Prefixes, suff	ixes and abbreviations	xxiv
Chapter 1	Introduction to pharmacology Suzanne Evans and Tanya Somani	1
	Aim	1
	Naming and classifying drugs	5
	How drugs bring about their actions	6
	How are we able to manipulate physiological function using drugs?	6
	Receptors as sites of drug action	7
	Enzymes as sites of drug action	7
	lon channels	7
	Transport molecules	9
	Selectivity of binding and its effect	11
	The drug-body interaction is a dynamic process	11
	Conclusion	14
	Glossary	14
	References	15
	Further reading	15
	Multiple-choice questions	15
Chapter 2	How to use pharmaceutical and prescribing reference guides	18
-	Nigel Conway and Jennifer Dod	
	Aim	18
	Introduction	19
	HCPC Standards of conduct, performance and ethics	19
	HCPC Standards of proficiency for paramedics	20
	Joint Royal Colleges Ambulance Liaison Committee (JRCALC)	
	Clinical Practice Guidelines	21
	JRCALC Update information	22
	How to navigate the JRCALC Guidelines	23
	JRCALC Pocket Book	30
	JRCALC Guidelines digital application (app)	31
	Useful additional resources	32
	British National Formulary (BNF)	32
	Monthly Index of Medical Specialities	33
	Electronic Medicines Compendium (EMC)	34
	Conclusion	34
	Disclaimer	35
	References	35
	Further reading	35
	Multiple-choice questions	35

Chapter 3	<b>Legal and ethical issues</b> Claire Leader, Emma Senior, Deborah Flynn and Paul Younger	37
	Aim	37
	Introduction	38
	The law	38
	Ethical principles and theories	39
	Regulatory bodies	43
	Research	45
	Conclusion	47
	Glossary	47
	References	48
	Further reading Multiple-choice questions	49 50
Chapter 4	Medicines management and the role of the paramedic	52
	Annette Hand, Carol Wills and Paul Younger Aim	52
	Introduction	53
	Medicines management	53
	Manufacturing, marketing, procurement and sale	54
	Selection	55
	Supply	55
	Patient-specific directions	56
	Prescriptions	56
	Patient Group Directions	56
	Exemptions	57
	Prescribing	59
	Handling and administration	60
	Special consideration: Controlled Drugs and critical medications	62
	Groups requiring special considerations	63
	Monitoring for side-effects	64
	Medicines optimisation	64
	Safety in medicines management	65
	Storage and disposal	66
	Conclusion	66
	References	66
	Further reading Multiple shairs questions	68 68
	Multiple-choice questions	Oc
Chapter 5	Pharmacodynamics and pharmacokinetics Dan Davern	70
	Aim	70
	Introduction	70
	Professional regulatory council	71
	Programmes of education and training	71
	Pharmacokinetics	71
	The pharmacokinetic processes	71
	Phase 1: absorption	72
	Phase 2: distribution	76
	Phase 3: metabolism (biotransformation)	77
	Phase 4: elimination	79
	Pharmacodynamics	81
	Agonists and antagonists	82

123

	Drug potency and efficacy	84
	Therapeutic index	84
	Adverse drug reactions	85
	Conclusion	87

	Further reading	87
	Multiple-choice questions	88
Chapter 6	<b>Drug formulations</b> Sarah Dineen-Griffin and Barbara C. Wimmer	90
	Aim	90
	Introduction	91
	Routes of drug administration	91
	Parenteral administration	92
	Intravenous administration	92
	Subcutaneous administration	93
	Intramuscular administration	93
	Intraosseous administration	95
	Intrathecal administration	95
	Intradermal administration	95
	Formulations	97
	Localised versus long-acting injectable formulations	97
	Topical formulations Inhaled formulations	97
	Enteral formulations	99 101
	Rectal formulations	101
	Conclusion	105
	Glossary	106
	References	106
	Further reading	108
	Multiple-choice questions	108
Chapter 7	Adverse drug reactions  Matt Dixon	110
	Aim	110
	What is an adverse drug reaction?	110
	Classification of adverse drug reactions	111
	How prevalent are adverse drug reactions?	111
	Who is more likely to experience adverse drug reactions?	112
	Recognising signs and symptoms of adverse drug reactions	114
	Anaphylaxis	114
	Rashes and skin eruptions Serum sickness	115 115
	Renal disorders	115
	Geriatric syndrome	116
	Idiosyncratic reactions	117
	Preventing adverse drug reactions	117
	Managing adverse drug reactions	117
	Reporting adverse drug reactions	119
	Conclusion	122
	References	122
	Further reading	123

Chapter 8	Analgesics Tom Mallinson	125
	Aim	125
	Pain and analgesia	125
	Understanding and assessing pain	125
	Why do we treat pain?	126
	Psychology of pain	126
	Physiology of pain	127
	Pain transmission	127
	Pain modulation	128
	Types of pain	129
	Assessment of pain	131
	Approach to analgesia	132
	Paracetamol	133
	Non-steroidal anti-inflammatory drugs	133
	Inhalational analgesia	136
	Opioids	137
	Antagonists	141
	Atypical analgesics	142
	Antidepressants and antiepileptics	143
	Adjuncts to analgesia	143
	Magnesium sulfate	143
	Local anaesthetics	143
	Conclusion	144

	Multiple-choice questions	147
Chapter 9	Antibacterials	149
	Dean Whiting, Deborah Flynn and Dawn Ball	
	Aim	149
	Introduction	149
	Language and terminology	150
	Antibacterial mechanisms of action	150
	Disruption of bacterial cell wall synthesis: beta-lactams	151
	Interference in folate metabolism: sulfonamides, trimethoprim	151
	Inhibition of bacterial DNA synthesis: quinolones	151
	Inhibition of bacterial protein synthesis: tetracyclines, aminoglycosides,	
	macrolides, chloramphenicol, lincosamides	151
	Choosing the right treatment	151
	Antimicrobial resistance	151
	Preventing antimicrobial resistance	152
	Antimicrobial stewardship (AMS)	153
	Antibacterials by clinical use	153
	Beta-lactams	153
	Tetracyclines	157
	Chloramphenicol	158
	When administered in combination with phenytoin, monitor	4 = 0
	seizure pattern. Aminoglycosides	159
	Macrolides	161
	Lincosamides	162

# **Contributors**

#### **Dawn Ball**

## PGCert ROM, Dip IMC (RCSEd), MCPara. Senior Lecturer University of Cumbria, Enhanced Care Paramedic (Bank) North East Ambulance Service.

