Springer

SpringerBriefs in Education

We are delighted to announce SpringerBriefs in Education, an innovative product type that combines elements of both journals and books. Briefs present concise summaries of cutting-edge research and practical applications in education. Featuring compact volumes of 50 to 125 pages, the SpringerBriefs in Education allow authors to present their ideas and readers to absorb them with a minimal time investment. Briefs are published as part of Springer's eBook Collection. In addition, Briefs are available for individual print and electronic purchase.

SpringerBriefs in Education cover a broad range of educational fields such as: Science Education, Higher Education, Educational Psychology, Assessment & Evaluation, Language Education, Mathematics Education, Educational Technology, Medical Education and Educational Policy.

SpringerBriefs typically offer an outlet for:

- An introduction to a (sub)field in education summarizing and giving an overview of theories, issues, core concepts and/or key literature in a particular field
- A timely report of state-of-the art analytical techniques and instruments in the field of educational research
- A presentation of core educational concepts
- An overview of a testing and evaluation method
- A snapshot of a hot or emerging topic or policy change
- An in-depth case study
- A literature review
- A report/review study of a survey
- An elaborated thesis

Both solicited and unsolicited manuscripts are considered for publication in the SpringerBriefs in Education series. Potential authors are warmly invited to complete and submit the Briefs Author Proposal form. All projects will be submitted to editorial review by editorial advisors.

SpringerBriefs are characterized by expedited production schedules with the aim for publication 8 to 12 weeks after acceptance and fast, global electronic dissemination through our online platform SpringerLink. The standard concise author contracts guarantee that:

- an individual ISBN is assigned to each manuscript
- each manuscript is copyrighted in the name of the author
- the author retains the right to post the pre-publication version on his/her website or that of his/her institution

Preface

School principals play a critical role in engaging parents and their communities to enhance student learning and wellbeing yet, the qualities and strategies of leadership to encourage and sustain engagement are little researched. This book is the culmination of the initial work of four researchers—we, the authors, Linda-Dianne (Linda) Willis, Jenny Povey, Julie Hodges, and Annemaree Carroll—brought together serendipitously one day in 2015 when we met at a symposium in Brisbane, Australia, which had been convened to hear Dr. Debbie Pushor from Canada speak about her life's work in parent engagement. The four of us had been variously researching aspects of parent engagement and student wellbeing and, although aware of one another's work and interests at The University of Queensland where we worked in various departments, had never before been together in the same room. Soon after the symposium, the Queensland (Australian state) government announced a major release of funding for educational researchers—the Education Horizon Research grant scheme—totalling one million dollars. These funds were available for researchers to apply in line with the government's then education priorities. Early career researchers were particularly encouraged to apply. This sequence of events saw the birth of the *Principal Leadership for Parent-School-Community Engagement in Disadvantaged Schools* (shortened in this book to *Principal Leadership for Parent Engagement*) project which was supported throughout 2016–2017 following a successful application to the Education Horizon Research grant scheme (see Department of Education, 2016). An extension of this project was made possible by a second round of funding through the same grant scheme which has seen the initial phase of the project supported until 2020 (see Department of Education, 2017). (The findings of phase two of the project will be reported on in future publications as they are beyond the scope of this book.)

In writing about phase one of the project in this our first book, *Principal Leadership for Parent Engagement in Disadvantaged Schools: What Qualities and Strategies Distinguish Effective Principals?*, we present design-based research used to select principals of four disadvantaged schools in Queensland who appeared to demonstrate effective parent engagement. Essentially, we sought to respond to the provocation, What gives some principals the *edge* on parent engagement? To achieve our aim, data were initially gathered from principal interviews and teacher, parent,

and student focus groups together with survey data collected at each school. These data were subsequently analysed using a framework drawn from Schwab's (1973) notion of *commonplaces* in the planning of curriculum which comprises four coordinated equally important spheres of influence—students, teachers, curriculum (subject matter), and milieus—where milieus consist of schools, classrooms, parents, communities, and an additional milieu arising from our research, digital technologies. Apart from drawing on Schwab's framework to develop a unique analytic tool, this book extends the literature on principal leadership for parent engagement by combining Emirbayer and Mische's (1998) chordal triad view of agency—which comprises iterative (past), projective (future), and practical-evaluative (present) dimensions—with Biesta and Tedder's (2007) notion of *agency as achievement* to examine the findings. This approach to theorising the findings has deepened our understanding about what and how the qualities and strategies of the principals involved enhanced parent engagement. We show how the principals' agentic orientations to agency shifted from the past to the future to influence their choices and actions for achieving agency in parent engagement in their present environments. Recognising the cultural aspects of their particular contexts and settings appeared to assist principals as parent engagement leaders while material and structural aspects such as available resources and government policies variously hindered the possible agency they could achieve. We close the book by drawing conclusions about principal leadership for parent engagement and exploring implications for practice and research for schools, public policymakers, employers, and higher education stakeholders.

Acknowledgments

The research included in this book, *Principal Leadership for Parent Engagement in Disadvantaged Schools*, benefited from funding provided by the Queensland Department of Education 2016 Education Horizon Research grant scheme. The research was conducted by a team from The University of Queensland comprising Dr. Linda-Dianne (Linda) Willis, Associate Professor Jenny Povey, Dr. Julie Hodges, and Professor Annemaree Carroll. Research assistance and administrative support were provided by Ms. Charley Pedde, Ms. Alice Campbell, and Ms. Alexandra Gramotnev. The research team worked in collaboration with the Parents and Citizens' Association Queensland (P&Cs Qld) and Kevan Goodworth (P&C Chief Executive Officer [2014–2020]). The team wishes to acknowledge the contribution and offer their sincere thanks to the four principals involved in the project and the teachers, parents, students, and other staff at their schools who gave generously of their time and support to participate in the project.

We also gratefully acknowledge the three international reviewers who read an earlier version of this manuscript. We are thankful for their generosity of time and expertise in providing feedback, suggestions and comments which encouraged us to improve our work to benefit future readers and researchers. Finally, we sincerely thank Don Willis for proofreading multiple drafts of this manuscript and for offering ideas and suggestions to improve its clarity and message.

Disclaimer This book is not a statement of Queensland Government policy. The findings in this book were based on interviews, focus groups, survey data, and school documents collected in good faith from the individuals and schools involved. No responsibility is accepted by the Queensland Department of Education or the researchers for any errors or omissions contained within this publication. No liability will be accepted for loss or damage arising from reliance upon any information contained herein.
