Preface

The present study is a collection and systematic summary of several papers which were published over the last five years. The publication of this volume would not be possible without the help of many people.

My special thanks go to Prof. Dr. Klaus Hurrelmann, former head of the Department of Prevention and Health Promotion at the School of Public Health and now Professor of Public Health and Education at the Hertie School of Governance for his loyal, friendly and stirring support and collaboration. He has indeed broadened my view on research in adolescence and public health. Further, I would like to thank my colleagues who worked with me on the different papers, first of all my former colleagues from the University of Bielefeld: David Bowles, Dr. Michael Erhart, Dr. Anja Langness, Prof. Dr. Anja Leppin, Dr. Rafael Mikolajczyk.

I also wish to thank my German colleagues and co-authors for their valuable advice and support: Prof. Dr. Andreas Klocke (FH Frankfurt/Main), Prof. Dr. Wolfgang Melzer (TU Dresden) and Dr. Andreas Mielck (Helmholtzzentrum, München). My special thanks go out to Dr. Thomas Lampert (Robert Koch-Institut, Berlin) for his friendship, his interest and engagement which lead to many joint ideas, projects and publications.

Further, I express my sincere thanks to my international colleagues who worked with me on the different studies summarized in this volume: Prof. Dr. Candace Currie (University of Edinburgh, UK), Prof. Dr. William Boyce (Queens University, Canada), Prof. Dr. Björn Holstein (University of Copenhagen, Denmark), Dr. Torbjörn Torsheim (University of Bergen, Norway), Dr. Michael Molcho and Dr. Saoirse Nic Gabhainn (National University of Ireland, Ireland), Prof. Dr. Lea Maes and

Dr. Carine Vereecken (Ghent University, Belgium) and Dr. Alessio Zambon (University of Torino, Italy). It has been a privilege to work with them.

My sincere thanks go to Verena Bohn, Michaela Hlavica and Katharina Rathmann for their editorial support and their critical feedback on earlier versions of the manuscript. Thanks also to Gordon Gillespie for his help with the English language.

Finally, I reserve my deepest gratitude to my family and friends for their encouragement and support throughout these years. I could not have done this without them. Although the present book is based on collaborative work I am solely responsible for any mistakes in the contents and arguments of this volume.

Matthias Richter

Contents

1	Introduction	15
1.1	Background.....	15
1.2	Aims of the study and research questions	18
1.3	Structure and content of the volume.....	22
2	Conceptual framework	25
2.1	What is risk behaviour?.....	25
2.2	Risk behaviour in adolescence: a general framework	26
2.2.1	Risk behaviour as reaction to developmental tasks ...	28
2.2.2	Functions of risk behaviour	30
2.2.3	Integrative model of risk behaviour.....	32
2.3	Determinants of adolescent risk behaviour	34
2.3.1	Age and gender.....	35
2.3.2	Socio-economic status	37
2.3.3	Peer and school context	39
2.4	Consequences of risk behaviour	42
3	Material and methods	45
3.1	Research context.....	45
3.2	The “Health Behaviour in School-aged Children” (HBSC) study	46

3.3	Data collection procedures and samples.....	47
3.3.1	International data	48
3.3.2	German data.....	50
3.3.3	Northrhine-Westphalian data.....	51
3.4	Instrument and Variables.....	52
3.4.1	Risk behaviour	53
3.4.2	Parental and 'own' socio-economic status.....	53
3.4.3	Peer and school factors	57
3.4.4	Health outcomes	58
3.5	Statistical analyses.....	60
4	Results of the empirical studies	63
4.1	Age and gender differences and patterns of risk behaviour in adolescence.....	63
4.2	Socio-economic determinants and patterns of adolescent risk behaviour	73
4.3	The role of social contexts for adolescent risk behaviour	85
4.4	Consequences of risk behaviour	88
5	Discussion and perspectives.....	95
5.1	Summary of the results	95
5.2	Implications and perspectives for research and practice	99
	References.....	107

