

SpringerBriefs in
Biochemistry and Molecular Biology

Willis X. Li · Louise Silver-Morse

The Secret Lives of Transcription Factors

In Heterochromatin
Regulation

SpringerBriefs in Biochemistry and Molecular Biology

SpringerBriefs in Biochemistry and Molecular Biology are a series of slim high quality publications encompassing the entire spectrum of biochemistry and molecular biology. Each individual proposal will be evaluated by hand-picked external reviewers to ensure publication of Springer Briefs of the highest standard. SpringerBriefs published in the series represent the cutting edge in biochemistry and molecular biology research in a format intersecting the traditional review and the scientific book volume.

This Springer imprint is published by the registered company Springer Nature Switzerland AG
The registered company address is: Gewerbestrasse 11, 6330 Cham, Switzerland

Contents

1	HP1 and Noncanonical Functions of STAT	1
	STAT	1
	HP1	4
	Summary	6
	References	7
2	Biological Functions of STAT, HP1, and Heterochromatin	13
	Heterochromatin Loss During Aging	13
	Heterochromatin Redistribution in Cellular Senescence	15
	Cellular Senescence Versus Cancer Development	16
	STAT and HP1 Protect Against DNA Damage and Promote Longevity	16
	References	17
3	Other Transcription Factors with Noncanonical Functions in Heterochromatin Regulation	19
	GAGA Factor	19
	Rb	21
	ATF2	23
	NF- κ B	24
	PAX	25
	C/EBP α	27
	References	28
4	HP1 in Liquid–Liquid Phase Separation and its Regulation by 53BP1	37
	Liquid–Liquid Phase Separation and HP1	37
	53BP1	38
	53BP1 and Proteins in DNA Damage Response	38
