software as a Service (SaaS)  132
  Enabling New Business Models  132
How Software Drives Logistics  133
  Warehouse Management Systems (WMS)  134
  Transportation Management Systems (TMS)  134
  Shortcomings of Conventional Logistics Software  135
    Complexity  135
    Difficult Data Integration  135
The Impact of SaaS on Logistics  136
  A New Technology Delivery Model  136
  SaaS Warehouse Management Systems  137
  SaaS Transportation Management Systems  138
  APIs  138
SaaS-Enabled Value Creation  139
  Automation  139
  Integration  141
  Analytics and Artificial Intelligence  141
Conclusion  142
Key Takeaways  143

Editors

Mac Sullivan
Mac Sullivan is currently the Head of Technology and Digital Promotion at NNR Global Logistics. In this role, he oversees a portfolio of programs that leverage technology to create operational and commercial efficiency. Mac has an MBA from Hult International Business School and is pursuing his PhD from East China Normal University in the field of Political Theory. In addition to working for the past eight years in international logistics, he teaches Supply Chain Management at Texas Christian University and Cross-cultural Communication at Tongji University.

Johannes Kern
Johannes is an Affiliated Professor of Supply Chain Management at Tongji University, China and General Manager of Xiezhi Consulting. His research focuses on logistics, purchasing, and supply chain management, particularly on buyer–supplier relationships and the digital transformation of logistics. He supports international companies in China to optimize the whole supply chain, including sourcing, transportation, warehousing, and production. Prior to that he worked in various functions in purchasing and logistics at the Bosch Group in Asia-Pacific where he led teams and managed strategic projects in China, Korea, Thailand, Malaysia, Japan, and India. Johannes holds master’s degrees from the University of Munich, Germany; Emlyon Business School, France; Aston University, UK and a PhD from Technical University Darmstadt in Germany.

Authors

Matías Aránguiz
Matías is a Chilean lawyer but has moved into the area of financial technology and artificial intelligence. Currently he is deputy director of the Program of Law, Science and Technology of the Catholic University of Chile and partner in the law firm Quarkz. In addition, he is currently pursuing his PhD in the Regulation of AI in Financial Markets from Shanghai Jiaotong University. He received his Master’s in Finance from Shanghai University of Finance and Economics.
**John Berry**
John is currently the IT Director for JUSDA Supply Chain Management, a member of the Foxconn Technology Group. In this role he leads a team that develops and implements technology solutions for the global manufacturing supply chain. Prior to JUSDA, John was the IT Director for NNR Global Logistics, a non-asset-based logistics provider. At NNR, John directed the USA IT operation as well as several global technology initiatives. This included leading various software development projects that powered NNR's air freight, ocean freight, customs, and warehousing operations. With 28 years of experience in IT, John enjoys helping a new generation of technologists establish careers in the supply chain and logistics field. John blogs at http://www.johnberry.us.

**Ira Breskin**
Ira Breskin is a senior lecturer at State University of New York Maritime College. He teaches applied economics, expository writing, and maritime history courses.

Breskin also is the author of The Business of Shipping (ninth edition), a seminal book that addresses industry economics, operations, and regulation.

He joined the SUNY Maritime faculty in September 2003 after completing a 25-year career as a reporter/editor for several business publications. He continues to do freelance writing.

Breskin has a BA from Columbia University, an MBA from Dowling College, and a MS in International Trade and Transportation from SUNY Maritime. He has won several academic fellowships including a Knight Bagehot at Columbia University and a National Endowment for the Humanities award to study maritime history at Mystic Seaport.

**Colin Cobb**
Colin recently served as the Vice President of B2B, leading sales operations for nuLOOM/RUGSUSA.com, one of the largest global rugs and decor brands. He also has experience in leading the e-commerce divisions for multiple consumer goods manufacturers in the home space. In addition to leading omni-channel and e-commerce teams, Colin has over 10 years of experience in supply chain and logistics management. His contributions with various organizations have expanded into digital marketing, product development, and optimizing retail dropship networks. He has a Master’s in Logistics and Supply Chain Management from Georgia College State University, as well as his six-sigma black belt.