Dawn started her medical career in the Royal Army Medical Corps in 1997 where she trained as a combat medical technician. Deploying across the globe in both operational and humanitarian roles, she gained invaluable experience in both trauma and primary care. In 2014 Dawn qualified as a paramedic at the University of Cumbria and has since used her knowledge and experience to help train others in combat casualty care and prehospital emergency care. Dawn has a keen interest in trauma and paediatrics and regularly instructs on several Resuscitation Council UK courses.

#### **Emma Beadle**

#### BSc(Hons), PGCert, MCPara. Advanced Paramedic Practitioner (Urgent Care).

Emma has 20 years' experience with the London Ambulance Service. She started as a qualified ambulance technician and became a paramedic in 2007. In 2011 she joined the Clinical Education department as a training officer with an IHDC instructor qualification. Emma graduated with a degree in paramedic science with emergency care practice in 2012 from the University of Hertfordshire. In 2016 she gained a postgraduate certificate in healthcare education from Anglia Ruskin University. Currently Emma is an advanced paramedic practitioner in urgent care and is studying for a master's in advanced clinical practice at St George's University London.

#### **George Bell-Starr**

#### FdSc, MCPara. Trainee Advanced Clinical Practitioner.

George began his career in paramedicine studying at the University of Worcester before starting with South Western Ambulance Foundation Trust as a newly qualified paramedic in 2017. He has continued to study, focusing particularly on clinical reasoning. His key areas of interest include mentoring, developing paramedic practice and frailty. In late 2020 he began training as an advanced practitioner in primary care within the Mid-Dorset Primary Care Network.

#### **Geoffrey Bench**

## PGCert Medical Healthcare Education, Dip HE (Emergency Care), CAVA. Clinical Tutor/Driving Instructor, L4CERADI Motorcycle Response Unit/Cycle Response Unit, Paramedic.

Geoff began his ambulance career as an emergency medical technician (EMT) with the London Ambulance Service (LAS) 27 years ago, progressing to paramedic and then emergency care practitioner. Geoff has a passion for motorcycles which culminated in him joining the Motorcycle Response Unit with the LAS. Geoff moved into the education department 7 years ago and still works clinical shifts to maintain the high standards he sets himself.

#### Lisa Clegg

#### PhD, MHlthSc, BHlthSc. Senior Lecturer.

Dr Lisa Clegg has worked in healthcare delivery since 1980. After qualifying as a registered nurse, Lisa worked in several different areas within the hospital and aged care settings. From 1998 to 2009 she was employed with Ambulance Tasmania in the roles of paramedic, intensive care paramedic and paramedic educator. Whilst employed as a paramedic educator, Lisa worked with University of Tasmania academics to develop and deliver the Associate Degree in Paramedicine. In 2009 Lisa was appointed senior lecturer in paramedicine at the University of Tasmania where she was part of a team that developed and delivered the Bachelor of Paramedic Practice (BPP). Lisa was course coordinator for the BPP for 2 years. In 2016, Lisa was appointed as a senior lecturer in paramedicine at

xiv

the University of the Sunshine Coast (USC). Lisa has completed a PhD researching mental healthcare in out-of-hospital practice. In 2021, Lisa commenced employment as a senior lecturer in paramedicine at Charles Sturt University (CSU).

#### **Nigel Conway**

#### MSc, BA (Hons). Cert Ed, RODP, Principal Lecturer, Programme Leader.

Nigel qualified in 1988 as an operating department practitioner initially working in a number of anaesthetic and surgical specialties in Oxford. He went on to develop his clinical career in the Midlands, London and the south coast of the UK. Alongside this Nigel continued to study, leading to roles in clinical practice education, lecturer practitioner and full-time academic employment in higher education, working his way up to principal lecturer. He has a wealth of experience, having lead and taught on a number of undergraduate and postgraduate healthcare programmes including paramedic science, non-medical prescribing, leadership and management and community nurse upskilling projects in the UK and internationally. He has also been involved with professional and regulatory projects and published a number of professional healthcare-focused articles and textbooks as well as undertaking a number of external examiner and clinical advisory roles.

#### **Hayley Croft**

#### BPharm, GCert Diabetes, PhD (Pharmacy), AACP, MPS. Pharmacist - Accredited Consultant.

Hayley began her pharmacy career in Newcastle, New South Wales, Australia, becoming a pharmacist and then accredited consultant pharmacist practising in the primary health sector. She later undertook a postgraduate certificate in diabetes education and management and a PhD in pharmacy which has led to her developing role as a clinician scientist in multimorbidity care with a focus on effective and safe utilisation of pharmacotherapies for complex, chronic patients. She has been delivering clinical pharmacy services to patients living in the community since 2000 and has worked in pharmacy education and research since 2007. Her key areas of interest are cardiometabolic health, disability care and pharmacy practice and education. Hayley has published in international peer-reviewed journals.

#### **Dan Davern**

#### MSc, GDip, BSc, Dip NQEMT-AP, MCPara.

Dan began his career completing a diploma in emergency medical technology – paramedic at the Royal College of Surgeons in Ireland and working as a firefighter/paramedic with a statutory fire, rescue and ambulance service. He later undertook a graduate diploma and master of science in emergency medical science. He is currently a PhD candidate in the field of emergency medicine. Dan currently practises as an advanced paramedic and is registered in both the UK and Ireland. He has worked in education since 2010 and is currently Head of Institution at DX2 in Dublin. His key areas of interest are prehospital airway management and clinical practice guideline development. Dan sits on the NAEMT European Education Committee and Pre-Hospital Emergency Care Council's education and standards committee.