List of figures

Figure 1: Research model	20
Figure 2: Developmental tasks and appropriate or inappropriate ways of coping with them	29
Figure 3: Risk behaviour: forms taken by the consequences of inappropriate coping	33
Figure 4: Regular tobacco use among 15-year olds by country and gender (percentages), HBSC data: international 2001/02.....	70
Figure 5: Daily breakfast among 15-year olds by country and gender (percentages), HBSC data: international 2001/02.....	72

List of tables

Table 1: HBSC survey 2001/02: number of respondents by country, gender and age group	49
Table 2: German sample of the HBSC study 2001/02 by federal state, gender and grade	50
Table 3: Northrhine-Westphalian samples of the HBSC study by survey year, gender and age group, 1994-2002	51
Table 4: Variables used in the analyses	59
Table 5: Substance use according to age and gender, HBSC data: Northrhine-Westphalia 2001/02.....	65
Table 6: Regular tobacco use (at least once a week) among 11- to 15-year olds by gender from 1994 to 2006, percentages, odds ratios and 95% confidence intervals, HBSC data: Northrhine-Westphalia	67
Table 7: Regular alcohol use (at least weekly consumption of beer, wine and spirits) among 11- to 15-year olds by gender from 1994 to 2006, percentages, odds ratios and 95% confidence intervals, HBSC data: Northrhine-Westphalia.....	68
Table 8: Associations between SES indicators and tobacco use (at least once a week) among boys, odds ratios and 95% confidence intervals, adjusted for age, HBSC data: Germany 2001/02	74
Table 9: Associations between SES indicators and tobacco use (at least once a week) among girls, odds ratios and 95% confidence intervals adjusted for age, HBSC data: Germany 2001/02	75

Table 10: Associations between SES indicators and television viewing (4 or more hours on schooldays) among boys, odds ratios and 95% confidence intervals, adjusted for age, HBSC data: Germany 2001/02.....	77
Table 11: Associations between SES indicators and television viewing (4 or more hours on schooldays) among girls, odds ratios and 95% confidence intervals, adjusted for age, HBSC data: Germany 2001/02.....	78
Table 12: Prevalence and trends of regular smoking (1994-2002) by family affluence among German girls and boys, Percentage, odds ratio (OR) and 95% confidence interval (95% CI), HBSC data: Northrhine-Westphalia.....	79
Table 13: Prevalence and trends of regular smoking (1994-2002) by school type among German girls and boys, Percentage, odds ratio (OR) and 95% confidence interval (95% CI), HBSC data: Northrhine-Westphalia.....	80
Table 14: Associations between smoking (at least once a week) and socio-economic indicators among 13- to 15-year olds by country, unadjusted prevalence (%) and odds ratios (OR), HBSC data: international 2001/02	82
Table 15: Associations between vegetable consumption (at least once a day) and socio-economic indicators among 13- to 15-year olds by country, unadjusted prevalence (%) and odds ratios (OR), HBSC data: international 2001/02	84
Table 16: Associations between smoking and family affluence, peer and school factors among 11- to 15-year-old German students, odds ratios (OR) and 95% CI, HBSC data: Germany 2001/02	86
Table 17: Associations between different types of bullying, subjective health and risk behaviour, multivariate logistic regression models, boys, odds ratios (OR) and 95% CI, HBSC data: Germany 2001/02.....	89
Table 18: Associations between different types of bullying, subjective health and risk behaviour, multivariate logistic regression models, girls, odds ratios (OR) and 95% CI, HBSC data: Germany 2001/02.....	90

Table 19: Associations of self-rated health (poor/fair) with family affluence before and after adjustment of health risk behaviours, 13- and 15- year old boys. Random intercepts, random slopes model, odds ratios. HBSC data: international 2001/02	92
Table 20: Associations of self-rated health (poor/fair) with family affluence before and after adjustment of health risk behaviours, 13- and 15- year old girls. Random intercepts, random slopes model, odds ratios. HBSC data: international 2001/02	93
