

# Toxicology of Nanoparticles and Nanomaterials in Human, Terrestrial and Aquatic Systems

Edited by **Marc A. Williams**

**WILEY**

# Table of Contents

[Cover](#)

[Title Page](#)

[Copyright](#)

[List of Contributors](#)

[Foreword](#)

[Editor Biography](#)

[Section I: Introduction](#)

[1 A One Health Perspective and Introduction](#)

[1.1 Background](#)

[1.2 Structural and Logical Organization of the Book](#)

[Acknowledgments](#)

[References](#)

[Section II: Terrestrial and Aquatic Systems](#)

[2 Ecosafety of Nanomaterials in the Aquatic Environment](#)

[2.1 Introduction](#)

[2.2 Inputs of NMs to the Aquatic Environment](#)

[2.3 How Wastewater Treatment Processes Act in the Removal of Nanomaterials?](#)

[2.4 So What Is Expected to Occur in WWTPs Processes?](#)

[2.5 The Importance of Understanding Speciation of NMs](#)

[2.6 Ecotoxicological Effects of NMs in Freshwater Organisms](#)

[2.7 Ecotoxicological Effects of NMs in Marine Organisms](#)

[2.8 Interactive Effects of NMs with Other Contaminants](#)

[2.9 Environmental Risk Assessment \(ERA\) of NMs](#)

[Acknowledgments](#)

[References](#)

[3 Changes in Toxicant Physicochemistry and Bioavailability During Sorption/Desorption Processes with TiO<sub>2</sub> Nanoparticles in the Aqueous Phase](#)

[3.1 Introduction](#)

[3.2 Properties of TiO<sub>2</sub> NPs in the Aqueous Phase](#)

[3.3 Sorption of Organic Substances to TiO<sub>2</sub> NPs](#)

[3.4 Conclusions](#)

[References](#)

[4 Behavior, Fate, and Toxicity of Engineered Nanoparticles in Estuarine and Coastal Environments](#)

[4.1 Introduction](#)

[4.2 Types of Nanoparticles: Sources/Products/Release Routes](#)

[4.3 Behavior of Nanoparticles in the Water Column](#)

[4.4 Biota, Trophic Transfer, Toxicity, and Mechanisms](#)

[4.5 Measurement Issues and Regulatory Environment](#)

[4.6 Modeling](#)

[4.7 Knowledge Gaps and Research Prospects](#)  
[References](#)

[5 Interactive Effects of Nanomaterials with Other Contaminants on Aquatic Organisms: nTiO<sub>2</sub> as a Case Study](#)

[5.1 Introduction](#)

[5.2 Interactive Effects of NPs with Other Contaminants in Aquatic Organisms: nTiO<sub>2</sub> as a Case Study](#)

[5.3 Interactions Between nTiO<sub>2</sub> and Other Contaminants in Marine Invertebrates: The Example of the Bivalve \*Mytilus\*](#)

[5.4 Interactions Between nTiO<sub>2</sub> and Other Contaminants in Marine Fish: The Example of the European Sea Bass \(\*Dicentrarchus labrax\*\)](#)

[5.5 Interactive Effects of NPs with Other Contaminants in Marine Species: Importance of Exposure Media](#)

[5.6 Concluding Remarks](#)

[Acknowledgments](#)

[References](#)

[6 Soil Nano-ecotoxicology: What Have We Learned from Standard Tests and What May We Be Missing?](#)

[6.1 Introduction](#)

[6.2 Development of Standard Test Methods and Their Application to Nanomaterials](#)

[6.3 From Soil Ecotoxicological Tests to Risk Assessment](#)

[6.4 Looking Beyond Standardized Tests Toward Effects in Ecosystems](#)

## [6.5 Standard Ecotoxicological Tests: A Blessing and A Curse?](#)

[Acknowledgments](#)

[References](#)

## [7 Impacts of Magnetic Iron Oxide Nanoparticles in Terrestrial and Aquatic Environments](#)

[7.1 Introduction](#)

