Human mobility, whatever its scale, is often controversial. Hence it carries with it the potential for politics. A core feature of mobility politics is the tension between the desire to maximise the social and economic benefits of migration and pressures to restrict movement. Transnational communities, global instability, advances in transportation and communication, and concepts of ‘smart borders’ and ‘migration management’ are just a few of the phenomena transforming the landscape of migration today. The tension between openness and restriction raises important questions about how different types of policy and politics come to life and influence mobility.

*Mobility & Politics* invites original, theoretically and empirically informed studies for academic and policy-oriented debates. Authors examine issues such as refugees and displacement, migration and citizenship, security and cross-border movements, (post-)colonialism and mobility, and transnational movements and cosmopolitics.

## NOTES ON CONTRIBUTORS

**Carlos Manuel Abaunza** holds a PhD in Sociology and Anthropology and a postdoctoral specialization in Migration and Refugee Studies. His research spans Europe, the Caribbean, and the MENA region, reflecting his global perspective. As an international instructor, Abaunza has excelled in the areas of applied sociology, migration studies, research methods and methodologies, and academic writing. He has contributed insights as a consultant to various international organizations, helping shape policies worldwide. Over the last 20 years, Abaunza has also assisted governmental and non-governmental organizations and academic institutions. He currently works at Nazarbayev University in Kazakhstan.

**Eglė Butkevičienė, PhD** serves as full Professor of Sociology and head of Committee for Political Science, Sociology and Public Governance Study Programs at the Faculty of Social Sciences, Arts and Humanities, Kaunas University of Technology. She holds a visiting professor appointment at University of Central Florida. Her research and teaching focus on civil society issues, public governance, social innovations, citizen science, social entrepreneurship, migration, environmental activism, and social impact of technologies. She has over 50 articles in peer-reviewed journals and book chapters to her credit. She is responsible for co-editing the book series “Democratic Dilemmas and Policy Responsiveness,” published by Lexington Books.

**Maritza Concha** holds a PhD in Public Affairs from the University of Central Florida (UCF). She has extensive experience in community-engaged research, focusing on vulnerable populations, including immigrants. Another area of interest includes acculturation processes of recently migrated immigrants from the Latin American and Caribbean region. Concha currently serves as the Director for the Center of Public and Nonprofit Management and as a Lecturer at the UCF School of Public Administration.

**Mónica Liliana Jacobo-Suárez** is a CONAHCYT Fellow Researcher currently working at El Colegio de México. Her research areas include US-Mx return migration, immigrant policies, and linguistic, educational, and labor reintegration for migrant populations. She currently coordinates the project Mexican Return Migrants: Educational Trajectories and Labor Incorporation (Funded by CONAHCYT). Her articles have appeared in the *Journal of Global Ethics*, *Latino Studies*, and the *Journal of Language and Policy*, among others. Also, she has collaborated as a chapter author in *The Routledge History of Modern Latin American Migration*, *Theorizing Transnational Youth Identities Crossing the US-Mexican Border* (Routledge), and *Accountability across borders* (UTexas).

**Sabith Khan** is an Associate Professor and Program Director in the MPPA program at Cal Lutheran University, California, USA. He has written on the philanthropy, migration, and remittances.

**Filiz Kunuroglu** works as an Associate Professor at Izmir Katip Celebi University, Turkey. She also works as an associate editor of *International Journal of Intercultural Relations*. She mainly does research on social psychological processes in culturally diverse environments. Her studies mainly focus on acculturation and reacculturation processes, discrimination, psychological resilience, and wellbeing in migrant and refugee groups.

**Frances D. Loustau-Williams** is an Assistant Professor in the School of Humanities and Social Sciences at Al Akhawayn University in Ifrane Morocco. Her research includes borders, migration, knowledge production systems, and social marginalization in Africa. She has a PhD in Public and International Affairs, concentrating on International Development and a Master's degree in International Development, both from the University of Pittsburgh.

**Rasha Mannaa** holds a bachelor's degree in international relations from Universidad del Norte in Colombia. She is currently pursuing two master's degrees at the University of Central Florida (UCF) in Public Administration and in Nonprofit Management. Mannaa works as a Graduate Assistant at the Center for Public and Nonprofit Management (CPNM), where she manages and oversees various public and nonprofit initiatives. Additionally, Mannaa works part-time as a junior consultant at socialBaq, a small consultancy firm that develops methods and programs for talent development, strategic planning, and for maximizing the impact of different companies and nonprofits worldwide.

