Geophysical Monograph Series

212 The Early Earth: Accretion and Differentiation
James Badro and Michael Walter (Eds.)

213 Global Vegetation Dynamics: Concepts and Applications in the MC1 Model
Dominique Bachelet and David Turner (Eds.)

214 Extreme Events: Observations, Modeling and Economics
Mario Chavez, Michael Ghil, and Jaime Urrutia-Fucugauchi (Eds.)

215 Auroral Dynamics and Space Weather
Yongliang Zhang and Larry Paxton (Eds.)

216 Low-Frequency Waves in Space Plasmas
Andreas Keiling, Dong-Hun Lee, and Valery Nakariakov (Eds.)

217 Deep Earth: Physics and Chemistry of the Lower Mantle and Core
Hidenori Terasaki and Rebecca A. Fischer (Eds.)

218 Integrated Imaging of the Earth: Theory and Applications
Max Moorkamp, Peter G. Lelievre, Niklas Linde, and Amir Khan (Eds.)

219 Plate Boundaries and Natural Hazards
Joao Duarte and Wouter Schellart (Eds.)

220 Ionospheric Space Weather: Longitude and Hemispheric Dependences and Lower Atmosphere Forcing
Timothy Fuller-Rowell,
Endawoke Yizengaw, Patricia H. Doherty, and Sunanda Basu (Eds.)

- 221 Terrestrial Water Cycle and Climate Change
Natural and Human-Induced Impacts**
Qihong Tang and Taikan Oki (Eds.)
- 222 Magnetosphere-Ionosphere Coupling in the
Solar System**
*Charles R. Chappell, Robert W. Schunk, Peter M.
Banks, James L. Burch, and Richard M. Thorne (Eds.)*
- 223 Natural Hazard Uncertainty Assessment:
Modeling and Decision Support**
*Karin Riley, Peter Webley, and Matthew Thompson
(Eds.)*
- 224 Hydrodynamics of Time-Periodic Groundwater
Flow: Diffusion Waves in Porous Media**
Joe S. Depner and Todd C. Rasmussen (Auth.)
- 225 Active Global Seismology**
Ibrahim Cemen and Yucel Yilmaz (Eds.)
- 226 Climate Extremes**
Simon Wang (Ed.)
- 227 Fault Zone Dynamic Processes**
Marion Thomas (Ed.)
- 228 Flood Damage Survey and Assessment: New
Insights from Research and Practice**
*Daniela Molinari, Scira Menoni, and Francesco Ballio
(Eds.)*
- 229 Water-Energy-Food Nexus - Principles and
Practices**
*P. Abdul Salam, Sangam Shrestha, Vishnu Prasad
Pandey, and Anil K Anal (Eds.)*
- 230 Dawn-Dusk Asymmetries in Planetary Plasma
Environments**
*Stein Haaland, Andrei Rounov, and Colin Forsyth
(Eds.)*

- 231 Bioenergy and Land Use Change**
Zhangcai Qin, Umakant Mishra, and Astley Hastings
(Eds.)
- 232 Microstructural Geochronology: Planetary Records Down to Atom Scale**
Desmond Moser, Fernando Corfu, James Darling, Steven Reddy, and Kimberly Tait (Eds.)
- 233 Global Flood Hazard: Applications in Modeling, Mapping and Forecasting**
Guy Schumann, Paul D. Bates, Giuseppe T. Aronica, and Heiko Apel (Eds.)
- 234 Pre-Earthquake Processes: A Multidisciplinary Approach to Earthquake Prediction Studies**
Dimitar Ouzounov, Sergey Pulinets, Katsumi Hattori, and Patrick Taylor (Eds.)
- 235 Electric Currents in Geospace and Beyond**
Andreas Keiling, Octav Marghitu, and Michael Wheatland (Eds.)
- 236 Quantifying Uncertainty in Subsurface Systems**
Celine Scheidt, Lewis Li, and Jef Caers (Eds.)
- 237 Petroleum Engineering**
Moshood Sanni (Ed.)
- 238 Geological Carbon Storage: Subsurface Seals and Caprock Integrity**
Stephanie Vialle, Jonathan Ajo-Franklin, and J. William Carey (Eds.)
- 239 Lithospheric Discontinuities**
Huaiyu Yuan and Barbara Romanowicz (Eds.)
- 240 Chemostratigraphy Across Major Chronological Eras**
Alcides N.Sial, Claudio Gaucher, Muthuvairavasamy Ramkumar, and Valderez Pinto Ferreira (Eds.)

