Table of Contents

Cover Title Page Copyright Introduction About This Book Foolish Assumptions Icons Used in This Book Beyond the Book Where to Go from Here Book 1: Installing and Setting Up Windows Server 2022

> Chapter 1: An Overview of Windows Server 2022

Extra! Extra! Read All About It! Seeing What's New in Windows Server 2022

Deciding Which Windows Server 2022 Edition Is Right for You

Walking the Walk: Windows Server 2022 User Experiences

Seeing What Server Manager Has to Offer

Windows Admin Center: Your New Best Friend

Extending and Improving Your Datacenter

Chapter 2: Using Boot Diagnostics

Accessing Boot Diagnostics

Using Advanced Boot Options

Performing a Memory Test

Using the Command Prompt

Working with Third-Party Boot Utilities

Chapter 3: Performing the Basic Installation

Making Sure You Have What It Takes

Performing a Clean Install

Upgrading Windows

Performing a Network Install with Windows Deployment Services

Chapter 4: Performing Initial Configuration Tasks

Understanding Default Settings

Getting an Overview of the Configuration Process

Providing Computer Information

Updating Windows Server 2022

Customizing Windows Server 2022

Configuring Startup Options with BCDEdit

Book 2: Configuring Windows Server 2022

Chapter 1: Configuring Server Roles and Features

<u>Using Server Manager</u> <u>Understanding Server Roles</u>

Understanding Server Features

Chapter 2: Configuring Server Hardware

Working with Device Manager

Using the Add Hardware Wizard

Performing Hard-Drive-Related Tasks

Performing Printer-Related Tasks

Performing Other Configuration Tasks

Chapter 3: Using the Settings Menu

Accessing the Settings Menu Understanding Settings Menu Items

Chapter 4: Working with Workgroups

Knowing What a Workgroup IsKnowing If a Workgroup Is Right for YouComparing Centralized and Group SharingConfiguring a Server for a WorkgroupManaging WorkgroupsExamining the Peer Name Resolution Protocol

Chapter 5: Promoting Your Server to Domain Controller

Understanding Domains Preparing to Create a Domain Performing Domain Configuration Prerequisites Configuring the Server as a Domain Controller Wrapping Things Up

Chapter 6: Managing DNS and DHCP with IP Address Management

Installing IP Address Management Configuring IP Address Management Using IP Address Management

Book 3: Administering Windows Server 2022

Chapter 1: An Overview of the Tools Menu in Server Manager Accessing the Server Manager Tools Menu Working with Common Administrative Tools Installing and Using Remote Server Administration Tools

Chapter 2: Setting Group Policy

Understanding How Group Policy Works Starting the Group Policy Editor Performing Computer Management Performing User Configuration Viewing Resultant Set of Policy

Chapter 3: Configuring the Registry

Starting Registry Editor

Importing and Exporting Registry Elements

Finding Registry Elements

Understanding Registry Data Types

Understanding the Hives

Loading and Unloading Hives

Connecting to Network Registries

Setting Registry Security

Chapter 4: Working with Active Directory

<u>Active Directory 101</u> <u>Configuring Objects in Active Directory</u>

Chapter 5: Performing Standard Maintenance

Activating Windows

Configuring the User Interface

<u>Understanding How User Access Control Affects</u> <u>Maintenance Tasks</u>

Adding and Removing Standard Applications

Measuring Reliability and Performance

Protecting the Data on Your Server

Performing Disk Management Tasks

Automating Diagnostic Tasks with Task Scheduler

Working with Remote Desktop

Working with Remote Server Administration Tools Working with Admin Center Creating a Windows Recovery Drive

Chapter 6: Working at the Command Line

Opening an Administrative Command Prompt

Configuring the Command Line

Setting Environmental Variables

Getting Help at the Command Line

Understanding Command Line Symbols

Chapter 7: Working with PowerShell

Opening an Administrative PowerShell Window

Configuring PowerShell

Customizing PowerShell a Little Further

Using a Profile Script

Setting Environmental Variables

Getting Help in PowerShell

Understanding PowerShell Punctuation

Book 4: Configuring Networking in Windows Server 2022

Chapter 1: Overview of Windows Server 2022 Networking

Getting Acquainted with the Network and Sharing Center Using the Network Connections Tools Configuring TCP/IP Understanding DHCP

<u>Defining DNS</u>

Chapter 2: Performing Basic Network Tasks

Viewing Network Properties

Connecting to Another Network

Managing Network Connections

Chapter 3: Accomplishing Advanced Network Tasks Working with Remote Desktop Services Working with Network Policy and Access Services Troubleshooting at the Command Line

Chapter 4: Diagnosing and Repairing Network Connection Problems

<u>Using Windows Network Diagnostics</u> <u>Repairing Individual Connections</u> <u>Network Troubleshooting at the Command Line</u> <u>Working with Windows Firewall</u> <u>Making Sense of Common Configuration Errors</u> <u>Working with Other Troubleshooting Tools</u>

