Acknowledgments

First, all glory and praise go to God, who through His Son, Jesus Christ, makes all things possible and gives us the gift of eternal life.

Many thanks go to the fantastic team of people at Sybex for their outstanding work on this project. Thanks to Kenyon Brown, the senior acquisitions editor, for offering us the opportunity to work on this book. Also thanks to Kim Wimpsett, the development editor, for keeping things on track and making the book more presentable. Thanks, Kim, for all your hard work and diligence. The technical proofreader, David Clinton, did a wonderful job of double-checking all of the work in the book in addition to making suggestions to improve the content. Thanks also goes to the young and talented Daniel Anez (theanez.com) for his illustration work. We would also like to thank Carole Jelen at Waterside Productions, Inc., for arranging this opportunity for us and for helping us out in our writing careers.

Rich would particularly like to thank his wife Barbara for enduring his grouchy attitude during this project and helping to keep up his spirits with baked goods.

About the Authors

Richard Blum, CompTIA Linux+ ce, CompTIA Security+ ce, LPIC-1, has also worked in the IT industry for more than 35 years as both a system and network administrator, and he has published numerous Linux and open source books. Rich is an online instructor for Linux and web programming courses that are used by colleges and universities across the United States. When he is not being a computer nerd, Rich enjoys spending time with his wife Barbara and his two daughters, Katie and Jessica.

Christine Bresnahan, CompTIA Linux+, LPIC-1, started working with computers more than 35 years ago in the IT industry as a system administrator. Christine is an adjunct professor at Ivy Tech Community College, where she teaches Linux certification and Python programming classes. She also writes books and produces instructional resources for the classroom.

About the Technical Editor

David Clinton is a Linux Server Professional and an Amazon Web Services (AWS) solutions architect with 10 years' experience teaching technology subjects. Besides his books (Wiley/Sybex, Manning, and independently published), he's created dozens of video courses for Pluralsight. He works with Linux administration, AWS, data analytics, security, and server virtualization.

	Exam Essentials	150
	Review Questions	152
Chapter 6	Maintaining System Startup and Services	157
	Looking at <i>init</i>	158
	Managing systemd Systems	159
	Exploring Unit Files	160
	Focusing on Service Unit Files	162
	Focusing on Target Unit Files	167
	Looking at <i>systemctl</i>	168
	Examining Special systemd Commands	172
	Managing SysV init Systems	178
	Understanding Runlevels	178
	Investigating SysV init Commands	182
	Digging Deeper into systemd	187
	Looking at systemd Mount Units	187
	Exploring Automount Units	189
	Focusing on Timer Unit Files	190
	Summary	191
	Exam Essentials	191
	Review Questions	194
Chapter 7	Configuring Network Connections	199
	Configuring Network Features	200
	Network Configuration Files	201

	Graphical Tools	203
	Command-Line Tools	205
	Command-Line Networking Tool	214
	Basic Network Troubleshooting	217
	Sending Test Packets	217
	Finding Host Information	219
	Advanced Network Troubleshooting	222
	The <i>netstat</i> Command	222
	Examining Sockets	226
	Monitoring the Network	226
	Summary	228
	Exam Essentials	229
	Review Questions	231
Chapter 8	Comparing GUIs	235
	Focusing on the GUI	236
	Getting to Know GNOME	237
	Probing KDE Plasma	239
	Considering Cinnamon	241
	Making Acquaintance with MATE	243
	Setting Up Accessibility	245
	Serving Up the GUI	247
	Figuring Out Wayland	248
	Examining X11	250
	Using Remote Desktops	252
	Viewing VNC	252
	Grasping Xrdp	254
	Exploring NX	256
	Studying SPICE	257
	Forwarding	257
	Local	259
	Remote	260
	Tunneling Your X11 Connection	261
	Summary	262
	Exam Essentials	262
	Review Questions	264
Chapter 9	Adjusting Localization Options	269
	Understanding Localization	270
	Character Sets	270
	Environment Variables	271
	Setting Your Locale	272
	Installation Locale Decisions	272
	Changing Your Locale	272

