Limit of Liability/Disclaimer of Warranty

The contents of this work are intended to further general scientific research, understanding and discussion only and are not intended and should not be relied upon as recommending or promoting scientific method, diagnosis or treatment by physicians for any particular patient. In view of ongoing research, equipment modifications, changes in governmental regulations and the constant flow of information relating to the use of medicines, equipment and devices, the reader is urged to review and evaluate the information provided in the package insert or instructions for each medicine, equipment or device for, among other things, any changes in the instructions or indication of usage and for added warnings and precautions. While the publisher and authors have used their best efforts in preparing this work, they make no representations or warranties with respect to the accuracy or completeness of the contents of this work and specifically disclaim all warranties, including without limitation any implied warranties of merchantability or fitness for a particular purpose. No warranty may be created or extended by sales representatives, written sales materials or promotional statements for this work. The fact that an organization, website or product is referred to in this work as a citation and/or potential source of further information does not mean that the publisher and authors endorse the information or services the organization, website or product may provide or recommendations it may make. This work is sold with the understanding that the publisher is not engaged in rendering professional services. The advice and strategies contained herein may not be suitable for your situation. You should consult with a specialist where appropriate. Further, readers should be aware that websites listed in this work may have changed or disappeared between when this work was written and when it is read. Neither the publisher nor authors shall be liable for any loss of profit or any other commercial damages, including but not limited to special, incidental, consequential or other damages.

Library of Congress Cataloging-in-Publication Data

Names: Wright, Ian M., editor.

Title: Fractures in the horse / edited by Ian Wright.

Description: First edition. | Hoboken, NJ : Wiley-Blackwell, 2022. |

Includes bibliographical references and index.

Identifiers: LCCN 2021046306 (print) | LCCN 2021046307 (ebook) | ISBN

9781119431770 (cloth) | ISBN 9781119431763 (adobe pdf) | ISBN

9781119431756 (epub)

Subjects: MESH: Fractures, Bone--veterinary | Horses--injuries

Classification: LCC SF951 (print) | LCC SF951 (ebook) | NLM SF 951 | DDC

636.1/08971--dc23

LC record available at <https://lcn.loc.gov/2021046306>

LC ebook record available at <https://lcn.loc.gov/2021046307>

Cover Design: Wiley

Contents

Preface	<i>xxxiii</i>
List of Contributors	<i>xxxv</i>
1 Introduction	<i>1</i>
<i>I.M. Wright</i>	
Historical Review	<i>1</i>
The Ancient World	<i>1</i>
Middle Ages/Mediaeval Period	<i>2</i>
The Renaissance/Reformation	<i>2</i>
The Enlightenment and Industrial Revolution	<i>2</i>
The Twentieth and Twenty-first Centuries	<i>4</i>
The Future	<i>6</i>
References	<i>7</i>
2 Bone Structure and Function	<i>11</i>
<i>C.M. Riggs and A.E. Goodship</i>	
Introduction	<i>11</i>
Bone Architecture	<i>11</i>
Cellular Components	<i>12</i>
Bone Formation	<i>13</i>
Vascular Supply	<i>14</i>
Innervation	<i>14</i>
Microstructure	<i>15</i>
Ultrastructure	<i>17</i>
Organic Component	<i>18</i>
Inorganic Component	<i>19</i>
Mineralization	<i>19</i>
Function	<i>20</i>
Tissue (Material) Properties	<i>20</i>
Structural (Whole Bone) Properties	<i>23</i>
Adaptation	<i>24</i>
Stress Protection	<i>25</i>
Conclusions	<i>25</i>
References	<i>26</i>
3 Pathophysiology of Fractures	<i>29</i>
<i>J.L. Pye and S.M. Stover</i>	
Material Features of Bone Failure	<i>29</i>
Loading Modes	<i>30</i>
Locally Acting Loading Modes	<i>30</i>
Globally Acting Loading Modes and Resulting Fracture Configurations	<i>30</i>

Tension	30
Compression	31
Torsion	31
Bending	32
Shear	34
Combined Loading	34
Relationships Between Location and Morphology	35
The Mechanical Behaviour of Bone	35
Structural Properties and the Load–Deformation Curve	36
Material Properties and the Stress–Strain Curve	36
The Role of Geometry	37
Viscoelasticity	39
Monotonic and Repetitive Stress Fractures	40
Classifications of Fractures	43
Fracture Topography	43
Completeness	45
Complexity	45
Displacement	45
Contamination	45
Articular Involvement	45
Other Factors	46
References	46
4 Fracture Epidemiology	55
<i>T.D.H. Parkin</i>	
State of Knowledge	55
Geographic, Discipline and Horse Level Incidence	55
Incidence of Fractures Sustained During Competition	55
Thoroughbred Racing	55
Quarter Horse Racing	57
Endurance Riding	57
Eventing	57
Incidence of Fractures Sustained During Training	57
Thoroughbred Training	57
Showjumping Training	58
Measures of Fracture Incidence in Other Horses	58
Risk Factors, Predisposing Factors and Evidence	59
Risk Factors Associated with Training Regimens	59
The Importance of Detailed Information About Horses Under Investigation	61
Predictability and Potential for Effective Screening	62
References	63
5 Imaging Fractures	67
<i>S.M. Puchalski and G.J. Minshall</i>	
Introduction	67
Image Quality	67
Image Interpretation	68
Negative Studies	68
Radiography	69
General Principles	69
Technical Considerations	70
Projections	70
Artefacts and Other Misleading Features	71

