

BEER CARBONATION

Sebastián Oddone

The book cover features a vibrant purple background. At the top, there are stylized line drawings of industrial brewing equipment, including large cylindrical tanks and a smaller vessel on a stand. To the right, a detailed illustration of a beer tap with a long, tapered spout is shown. The title 'BEER CARBONATION' is prominently displayed in the center in a white, distressed, hand-drawn font. Below the title, the author's name 'Sebastián Oddone' is written in a clean, white sans-serif font. The lower half of the cover is dominated by a large, dynamic splash of white beer foam emerging from a yellow, textured glass. Surrounding the foam and glass are various white line drawings of chemical structures, including benzene rings, water molecules, and other organic compounds. Some of these structures are labeled with chemical names like 'Aluminium', 'Carbon', 'Nitrogen', and 'Oxygen'. A small circular logo with a stylized 'A' is located in the bottom right corner.
