[Preface](#)

[About the Companion Website](#)

[1 Introduction](#)

[1.1 Why Potential and Vortex Methods?](#)

[1.2 Outline of This Book](#)

[References](#)

[2 Unsteady Flow Fundamentals](#)

[2.1 Introduction](#)

[2.2 From Navier-Stokes to Unsteady
Incompressible Potential Flow](#)

[2.3 Incompressible Potential Flow Solutions](#)

[2.4 From Navier-Stokes to Unsteady Compressible
Potential Flow](#)

[2.5 Subsonic Linearised Potential Flow Solutions](#)

[2.6 Supersonic Linearised Potential Flow Solutions](#)

[2.7 Vorticity and Circulation](#)

[2.8 Concluding Remarks](#)

[References](#)

[Notes](#)

[3 Analytical Incompressible 2D Models](#)

[3.1 Introduction](#)

[3.2 Steady Thin Airfoil Theory](#)

[3.3 Fundamentals of Wagner and Theodorsen Theory](#)

[3.4 Wagner Theory](#)

[3.5 Theodorsen Theory](#)

[3.6 Finite State Theory](#)

[3.7 Concluding Remarks](#)

[3.8 Exercises](#)

[References](#)

[Notes](#)

[4 Numerical Incompressible 2D Models](#)

[4.1 Introduction](#)

[4.2 Lumped Vortex Method](#)

[4.3 Gust Encounters](#)

[4.4 Frequency Domain Formulation of the Lumped Vortex Method](#)

[4.5 Source and Vortex Panel Method](#)

[4.6 Theodorsen's Function and Wake Shape](#)

[4.7 Steady and Unsteady Kutta Conditions](#)

[4.8 Concluding Remarks](#)

[4.9 Exercises](#)

[References](#)

[Note](#)

[5 Finite Wings](#)

[5.1 Introduction](#)

[5.2 Finite Wings in Steady Flow](#)

[5.3 The Impulsively Started Elliptical Wing](#)

[5.4 The Unsteady Vortex Lattice Method](#)

[5.5 Rigid Harmonic Motion](#)

[5.6 The 3D Source and Doublet Panel Method](#)

[5.7 Flexible Motion](#)

[5.8 Concluding Remarks](#)

[5.9 Exercises](#)

[References](#)

[Note](#)

[6 Unsteady Compressible Flow](#)

[6.1 Introduction](#)

[6.2 Steady Subsonic Potential Flow](#)

[6.3 Unsteady Subsonic Potential Flow](#)

[6.4 Unsteady Supersonic Potential Flow](#)

[6.5 Transonic Flow](#)

[6.6 Concluding Remarks](#)

[6.7 Exercises](#)

[References](#)

[Notes](#)

[7 Viscous Flow](#)

[7.1 Introduction](#)

[7.2 Impulsively Started Flow around a 2D Flat Plate at High Angles of Attack](#)

[7.3 Flow Around a 2D Circular Cylinder](#)

[7.4 Flow Past 2D Rectangular Cylinders](#)

[7.5 Concluding Remarks](#)

[7.6 Exercises](#)

[References](#)

[Note](#)

[A Fundamental Solutions of Laplace's Equation](#)

[A.1 The 2D Point Source](#)

[A.2 The 2D Point Vortex](#)

[A.3 The Source Line Panel](#)

[A.4 The Vortex Line Panel](#)

[A.5 The Horseshoe Vortex](#)

[A.6 The Vortex Line Segment](#)

[A.7 The Vortex Ring](#)

[A.8 The 3D Point Source](#)

[A.9 The 3D Point Doublet](#)

[A.10 The Source Surface Panel](#)

[A.11 The Doublet Surface Panel](#)

[References](#)

[Note](#)

[B Fundamental Solutions of the Linearized Small Disturbance Equation](#)

[B.1 The Subsonic Doublet Surface Panel](#)

[B.2 The Acoustic Source Surface Panel](#)

[B.3 The Acoustic Doublet Surface Panel](#)

[B.4 The Supersonic Source Surface Panel](#)