[7.2 Gaps and Obstacles](#)

[7.3 Conclusions](#)

[Acknowledgments](#)

[References](#)

## [8 Carbon Nanotubes: Sublethal Effects and Unique Mechanisms of Toxicity in Aquatic Species](#)

[8.1 Carbon Nanotubes in Aquatic Environments](#)

[8.2 Classical Toxicity: What We Have Learned](#)

[8.3 Unique Mechanisms and Effects](#)

[8.4 Next-Generation](#)

[Nanomaterials: Nanohybrids](#)

[8.5 Future Perspectives](#)

[Acknowledgments](#)

[References](#)

## [9 Surface Reactivity of Anatase and Rutile Samples: Relationship with Toxicity on Aquatic Organisms](#)

[9.1 Introduction](#)

[9.2 TiO<sub>2</sub> Solid Phase Characterization](#)

[9.3 Potentiometric Titrations](#)

[9.4 Electrophoresis Measurements](#)

[9.5 Size Measurements of the Agglomerates](#)

[9.6 Ecotoxicity Tests](#)

[9.7 Discussion](#)

[9.8 Conclusions](#)

[Acknowledgments](#)

[References](#)

## [10 Cardiorespiratory Toxicity of Nanoparticles in Aquatic Environments](#)

[10.1 Introduction](#)

[10.2 Cellular and Molecular Mechanisms of Engineered Nanomaterial Toxicity](#)

[10.3 Complement](#)

[10.4 Phagocytosis](#)

[10.5 Conclusions and Ecological Perspectives](#)

[References](#)

## [Section III: Human Systems](#)

### [11 Air Pollution and Neurodevelopmental Disorders](#)

[11.1 Air Pollution and the Brain](#)

[11.2 Air Pollution and Neurodevelopmental Disorders](#)

[11.3 An Animal Model of UFP-Induced Developmental Neuropathology and Behavioral Disorders](#)

[11.4 Summary and Conclusions](#)

[References](#)

### [12 Toxicity of Nanomaterials to the Gastrointestinal Tract](#)

[12.1 Introduction](#)

[12.2 GI Physiology and Toxicity Testing](#)

[12.3 Nanomaterial Toxicity Assessment: Challenges](#)

[12.4 Toxicity of Specific Nanomaterial Types](#)

[12.5 Miscellaneous Nanomaterials](#)

[12.6 Analysis and Conclusions](#)

[References](#)

[13 The Mucosal Microbiome: Impact of Nanoparticles and Nanomaterials](#)

[13.1 Introduction](#)

[13.2 Types of Nanoparticles and Human Exposure](#)

[13.3 Factors Influencing Nanomaterial/Microbiota Interactions in the Intestinal Mucosal Environment](#)

[13.4 Nanomaterial Effects on Bacterial Microbiota](#)

[13.5 Nanomaterial Effects on Viral and Fungal Microbiota](#)

[13.6 Conclusions](#)

[References](#)

[14 Human Health Impacts and Immunotoxicology of Metal Nanoparticles and Nanomaterials – An Overview](#)

[14.1 Introduction and Background](#)

[14.2 Welding Fumes as Surrogates for Metal Nanoparticles](#)

[14.3 Immune-Related Health Effects](#)

[14.4 Oxidative Stress and Immunologic Effects](#)

[14.5 Conclusion](#)

[14.6 Immune-Triggered Human Health Effects of Metal and Metal Oxide Nanoparticles](#)

[14.7 Immune Interaction](#)

[14.8 Cellular Mechanisms of Injury](#)

[14.9 Oxidative Stress](#)

[14.10 Interaction with Cellular Membranes and Proteins](#)

[14.11 Disruption of Signaling Pathways](#)

[14.12 Immune Response](#)

[14.13 Immunosuppression](#)

[14.14 Inflammation and Autoimmunity](#)

[14.15 Sensitivity/Hypersensitivity](#)

[14.16 Summary](#)

[References](#)

[15 Vasculotoxicity of Metal-Based Nanoparticles](#)

