This series focuses on new developments in the study of race, social justice and education. Promoting theoretically-rich works, contributions include empirical and conceptual studies that advance critical analysis whilst attempting to destabilise the institutionalised racist orthodoxy that has undermined the notion of education being a tool of social mobility. The series will consider social mobility as a form of equality narrowly defined whilst also critiquing the ideology of social mobility which essentially pits individuals against one another in a sink or swim competition, entirely ignoring the reality of deep and damaging structural inequalities. A central aim of the series will be to address important current policy issues, such as social mobility, widening participation etc., while also recognising that critical studies of race are also concerned with wider, fundamental transformations in education, knowledge and society, i.e. the dismantling of racist structures, concern with education's role in reproducing racial inequality.

FOREWORD

In the intricate tapestry of higher education, we are continuously called upon not only to impart knowledge but also to shape a learning environment through the facilitation of knowledge that mirrors the diversity of the world we inhabit. The journey of evaluating and enhancing higher education curricula through the prism of culturally sensitive curricula scales is a profound exploration, underscoring the educators' perennial commitment to educational justice, inclusivity, equity, and a holistic educational experience.

As we stand at the nexus of tradition and progress, the imperative to re-evaluate our curricula has never been more pressing given the turbulent societal context that we currently reside in. The complexities of our globalised society demand a paradigm shift in how we conceive and deliver education. This collection serves as a comprehensive guide for educators, administrators, and institutions committed to aligning their curricula with the cultural kaleidoscope of their student body.

In our eternal pursuit of academic and pedagogical excellence, there is a recognition that true education extends beyond the boundaries of textbooks, literature, and learning spaces. The call for cultural sensitivity arises from the understanding that diversity is not a mere adornment but a fundamental aspect of human experience. It is the recognition that each student brings a unique set of perspectives, experiences, and cultural contexts to the learning environment.

The commitment made to cultural sensitivity in this pedagogically inspiring collection is not just a response to the demands of the present; it is a pledge to shape the future. By fostering an inclusive curriculum, we equip learners at various stages of the learning continuum with the tools to navigate a globalised world, where cross-cultural understanding is not just an asset but a prerequisite for meaningful societal engagement.

The process of evaluating and enhancing higher education curricula necessitates a comprehensive approach that delves into the very foundations of our educational frameworks. It starts with the definition of culturally sensitive criteria, a roadmap that guides the assessment of each facet of any existing curriculum. Such criteria should reject rigid standards opting for instead, flexible guidelines that accommodate the dynamic and ever-changing nature of cultural diversity.

Stakeholder involvement is a cornerstone of this process. Engaging students, faculty, and community members ensures that the evaluation is not an abstract exercise but a collective endeavour. The insights, experiences, and perspectives enrich the dialogue, providing a nuanced understanding of the strengths and weaknesses of existing curriculums. To enhance our curricula, we must remain committed to first mapping out and interrogating the existing landscape. Curriculum mapping involves a meticulous review of courses, materials, and teaching methodologies to identify areas where cultural sensitivity may be lacking. It is a reflective exercise that challenges us to question assumptions, biases, and omissions within our educational content.

As we navigate this terrain, we must be prepared to make conscious decisions about the voices and narratives that are amplified within our curricula. For example, whose stories are being told, and whose are being left untold? What perspectives are dominating the discourse, and which ones are marginalised to the periphery? These questions provide a compass point for navigating and guiding our journey towards a more equitable educational experience.

This collection is more than a guide; it is a call to action. It advocates for the integration of culturally sensitive curricula scales as a transformative tool for shaping and re-modelling the educational landscape. This involves not only revising learning materials and assessment strategies but fundamentally reconsidering the ethos of our educational institutions.

Collectively, we must champion professional development opportunities for academic and professional stakeholders, equipping them with the

skills and perspectives necessary to navigate the nuances of cultural sensitivity. Creating inclusive learning environments requires a commitment to ongoing dialogue, community engagement, and the acknowledgement that cultural competence is a journey, not a destination. It is imperative that we are always cognisant of the transformative power of inclusive and culturally sensitive education. By embracing culturally sensitive curricula scales, we not only enrich the educational experience for our all stakeholders but also contribute to the broader societal shift towards empathy, understanding, and unity.

This collection serves as both a monument to pedagogical advancement in the academy and an inspiration for those truly committed to the art of learning and knowledge construction. Use this offering by Thomas and Quinlan to spark meaningful conversations, catalyse purposeful changes, and pave the way for a higher education landscape that truly reflects the diversity and vibrancy of the human experience.

