1. Prologue

This *Short Meaning of Life* lays out the Eight-dimensional structure of this Cosmos or Universe of ours and precisely how Time itself develops as a process of expanding Cosmic Consciousness. This Consciousness, which we are part of but largely unconscious of, expands from the generation of those Sequence Event Strings presently being examined by our quantum physicists but having nothing whatsoever to do with any "Big Bang", that totally false line of enquiry still being pursued by conventional Space scientists.

The phenomenon of Time, as we experience as our Homo sapiens Body gets older, does not exist on our Home 6th dimension - the "Heaven" or "Paradise" of our traditional three Semitic religions - Judaism, Christianity and Islam. Hence the importance of our regular Earth rebirths where we go through an analogous tempering process similar to the beating out of a Damascene, Toledo or Samurai sword on a blacksmith's anvil.

We ourselves, as basically that dimension-crossing Energy Being familiarly identified in our various theologies as "the Soul", are on a roughly 4,000-year-long apprenticeship course on planet Earth, on this 5th dimension, learning the vital principles of Cause, Effect, Choice, Consequence of Choices, Moral Responsibility for such Choices and the correct response to Conscience, that monitoring principle central to Cosmic morality and what I identify via Lao Tzu and Confucius as that "Mandate of Heaven", which presently we almost totally ignore - to our considerable loss (see various World Wars, "global warming", AIDS, attacks of Covid Hysteria, brushfire wars in the Ukraine, Middle East, and other "visitations)!

We have finally arrived at an era in the history of our species, Homo sapiens, where everything we think we

know about nearly everything will have to be rewritten and placed under a quite - almost opposite, in some respects - understanding to that which we have at this present low point in our materialist history.

This short guide to the Meaning of Life is designed to establish the conditions for the paradigm revolution about to occur while also rebuilding our understanding of precisely what is required of us from our ruling Cosmos and the hierarchy of advanced beings that monitor our progress from that 6th Dimension.

It's a unique situation, because it has never been presented in such a detailed form before, for reasons that will become apparent as we progress through these pages. The so-called "Age of Reason" or "Age of Enlightenment" heralded by Voltaire and Descartes was in itself a designed event similar in intent to the construction of this short Guide in that it effectively challenged all the suppositions from our old religions and opened up the whole subject of our origin and the nature of our surrounding Universe to renewed analysis in more objective and scientific terms.

Reason, however, like all essential growth processes, goes through its necessary elementary phase and we are stepping into a new era.

We are at the end of our kindergarten stage of evolution and like most 5-year-olds, we are shortly to be struck down with that very same strange discovery of totally new horizons and a totally new place for ourselves so far beyond the limitations of our present consciousness that it takes on the aspects of a new birth, which, in a sense, is exactly what it IS.

We make a start on these pages with a completely new analysis of why we are here, what our mission is and what the nature of the reality we exist within actually IS .

2. The context of discussion

This is the “short form” of my more detailed and precise outline with examples of Life’s Meaning as detailed in my book *Cosmos - Soul & Body Operating Manual for the 22nd Century*, originally set for release in 2022 but still pending at this stage due to its Biblical length of over one million words. A print version is eventually planned as an A4-size Cosmic telephone book and, as the international community of potential *Star Wars/Star Trek* Jedi Knights become aware of this new approach to Reality, translations into the main languages will become available.

At this point I am encouraging the recruitment of “avatars” with the relevant inspiration and motivation from the main language groups who can translate and narrate the central points from this text and *Cosmos* via social media over the Internet and with that intent I have included my contact email in the closing pages of this version.

Followers of what I call “the Way” or “Work” self-select, since those of you who will understand what I am saying on these pages are already at that stage of Soul development beyond what I nominate as Soul Zero (or no development at all) where you already intuitively understand what I am saying.

This short form of Life’s meaning naturally cannot do justice to the enormous amount of work I put into *Cosmos* and its extensive examples and case histories from many of our leading present and past generations of Homo sapiens whose behaviours and histories take their place in *Cosmos’s* pages. It does, however, serve the purpose I intended of summarising the major points raised in the book and the relevance of the paradigm revolution about to take place over the next few decades.

Cosmos IS NOT a “touchy feely” account of Cosmic Reality but more a frank, factual and shock exposition of what is going on around us outside the range of our present rather daft “consciousness”, which makes my account closer to the nature of Karl Marx’s *Capital* or Sigmund Freud, Wilhelm Reich and Carl Jung’s original exposures of sex, the Ego and nature of the human psyche.

In that sense it is the guiding manual for an upset of the ruling Capitalist rogue political order beyond anything the Bolsheviks could manage and that process of change is already well on its way.