Book 5: Managing Security with Windows Server 2022

Chapter 1: Understanding Windows Server 2022 Security

Understanding Basic Windows Server Security

Working with Files and Folders

Creating a Local Security Policy

Paying Attention to Windows Security

Chapter 2: Configuring Shared Resources

Comparing Share Security with File System Security

Sharing Resources

Configuring Access with Federated Rights Management

<u>Working with Active Directory Rights Management</u> <u>Services</u>

Chapter 3: Configuring Operating System Security

Understanding and Using User Account Control Managing User Passwords Understanding Credential Guard Configuring Startup and Recovery Options

Hardening Your Server

Chapter 4: Working with the Internet

Firewall Basics

<u>Configuring Windows Defender Firewall with Advanced</u> <u>Security</u>

Chapter 5: Understanding Digital Certificates

Certificates in Windows Server 2022

<u>Types of Certificates in Active Directory Certificate</u> <u>Services</u>

Chapter 6: Installing and Configuring AD CS

Introducing Certificate Authority Architecture

Installing a Certificate Authority

Configuring Certificate Auto-Enrollment

Chapter 7: Securing Your DNS Infrastructure

Understanding DNSSEC

Understanding DANE

Protecting DNS Traffic with DNS-over-HTTPS

Book 6: Working with Windows PowerShell Chapter 1: Introducing PowerShell

Understanding the Basics of PowerShell Using PowerShell

Running PowerShell Remotely

Getting Help in PowerShell

Identifying Security Issues with PowerShell

Chapter 2: Understanding the .NET Framework

Introducing the Various Versions of .NET Framework Focusing on New Features in .NET 4.8 Viewing the Global Assembly Cache Understanding .NET Standard and .NET Core

Chapter 3: Working with Scripts and Cmdlets

Introducing Common Scripts and Cmdlets

Executing Scripts or Cmdlets

Working from Another Location

Performing Simple Administrative Tasks with PowerShell Scripts

Chapter 4: Creating Your Own Scripts and Advanced Functions

Creating a PowerShell Script

Defining a Script Policy

Signing a PowerShell Script

Creating a PowerShell Advanced Function

Chapter 5: PowerShell Desired State Configuration

<u>Getting an Overview of PowerShell Desired State</u> <u>Configuration</u>

Creating a PowerShell Desired State Configuration Script

Applying the PowerShell Desired State Configuration Script

Push and Pull: Using PowerShell Desired State Configuration at Scale

Book 7: Installing and Administering Hyper-V

Chapter 1: What Is Hyper-V?

Introduction to Virtualization

Type 1 and Type 2 Hypervisors

Installing and Configuring Hyper-V

Chapter 2: Virtual Machines

Creating a Virtual Machine

Configuring a Virtual Machine

Shielded Virtual Machines

Chapter 3: Virtual Networking

Identifying the Types of Virtual Switches Creating a Virtual Switch Getting into Advanced Hyper-V Networking

Chapter 4: Virtual Storage

Understanding Virtual Disk Formats

Considering Types of Disks

Adding Storage to the Host

Adding Storage to the Virtual Machine

Chapter 5: High Availability in Hyper-V

Hyper-V Replica

Live Migration

Storage Migration

Failover Clustering

Book 8: Installing, Configuring, and Using Containers

Chapter 1: Introduction to Containers in Windows Server 2022

Understanding Containers Considering Use Cases for Containers Deciding What Type of Containers You Want to Use Managing Containers at Scale

Chapter 2: Docker and Docker Hub

Introduction to Docker Introduction to Docker Hub

Chapter 3: Installing Containers on Windows Server 2022

Installing Windows Containers

Installing Hyper-V Containers

Installing Docker

Testing Your Container Installation

Chapter 4: Configuring Docker and Containers on Windows Server 2022

Working with Dockerfile

<u>Applying Custom Metadata to Containers and Other</u> <u>Objects</u>

Configuring Containers

Configuring the Docker Daemon with daemon.json

Chapter 5: Managing Container Images

Making Changes to Images and Saving the Changes You Make

Pushing Images to Docker Hub

Pulling Images from Docker Hub

Handling Image Versioning

Chapter 6: Container Networking

Considering the Different Types of Network Connections Viewing Your Network Adapters and Virtual Switches Configuring a Network Address Translation Network Connection

Configuring a Transparent Network Connection

Configuring an Overlay Network Connection

Configuring an I2bridge Network Connection

Configuring an I2tunnel Network Connection

Removing a Network Connection

Connecting to a Network

Chapter 7: Container Storage

<u>Getting Acquainted with Container Storage</u> <u>Creating a Volume Inside of a Container</u> <u>Working with Persistent Volumes</u>