**Jeremaiah M. Opiniano** holds a PhD from The University of Adelaide and teaches journalism and research methods at the University of Santo Tomas (UST) in Manila, Philippines. He is also director of UST's Research Center for Social Sciences and Education (RCSSSED). Opiniano also runs a nonprofit think-tank, the Institute for Migration and Development Issues (IMDI).

**Olga Pysmenna** obtained a PhD in Public Affairs from the University of Central Florida. Her dissertation investigated the network collaborated capacity for service delivery for people impacted by humanitarian crisis caused by war. Her research interests include network governance, humanitarian crises, nonprofit management, international conflicts, and corruption prevention.

**Jolanta Vaičiūnienė** is an expert in public administration, mainly focusing on local democracy, communities, migration, local governance, sustainable public procurement, and social policy. She serves as head of the Municipal Training Centre at Kaunas University of Technology and is a member of the research group "Civil Society and Sustainability" at the Faculty of Social Sciences, Arts and Humanities. She has managed a variety of projects that have strengthened the capacity of municipal governments throughout Lithuania and has provided knowledge sharing for public officials in other European communities. She is co-editor of Palgrave Macmillan's book series "Rethinking University and Community Policy Connections".

**Eglė Vaidelytė** holds a PhD in Sociology and is professor, vice-dean for studies, and a member of the research group "Civil Society and Sustainability" at Kaunas University of Technology. Vaidelyte has been an external expert at the European Commission for a number of research

programs including Asylum, Migration, and Integration Fund (AMIF), DG for Migration and Home Affairs. Vaidelyte often speaks at various national and international conferences, gives training to civil servants and communities, and is an author or co-author of over 40 research articles, chapters, and books on civil society, public governance, corruption prevention, and migration issues.

**Cherry Amor D. Yap** holds a PhD from Kyoto University. She teaches at the Global Linkage Initiative Program of the Tokyo University of Foreign Studies, and the General Studies Department of Asia University in Tokyo, Japan. She was previously a lecturer at the University of the Philippines Manila and De La Salle - College of Saint Benilde in Manila, Philippines

**Jungwon Yeo** is an Associate Professor in the School of Public Administration at the University of Central Florida. Her primary research focuses on enhancing attitudes, behaviors, and cognitions of diverse individuals and organizations and their collective decision-making process in critical policy contexts, such as disaster and crisis management, migration, and human security. Additionally, her research explores key topics shaping contemporary discourse in public administration, including accountability, ethics, leadership, and social justice, and their impact on public service provision. Her research experience is demonstrated through refereed publications, national and international conference presentations, and multi-year interdisciplinary research grant awards.

**Demet Vural Yüzbaşı** works as an Assistant Professor at Izmir Katip Çelebi University, Department of Psychology. She obtained her MA degree in Developmental Psychology and PhD in Psychological Counseling and Guidance at Ege University. Her work includes studies of intervention programs for children and youth, children with special needs and their families, immigrants, emerging adulthood, and late adulthood.

**Haibo Zhang** is professor and director of the Center for Risk, Disaster and Crisis Management in the School of Government at Nanjing University, China. His research interests include emergency management networks, social media and crisis communication, organizational and policy learning, and social risk governance in China. His work has been published in journals such as *Safety Science*, *Disasters*, *Risk Analysis*, the *Journal of Public Affairs Education*, and the *Journal of Comparative Policy Analysis*.

**Ai-xiang Zheng** is a professor at Wuxi Institute of Technology, where he is a deputy dean of school of management. His primary research interests include migration risk and unemployment risk. His work has appeared in journals including *Asian and Pacific Migration Journal*, and *PLOS ONE*.

**Abderrahim Zouggaghi** is an alumnus of Al Akhawayn University in Ifrane with advanced degrees in International Studies & Diplomacy. He is currently researching the intricacies of the informal economies and power structures that emerge out of border fluidity at the Melilla-Nador border. His master's thesis is a thorough investigation on how money sent home by migrants affects Moroccan migration patterns.