#### Sarah Dineen-Griffin

#### PhD, MPharm, GradCertPharmPrac, BBSci, AACPA, AdvPP(II), MPS. Lecturer.

Sarah is a lecturer in health management and leadership at Charles Sturt University, Australia. She has been a research investigator on national and international pharmacy projects and has published in international journals. At an international level, she is an editorial board member for *Pharmacy Practice and Research in Social and Administrative Pharmacy*. Sarah is an executive committee member of the Community Pharmacy Section of the International Pharmaceutical Federation. At a national level, she is Vice President of the Pharmaceutical Society of Australia's New South Wales Branch, and appointed to the Expert Advisory Committee leading the Review of the Australian National Medicines Policy. Sarah was named Early Career Pharmacist of the Year in 2021.

#### **Matt Dixon**

## MSc, PGCert, BSc (Hons), FdSc, MCPara. Advanced Clinical Practitioner/Bank Specialist Paramedic (Urgent and Emergency Care).

Matt began his career in 2007 as a community first responder, graduating as a paramedic in 2011. He initially worked on ambulances in Wiltshire, UK, providing the normal range of paramedic care, before taking on additional responsibility as a mentor and educator working with new students and developing colleagues. He moved into urgent care in 2016, completing an MSc and working in a senior admission avoidance role within the ambulance service. In 2018 he left to work in general practice in a surgery in Bristol, going on to be one of the first paramedic prescribers in the UK. He has a small portfolio of publications and recently has written on the topic of prescribing for paramedics and pharmacology.

#### **Jennifer Dod**

#### BSc (Hons), FdSc, Paramedic. Lecturer – Paramedic Practice.

Jenny graduated from the University of Sussex in 2006 with a first class honours degree in chemistry. She then worked for 5 years as a research scientist for an Oxfordshire pharmaceutical company. She worked in early-stage drug design and discovery on a variety of clinical projects, including those targeting Alzheimer disease and neuropathic pain via sodium ion channels. In 2011 she joined South Central Ambulance Service as an emergency care assistant. She qualified as an ambulance technician in 2014 and gained a foundation degree in paramedic sciences from Oxford Brookes in 2015. After gaining her paramedic registration, she worked at Kidlington Ambulance Station as a paramedic and clinical mentor. In 2018 she returned to Oxford Brookes to join the paramedic sciences teaching team as a lecturer specialising in pharmacology. She is also a qualified prehospital trauma life support instructor and is currently studying part time for a master's in pharmacology.

#### **Paul Doherty**

### Paramedic Science (FdSc), Paramedic Science (PGCert), Medical and Healthcare Education (PGCert). Clinical Education Tutor.

Paul has worked for the NHS since 2012 and began his ambulance career with the London Ambulance Service in 2013. After graduating from Teesside University, Paul undertook a PGCert in paramedic science at Hertfordshire University. He has always been passionate about education and enjoyed mentoring paramedic students before deciding to join the clinical education department at the LAS in 2019 in a formal teaching role.

#### Alastair Dolan

#### Biomedical Science (BSc), Medical and Heathcare Education (PGCert), Clinical Education Tutor.

Alastair graduated from the University of Sheffield in 2007. He has worked for the London Ambulance Service since 2009, starting as student paramedic and qualifying as a paramedic in 2012. Alastair undertook a PGCert at Anglia Ruskin University in 2019, when he joined the London Ambulance Services Clinical Education Team.

#### **Suzanne Evans**

#### Physiology (BSc), Neuropharmacology (PhD), Associate Professor, Biomedical Sciences.

Suzanne gained her PhD in neuroscience at the University of Wales in 1989 and has been researching and teaching in universities in the UK, USA, the Caribbean, New Zealand and Australia ever since, receiving numerous teaching awards along the way. She has taught human physiology, pathophysiology and pharmacology at undergraduate and postgraduate level for many years and her special interest is teaching and assessing these subjects in health professional degrees.

#### **Michael Fanner**

#### RN(Adult), SCPHN(HV), FHEA, PhD, PGDip, PGCert, BSc (Hons). Senior Lecturer.

Michael graduated in adult nursing (2012) and specialist community public health nursing/health visiting (2013) at King's College London and was awarded a PhD in social policy at the University of Greenwich in 2020. Michael was a main architect of the UK's first MSc in paramedic science (preregistration) and subsequent module leader for a range of paramedic theory modules. Michael is

xvi

currently a senior lecturer in specialist community public health nursing at the University of Hertfordshire and is an external examiner for the BSc (Hons) paramedic science programmes at the University of Huddersfield. Michael has research interests in ethically complex social issues in clinical practice and is an associate editor for *Child Abuse Review*.

#### **Deborah Flynn**

Doctor of Nursing, MA Medical Education, PGC Academic Practice, BSc (Hons) Health and Social Care, DipHE General Nursing, Registered Nurse (RN), Registered Teacher (NMC), Fellow (FHEA), Senior Lecturer Adult Nursing, Northumbria University.

Deborah became a student nurse in 1986 at BG Alexander Nursing College and Johannesburg General Hospital (now Charlotte Maxeke Johannesburg Academic Hospital) in Johannesburg, South Africa, completing her studies as a registered nurse (general, community health and psychiatry) and midwife in 1990. Deborah worked across the South African public and private sector in general surgical and neuro medical wards. From 1993 to 2002, she worked as a staff nurse. rising to a charge nurse, in Germany and Switzerland in a variety of disciplines. In 2002, she returned to Britain to work as a staff nurse on an acute stroke unit. Entering the educational sector in 2005, Deborah progressed from practice educator to senior lecturer and has taught on both undergraduate and postgraduate programmes. In 2018, she completed her doctorate exploring student nurses' experience of humour use in the clinical setting. Her key interests are clinical skills, humour in clinical care, stroke care, pharmacology and practice supervisor/assessor preparation.