**Simon de Raadt**
Simon is Vice President Europe at HyperSKU, Managing Partner at MAiNS International, and co-founder of DigiDutch. He has been based in China since 2011 and active in cross-border trade and e-commerce logistics between China and Europe. His specialty lies in e-commerce parcel deliveries from and to China. Prior to MAiNS, he has been working at TNT Post, Capgemini, and various other positions. Simon has a Master’s degree in Business Economics at the University of Amsterdam.

**Samuel Heuck**
Sam is the founder and director of Atlas Sourcing Partners, a Hong Kong-based trading company specializing in building materials. For six years, he was based in Shanghai where
he led the turnarounds of two manufacturing businesses. Sam has transactional and operating experience in over 15 countries including India, Vietnam, and Germany with extensive experience and focus on China and Asia-Pacific. At press time, he was an MBA candidate at MIT Sloan School of Management.

**Ruben Huber**
Ruben grew up in the trucking and warehousing business in Germany and held various management and executive roles in leading shipping lines, NVOCCs and intermodal operators across Europe, China and the Middle East. Today he is consulting on strategy, digitalization, internationalization, and logistics. He is the founder and director of OceanX, a network and think tank of leading seafreight specialist firms. He has a freight forwarding education, holds a German degree in business economics and an MBA from Aston University.

**Cameron Johnson**
Cameron has 20 years of experience in management across various industries in China. He drives the strategic consulting and advising initiatives at Tidal Wave Solutions. His expertise focuses on developing and executing strategy in difficult business environments, turning a business around to profitability, and operational excellence across a global company.

Cameron was a long-serving Asia General Manager at a leading carbon fiber company, where he worked in close collaboration with European and US stakeholders, suppliers, downstream customers, and regulators. He participates extensively in the American Chamber of Commerce where he served as the Chairman of the Aerospace Sub-committee in 2015–2017, and co-chaired the Future Leaders Committee from 2016–2018. He is currently Vice Chair of the Manufacturers’ Business Council, and an advisor to the National IDC Industrial Technological Innovation Strategic Alliance, a China-based technology association.

**Nicholas Krapels**
Nic is the Managing Director for DarcMatter China. He is a leading blockchain expert in the Asia-Pacific region and an experienced financial consultant. He has an MBA from the University of South Carolina and is pursuing his PhD in Political Theory from East China Normal University.

**Wesley Li**
Wesley Li is an IT and service operations director with more than 17 years of combined experience in the logistics, freight forwarding, manufacturing, business consulting, and technology services industries.

Over the past few years, Wesley has been focusing on bringing business and IT together and promoting the concept of “IT Business Partner,” shaping the traditional IT culture to fit the new IT business world. As a senior manager, he has been closely working with CEO and the senior management team to promote, drive, and resolve business issues by applying new technology. This great experience has given him many new business insights and turn them into innovations. He has demonstrated a capability to achieve business goals through innovative technology. He has a broad range of technical and
information security expertise coupled with highly effective communications and interpersonal skills.

**Cory Margand**
Cory is the co-founder and CEO of SimpliShip, which is an international air and ocean freight SaaS-powered marketplace for freight procurement including a full suite of APIs. Cory has 14 years’ experience in supply chain management working with companies like Adidas and Rockport. Cory has a Master’s in Operations Design and Leadership from Worcester Polytechnic Institute.

**Andrea Margheri**
Andrea Margheri is a Cyber Security researcher and consultant specialized in digital identities and blockchain technology. Andrea holds a Ph.D. in Computer Science from the University of Pisa. Specialized in the design and deployment of access management systems, Andrea was with the University of Southampton where he coordinated research initiatives on blockchain in the context of EU H2020 projects and UK-founded industrial projects.

**Robert Mostert**
Robert Mostert is Head of Human Resources of the Global Forwarding Division of the Toll Group. He joined Toll in March 2018 after having worked for nine years for Standard Chartered Bank (SCB), where he was Global Head of HR of its Risk function, followed by a number of years as Head of HR of its Global Information Technology area and SCB’s Global Shared Services Centers.