	Looking at Time	275
	Working with Time Zones	275
	Setting the Time and Date	276
	Watching System Time	280
	Summary	281
	Exam Essentials	282
	Review Questions	284
Part III	Managing Your System	289
Chapter 10	Administering Users and Groups	291
	Managing User Accounts	292
	Adding Accounts	292
	Maintaining Passwords	304
	Modifying Accounts	306
	Deleting Accounts	308
	Managing Groups	309
	Setting Up the Environment	313
	Perusing Bash Parameters	313
	Understanding User Entries	314
	Grasping Global Entries	316
	Querying Users	316
	Exploring the <i>whoami</i> Utility	316
	Understanding the <i>who</i> Utility	317
	Identifying with the <i>id</i> Program	318
	Displaying Access History with the <i>last</i> Utility	319
	Managing Disk Space Usage	320
	Summary	323
	Exam Essentials	324
	Review Questions	325
Chapter 11	Handling Storage	329
	Storage Basics	330
	Drive Connections	330
	Partitioning Drives	331
	Automatic Drive Detection	331
	Partitioning Tools	332
	Working with <i>fdisk</i>	332
	Working with <i>gdisk</i>	334
	The GNU <i>parted</i> Command	336
	Graphical Tools	337
	Understanding Filesystems	337
	The Virtual Directory	338
	Maneuvering around the Filesystem	341

	Formatting Filesystems	341
	Common Filesystem Types	341
	Creating Filesystems	343
	Mounting Filesystems	344
	Manually Mounting Devices	344
	Automatically Mounting Devices	345
	Managing Filesystems	346
	Retrieving Filesystem Stats	346
	Filesystem Tools	348
	Storage Alternatives	349
	Multipath	350
	Logical Volume Manager	350
	Using RAID Technology	354
	Encrypting Partitions	355
	Summary	358
	Exam Essentials	358
	Review Questions	360
Chapter 12	Protecting Files	363
	Understanding Backup Types	364
	Looking at Compression Methods	366
	Comparing Archive and Restore Utilities	368
	Copying with <i>cpio</i>	369
	Archiving with <i>tar</i>	372
	Duplicating with <i>dd</i>	377
	Replicating with <i>rsync</i>	380
	Securing Offsite/Off-System Backups	382
	Copying Securely via <i>scp</i>	382
	Transferring Securely via <i>sftp</i>	384
	Checking Backup Integrity	387
	Digesting an MD5 Algorithm	387
	Securing Hash Algorithms	388
	Summary	389
	Exam Essentials	389
	Review Questions	390
Chapter 13	Governing Software	393
	Working with Source Code	394
	Downloading Source Code	394
	Bundling Source Code Packages	395
	Compiling Source Code	399
	Packaging Applications	400
	Installing and Managing Packages	401
	Understanding Repositories	405

	Using Application Containers	413
	Using Snap Containers	414
	Using Flatpak Containers	416
	Summary	418
	Exam Essentials	419
	Review Questions	421
Chapter 14	Tending Kernel Modules	423
	Exploring Kernel Modules	424
	Installing Kernel Modules	428
	Removing Kernel Modules	431
	Summary	432
	Exam Essentials	432
	Review Questions	434
Part IV	Securing Your System	437
Chapter 15	Applying Ownership and Permissions	439
	Looking at File and Directory Permissions	440
	Understanding Ownership	440
	Controlling Access Permissions	442
	Exploring Special Permissions	445
	Managing Default Permissions	446
	Access Control Lists	448
	Context-Based Permissions	450
	Using SELinux	451
	Using AppArmor	455
	Understanding Linux User Types	457
	Types of User Accounts	458
	Escalating Privileges	458
	Restricting Users and Files	459
	Summary	464
	Exam Essentials	465
	Review Questions	466
Chapter 16	Looking at Access and Authentication Methods	469
	Getting to Know PAM	470
	Exploring PAM Configuration Files	471
	Enforcing Strong Passwords	474
	Locking Out Accounts	477
	Limiting Root Access	481
	Exploring PKI Concepts	483
	Getting Certificates	483
	Discovering Key Concepts	483

	Securing Data	484
	Signing Transmissions	485
	Using SSH	486
	Exploring Basic SSH Concepts	486
	Configuring SSH	488
	Generating SSH Keys	490
	Authenticating with SSH Keys	492
	Authenticating with the Authentication Agent	494
	Using SSH Securely	496
	Using VPN as a Client	498
	Summary	499
	Exam Essentials	499
	Review Questions	501
Chapter 17	Implementing Logging Services	503
	Understanding the Importance of Logging	504
	The syslog Protocol	504
	The History of Linux Logging	506
	Basic Logging Using <i>rsyslog</i>	507
	Configuration	507
	Making Log Entries	509
	Finding Event Messages	509
	Journaling with <i>systemd-journald</i>	510
	Configuration	510
	Viewing Logs	511
	Summary	513
	Exam Essentials	514
	Review Questions	515
Chapter 18	Overseeing Linux Firewalls	517
	Providing Access Control	518
	Looking at Firewall Technologies	520
	Familiarizing Yourself with <i>firewalld</i>	521
	Investigating <i>iptables</i>	525
	Exploring <i>nftables</i>	530
	Understanding UFW	533
	Forwarding IP Packets	539
	Dynamically Setting Rules	539
	DenyHosts	539
	Fail2Ban	540
	IPset	540
	Summary	542
	Exam Essentials	542
	Review Questions	544