Cambridge, England

Jason Arday

Jason Arday, Ph.D., FRSA is the 2002 Professorial Chair in the Sociology of Education at the University of Cambridge, Faculty of Education. Previously, he was Professor of Sociology of Education at the University of Glasgow in the School of Education, College of Social Sciences. He has also held the position of Associate Professor in Sociology at Durham University in the Department of Sociology and Deputy Executive Dean for People and Culture in the Faculty of Social Science and Health. He is a Visiting Professor at The Ohio State University in the Office of Diversity and Inclusion, University of Glasgow in the School of Education and an Honorary Professor at Durham University in the Department of Sociology. He is a Trustee of the Runnymede Trust, the UK's leading Race Equality Thinktank and the British Sociological Association (BSA). He sits on the Centre for Labour and Social Studies (CLASS) National Advisory Panel, the NHS Race and Health Observatory Academic Reference Group and the ITV Cultural Advisory Council. His research focuses on the areas of race and higher education, intersectionality and education, mental health and education, neurodiversity and cultural studies.

ACKNOWLEDGEMENTS

This book has been a collaborative effort. As editors, we are deeply grateful to everyone who has contributed to this work, whether through direct collaboration, insightful discussions, inspiring work on which we have built, or day-to-day support. Your contributions have been invaluable, and any omission of names does not reflect a lack of appreciation but rather the limitations of space.

We are indebted to the Network for Evaluating and Researching University Participation (NERUPI) and particularly its Chair, Annette Hayton, for organising and sponsoring the NERUPI CSCS Pilot Working Group. We are also grateful to the seven institutional members of the NERUPI Network who collaborated on the CSCS Pilot Working Group Study and to various colleagues at those institutions who approved or supported participation. This working group enabled us to refine our original CSCS tool and report and reflect on its practical application in this volume. Our work together in late 2021 and throughout 2022 underpins this book.

We are grateful to hundreds of students from across those member institutions who completed the revised CSCS survey. Without their contribution this volume would not have been possible. We offer our heartfelt thanks to the authors of this volume's chapters for their enthusiastic and thoughtful contributions on a tight timeline. We acknowledge the competing demands on their time and constraints of full workloads, which make their contributions even more precious. We also

appreciate Professor Reinhard Pekrun's invaluable expert advice on scale development and data analysis of the original CSCS.

We could not have thought of a better person to write the foreword for this volume than Dave's dear friend and colleague Professor Jason Arday. It was with him that Dave first shared his vision for this volume as a part of Jason's book series—Palgrave Studies in Race, Inequality, and Social Justice in Education. Dave wondered if Jason would have the interest or time to read what had been produced and think it worthy of publication. Without hesitation, Jason kindly asked to write the Foreword. Equally, Dr Omar Khan was the only choice to write the afterword. We thank Omar for carving out space and time in his busy schedule to read and reflect on our work and write the final words. We value his contribution greatly.

We also wish to thank the Palgrave Macmillan Editorial Team; specifically, Alice Green and Ashwini Elango. Your enthusiasm for this project and consistent support served as a source of inspiration throughout the process.

Dave writes: there are no words to say heartfelt thanks to my family for their patience and unconditional support in allowing me to pursue my interests and passions. Wife Shauna, son Malik and daughter Deja, only love can explain how you endured being a sounding board of embryonic thinking and tolerated my absence during the long office hours throughout the time of compilation, which at times felt like it took all my attention. Thanks for your understanding. Mom Merle, Andrea, Brian and Craig, you provided valuable inspiration. The strong impetus to undertake this task came from the triune god who enables all things in all circumstances, especially divine guidance in times of doubt and uncertainty.

Kathleen writes: Reinhard, thank you for your unfailing support, for space to write, and for always willingly offering seasoned advice. Julie Nathanielsz, thank you for being there, listening, and reminding me of what matters. Finally, thank you to my caring teachers, generous colleagues, and courageous students from and with whom I have learned about cultural sensitivity in education.

TYPOGRAPHICAL NOTE

The editors capitalise the terms ‘Black’ and ‘White’ when used in the volume to denote racial groups. We do this for two reasons. First, these groups are equal. Though some partisans choose to capitalise their own racialised group and lower-case others, we capitalise both groups to emphasise their equality. Second, races are social constructs that change names and shapes from time to time and place to place. ‘Black’ and ‘White’ are not descriptive adjectives; they are current names of (imagined) racial groups. We use scare-quotes (e.g. ‘race’) to indicate concepts that should not be read or used uncritically.

PRAISE FOR *CULTURALLY SENSITIVE CURRICULA SCALES*

“This is a vitally important text for all HE educators and managers. Too much of the HE literature describes inequalities in learning and teaching practices. Here are the tools and examples, to be used in any discipline, to create curricula that affirms and respects the cultures, identities, and contexts of every student body. Use it.”

—Pauline Kneale, *Society for Research into Higher Education, Chair, University of Plymouth, UK*

“Thomas and Quinlan ought to be congratulated for pulling this book together. This book is as important as it is timely, responding to the current wave of ‘hopefulness’ in UK higher education, and elsewhere, not previously seen, among educators and curriculum developers, for expert support and guidance to make curricula more reflective of learners. This book responds to ‘hopefulness’ and indeed provides ‘hope’ and direction through the Culturally Sensitive Curricula Scales which establishes a clear framework for practice. All ten chapters are rich - grounded in research and designed to advance practice. Many congratulations and well done.”