# Return Migration and Crises in Non-Western Countries: Introduction

*Jungwon Yeo*

## INTRODUCTION

Crises have become prominent factors in global migration. The increasing frequencies and scales of both expected and unprecedented crises shed light on diverse issues related to human displacement (Kahanec et al., 2016; Yeo, 2020; Comfort, 2023). Crises can shape multifaceted conditions for the departure or return of people and bring about cascading changes or challenges in the societies involved, all without necessarily suggesting foreseeable outcomes or resolutions (Hall & Massey, 2010; Barrett et al., 2016; Mencutek, 2022). For instance, the Russian Invasion of Ukraine in 2022 led to the displacement of over eight million Ukrainians, resulting in new economic, cultural, political, and societal challenges and opportunities for many European countries (see Yeo & Pysmenna, 2024, Chap. 6, in this volume). Similarly, the world's common responses to combat the initial spread of the COVID-19 pandemic, such as border

J. Yeo (ed.), *Return Migration and Crises in Non-Western  
Countries*, Mobility & Politics,  
[https://doi.org/10.1007/978-3-031-53562-8\\_1](https://doi.org/10.1007/978-3-031-53562-8_1)

closures and lockdowns, gave rise to unusual migration flows between countries, resulting in unprecedented socio-economic issues and challenges worldwide (see Loustau-Williams & Zougaghi, 2024, Chap. 8 in this volume).

It requires a comprehensive understanding of the complex interplay between various types and scales of crises and the diverse backgrounds of migrants, encompassing their social, political, economic, cultural, and psychological status to address and resolve emerging issues at the intersection of migration and crises (Hall & Massey, 2010; Hazans, 2016). Despite the significance, the intersection of crises and migration remains relatively underexplored and poorly understood within migration and crisis research (Bastia, 2011; Mencutek, 2022). This limited research knowledge has hindered its potential to offer meaningful insights to policymakers and practitioners in these fields.

Additionally, there has been a growing demand for information and knowledge concerning return migration and crisis in non-Western countries. A major portion of migration studies focuses predominantly on the dichotomy between immigration—the influx of foreigners—into Western countries, and emigration—outflows of citizens—from non-Western countries (Olivier-Mensah & Scholl-Schneider, 2016; Yeo & Huang, 2020). Return migration is often viewed as the final stage of this dichotomy and is not explored extensively as an independent subject within migration studies (Olivier-Mensah & Scholl-Schneider, 2016). Moreover, significant volume of migration studies was conducted in the context of Western countries, as migrants' destinations (Yeo & Huang, 2020). When non-Western countries become the locus of migration research, it tends to revolve around the emigration of their citizens. This emphasis on emigration stems from economic factors as non-Western countries are rarely highlighted as departures for migrants seeking for new opportunities. Consequently, migration studies have rarely centered on non-Western countries as destination for migrants.

Return migration in non-Western countries has been an evolving phenomenon, particularly amid crises (Bastia, 2011; Zaiceva & Zimmermann, 2016). Moreover, the contextual conditions in non-Western countries differ significantly from those in developed Western countries. Many returnees may find that their formal status aligns with their countries of origin. When they return to their home countries, they may no longer face the same set of challenges they encountered in their host countries, especially those related to maintaining their formal status (as Jacobo-Suárez, 2024

discussed in Chap. 9 in this volume). However, returnees' experiences in other countries, primarily affluent Western ones, and their encounters with crises could introduce unique contexts that either facilitate or hinder the processes and outcomes of their return to their home countries (Comfort, 2023). Furthermore, the impacts, challenges, and issues associated with return migration are more prominent in non-Western countries (Zaiceva & Zimmermann, 2016), many of which may lack sufficient awareness and mitigation measures to address the emerging needs and demands of returnees (as discussed in Chaps. 2 and 9 in this volume).

Therefore, I have proposed this edited volume to explore diverse issues related to return migration amid various types of crises facing non-Western countries. Through a rich collection of cases and theoretical discussions featured in chapters, this book aims to expand significantly current knowledge of crisis migration and discuss the implications for a wide range of practices and policies in migration and crisis management.

### FOCI, LOCI, AND CONCEPTUALIZATION

As the title of this edited volume indicates explicitly, 'crisis,' 'return migration,' and 'non-Western countries' are the key terms that define the focus and locus of this book. In this section, I will briefly discuss how these terms are defined and used throughout the chapters of this book.