Prior to his time at SCB, Robert worked as Global Director Human Resources of the Biochemicals Division of CSM, as Director Organizational Development of Innodata Corporation (a BPO provider that operates predominantly in the Philippines and India), and as Senior Manager of KPMG Consulting in Hong Kong.

Robert holds a Master’s degree in Law from the University of Utrecht, The Netherlands, an MBA from Bradford University Management Centre in the United Kingdom, and an Executive Master’s Degree in Consulting and Coaching for Change from INSEAD. He has recently also completed the Senior Executive Leadership Program at Harvard Business School.

**Axel Neher**
Axel has 15 years of working experience for Bosch and Bosch Rexroth globally in various management and consulting positions in logistics and lean production. He has published several articles on supply chain management, international logistics management, and accounting. He has an MBA and a PhD from the University of Marburg.

**Ayush Pandey**
As a kid, the game of “Farmville” piqued Ayush Pandey’s interest in the supply and demand. A supply chain enthusiast with a keen interest in global logistics, Ayush has leveraged exceptional cross-functional collaborations at the Indian Institute of Technology, Bombay, Tata Power Ltd., and Philips Lighting to drive operational efficiencies in multimillion-dollar global logistics and warehousing projects. Driving a positive change in all his professional engagements inspires
Ayush to get to work every day. Currently pursuing his Master’s in Supply Chain Management (with a focus in logistics and transportation) from Northeastern University, Boston, Ayush is excited about two things in the shipping industry in the next decade: digitalization and de-carbonization. Having witnessed the birth of mega-ships, IMO 2020, and COVID-19, there is not a single day when he does not think, “What an exciting time to be a Logistics professional!” Apart from his professional engagements, Ayush has spent a good part of the last decade in 100+ community building projects, and is passionate about women empowerment, ending hunger, and cross-cultural communication.

**Jens Puttfarcken**
Dr. Ing. Jens Puttfarcken, 54 years old, has worked in the automotive sector for 29 years and moved from Fiat to Porsche in 1997. He has held multiple positions at Porsche AG, including Manager Sales of Porsche subsidiaries in Europe and subsequently in a worldwide capacity. In 2004 and 2010, he was appointed Vice President Customer Relations, and Vice President After Sales respectively at Porsche AG, contributing considerably to maintain Porsche customer brand loyalty and to enhance their enthusiasm for the brand. In 2015, Dr. Ing. Jens Puttfarcken was appointed Chief Executive Officer of Porsche Deutschland GmbH, where he was responsible for maintaining Porsche’s stable development in the domestic market.

**Dyci Sfregola**
Dyci Manns Sfregola holds a Master’s in Engineering Management from Kennesaw State University’s Southern Polytechnic College of Engineering. She spent the early part of her career in digital and experiential marketing before transitioning to supply chain. She is currently a consultant focused on Connected Planning process improvement and leveraging cloud-based technology to achieve supply chain excellence.

**Walter Simpson**
Walter graduated from Clemson University in 2019 with a degree in supply chain management. After spending a summer in Hong Kong working for local 3PL Wilson Logistics Ltd., he began his career in February of 2020 with NNR Global Logistics in Dallas, TX. In his role as Process Coordinator for the Technology and Digital Promotion Team, he uses process mining and mapping techniques to analyze the current state of workflows and leads projects to implement improvements using digital solutions.

**Jiayu Sun**
Jiayu is a Senior Training Specialist at Bosch. She has experiences in instructional design, digital learning, internal marketing and communication and is a certified articulate storyline expert. Prior to that she worked in various functions at Bosch where she was responsible for competence management and learning innovation. Jiayu holds a bachelor’s degree from Shanghai International Studies University and Shanghai Dianji University.

**Zheyuan Tang**
Zheyuan Tang is an Economics graduate from the University of Illinois at Chicago. He was the General Manager at Perception Jewelers where he engaged with thousands of international clients and handled logistics operations. A first-generation immigrant from China,
Zheyuan has certifications from both Peking and Fudan University. He specializes in researches on international trade and relations.