- 241 Mathematical Geoenergy: Discovery, Depletion, and Renewal**
Paul Pukite, Dennis Coyne, and Daniel Challou (Eds.)
- 242 Ore Deposits: Origin, Exploration, and Exploitation**
Sophie Decree and Laurence Robb (Eds.)
- 243 Kuroshio Current: Physical, Biogeochemical and Ecosystem Dynamics**
Takeyoshi Nagai, Hiroaki Saito, Koji Suzuki, and Motomitsu Takahashi (Eds.)
- 244 Geomagnetically Induced Currents from the Sun to the Power Grid**
Jennifer L. Gannon, Andrei Swidinsky, and Zhonghua Xu (Eds.)
- 245 Shale: Subsurface Science and Engineering**
Thomas Dewers, Jason Heath, and Marcelo Sánchez (Eds.)
- 246 Submarine Landslides: Subaqueous Mass Transport Deposits From Outcrops to Seismic Profiles**
Kei Ogata, Andrea Festa, and Gian Andrea Pini (Eds.)
- 247 Iceland: Tectonics, Volcanics, and Glacial Features**
Tamie J. Jovanelly
- 248 Dayside Magnetosphere Interactions**
Qiugang Zong, Philippe Escoubet, David Sibeck, Guan Le, and Hui Zhang (Eds.)
- 249 Carbon in Earth's Interior**
Craig E. Manning, Jung-Fu Lin, and Wendy L. Mao (Eds.)

Library of Congress Cataloging-in-Publication Data

Names: Coster, A. J. (Anthea J.), editor. | Erickson, Philip, J. 1965- editor. | Lanzerotti, Louis J., editor.

Title: Space weather effects and applications / Anthea J. Coster, Philip J. Erickson, Louis J. Lanzerotti, editors.

Description: Hoboken, NJ : Wiley-American Geophysical Union, 2021. | Series: Geophysical monograph series | Includes bibliographical references and index.

Identifiers: LCCN 2020042802 | ISBN 9781119507574 (cloth) | ISBN 9781119815594 (adobe pdf) | ISBN 9781119815587 (epub)

Subjects: LCSH: Technology-Environmental aspects. | Space environment.

Classification: LCC TD174 .S673 2021 | DDC 600-dc23

LC record available at <https://lccn.loc.gov/2020042802>

Cover Design: Wiley

LIST OF CONTRIBUTORS

Daniel N. Baker

Laboratory for Atmospheric and Space Physics
University of Colorado at Boulder
Boulder, Colorado, USA

Timothy S. Bastian

National Radio Astronomy Observatory
Charlottesville, Virginia, USA

Michael Bodeau

Northrup Grumman Aerospace Systems
Redondo Beach, California, USA (ret.)

Gary S. Bust

Johns Hopkins University
Applied Physics Laboratory
Laurel, Maryland, USA

Anthea J. Coster

Haystack Observatory
Massachusetts Institute of Technology
Westford, Massachusetts, USA

Philip J. Erickson

Haystack Observatory
Massachusetts Institute of Technology
Westford, Massachusetts, USA

Dale E. Gary

Center for Solar-Terrestrial Research
New Jersey Institute of Technology
Newark, New Jersey, USA

John Kappenman

Storm Analysis Consultants
Duluth, Minnesota, USA

Louis J. Lanzerotti

New Jersey Institute of Technology and
Alcatel Lucent Bell Laboratories
New Jersey, USA (ret.)

William Liles

HamSCI Community
Virginia, USA

Christopher J. Mertens

Space Radiation Group
NASA Langley Research Center
Hampton, Virginia, USA

Cathryn Mitchell

Department of Electronic and Electrical Engineering
University of Bath
Bath, UK

Marcin D. Pilinski

Laboratory for Atmospheric and Space Physics
University of Colorado at Boulder
Boulder, Colorado, USA

William Radasky

Metatech Corporation
Goleta, California, USA

Eric K. Sutton

Space Weather Technology, Research, and Education
Center
University of Colorado at Boulder
Boulder, Colorado, USA

Jeffrey P. Thayer

Ann and H. J. Smead Aerospace Engineering Sciences
Department
University of Colorado at Boulder
Boulder, Colorado, USA

W. Kent Tobiska

Space Environment Technologies
Pacific Palisades, California, USA

Lawrence W. Townsend

Department of Nuclear Engineering
The University of Tennessee
Knoxville, Tennessee, USA