Limitations	72
Principles of Interpretation	72
Fracture Types	72
Monotonic Fractures	72
Stress Fractures	72
Articular Fractures	73
Fissure Fractures	73
Avulsion Fractures	73
Compression Fractures	73
Accompanying Features	73
Soft Tissue Swelling	73
Presence of Gas Lucency	73
Monitoring Fracture Healing	74
Ultrasonography	74
General Principles	74
Technical Considerations	74
Transducers	74
Artefacts and Other Misleading Features	75
Limitations	75
Principles of Interpretation	76
Entheses	76
Secondary Features	76
Monitoring Fracture Healing	76
Nuclear Scintigraphy	76
General Principles	76
Technical Considerations	79
Time of Evaluation	79
Patient Preparation	79
Image Acquisition	79
Image Quality	81
Descriptors	81
Quantitative Assessment	81
Qualitative Assessment	82
Clinical Indications	82
Limitations	82
Principles of Interpretation	82
Dorsal Cortex of the Third Metacarpal Bone	82
Enostosis-like Lesions	82
Monitoring Fracture Healing	82
Computed Tomography	84
General Principles	84
Technical Considerations	84
Artefacts	85
Clinical Indications	85
Limitations	86
Principles of Interpretation	87
Magnetic Resonance Imaging	87
General Principles	87
Technical Considerations	88
Clinical Indications	88
Limitations	88
Principles of Interpretation	89
Monitoring Fracture Healing	91

Positron Emission Tomography 91
References 91

6 Bone Healing 97

C.E. Kawcak

Introduction and Principles 97

Phases of Bone Healing 98

Cellular and Humeral Influences on Bone Healing 101

Mechanical Influences on Bone Healing 103

Monitoring Bone Healing 104

Healing of Stress Fractures 105

Healing of Incomplete Fractures 106

Healing of Complete Non-displaced Fractures 106

Healing of Displaced Fractures 106

Healing of Reduced and Repaired Fractures 106

Healing of Repaired But Non-reduced and/or Unstable Fractures 107

Effects of Internal Fixation on Bone Healing 107

Effects of External Fixation on Bone Healing 107

Intrinsic Factors That Affect Healing 108

Exogenous Factors That Influence Fracture Healing 108

Pharmacologic Influences 108

Non-steroidal Anti-inflammatory Drugs 108

Bisphosphonates 108

Antimicrobials 109

Biological Techniques 109

Bone Grafts 110

Synthetic Bone Substitutes 110

Exogenous Devices 111

Conclusions 111

16 Fractures of the Distal Phalanx 331

- D.W. Richardson*
- Anatomy 331
- Fracture Types 331
- Incidence and Causation 333

Clinical Features and Presentation	333
Imaging and Diagnosis	334
Acute Fracture Management	335
Treatment Options and Recommendations	335
Specific Management Techniques	336
Type 1 (Non-articular Wing) Fractures	336
Type 2 (Articular Wing) Fractures	336
CT-Guided Lag Screw Fixation	337
Post-operative Care and Convalescence	340
Type 3 (Mid-sagittal) Fractures	341
Screw Size	341
Screw Position	341
Screw Number	342
Lag Screw Fixation Technique	342
Type 4 (Extensor Process) Fractures	346
Fragment Removal	346
Repair	346
Type 5 (Complex and Transverse) Fractures	347
Type 6 (Solar Margin) Fractures	347
Type 7 Fractures	348
Results	348
References	348

17 Fractures of the Navicular Bone 351

M.R.W. Smith

Anatomy	351
Fracture Incidence and Aetiology	351
Parasagittal Fractures	351
Transverse Fractures	352
Frontal Plane Fractures	352
Fractures of the Sloping Border	352
Distal Border Fragments	352
Bipartite and Tripartite Bones	353
Parasagittal Fractures	353
Presentation and Diagnosis	353
Conservative Management	355
Surgical Repair	355
Pre-operative Planning	357
Surgical Preparation	357
Computed Tomographic Imaging	357
Surgical Technique	357
Post-operative Care	360
Outcome	361