#### **Annette Hand**

#### Prof. Doc (Health), MA, PGDip (CR), Dip HE, RGN. Nurse Consultant/Associate Professor/ Clinical Lead – Nursing.

Annette has a clinical academic position and divides her time between three roles. She has worked within the Parkinson's Northumbria Team in the UK for over 23 years, starting as the research associate before obtaining a nurse specialist post. For the past 16 years she has worked as a nurse consultant in Parkinson's. Her main role is to co-ordinate the Parkinson's service, support patients and their families and manage a team of Parkinson's specialist nurses. As an autonomous practitioner she is responsible for diagnosis and management of all stages of Parkinson's. She has worked on and been involved with multiple research studies at a local, national and international level, including non-motor symptoms, sexual dysfunction, information prescriptions and care needs in Parkinson's. Her doctorate focused on understanding carer strain and its relationship to care home placement for people with Parkinson's. Annette was appointed to an associate professor post with Northumbria University in recognition of her research work within the field of Parkinson's. She also has the UK national role of clinical lead for nursing within the Parkinson's UK Excellence Network, as part of the clinical leadership team. This role was developed to support service improvements through education, knowledge exchange and evidence-based practice and support the role of the Parkinson's nurse across the UK.

#### Ashley Ingram

#### BSc (Hons), MCPara. Frailty Practitioner.

Ashley began his career with South Western Ambulance Foundation Trust as an ambulance care assistant. Over the space of 7 years he worked his way up to a registered paramedic, training whilst working full time. He worked as an ambulance paramedic for 3 years, during which time he took a keen interest in palliative and end-of-life care. He has recently embarked on a primary care role as a frailty practitioner. Working within a multidisciplinary team, they focus on admission avoidance, with patients who reside in care homes in Dorset, UK. He looks forward to developing this role in the future.

#### **Anthony Kitchener**

#### MSc, PGCert. Paramedic Educationalist.

As a leader within the health and social care network, Ant has held senior management and educationalist positions within the public, voluntary and academic sector. He holds a number of publications, consultancies and award nominations. He is a Master of Science (Education) and a Master of Arts (Educational Leadership) with various other clinical and professional qualifications.

#### Ricky Lawrence Clinical Education Tutor.

Ricky has been working in the Clinical Education Standards for the past 2 years. He joined the London Ambulance Service in 1982 after leaving the army, as a qualified ambulance technician working in London, qualifying as a NHSTD registered paramedic in 1990. Since then he has had various roles within the London Ambulance Service and a secondment to the Department of Health Equality and Human Rights Group, as lead adviser on EQIA. He returned in 2007 as Equality and Inclusion Officer until 2016 when due to organisational restructuring, he had a number of short roles in safeguarding and infection prevention control before joining the CES department full time.

#### **Claire Leader**

#### RN, RM, PGCAP, MA, BSc (Hons), FHEA. Senior Lecturer.

Claire qualified as a registered nurse from York University in 1998 after which she moved to Leeds, working in cardiothoracic surgery and emergency nursing. In 2003 she commenced her midwifery education at Huddersfield University where she was awarded a first class BSc (Hons). Working initially at Sheffield Teaching Hospitals, she later moved to the North East where she commenced her role as a staff midwife before moving into the area of research as a research nurse and midwife. She was awarded a distinction for her MA in sociology and social research at Newcastle University in 2012. Claire moved to Northumbria University in 2018 and is now a senior lecturer and programme lead for pre-registration nursing programmes, while also studying for her PhD in the area of nurse and midwife wellbeing.

#### **Tom Mallinson**

## BSc (Hons), MBChB, PGCHE, MRCGP(2020), MCPara, MCoROM, FAWM, FHEA, FRGS. Prehospital Doctor, Rural Generalist, Responder Support Clinician.

Tom began his career in London, undertaking the IHCD ambulance aid and paramedic qualifications alongside a Bachelor's degree in paramedic science at the University of Hertfordshire. After working as a paramedic for the London Ambulance Service NHS Trust, he attended Warwick Medical School to qualify as a medical practitioner. He continued his studies with postgraduate qualifications in health-care education, wilderness medicine and primary care. Tom has published a variety of primary research and educational resources and is a member of the editorial board for the *Journal of Paramedic Practice*.

#### **Jason McKenna**

#### BSc, GDip, DipNQEMT AP. Advanced Paramedic Supervisor.

Jason began his prehospital career as an emergency medical technician within the private ambulance services in Ireland. In 2011 he joined the National Ambulance Service as a student paramedic, graduating from University College Dublin (UCD) with a diploma in emergency medical technology. In 2015 he continued his education as part of the Bachelor degree programme in paramedic studies at the University of Limerick. He subsequently joined the advanced paramedic programme, graduating from UCD in 2018 with a graduate diploma in emergency medical science. He is also a graduate of the University of South Wales where he studied Acute Medicine. He is a registered assistant tutor with PHECC and is involved with training and education of all levels of prehospital care from community first responder to paramedic. His interests lie in prehospital education and research.

#### **Ian Peate**

OBE, FRCN. Visiting Professor of Nursing, St George's University of London and Kingston University London; Visiting Professor, Northumbria University; Visiting Senior Clinical Fellow, University of Hertfordshire, and Editor-in-Chief of the British Journal of Nursing. Senior Lecturer University of Roehampton.

lan began his nursing career at Central Middlesex Hospital, becoming an enrolled nurse practising in an intensive care unit. He later undertook 3 years' student nurse training at Central Middlesex and Northwick Park Hospitals, becoming a staff nurse and then a charge nurse. He has worked in nurse education since 1989. His key areas of interest are nursing practice and theory. Ian has published widely. He is editor in chief of the *British Journal of Nursing*, founding consultant editor of the *Journal* 

xviii

of Paramedic Practice and editorial board member of the British Journal of Healthcare Assistants. Ian was awarded an OBE in the Queen's 90th Birthday Honours List for his services to nursing and nurse education and was granted a fellowship from the Royal College of Nursing in 2017.