Firstly, this book explores various causes, types, scales, and roles of crises in the realm of human migration research and practice. In this book, 'crisis' refers to 'a difficult or a dangerous situation requiring serious policy attention.' The contributing authors investigate different forms of crises including war (see Chap. 6), public health crises (see Chaps. 2, 3, 4, 5, 7, and 11), and institutional, economic, or policy failures (see Chaps. 7, 8, 9, and 10). Some chapters focus on specific crisis as a standalone event, such as the COVID-19 pandemic in Chaps. 2 and 3, and the war in Chap. 5. Other chapters examine cascading crises that involve a series of interconnected events (see Chaps. 9, 10, and 11). Additionally, certain chapters explore how a crisis or cascading crises can create new contexts influencing various aspects of human migratory processes (see Chaps. 5, 6, 7, 8, 9, and 10), and relevant policies (see Chap. 2). Some chapters address crises as both causes and consequences of human movement across borders (Chaps. 3 and 9).

Secondly, while many studies on migration amid crises exist, this edited volume places a particular emphasis on 'return migration.' Return

migration refers to ‘the movement of a person going from a host country back to a country of origin, country of nationality, or habitual residence’ (International Organization of Migration [IOM], 2011). Traditionally, in migration studies, return migration was often seen as the final stage of the migratory process, primarily discussed in relation to the extended period of residence in foreign countries (Pérez-López, 2001; IOM, 2011; Stark, 2019). However, both chapter authors and I acknowledge that there has not been a universally concrete definition or understanding of return migration within the field, given the varied causes, processes, and outcomes associated with return migration. In addition, existing studies on return migration tend to highlight the experiences of low-skilled international male labor migrants. Other types of returnees, such as refugees, asylum seekers, families, high-skilled migrants, female domestic workers, and 1.5 generations, received relatively less scholarly attention (Mencutek, 2022).

Therefore, this book presents a wide array of definitions of return migration, returnees, or return migrants that consider factors such as the duration of migration, types of return (permanent, medium, and temporary), causes, and locations. Several chapters delve into the issues of return migration’s volatility or circularity of return migration. In examining the forces and factors driving return (or return intention), the chapter authors are allowed to adopt and explain diverse terms, including push and pull factors, as well as individual, structural, and institutional factors. The book addresses divergent types of return, distinguishing between forced returns due to external circumstances or forces and voluntary returns driven by individual choices within different contexts.

Moreover, recognizing the volatility and circulatory nature of return migration, this book broadens the concept by including ‘remigration’ which refers to the act or process of migrants moving from their initial location to another that may not necessarily be their home (see Zheng & Zhang, 2024, Chap. 3 in this volume). This expansion is especially pertinent for short-term or seasonal migrant laborers, for whom remigration to other cities or locations could be an integral part of the return process. As such, we anticipate that research findings on remigration will offer valuable insight into our understanding of return migration.

Finally, this book delves into the intersection of return migration and crises within ‘non-Western countries.’ The term ‘non-Western countries’ refers to nations in the Eastern part of the world, encompassing Asian, Middle Eastern, and African countries. Western countries typically denote

economically developed nations primarily located in North America and Western Europe.

However, it is worth noting that the distinction between Western and non-Western countries extends beyond geography; it often signifies the level of economic development. For instance, countries in Central or South America as well as Eastern Europe are not typically considered Western despite their geographical locations. Conversely, Australia and New Zealand are regarded as Western countries due to their historical and cultural ties to North America and Western Europe, even though they are situated in the Oceania region. As a result, the term ‘non-Western countries’ encompasses a broad range of regions, including Asia, the Middle East, Africa, Eastern Europe, Latin America, and the Caribbean, based on the aforementioned criteria. This distinction forms the framework for selecting chapter authors in this edited volume.

## BOOK ORGANIZATION AND CHAPTER INTRODUCTION

This book is divided into three sections. **Section I**, which includes this introductory chapter (Chap. 1), serves as a foundational component of the edited volume. It introduces the volume’s overarching goals and contributions by emphasizing the significance of understanding return migration and crises in contemporary society. This chapter also provides clear definitions of the main concepts—return migration, crisis, and non-Western countries. Additionally, it offers an overview of the edited volume and briefly introduces the chapters that are included in Section II.

In **Section II**, which encompasses Chaps. 2–11, the book delves into specific case studies of non-Western countries. These chapters explore a wide range of theoretical and methodological perspectives while offering practical insights to address the intricate issues surrounding return migration and crises. The topics covered within this chapters include return migration trends, the pivotal roles, and contributions of return migrants, the social, psychological, and policy challenges faced by returnees, emerging issues stemming from return migration in their home countries, and the public and formal responses to return migration and the reintegration of returned citizens. Section II is further divided into four parts, each focusing on a distinct geographical region: Asia (Chaps. 2–4), Europe (Chaps. 5–7), North Africa (Chap. 8), and Latin America and the Caribbean (Chaps. 9–11).

