Table of Contents

[Cover](#)

[Title Page](#)

[Copyright Page](#)

[Dedication Page](#)

[Contributors](#)

[Preface](#)

[Part 1: Advanced clinical practice](#)

[1 Introducing advanced clinical practice](#)

[Advanced Practice Toolkit \(APT\)](#)

[Centre for Advancing Practice](#)

[Conclusion](#)

[2 Scope of practice](#)

[Defining scope of practice](#)

[Expanding scope of practice](#)

[Dunning-Kruger effect](#)

[Imposter syndrome](#)

[Regulation](#)

[3 Professional, legal and ethical considerations of advanced practice](#)

[Professional issues](#)

[Competence](#)

[Responsibility](#)

[Accountability](#)

[Indemnity](#)

[Regulation](#)

[Governance](#)

[Legal issues](#)

[Ethics](#)

[Consent](#)

[4 Advancing to consultant-level practice](#)

[Consultant-level practice](#)

[The journey from advanced to consultant practice](#)

[Conclusion](#)

[5 Transitioning to advanced practice](#)

[Becoming an advanced clinical practitioner](#)

[Acceptance](#)

[Prescribing](#)

[Uniforms](#)

[Academic study](#)

[Mentorship and supervision](#)

[Transitioning to advanced clinical practice](#)

[Scope of practice](#)

[Advancing the advanced clinical practitioner](#)

[Conclusion](#)

[6 Continuing professional development and lifelong learning](#)

[Continuing professional development](#)

[Continuing professional development and the four pillars of advanced practice](#)

[Enablers for effective continuing professional development and lifelong learning](#)

[The future of continuing professional development and lifelong learning](#)

[7 Consultation models](#)

[Classification of consultation models](#)

[Calgary-Cambridge Guide to the Medical Interview](#)

[Cone technique](#)

[Ideas, concerns and expectations \(ICE\)](#)

[Communication](#)

[Triggers to consultation](#)

[Consultations with an alternative agenda](#)

[Assessing the quality of consultations](#)

[Part 2: Advanced history taking and physical examination](#)

[8 Principles of history taking and physical examination skills](#)

[History taking](#)

[Skills needed to elicit information](#)

[History taking for special situations](#)

[General aspects of physical examination](#)

[Physical examination for special situations](#)

[Evidence-based physical diagnosis](#)

[9 Principles of diagnostic testing and clinical decision making](#)

[Key principles](#)

[Diagnostic accuracy and clinical decision making](#)

[10 The psychiatric interview: mental health history taking and examination](#)

[The psychiatric interview](#)

[Components of the psychiatric history](#)

[Mental State Examination](#)

11 History taking for patients who lack mental capacity

12 Dermatology history taking and physical examination

Prevalence of dermatological conditions

Presentation of dermatological conditions

History of presenting complaint and past medical history

Drugs

Allergies

Family and social history

Social history

Psychosocial impact

Review of systems

Examination

Investigations

Documentation

Dermatological emergencies

13 Neurological history taking and physical examination

Prevalence of neurological disorders

Presentation of neurological disorders

Past medical history_(PMH).

Drug history_(DH).

Family history_(FH).

Social history_(SH).

Review of systems_(ROS).

Physical examination

Concept mapping in neurological disorders

Summary.

14 Ear, nose and throat history taking and physical examination

Ear

Nose

Throat

15 Lymph node assessment

Lymphadenopathy

Assessing lymphadenopathy

Causes of lymphadenopathy

16 Endocrine history taking and physical examination

Prevalence of endocrine conditions

Presentation of endocrine disorders

Past medical history

Drugs

Family history

Clinical examination

Clinical investigations

Endocrine 'red flags'

Endocrine emergencies

17 Respiratory history taking and physical examination

Prevalence of respiratory disorders

Presentation of respiratory disorders

Past medical history

Drug history

Family history and social history

Clinical examination

Concept mapping in respiratory disorders

Respiratory red flags

Respiratory emergencies

18 Cardiovascular history taking and physical examination

Presentation of cardiac disorders

Drug history

Clinical examination

Concept mapping in cardiac disorders

Cardiac red flags

19 Abdominal history taking and physical examination

Presentation of gastrointestinal disorders

Past medical history

Drug history

Family history and social history

Clinical examination

Differential diagnosis and concept mapping in gastrointestinal disorders

Gastrointestinal red flags

Investigations

20 Genitourinary system history taking and physical examination

Presentation of genitourinary system disorders

Past medical history

Drug history

Family history and social history

Clinical Examination

Genitourinary system red flags

21 Musculoskeletal system history taking and physical examination

Prevalence of musculoskeletal system disorders

Presentation of musculoskeletal system disorders

History of presenting complaint

Past medical history

Drug history

Family history and social history

Clinical examination

Musculoskeletal system red flags

22 Dealing with difficult situations

Duty of care

Informed refusal

Preventing a challenging interaction

Handling a challenging interaction

Breaking bad news

Part 3: Advanced clinical interventions

23 Fundamental ultrasound skills

Basic principles of ultrasound

Clinical application

Training and governance

24 Lung ultrasound

Probe selection and image optimisation

Probe placement and normal sonoanatomy

Image interpretation

Limitations

25 Vascular ultrasound

Indications for use

[Relative contraindications](#)