## Liam Rooney BSc (Hons), GDip, DipNQEMT-AP. Assistant Tutor.

Liam has worked as a firefighter/paramedic with Dublin Fire Brigade since 2007, where he completed his diploma in emergency medical technology – paramedic with the Royal College of Surgeons, Ireland. In 2016 he completed a BSc (Hons) in paramedic studies at the University of Limerick, winning the Graduate Entry Medical School Award for overall performance. In 2017, he undertook a graduate diploma in emergency medical science through University College Dublin. Liam currently practises as an advanced paramedic in Ireland. In 2017, he joined the faculty of DX2, where he delivers multiple courses in prehospital education. He has a keen interest in geriatric medicine and pain management in dementia patients.

#### Fraser D. Russell

BSc (Deakin), PhD (Univ. Melb.). Associate Professor, University of the Sunshine Coast, Queensland, Australia.

Fraser's PhD investigating the regulation of cardiac beta-adrenoceptors was awarded by the University of Melbourne in 1994. A series of successful postdoctoral appointments followed at the University of Cambridge, UK (1995–1998), University of Otago, NZ (1998–2000) and University of Queensland, Australia (2000–2004). Fraser's research interests have focused on providing a better understanding of the intracellular trafficking and cardiovascular function of endothelin-1, urotensin II and glial cell line-derived neurotrophic factor. Since taking a faculty position at the University of the Sunshine Coast (2005–), Fraser has developed a research programme in natural product therapies, with a focus on providing new ideas for the management of patients with abdominal aortic aneurysm and aberrant wound healing responses, where there are limited pharmacological treatment options.

#### **Emma Senior**

MSc Academic and Professional Learning, BSc (Hons) Promoting Practice Effectiveness (Public Health/Health Visiting), DipHE Nursing Studies (Adult), Registered Nurse (RN), Registered Specialist Community Public Health Nurse (SCPHN), Registered Teacher (NMC), Fellow (FHEA). Senior Lecturer, Northumbria University.

Emma is an NMC registered teacher, nurse and health visitor with over 10 years of experience in the NHS and 10 years teaching experience with Northumbria University. She began her nurse career in theatres specialising in women's and children's health before qualifying as a health visitor in 2006. She then went on to work as a sexual health advisor across North Yorkshire where she was able to work collaboratively with a range of services and organisations which included the military, primary care and secondary education. Emma joined higher education in 2009, taking her first post as a senior lecturer/practitioner implementing a workforce development initiative called Northumbria Integrated Sexual Health Education (NISHE) for postqualified nurses across County Durham and Darlington and then project managed delivery across the south west of England with the University of West England. This involved the development and delivery of e-learning educational materials along with supporting academic staff and students in their practice setting. In 2012, Emma joined the pre-registration nurse team where she has been able to introduce, develop and co-ordinate e-learning packages on the programme. Along with teaching pre-registration healthcare, Emma has maintained her postregistration nurse teaching within sexual health, safeguarding and public health within the Specialist Community Public Health Nurse programme. During her time at Northumbria University, Emma was part of the workforce development team working in collaboration with external partners to create education packages to develop the workforce. In 2015, Emma became involved with and is programme lead for Northumbria University's innovative programme for professional non-surgical aesthetic practice which has been a trailblazer nationally. Emma's key areas of interest are public health, sexual health, military families and technology-enhanced learning. She has published widely in journals and is a fellow of the Higher Education Academy.

#### Lena Solanki

#### DipHe Paramedic Practice. Paramedic Clinical Tutor.

Lena's career began in 1998 with the Lancashire Ambulance Service as a call taker. After a brief spell adjusting to life as a new mum, she started training with the London Ambulance Service in 2010 as a student paramedic. She joined the clinical education and standards department in 2018 and trained as a clinical tutor, achieving her teaching qualification in 2020. Lena has enjoyed her career with the London Ambulance Service and finds it immensely rewarding. Lena likes to help others especially during their times of need and supports them in achieving their goals.

#### **Tanya Somani**

#### MSc. Registered Paramedic.

Tanya began her career in paramedicine in 2008 practising in metropolitan and regional NSW Australia. Tanya completed a Bachelor Paramedicine (University of Tasmania) and undertook volunteer work in Papua New Guinea. She developed an interest in infection control, attaining a graduate certificate in clinical redesign (University of Tasmania), with a focus on environmental cleaning of ambulances, and an infection prevention and control qualification from the Australian College of Infection Prevention and Control. Tanya worked as part of the Sydney Metropolitan Ambulance Infrastructure program as program manager for the Make Ready Model and as station officer. Tanya has been the recipient of the Safety Thinker Award 2021 for NSW Ambulance, International Woman of the Year award 2021 from Council Ambulance Authorities and received a Commissioner Citation in 2021. Currently she is health relationship manager for NSW Ambulance. Tanya is passionate about patient and paramedic safety with a focus on systems improvement and project management.

#### **Olivia Thornton**

#### BEnvSc, Dip Pre-hospital Care, MPharm (Dist), AACPa, MSHPA. Pharmacist – Accredited Consultant.

Olivia began her career as a paramedic with the New South Wales Ambulance Service. During her 10 years of service as a paramedic, she worked at multiple sites in NSW, including metropolitan and regional areas. Olivia undertook a master's in pharmacy through the University of Newcastle, graduating with distinction. Her pharmacy career has included working in community pharmacy, hospital pharmacy, consultancy work and as a clinical associate lecturer for an undergraduate pharmacy program. She has an interest in improving medication safety for people with complex chronic health conditions throughout their medical journey, including during hospital admissions, aged care/ disability care or at home. Her clinical interest areas are pre- and postsurgical admission, diabetes, Parkinson disease and mental health pharmacology.