[15.1 Nanoparticles in the Environment](#)

[15.2 Vascular Development](#)

[15.3 Critical Issues in Assessing the Toxicity of NPs](#)

[15.4 Vascular Toxicity of NPs \*In Vitro\*](#)

[15.5 Vascular Toxicity of NPs \*In Vivo\*](#)

[15.6 Movement of NPs Through the Blood Brain Barrier \(BBB\)](#)

[15.7 Conclusions](#)

[References](#)

[Section IV: Future Directions and Gaps in the Knowledge](#)

[16 Knowledge Gaps, Future Directions, and the Emergence of Nanoplastics as an Environmental Threat Pollutant](#)

[16.1 Current Concerns and Scope of the Problem](#)

[16.2 A survey of the Identified Knowledge Gaps and Needs for Future Research](#)

[16.3 Knowledge Gaps - Aquatic and Terrestrial Ecotoxicology](#)

[16.4 Knowledge Gaps - Adverse Health Effects in Humans](#)

[16.5 Emerging Threats and Future Directions](#)

[16.6 Conclusions and Other Considerations](#)

## List of Tables

### Chapter 2

[Table 2.1 Interactive effects of nanomaterials \(NMs\) with other contaminant...](#)

### Chapter 3

[Table 3.1 Evaluation of sorption of organic contaminants on TiO<sub>2</sub> NPs, based...](#)

[Table 3.2 Evaluation of sorption of organic contaminants on TiO<sub>2</sub> NPs by ass...](#)

### Chapter 4

[Table 4.1 Selected recent research on the impact of nanomaterials on marine...](#)

### Chapter 5

[Table 5.1 Interactive effects \(antagonistic, additive, synergistic\) of \*in v...\*](#)

[Table 5.2 Interactive effects of \*in vivo\* exposure to nTiO<sub>2</sub> and 2,3,7,8-TCDD...](#)

### Chapter 7

[Table 7.1 Studies using assays with cell cultures or organisms to assess th...](#)

[Table 7.2 Studies conducted to evaluate possible toxic effects on aquatic b...](#)

[Table 7.3 Studies conducted to evaluate possible toxic effects of magnetic ...](#)

## Chapter 8

[Table 8.1 Co-contaminants.](#)

## Chapter 9

[Table 9.1 Data from the provider for anatase and rutile samples.](#)

[Table 9.2 Surface and bulk properties of TiO<sub>2</sub> materials.](#)

[Table 9.3 Determination of \[H<sup>+</sup>\]<sub>sat</sub>, \[OH<sup>-</sup>\]<sub>sat</sub>, and \[SOH\]<sub>tot</sub> after ...](#)

[Table 9.4 Composition of the synthetic freshwater \(SFW\).](#)

[Table 9.5 Composition of the synthetic marine water \(SMW\)\\_pH 8.1.](#)

## Chapter 10

[Table 10.1 The effects of aquatic engineered nanomaterial \(ENM\) exposure on...](#)

## Chapter 12

[Table 12.1 Toxicity studies conducted with TiO<sub>2</sub>.](#)

[Table 12.2 Toxicity data for nanosilica.](#)

[Table 12.3 Toxicity data for nanosilver.](#)

[Table 12.4 Toxicity data for zinc oxide nanoparticles.](#)

[Table 12.5 Toxicity data for SWCNT, MWCNT, fullerenes, and single-walled ca...](#)

[Table 12.6 Toxicity data for miscellaneous metal oxide nanoparticles.](#)

## Chapter 13

[Table 13.1 Summary of published literature using fermentation studies or \*in...\*](#)

## Chapter 15

[Table 15.1 Toxicity of nanoparticles to endothelial cells.](#)

[Table 15.2 Toxicity of nanoparticles to the vascular system of vertebrates....](#)

# List of Illustrations

## Chapter 1

[Figure 1.1 Illustrating the structural content to this book as it aligns to ...](#)

## Chapter 2

[Figure 2.1 NMs route after discharge in wastewater and removal processes.](#)