This revolution, for that is a precise description of the changes *Cosmos* heralds, will ultimately be on a scale far beyond anything seen in the past few thousand years of world history and pivots on final recognition of the human trans-dimensional Soul journey within a super intelligent construct where Cosmic Consciousness flows through all matter at an atomic nuclear level and the apparent expansion of this observable Cosmos or Universe is a function not of a Big Bang but is an essential feature of Consciousness generation and the phenomenon of Time.

What stimulated me to get involved in this project in the first place develops as we go along, but fundamentally started in my childhood with a near death experience and later extra sensory perception (ESP) events that challenged the conventional materialist view of reality and indeed posed the question “Does some other set of rules about Life exist about which we mostly know nothing or just ignore?”

The whole process of human socialisation is itself a huge learning curve. Furthermore, in a conventional upbringing, with conventional British middle-class parents, in a conventional colonial New Zealand community, raising the subject of paranormal, ESP and psychic experiences immediately suggests insanity or, at best, an early tendency towards bohemian behaviour. So you quickly learn to shut up. Such challenges from our Cosmos, however,

demonstrated at least to me that the “reality” I and others took for granted was seriously flawed and even overruled by what one could best, with one’s limited resources, describe as “magic” or the potential existence of what is best described in the English language as “miracles”, “other worldly events” or the “Occult phenomena” of magicians and sorcerers, which by their very nature are outside the realm of popular opinion and current science.

It takes a certain type of personality to go against the tide of popular opinion. Without a somewhat cantankerous, obsessive and indeed abrasive disposition and preparedness to kick against the pricks, those pricks will overwhelm you and, finding my somewhat “left” and socialist mentors inadequate for the occasion, in my mid-30s I eventually came across the man who was going to become my official entry into the strange world of the Occult, the Naqshbandia Sufi Abdullah, who became the thematic pivot point, along with the Russian/Armenian/Greek pundit, George Gurdjieff and his major interpreter, Peter Ouspensky, as I burrowed my way into the most vital topic area any of us will ever be confronted with.

3. The first step

My book, *Cosmos - Soul & Body Operating Manual for the 22nd Century*, defines precisely the mission our Homo sapiens species is irrevocably embarked on. It defines our exact position inside a super intelligent and 8-dimensional system I term variously, Cosmos, Universe and Tao, the last being Chinese in origin and thus acknowledging one of our oldest forms of relatively sophisticated civilisation and understanding.

This establishes the first step in what I have termed, for the sake of brevity but extended in *Cosmos's* development, the "Way of the Tao", which builds on the terse verses of the original, partially mythical Chinese sage of roughly 600 BC, Lao Tzu, and his verse anthology, the *Tao Te Ching*. That second famous Chinese sage, Confucius (551 - 479 B.C.), is said to have visited Lao Tzu for instruction and was ordered to first deal with his Ego, which places my *Cosmos* in its correct context.

In what becomes the "Work on your Self" the first step is always to deal with that imaginary series of stories we tell about our Selves that Sigmund Freud originally termed "the Ego", whose trickery certainly foxes most of us and leads eventually to the highly dysfunctional society we have where Ego popularity and the success of our personal stage act is seen in the flaunting exhibitionism of our politicians and various pop stars of the media.

Due to the state of our own Egos, reinforced in place by our popular media role models, more than 90 percent of us haven't got a single clue as to what is "true" or "false", "good" or "bad", and this catastrophic absence of true discernment in us all is what the Way of the Tao is aimed at correcting.

Know the Truth and the Truth will set you free.

This interpretation of Taoism is my own, however, and has no connection to any ancient or modern accretions or interpretations called “Taoist” or attributed to “Taoism”, although in the manner in which the Tao Itself operates there will be more potential links than all those existing in the world Internet web, but not as many as exist on those Cosmic Consciousness Sequence Event Strings (SES) I explain as we proceed.

My choice of Lao Tzu, indeed, and his *Tao Te Ching*, floats on the fact that I am not really inventing something new, but essentially just building on old principles within the mystical, psychic and Occult traditions that have either been forgotten or considerably devalued in modern times. As I develop later, a layer of traditional Asian Sufism and Middle Eastern Gnosticism with discussion points from the Russian mystic, George Gurdjieff and his key follower, Peter Ouspensky, on the nature of “the Work on your Self” attains prominence in my text, although in similar fashion to my treatment of Taoism, I follow none of the accepted schools on these contact points.

That point should deal with the ever-present likelihood of natural human argumentativeness from those “Taoists”, “Sufis”, “Gnostics” and general opinionators seeking a fight over dancing angels on pinheads. While not really “inventing” any new system of Metaphysics, my own authority rests purely on the Tao Itself and can be checked by the methods of authentication inside the mystical and Occult traditions.