#### **Charlotte White**

#### BSc (Hons) Paramedic Science and PGCert Medical Healthcare Education. Education Centre Manager.

Charlotte has worked in paramedicine since 2012. Previously, she worked within a learning disability and dementia setting, then moved into clinical settings in numerous hospitals. Charlotte has enjoyed mentoring students during her operational duties, which sparked her passion to move into a formal education working environment, where she is currently undertaking a secondment. Charlotte enjoys the dynamic and challenging work education can bring, always striving for continuous developmental practice.

#### **Dean Whiting**

RN, BN (Hons), BSc (Hons), PgCAP, PgDip(ACP), MSc, FHEA. Principal Lecturer in Advanced Clinical Practice, University of Hertfordshire. Advanced Clinical Practitioner, Berryfields Medical Centre, Buckinghamshire. Advanced Clinical Practitioner, London Scottish RFC.

Dean began his career in the British Army as a combat medical technician and then studied at the Royal Centre for Defence Medicine and the University of Portsmouth to become a registered nurse. During his time in the military, he mainly specialised in trauma and critical care nursing and was fortunate enough to work all over the UK and around the world. Since 2012, Dean has worked in higher education and pursued a clinical career in general practice and sports nursing. He now leads the MSc in Advanced Clinical Practice at the University of Hertfordshire.

#### **Carol Wills**

MSc Multidisciplinary Professional Development and Education, PGDip Advanced Practice, Bsc (Hons) Specialist Community Public Health Nursing (SCPHN) (Health Visiting), DipHE Adult Nursing, Registered Nurse (RN), Enrolled Nurse (EN), Registered Health Visitor (HV), Community Practitioner Prescriber (NP), Registered Lecturer/Practice Educator (RLP), Senior Fellow (SFHEA), Subject and Programme Leader Non-Medical Prescribing at Northumbria University.

Carol began her career undertaking enrolled nurse training in 1983 at Hexham Hospital in Northumberland. She then worked within neurotrauma at Newcastle General Hospital and then for several years in coronary care and intensive care at Hexham Hospital. This experience and additional training to complete registered nurse qualification then stimulated her to focus on primary care and prevention of ill health. Carol worked as a practice nurse and nurse practitioner in Newcastle city centre and as a staff nurse within Northumberland community nursing teams before going on to complete a health visiting degree and working in Newcastle as a health visitor for several years. During this time, she undertook several leadership and teaching roles including immunisation training co-ordinator, community practice teacher and trust lead mentor. Carol has been a senior lecturer at Northumbria University since 2002 and has led several postgraduate professional programmes including MSc Education in Professional Practice (NMC Teacher programme), PGDip SCPHN and the Non-Medical Prescribing programme. She has also undertaken national roles including Policy Advice Committee member and Treasurer for the UK Standing Conference SCPHN Education and subject expert for several quality approval panels and external examiner roles. Her key areas of interest and research are around developing learning and teaching and advanced level practice.

#### Barbara C. Wimmer BPharm (Hons), MSc (Clin Pharm), PhD. Lecturer.

Barbara brings together experience in community and hospital pharmacy and clinical research in Europe and in Australia. She worked in community pharmacies as pharmacist in charge and is an approved hospital pharmacist. Barbara has experience teaching pharmacology to nursing students and oversaw quality assurance in a hospital setting in Austria. Following on from her master of clinical pharmacy at the University of Strathclyde, Scotland, she returned to Steyr Hospital in Austria to lead the service for drugs information and clinical pharmacy. Barbara's PhD studies at Monash University in Melbourne focused on factors associated with medication regimen complexity. She joined the University of Tasmania in 2016 and teaches clinical pharmacokinetics to undergraduate students.

#### **Paul Younger**

MClinRes, PGCert (Medical Ultrasound), PGCE, BSc(Hons), BA(Hons), DipPUC, FCPara. Advanced Paramedic Practitioner. North East Ambulance Service.

Paul joined the North East Ambulance Service in 2002, completing his paramedic training in 2005. He has a master's in clinical research from Newcastle University, a PGCE, and a postgraduate qualification in medical ultrasound. He studied non-medical prescribing at Northumbria University, becoming one of the first paramedics in the UK to complete their training. He works clinically as an advanced practitioner for the North East Ambulance Service. A member of the College of Paramedics council and board since 2010, he has held various posts including regional and alternative regional representative for the North East, vice and deputy chair before being appointed as vice president in 2021. For his work with the profession and the college, Paul was made a fellow of the College of Paramedics in 2016. He has presented on paramedic practice at conferences around the world, including the UK, USA, Canada, Australia, Finland and The Netherlands.

# **Preface**

The key aim of Fundamentals of Pharmacology for Paramedics is to provide the reader with an understanding of the essentials associated with pharmacology and paramedic practice so as to enhance patient safety and patient outcomes. This book can help readers improve and expand their expertise and self-confidence within the field of paramedicine and enable them to recognise and respond appropriately to the needs of those they offer care and support to, wherever this may be. The contributors to the text are all experienced clinicians and academics who have expertise in their sphere of practice.

Pharmacology is the study of how drugs, medicines and substances work together with the body when they are being used for the management of illness, disease, pain relief and other conditions. This can be everything from drugs that are used in respiratory care to the action of medications used as a vaccine.

The paramedic scope of practice at the point of registration continues to be developed within preregistration programmes of study around the world, ensuring that the newly qualified paramedic has the required knowledge and skills to provide best practice healthcare to patients. In many countries, this also includes ensuring that pre-registration paramedic students are 'prescriber ready' once they have successfully completed their undergraduate programme of study.