**Michael Babilon-Teubenbacher**

Michael Babilon-Teubenbacher is Partner with CPC AG, the German hidden Champion in Change Management providing services in the fields of change, project and HR management as well as organizational development.

Having graduated in International Business Administration from the International Management Center in Krems, Austria and spent most of the past two decades outside of his home country, Michael is truly a global citizen. Apart from project assignments in Japan, Spain, the Netherlands, and Australia he has so far spent more than six years in China ramping up and leading CPC Consulting (Beijing) Co., Ltd., the local subsidiary of CPC Group, as CEO. In this function he has also spearheaded CPC’s activities in Asia.

In more than 16 years of consulting, he has gained in-depth experience in transformation, strategy definition as well as organizational development projects in highly dynamic environments. While the automotive field clearly is his home-turf, he feels just as well at ease in telecommunications, banking, and logistics where during many assignments at the interface between business and IT his ability to build bridges and thus drive successful transformation has proven a key success factor.

**Bill Tran**

Bill is a sophomore, studying Supply Chain Management and Information Systems at Texas Christian University. Bill is also pursuing a MicroMasters degree in Supply Chain Management at MIT. He is currently working on a startup which provides business intelligence tools for logistics companies to leverage their competitive advantages and exceed their customer expectations.

**Alex von Stempel**

Alex von Stempel has 30 years’ experience as a commentator and trade journalist, most of which dedicated to freight transport and logistics of perishables.

Thirteen years ago, he set out on his own, devoting a significant proportion of his time to developing global and regional perishable logistics events, including Cool Logistics Global, Logistics Hub and Cool Logistics Asia, which is held alongside the Asia Fruit Exhibition in Hong Kong.

Alex von Stempel also works as an independent logistics adviser and frequently acts as master of ceremonies for third-party events.

**Scott Wang**

Scott is Air Gateway Manager at UPS where he is responsible for managing the daily gateway air, space procurement and hub operations in Shanghai, ensuring superior service and developing innovative logistics solutions. Prior to that, he was a program manager for two of the most important accounts at UPS globally. Here, he led a team and managed complex projects and designed programs to ensure that projects were timely on board. Scott is member of the UPS China Millennial Business Resource Group, which supports innovation in the company by bringing a diverse set of ideas and insights to the
job. Scott holds an MBA from Fudan University and a BSc from Shanghai International Studies University.

**Andre Wheeler**
Based in Perth, Western Australia, Andre runs the Asia-Pacific Connex consultancy. With more than 20 years’ experience in international business, he maintains a diverse network of personal contacts throughout the United States, Asia, SE Asia, Africa, and the United Kingdom.

Holding a B. Science (Hons) degree and an MBA, he is currently working toward his PhD on the Impact of the China One Belt One Road initiative on infrastructure and logistics in the ASEAN Region.

Author of the book: “China's Belt Road Initiative: The Challenge for The Middle Kingdom Through A New Logistics Paradigm,” he has also published and presented a number of papers concerning China's Belt Road Initiative and the changing Eurasian trade paradigm.

He is recognized for his contribution and participation in the development of the Western Australian government’s Asian Engagement Strategy 2019–2030.

**Lionel Willems**
Lionel is team leader of project managers and business analysts in the open-core ERP company Odoo. After graduating with a master’s in supply chain management and international business from the Louvain School of Management (Belgium), he helped in digitalizing SMEs across Asia by working in Indonesia, Vietnam, and Hong Kong for three years. Strong in functional, technical, project management and cross-industry knowledge, Lionel’s contribution to this book reflects his passion for logistics, supply chains, and IT.

**Dennis Wong**
Dennis has 15 years’ experience in various functions at leading third-party logistics providers in the United States and China. Most recently he was the Director of Sales at Flexport Asia-Pacific Region, and previously the Director of Sales and Marketing at Kuehne + Nagel Hong Kong, where he acted as Head of Sales for Hong Kong, South China, and Macau.

Dennis studied at California State Polytechnic University in Pomona.
