Food for thought:

**Nostalgia is a feeling—not a business model!**

# Prologue

Dear Reader,

Cycling in the French Alps after breakfast, followed by a meeting with the team directly in the power plant's engine compartment to check the processes for optimization potential. Lunch at the beach with friends from all over the world. In the afternoon, a quick look at how many people have played the game created in spare time at Roblox and check whether the income is sufficient for the new avatar suit. In the evening, attending a concert in the USA before a meditation in the painting “Starry Night” by Vincent van Gogh to help you fall asleep. And all of this from your own flat.

Is this what the Metaverse will look like? We don't know yet. Now, at the beginning of 2023, the Metaverse is initially an idea or a promise. So with this book, we are trying to make a vision tangible, or imaginable. What we are describing may be true—it may also develop somewhat differently, or completely differently, or not at all. Just as with the Internet, it is difficult to predict at this point which developments and technologies will be created and combined by which people and companies in which way.

Therefore, this book is a first strike to advance the engagement with the Metaverse in science and practice. It will not be the last! We believe that the Metaverse will impact and change our world in ways not yet

imagined. Not necessarily with a big bang, but through incremental technological and content developments. And we are excited about that.

One thing we would like to recommend: Do not ignore these developments! You don't have to make extensive investments in the Metaverse. But we would advise you to do some finger exercises. So that you are already on board when the train actually picks up speed. In addition, it can also help you with your employer branding if it becomes visible that you are also dealing with exciting topics of the future.

We wish you inspiring reading pleasure!

Berlin, Germany

## About the Authors

**Ralf T. Kreutzer** has been a Professor of Marketing at the Berlin School of Economics and Law since 2005. At the same time, he works as a trainer, coach, and marketing and management consultant. He spent 15 years in various management positions at Bertelsmann (last position director of the foreign division of a subsidiary), Volkswagen (managing director of a subsidiary), and Deutsche Post (managing director of a subsidiary) before being appointed professor of marketing in 2005.

Through regular publications and keynote lectures (in Germany, Austria, Switzerland, France, Belgium, Singapore, India, Japan, Russia, the USA, among others), Prof. Kreutzer has provided significant impetus on various topics related to marketing, dialog marketing, CRM/customer loyalty systems, database marketing, online marketing, social media mar-

keting, digital Darwinism, digital branding, dematerialization, change management, digital transformation, artificial intelligence, agile management, strategic as well as international marketing, and has advised a large number of companies in Germany and abroad on these topics. In addition, Prof. Kreuzer works as a trainer and coach.

His most recent book releases are “Toolbox for Marketing and Management” (2019), “B2B Online-Marketing und Social Media” (second ed., 2020, together with Andrea Rumler and Benjamin Wille-Baumkauff), “Voice-Marketing” (2020, together with Darius Vousoghi), “Die digitale Verführung” (2020), “Kundendialog Online und Offline” (2021), “Praxisorientiertes Online-Marketing” (fourth ed., 2021), “Social-Media-Marketing kompakt” (second ed., 2021), “E-Mail-Marketing kompakt” (second ed., 2021), “Online Marketing” (2022), “Digitale Markenführung” (2022, together with Karsten Kilian), “Praxisorientiertes Marketing” (sixth ed., 2022), and “Toolbox Digital Business” (2022).

**Sonja Klose** has been a Professor of Marketing as well as a trainer, mentor, and coach since 2017. She also has many years of experience as a marketing executive for various Berlin-based start-ups in the fields of Business Intelligence, InsureTech, and Digital Health. Her focus is on online and offline marketing, social media and CRM, each in B2B and B2C environments. Her latest project, a contribution to the book series “Esportpedia,” deals with options for marketing in the world of electronic sports.