If undergraduate paramedic students are to offer care that is safe and effective, then they must be prepared in such a way that they become accountable practitioners who are able to carry out their role in a meaningful manner that adheres to professional standards and aligns with the law. Fundamentals of Pharmacology for Paramedics will help paramedics add to their repertoire of skills as they gain appropriate pharmacological knowledge. Whilst there is a need to ensure that emphasis is placed on the principles of safe drug administration in undergraduate curricula, there is also a need to ensure that students are provided with the pharmacological foundations associated with the bigger issues related to medicines management. Knowing how to study this subject effectively is about developing an effective workable learning strategy. Fundamentals of Pharmacology for Paramedics provides the reader with an overview of the key issues that can support them as they begin to understand and apply the complexities associated with pharmacology as well as the exciting challenges that are ahead of them.

The text integrates comprehensive knowledge of pharmacology enabling the reader to formulate a plan of care that can improve the overall health and wellbeing of the patient. When advising on and dispensing or administering medicines, this must be done within the limits of the individual's education, training and competence, professional body guidance and other relevant policies and regulations. It is essential to ensure that you keep to the laws of the country in which you are practising.

The paramedic must know the names, mechanism of action, indications, contraindications, complications, routes of administration, side-effects, interactions, dose and any specific administration considerations for a range of medications. They have to understand relevant pharmacology as well as the administration of therapeutic medications.

The chapters in this book offer a range of teaching and learning resources that can help you come to terms with the often complex area of pharmacology and paramedicine. The book can be used in a number of ways; for example, you may choose to read Chapters 1–7 first and then dip in and out of the remaining chapters as you need them. Trying to learn everything at once has the potential to cause confusion which can eventually result in a loss of confidence, affecting your ability to learn and assimilate. Avoid trying to learn large volumes of information and copious amounts of detail all at once; focus instead on only those details that can help you achieve your aims.

Often pharmacology modules, as part of the wider curriculum, will require the student to safely administer the appropriate medication, correctly monitor medicated patients in accordance with established protocols/policy, understand the drug's mechanism of action, indication for use, routes

xxii

of administration, how the drug is absorbed, distributed, metabolised and eliminated, contraindications, drug interactions and a lot more. Recognising each drug you use and learning the differences and similarities between drugs is key to understanding the fundamentals of pharmacology. Pharmacology is an important subject and it is vital that you effectively learn the various drugs, their categories, mechanisms of action, pharmacodynamics and pharmacokinetics. The 17 chapters in this book will help you come to terms with what is often seen as a complex and sometimes terrifying subject.

The paramedic scope of practice at the point of registration continues to be developed within pre-registration programmes of study, ensuring that the newly qualified paramedic is fit for practice. The scope of practice for specialist, advanced and consultant paramedics is being defined and refined around the world. A sound understanding of the fundamentals of pharmacology related to paramedicine will help you attain the goals that you set today.

We hope you enjoy using this book as you develop personally and professionally. Having a detailed understanding of how drugs work and why they are given has the potential to help you become a great paramedic.

lan Peate, London, UK Suzanne Evans, Newcastle, New South Wales, Australia Lisa Clegg, New South Wales, Australia

# Acknowledgements

lan wishes to thank his partner Jussi Lahtinen for his unfailing encouragement and Mrs Frances Cohen for her ongoing support.

Suzanne would like to thank everyone who has contributed to the writing of this text at such a difficult time for health professionals.

Lisa wishes to thank her wife Jennie for her ongoing love and support.

# Prefixes, suffixes and abbreviations

**Prefix:** A prefix is positioned at the beginning of a word to modify or change its meaning. Pre means 'before'. Prefixes may also indicate a location, number, or time.

**Suffix:** The ending part of a word that changes the meaning of the word.

Prefix or suffix	Meaning	Example(s)
a-, an-	not, without	analgesic, apathy
ab-	from; away from	abduction
abdomin(o)-	of or relating to the abdomen	abdomen
acous(io)-	of or relating to hearing	acoumeter, acoustician
acr(o)-	extremity, topmost	acrocrany, acromegaly, acroosteolysis, acroposthia
ad-	at, increase, on, toward	adduction
aden(o)-, aden(i)-	of or relating to a gland	adenocarcinoma, adenology, adenotome, adenotyphus
adip(o)-	of or relating to fat or fatty tissue	adipocyte
adren(o)-	of or relating to adrenal glands	adrenal artery
-aemia	blood condition	anaemia
aer(o)-	air, gas	aerosinusitis
-aesthesi(o)-	sensation	anaesthesia
alb-	denoting a white or pale colour	albino
-alge(si)-	pain	analgesic
-algia, -alg(i)o-	pain	myalgia
all(o-)	denoting something as different, or as an addition	alloantigen, allopathy
ambi-	denoting something as positioned on both sides	ambidextrous
amni-	pertaining to the membranous fetal sac (amnion)	amniocentesis
ana-	back, again, up	anaplasia
andr(o)-	pertaining to a man	android, andrology
angi(o)-	blood vessel	angiogram
ankyl(o)-, ancyl(o)-	denoting something as crooked or bent	ankylosis
ante-	describing something as positioned in front of another thing	antepartum
anti-	describing something as 'against' or 'opposed to' another	antibody, antipsychotic
arteri(o)-	of or pertaining to an artery	arteriole, arterial