The Asian chapter by Yap and Opiniano (2024) (Chap. 2). In the chapter, Yap and Opiniano delve into the systematic policy efforts of Philippine government to reintegrate overseas returnees, particularly during the COVID-19 pandemic. They provide a comprehensive review of the 40-year history of migrant management policies, with a special focus on reintegration policies developed in response to various crises. The chapter analyzes how the substantial return migration resulting from the COVID-19 pandemic has led to innovative approaches to migration reintegration in the Philippines. The authors underscore the significance of return migration for the nation's development and emphasize the need for more comprehensive and inclusive reintegration policies. They advocate for a whole-of-government and a whole-of-society approach to support systemically the return of overseas migrants in the post pandemic era.

In Chap. 3, Zheng and Zhang (2024) explain empirically how environmental uncertainty, particularly uncertainty related to the global pandemic, influences the remigration intentions of Chinese migrant workers within different regions and cities of China. Through statistical analysis of survey data from 317 migrant workers, Zheng and Zhang explore the intricate relationships among environmental uncertainty, pandemic-related uncertainty, migrant workers' perception of unemployment risk, and their intentions to remigrate. While the authors did not find a significant direct association between environmental uncertainties and remigration intentions, their findings highlight the exacerbating impact of pandemic-related uncertainty on overall environmental uncertainty. Furthermore, they demonstrate that heightened perceptions regarding unemployment significantly influence migrant workers' intention to emigrate from their current locations.

In Chap. 4, Khan (2024) delves into the profound effects of return migration on the diplomatic ties between nation-states. Emphasizing the pivotal role of remittances in cementing the connection between countries of origin and destination, the author contends that the mass return of Indian expatriates from the Persian Gulf amid the COVID-19 pandemic and shifting labor market dynamics in the region have resulted in a substantial reduction in remittances. Consequently, this reduction has led to fractures in the bilateral relationship between the nations.

Chapters 5, 6, and 7 explore return migration and crises within the context of non-Western Europe. In Chap. 5, Vaidelytė et al. (2024) investigate whether various crises have reshaped migration patterns, specifically the movement between emigration and return, among high-skilled

professionals in Lithuania. The authors explained that while the pandemic itself may not have significantly influenced the decisions of high-skilled labor migrants to return, the conditions in both the origin and host countries since the pandemic—such as socio-economic cultural conditions, as well as individual's perceptions of the life—may serve as push or pull factors in the return and remigration decision of high-skilled migrants in Lithuania.

Chapter 6, by Yeo and Pysmenna (2024), examines the migratory processes of Ukrainians before and after the war resulting from the Russian invasion in February 2022. The authors explore whether the factors and antecedents driving Ukrainians' emigration, return, remigration, or resettlement differ before and after the war. Findings indicate that in the pre-war period, structural factors, especially economic and institutional disparities between Ukraine and the destination countries, were the primary drivers of Ukrainians' migratory process. However, after the war, individual factors, such as family connections and patriotism, became the major forces influencing the return intentions and decisions of Ukrainian refugees.

In Chap. 7, Künüroğlu and Yüzbaşı (2024) focus on the return migration of Turkish families from Western European countries and the impact of cascading crises on their returns and reintegration in Turkey. The authors investigate the push and pull factors affecting Turkish migrant families' decisions to return, their reintegration and readaptation processes amid public health and economic crises, and the role of family dynamics in the returnees' reintegration and re-acculturation processes. Through qualitative analysis of in-depth interviews, authors find that emotional reasons, such as preserving ethnic ties, feeling at home, and avoiding discrimination in Europe, played a significant role in convincing returnees to stay in Turkey, despite the challenges of hyperinflation and unemployment challenge they faced in Turkey.

In Chap. 8 Loustau-Williams and Zougaghi (2024) contend that the pandemic-induced border closures caused an immobility crisis in Morocco, **North Africa**. They, then, delve into how the immobility crisis reshaped the circulatory movement of migrants within Morocco. Throughout the chapter, the authors explore three forms of circulatory return migration: longer term return, seasonal return, and daily border-crossing. By analyzing government reports, statistics, and in-depth interviews, the authors discover that the mobility restrictions disrupted the migration circularity system. In particular, immobility had a significant impact on seasonal or
