Table of Contents

[Cover](#)

[Dedication Page](#)

[Title Page](#)

[Copyright Page](#)

[Preface](#)

[Acknowledgments](#)

[CHAPTER 1: Basic Nuclear Medicine Physics](#)

[Properties and structure of matter](#)

[Radioactivity](#)

[Questions](#)

[Answers](#)

[CHAPTER 2: Interaction of Radiation with Matter](#)

[Interaction of photons with matter](#)

[Interaction of charged particles with matter](#)

[Reference](#)

[Questions](#)

[Answers](#)

[CHAPTER 3: Formation of Radionuclides](#)

[Generators](#)

[Cyclotrons](#)

[Reactors](#)

[Questions](#)

[Answers](#)

[CHAPTER 4: Nonscintillation Detectors](#)

[Gas-filled detectors](#)

[Semiconductor detectors](#)

[Photographic and luminescent detectors](#)

[Questions](#)

[Answers](#)

[CHAPTER 5: Scintillation Detectors](#)

[Structure](#)

[Sodium iodide detector energy spectrum](#)

[Characteristics of scintillation detectors](#)

[Types of scintillation-based detectors](#)

[Questions](#)

[Answers](#)

[CHAPTER 6: Imaging Instrumentation](#)

[Theory and structure](#)

[Planar imaging](#)

[Questions](#)

[Answers](#)

[CHAPTER 7: Single-photon Emission Computed Tomography \(SPECT\)](#)

[Equipment](#)

[Acquisition](#)

[Dedicated cardiac SPECT cameras](#)

[Quantitation of lesion activity in SPECT studies](#)

[Questions](#)

[Answers](#)

[CHAPTER 8: Positron Emission Tomography \(PET\)](#)

[Advantages of PET imaging](#)

[PET camera components](#)

[Factors affecting resolution in PET imaging](#)

[Attenuation in PET imaging](#)

[Standard uptake values](#)

[References](#)

[Questions](#)

[Answers](#)

[CHAPTER 9: X-ray Computed Tomography \(CT\)](#)

[X-ray production](#)

[X-ray imaging](#)

[Computed tomography](#)

[Questions](#)

[Answers](#)

[CHAPTER 10: Magnetic Resonance Imaging \(MRI\)](#)

[Background](#)

[Introduction to MRI](#)

[References](#)

[Questions](#)

[Answers](#)

[CHAPTER 11: Hybrid Imaging Systems](#)

[PET-CT and SPECT-CT imaging](#)

[Current limitations in SPECT-CT and PET-CT hybrid imaging](#)

[PET-MR imaging](#)

[Questions](#)

[Answers](#)

[CHAPTER 12: Image Reconstruction, Processing, and Display](#)

[Reconstruction](#)

[Postreconstruction image processing](#)

[Questions](#)

[Answers](#)

[CHAPTER 13: Information Technology.](#)

[Network](#)

[DICOM](#)

[PACS](#)

[Information systems](#)

[Additional DICOM capabilities](#)

[Questions](#)

[Answers](#)

[CHAPTER 14: Quality Control](#)

[Nonimaging devices](#)

[Imaging](#)

[Reference](#)

[Questions](#)

[Answers](#)

[CHAPTER 15: Radiation Biology.](#)

[Radiation Units](#)

[The effects of radiation on living organisms](#)

[References](#)

[Questions](#)

[Answers](#)

[CHAPTER 16: Radiation Dosimetry.](#)

[Nuclear medicine dosimetry.](#)

[CT dosimetry.](#)

[Reference](#)

[Questions](#)

[Answers](#)

[CHAPTER 17: Radiation Safety.](#)

[Rationale](#)

[Dose limits](#)

[Methods for limiting exposure](#)

[Regulations](#)

[References](#)

[Questions](#)

[CHAPTER 18: Radiopharmaceutical Therapy](#)

[Introduction](#)

[Tissue-specific radiopharmaceutical treatments](#)

[Radiation protection](#)

[References](#)

[Questions](#)

[Answers](#)

[CHAPTER 19: Management of Nuclear Event Casualties](#)

[Interaction of radiation with tissue](#)

[Radionuclides](#)

[Hospital response to a radiation accident](#)

[Exposure and contamination](#)

[Hospital facilities](#)

[External decontamination](#)

[Personnel](#)

[Evaluation of the radiation accident victim](#)

Dedication

In memory of my parents, Rhoda and Edward Powsner, for all of their love, support, and guidance throughout the years.

R.A.P.

To the memory of my father, Ivan George Palmer, who would have said, "Well, what's all this then?"

M.R.P.

Essentials of Nuclear Medicine Physics, Instrumentation, and Radiation Biology

FOURTH EDITION

Rachel A. Powsner, MD

Clinical Professor of Radiology
Boston University School of Medicine
Director, Division of Nuclear Medicine
Department of Radiology
Boston Veterans Administration Healthcare System
Boston, MA, USA

Matthew R. Palmer, PhD

Director of Medical Imaging Physics
Department of Radiology
Beth Israel Deaconess Medical Center
Assistant Professor of Radiology
Harvard Medical School
Boston, MA, USA

Edward R. Powsner, MD*

Former Chief, Nuclear Medicine Service Veterans
Administration Hospital
Allen Park, MI, USA

Limit of Liability/Disclaimer of Warranty

The contents of this work are intended to further general scientific research, understanding, and discussion only and are not intended and should not be relied upon as recommending or promoting scientific method, diagnosis, or treatment by physicians for any particular patient. In view of ongoing research, equipment modifications, changes in governmental regulations, and the constant flow of information relating to the use of medicines, equipment, and devices, the reader is urged to review and evaluate the information provided in the package insert or instructions for each medicine, equipment, or device for, among other things, any changes in the instructions or indication of usage and for added warnings and precautions. While the publisher and authors have used their best efforts in preparing this work, they make no representations or warranties with respect to the accuracy or completeness of the contents of this work and specifically disclaim all warranties, including without limitation any implied warranties of merchantability or fitness for a particular purpose. No warranty may be created or extended by sales representatives, written sales materials or promotional statements for this work. The fact that an organization, website, or product is referred to in this work as a citation and/or potential source of further information does not mean that the publisher and authors endorse the information or services the organization, website, or product may provide or recommendations it may make. This work is sold with the understanding that the publisher is not engaged in rendering professional