[Sonography](#)

[Technique](#)

[DVT assessment:](#)

[26 Focused echocardiography](#)

[FUSIC Heart](#)

[FEEL](#)

[BSE Level 1](#)

[Preparing for the examination](#)

[Probe and manipulation](#)

[Basic views](#)

[Echocardiographic assessment](#)

[Common pathologies](#)

[27 Central venous catheter and arterial catheter insertion](#)

[Central venous catheter insertion](#)

[Arterial catheter insertion](#)

[28 Pleural procedures](#)

[Understanding the pleural space](#)

[Local Standards for Safe Invasive Procedures \(LocSSIPs\)](#)

[Complications of pleural procedures](#)

[Effect of pleural procedures](#)

[Investigations](#)

[29 Radiology interpretation](#)

[Plain radiographs](#)

[Radiology referrals](#)

[IRMER](#)

[Plain X-ray](#)

Cross-sectional imaging

Fluoroscopy

30 The advanced practitioner's role in organ donation and transplantation

Types of donation

Diagnosing death by neurological criteria ('brainstem death testing')

Role of the specialist nurse for organ donation (SN-OD)

Optimisation of the potential organ donor

UK law and ethics

Tissue donation

31 Verification of death

Diagnosis of death

Legal aspects

Diagnosis of death guidance and practice

Training and Competence

32 Home-based care, crisis response and rehabilitation

Improving Outcomes

Skills and knowledge

Rehabilitation

33 Frailty

What is frailty?

Who has frailty?

How to identify frailty

Why is it important to recognise frailty?

How do I find out more?

34 Advanced practitioner-led inter- and intrahospital transfer

Patient stabilisation and preparation for transfer

During and after transfer

Governance

Conclusion

Part 4: Independent prescribing

35 Principles of pharmacology

Pharmacodynamics

Pharmacokinetics (ADME)

36 Non-pharmacological and pharmacological interventions

Splinting

Psychology, physiology and pharmacology

Altered pharmacokinetics

Multimodal approach (Figure 36.2)

Distraction techniques

Home remedies

Health promotion

37 Shared decision making

Mental capacity, informed consent and prescribing decisions

Creating a partnership

Reflection and self-growth to facilitate a better understanding

38 Prescribing practice and patient education

Education

Behaviour change

Case study - Suzanne

Social prescribing

Materials

Part 5: Advanced clinical practice leadership and management

39 Leadership in healthcare settings

Leadership in healthcare settings

Approaches to leadership in healthcare settings

Opportunities for advanced practice

40 Leadership and management theories

Management theory

Leadership theory

Conclusion

41 Clinical leadership

What is clinical leadership?

Clinical leadership vs management

What makes a good clinical leader?

Clinical leadership within advanced practice

Conclusion

42 Educational leadership

Organisational level

Teamwork

Individual level

Distributive leadership and education

Case study - Demonstrating Educational leadership

43 Research leadership

Embracing social responsibilities within research leadership

Impact - an unexplored domain of research leadership in advanced clinical practice

Conclusion

44 Improving quality of care

What is quality improvement in healthcare and why is it important?

Stakeholders and assessing feasibility

Problem identification and models for improvement

Quality improvement methods

Part 6: Advanced clinical practice education

45 Exploring the challenges with advanced clinical practice education

Background/context

System standard setting for, and co-ordination of, ACP education

Development and delivery of ACP education - workplace-based and academic support and supervision

46 Opportunities for advanced clinical practice education and associated support mechanisms

Background

Pathways to ACP education

Educational opportunities

47 Education and learning theories

Constructive alignment

Ensuring learning is appropriate

Experiential learning and constructivism

48 Simulated learning and decision-making theories

[Why use simulation-based education?](#)

[How to use simulation-based education](#)

[Decision making in simulation](#)

[49 Integrating simulation and virtual reality into clinical practice education](#)

[Standards for simulation-based education](#)

[Curriculum design](#)

[Virtual reality \(VR\) in healthcare education](#)

[50 The advanced practitioner as clinical educator and supervisor](#)

[What is workplace-based assessment?](#)

[Feedback](#)

[Ende's guidelines for effective feedback](#)

[Pendleton's feedback model](#)

[Differential attainment and remediation](#)

[Part 7: Advanced clinical practice research](#)

[51 Ethical and governance principles](#)

[Ethical principles](#)

[Governance principles](#)

[52 Research design and methods](#)

[Leading in areas of expertise](#)

[Leading on research - self and others](#)

[Case studies](#)

[53 Critical appraisal skills](#)

[Stages of critical appraisal](#)

[Critical appraisal frameworks](#)

[Further skill development](#)

[54 Audit and quality improvement sciences](#)

[Lean methodology](#)

[Six Sigma](#)

[Model for improvement](#)

[Experience-based co-design](#)

[55 From bench to bedside: integrating research into practice](#)

[Step 1: Formulating a clinical question – the PICO method](#)

[Step 2: Locating the evidence/research – performing a systematic literature review](#)

[Step 3: Critical appraisal and the hierarchy of evidence](#)

[Step 4: Extracting the most relevant and useful results](#)

[Step 5: Implementing research into practice](#)

[Conclusion](#)

[References](#)

[Index](#)