Chapter 19	Embracing Best Security Practices	547
	User Security	548
	Authentication Methods	548
	Multifactor Authentication	550
	Unique User Accounts	551
	Enforce Strong Passwords	551
	Restricting the Root Account	553
	Separation of Data	555
	Disk Encryption	556
	Restricting Applications	556
	Preventing Unauthorized Rebooting	557
	Restricting Unapproved Jobs	559
	Banners and Messages	559
	Restricting USB Devices	559
	Looking for Trouble	560
	Auditing	561
	Network Security	561
	Denying Hosts	561
	Disabling Unused Services	562
	Changing Default Ports	562
	Using Encryption on the Network	563
	Summary	564
	Exam Essentials	565
	Review Questions	567
Part V	Troubleshooting Your System	571
Chapter 20	Analyzing System Properties and Remediation	573
	Troubleshooting the Network	574
	Exploring Network Issues	574
	Viewing Network Performance	578
	Reviewing the Network's Configuration	584
	Troubleshooting Storage Issues	587
	Running Out of Filesystem Space	587
	Waiting on Disk I/O	588
	Measuring Disk Performance	591
	Failing Disks	593
	Troubleshooting the CPU	594
	Troubleshooting Memory	595

	Exam Essentials	766
	Review Questions	768
Part VII	Realizing Virtual and Cloud Environments	771
Chapter 28	Understanding Cloud and Virtualization Concepts	773
	Considering Cloud Services	774
	What Is Cloud Computing?	774
	What Are the Cloud Services?	775
	Understanding Virtualization	777
	Hypervisors	778
	Types of Hypervisors	779

	Hypervisor Templates	781
	Exploring Containers	781
	What Are Containers?	781
	Container Software	782
	Container Templates	783
	Working with Docker	783
	Summary	786
	Exam Essentials	787
	Review Questions	788
Chapter 29	Inspecting Cloud and Virtualization Services	791
	Focusing on VM Tools	792
	Looking at <i>libvirt</i>	792
	Viewing <i>virsh</i>	793
	Managing with Virtual Machine Manager	794
	Understanding Bootstrapping	796
	Booting with Shell Scripts	796
	Kickstarting with Anaconda	797
	Initializing with Cloud-init	801
	Exploring Storage Issues	802
	Considering Network Configurations	804
	Virtualizing the Network	804
	Configuring Virtualized NICs	805
	Summary	808
	Exam Essentials	808
	Review Questions	810
Chapter 30	Orchestrating the Environment	813
	Understanding Orchestration Concepts	814
	Probing Procedures	815
	Analyzing Attributes	816
	Provisioning the Data Center	819
	Coding the Infrastructure	819
	Automating the Infrastructure	820
	Comparing Agent and Agentless	821
	Investigating the Inventory	821
	Looking at Container Orchestration	
	Engines	822
	Embracing Kubernetes	822
	Inspecting Docker Swarm	823
	Surveying Mesos	823
	Summary	823
	Exam Essentials	824
	Review Questions	825

Appendix	Answers to the Review Questions	829
	Chapter 2: Introduction to Services	830
	Chapter 3: Managing Files, Directories, and Text	833
	Chapter 4: Searching and Analyzing Text	837
	Chapter 5: Explaining the Boot Process	841
	Chapter 6: Maintaining System Startup and Services	844
	Chapter 7: Configuring Network Connections	848
	Chapter 8: Comparing GUIs	851
	Chapter 9: Adjusting Localization Options	855
	Chapter 10: Administering Users and Groups	858
	Chapter 11: Handling Storage	861
	Chapter 12: Protecting Files	863
	Chapter 13: Governing Software	864
	Chapter 14: Tending Kernel Modules	866
	Chapter 15: Applying Ownership and Permissions	868
	Chapter 16: Looking at Access and Authentication Methods	869
	Chapter 17: Implementing Logging Services	871
	Chapter 18: Overseeing Linux Firewalls	872
	Chapter 19: Embracing Best Security Practices	874
	Chapter 20: Analyzing System Properties and Remediation	876
	Chapter 21: Optimizing Performance	878
	Chapter 22: Investigating User Issues	880
	Chapter 23: Dealing with Linux Devices	881
	Chapter 24: Troubleshooting Application and Hardware Issues	883
	Chapter 25: Deploying Bash Scripts	885
	Chapter 26: Automating Jobs	887
	Chapter 27: Controlling Versions with Git	889
	Chapter 28: Understanding Cloud and Virtualization Concepts	890
	Chapter 29: Inspecting Cloud and Virtualization Services	892
	Chapter 30: Orchestrating the Environment	894