[Figure 2.2 General scheme illustrating the potential pathways for the behavi...](#)

[Figure 2.3 Scheme illustrating the potential interaction of NMs with other N...](#)

## Chapter 3

[Figure 3.1 Relative expression of \*cyp1A\* in zebrafish larvae \(72 hpf\), after ...](#)

## Chapter 4

[Figure 4.1 Nanomaterial pathways to estuarine and coastal aquatic environmen...](#)

## Chapter 5

[Figure 5.1 Schematic representation of the possible interactions of NPs with...](#)

[Figure 5.2 Schematic representation of the case study on the interactive eff...](#)

[Figure 5.3 Schematic representation of modulation \(+ upregulation, - downreg...](#)

## Chapter 6

[Figure 6.1 Invertebrate species current used for standardized toxicity tests...](#)

[Figure 6.2 Number of papers in Web of Knowledge by year containing the searc...](#)

[Figure 6.3 Major processes governing nanomaterial environmental fate, bioava...](#)

## Chapter 7

[Figure 7.1 Schematic illustration of the main magnetic behaviors of IONPs: \(...](#)

[Figure 7.2 Different areas of application of IONPs: environmental, clinical ...](#)

[Figure 7.3 Possible fates of magnetic nanoparticles in the environment. In t...](#)

## Chapter 8

[Figure 8.1 \(a\) Total number of publications that have investigated the effec...](#)

[Figure 8.2 Diagram of a fish intestine exposed to CNTs showing the proximal,...](#)

[Figure 8.3 Diagram showing the known responses of aquatic organisms to CNTs,...](#)

## Chapter 9

[Figure 9.1 X-ray diffraction patterns of A1, A2, A3 and R1 nanoparticles \(\\*R...](#)

[Figure 9.2 TEM images of A1 and A2 samples. SEM images of A3 and R1 samples....](#)

[Figure 9.3 \(a\) Acid \(HNO<sub>3</sub> 0.1 M\) titration of A1, A2, A3, and R1 suspensions...](#)

[Figure 9.4 Zeta potential of TiO<sub>2</sub> substances, m/v = 0.25 g/L, 4 days of shak...](#)

[Figure 9.5 Particle frequency distribution of TiO<sub>2</sub> substances, m/v = 0.01 g/...](#)

[Figure 9.6 Dose response curve for \*B. plicatilis\* \(mortality after 48 h\) of f...](#)

[Figure 9.7 Dose response curve for \*D. Magna\* \(% immobilization after 72 h\) of...](#)

[Figure 9.8 Dose response curve for \*P. tricornutum\* \(growth inhibition after 7...](#)

## Chapter 10

[Figure 10.1 Potential mechanisms of engineered nanomaterial \(ENM\) toxicity i...](#)

[Figure 10.2 Atomic force microscopy phase \(a\), two-dimensional topography \(b...](#)

[Figure 10.3 Scanning electron micrographs of gill filaments from white sucke...](#)

## Chapter 11

[Figure 11.1 Developmental exposures to CAPS produced male-specific and time-...](#)

[Figure 11.2 Developmental exposures to CAPS lead to increased lateral ventri...](#)

[Figure 11.3 Developmental exposures to CAPS reduces the size of corpus callo...](#)

[Figure 11.4 Developmental exposures to CAPS produced a male-specific hypomye...](#)

[Figure 11.5 Developmental exposures to CAPS produced a male-specific frontal...](#)

[Figure 11.6 Neonatal CAPS exposure results in impulsive behavior in males. G...](#)

## Chapter 13

[Figure 13.1 The normal, healthy intestinal mucosa \(a\) is characterized by di...](#)

## Chapter 14

[Figure 14.1 Metal NPs interaction with the immune system \[26\], figure 1 \(p.1...](#)

[Figure 14.2 Events by which NPs cause cellular effects \[33\], figure 29 \(p.MR...](#)

[Figure 14.3 Metal NPs as a trigger for metal allergy \[51\], figure 1 \(p.3\) / ...](#)

## Chapter 15