Prefix or suffix	Meaning	Example(s)
arthr(o)-	of or pertaining to the joints, limbs	arthritis
articul(o)-	joint	articulation
-ase	enzyme	lactase
-asthenia	weakness	myasthenia gravis
ather(o)-	fatty deposit, soft gruel-like deposit	atherosclerosis
atri(o)-	an atrium (especially heart atrium)	atrioventricular
aur(i)-	of or pertaining to the ear	aural
aut(o)-	self	autoimmune
axill-	of or pertaining to the armpit (uncommon as a prefix)	axilla
bi-	twice, double	binary
bio-	life	biology
blephar(o)-	of or pertaining to the eyelid	blepharoplast
brachi(o)-	of or relating to the arm	brachium of inferior colliculus
brady-	'slow'	bradycardia
bronch(i)-	bronchus	bronchiolitis obliterans
bucc(o)-	of or pertaining to the cheek	buccolabial
burs(o)-	bursa (fluid sac between the bones)	bursitis
carcin(o)-	cancer	carcinoma
cardi(o)-	of or pertaining to the heart	cardiology
carp(o)-	of or pertaining to the wrist	carpal tunnel
-cele	pouching, hernia	hydrocele, varicocele
-centesis	surgical puncture for aspiration	amniocentesis
cephal(o)-	of or pertaining to the head (as a whole)	cephalalgy
cerebell(o)-	of or pertaining to the cerebellum	cerebellum
cerebr(o)-	of or pertaining to the brain	cerebrology
chem(o)-	chemistry, drug	chemotherapy
cholecyst(o)-	of or pertaining to the gallbladder	cholecystectomy
chondr(i)o-	cartilage, gristle, granule, granular	chondrocalcinosis
chrom(ato)-	colour	haemochromatosis
-cidal, -cide	killing, destroying	bacteriocidal
cili-	of or pertaining to the cilia, the eyelashes	ciliary
circum-	denoting something as 'around' another	circumcision
col(o)-, colono-	colon	colonoscopy
colp(o)-	of or pertaining to the vagina	colposcopy
contra-	against	contraindicate
coron(o)-	crown	coronary
cost(o)-	of or pertaining to the ribs	costochondral
crani(o)-	belonging or relating to the cranium	craniology

Prefix or suffix	Meaning	Example(s)
-crine, -crin(o)-	to secrete	endocrine
cry(o)-	cold	cryoablation
cutane-	skin	subcutaneous
cyan(o)-	denotes a blue colour	cyanosis
cyst(o)-, cyst(i)-	of or pertaining to the urinary bladder	cystotomy
cyt(o)-	cell	cytokine
-cyte	cell	leukocyte
-dactyl(o)-	of or pertaining to a finger, toe	dactylology, polydactyly
dent-	of or pertaining to teeth	dentist
dermat(o)-, derm(o)-	of or pertaining to the skin	dermatology
-desis	binding	arthrodesis
dextr(o)-	right, on the right side	dextrocardia
di-	two	diplopia
dia-	through, during, across	dialysis
dif-	apart, separation	different
digit-	of or pertaining to the finger (rare as a root)	digit
-dipsia	suffix meaning '(condition of) thirst'	polydipsia, hydroadipsia, oligodipsia
dors(o)-, dors(i)-	of or pertaining to the back	dorsal, dorsocephalad
duodeno-	duodenum	duodenal atresia
dynam(o)-	force, energy, power	hand strength dynamometer
-dynia	pain	vulvodynia
dys-	bad, difficult, defective, abnormal	dysphagia, dysphasia
ec-	out, away	ectopia, ectopic pregnancy
-ectasia, -ectasis	expansion, dilation	bronchiectasis, telangiectasia
ect(o)-	outer, outside	ectoblast, ectoderm
-ectomy	denotes a surgical operation or removal of a body part; resection, excision	mastectomy
-emesis	vomiting condition	haematemesis
encephal(o)-	of or pertaining to the brain; also see cerebr(o)-	encephalogram
endo-	denotes something as 'inside' or 'within'	endocrinology, endospore
enter(o)-	of or pertaining to the intestine	gastroenterology
epi-	on, upon	epicardium, epidermis, epidural, episclera, epistaxis
erythr(o)-	denotes a red colour	erythrocyte
ex-	out of, away from	excision, exophthalmos
exo-	denotes something as 'outside' another	exoskeleton
extra-	outside	extradural haematoma
faci(o)-	of or pertaining to the face	facioplegic
fibr(o)	fibre	fibroblast

Prefix or suffix	Meaning	Example(s)
fore-	before or ahead	forehead
fossa	a hollow or depressed area; trench or channel	fossa ovalis
front-	of or pertaining to the forehead	frontonasal
galact(o)-	milk	galactorrhoea
gastr(o)-	of or pertaining to the stomach	gastric bypass
-genic	formative, pertaining to producing	cardiogenic shock
gingiv-	of or pertaining to the gums	gingivitis
glauc(o)-	denoting a grey or bluish-grey colour	glaucoma
gloss(o)-, glott(o)-	of or pertaining to the tongue	glossology
gluco-	sweet	glucocorticoid
glyc(o)-	sugar	glycolysis
-gnosis	knowledge	diagnosis, prognosis
gon(o)-	seed, semen; also, reproductive	gonorrhoea
-gram, -gramme	record or picture	angiogram
-graph	instrument used to record data or picture	electrocardiograph
-graphy	process of recording	angiography
gyn(aec)o-	woman	gynaecomastia
haemangi(o)-	blood vessels	haemangioma
haemat(o)-, haem-	of or pertaining to blood	haematology
halluc-	to wander in mind	hallucinosis
hemi-	one-half	cerebral hemisphere
hepat- (hepatic-)	of or pertaining to the liver	hepatology
heter(o)-	denotes something as 'the other' (of two), as an addition, or different	heterogeneous
hist(o)-, histio-	tissue	histology
home(o)-	similar	homeopathy
hom(o)-	denotes something as 'the same' as another or common	homosexuality
hydr(o)-	water	hydrophobe
hyper-	denotes something as 'extreme' or 'beyond normal'	hypertension
hyp(o)-	denotes something as 'below normal'	hypovolaemia
hyster(o)-	of or pertaining to the womb, the uterus	hysterectomy
iatr(o)-	of or pertaining to medicine, or a physician	iatrogenic
-iatry	denotes a field in medicine of a certain body component	podiatry, psychiatry
-ics	organised knowledge, treatment	obstetrics
ileo-	ileum	ileocaecal valve
infra-	below	infrahyoid muscles
inter-	between, among	interarticular ligament