—Paul Miller, *Institute for Educational & Social Equity, UK*

“For the colonial westernized university, confronting racism with honesty and courage can only be the precise beginning for meaningful transformation and decolonisation. This book does exactly that. It asks us not

only to reckon with our shared complicity, but also provides curriculum tools towards diversity, belonging, equity and anti-racist education.”

—Elelwani Ramugondo, *University of Cape Town, South Africa*

“The CSCS offers a great starting point to create more culturally sensitive curricula. It invites teaching staff to start the conversation with students, listening to their perspectives. In addition, the scales can also be applied to a broader context of inclusive education. The examples presented throughout the chapters inspired me to start changing the curriculum in a more culturally sensitive way.”

—Mijke Hartendorp, *Saxion University of Applied Sciences, the Netherlands*

“Dave S.P. Thomas and Kathleen M. Quinlan set an intention and take readers on a journey to develop more equitable and culturally informed curricula. This book is a must-read for anyone committed to educational equality and creating inclusive learning environments.”

—Khalilah R. Johnson, *University of North Carolina at Chapel Hill, USA*

NOTES ON CONTRIBUTORS

Caroline Ball, SFHEA is an Academic Librarian at the University of Derby (UK). She is a Senior Fellow of the Higher Education Academy and was UK Wikipedian of the Year in 2020. She is a founder of the #ebookSOS campaign, trustee of Wikimedia UK and an independent expert for the Libraries and Archives Copyright Alliance. Her research interests focus on the responsible and equitable use and dissemination of information, and the democratisation of knowledge, connecting topics as diverse as Wikipedia, knowledge equity, libraries, decolonisation, information and data ethics, digital literacy and systemic bias.

Jo Birkett, Ph.D. is a Chartered Clinical Psychologist and Lecturer at the University of Westminster and is the Course Leader for the B.Sc. Psychology and Counselling course. Jo is a member of the Equality, Diversity, and Inclusion working group for Social Sciences and the Decolonising Psychology working group. Jo has clinical and research interests in trauma and community-based approaches to mental health, including using technology to increase access to support.

Fatmata K. Daramy is a Widening Participation Specialist who has contributed significantly to shaping institutional approaches to equity, diversity, and inclusion. She has been integral to the creation of inclusive and anti-racist curriculum design, and fostering a sense of belonging, at several universities. She played a pivotal role in creating and developing a

Black Asian and Minority Ethnic student Advocates Scheme, conceptualising a dynamic diversity and inclusion task force involving employers, and co-ordinating a large research project at the University of Law. She serves as the Co-chair lead of the NERUPI Student and Staff Race and Ethnic Equity working group. She actively shapes and implements the group's strategies and spearheads projects which create positive change in the sector. Currently a Doctoral Researcher at the University of Leicester, she is engaged in a research project exploring mental well-being for domicile Black, Asian, and minority ethnic students in Higher Education.

Morag Duffin, Ph.D. is Head of Access and Student Success at the University of Law. Morag is responsible for the University's work in supporting students from underrepresented backgrounds to access, succeed in and progress from Higher Education into employment. Morag is a qualified teacher with over 10 years' experience in Access and Participation work at a variety of educational institutions, spanning higher, secondary and primary education. Morag has participated in collaborative research with other higher education providers on developing inclusive curricula.

Annette Hayton convenes NERUPI (Network for Evaluating and Researching University Participation Interventions) which has over 70 members from higher and further education. She was previously Head of Widening Participation at the University of Bath and at Goldsmiths, University of London. She has many years of experience in managing activities designed to support successful progression to higher education as well as developing strategies to ensure that all students have a positive experience of university study. She is a member of ICHEM (International Centre for Higher Education Management) at the University of Bath and Innovative Practice Editor for the journal 'Widening Participation and Lifelong Learning'. Annette is a Trustee of Midsomer Norton Schools' Partnership and leads on the Bath Hub for MNSP. She is interested in how educational theory, research, and evaluation can be developed and applied in practice to promote positive change within the education system, aiming to combine theory and practice in her work. She has published a number of books and articles on widening participation.

Dr Deborah Husbands, Ph.D. is a Chartered Psychologist and Reader in Race and Sociocultural Psychology at the University of Westminster. She is the Course Leader for the B.A. in Global Challenges course,

Outreach Coordinator for the School of Social Sciences, Co-Chair for the BME Colleague Network, leads the Black History Year programme at the university and sits on several university committees as well as The Psychologist and Digest Editorial Committee for the British Psychological Society. She is also part of the Decolonising Psychology working group at the university. Her research interests are the impostor phenomenon, race, ethnicity and marginality.

Helen Kay, SFHEA is a Senior Lecturer in Academic Development and Inclusivity at Sheffield Hallam University. She has a breadth of experience in pedagogic development and educational change. Drawing on over thirty-five years of experience of teaching, curriculum development, course leadership, and institutional research her work supports academic and curriculum innovation and leadership. Her practice is research informed and underpinned by a wealth of experience in evaluating the implementation of educational practices and providing an understanding of how students engage with and experience teaching and learning. She has had a pivotal role in the development of equality and diversity and widening participation policy and strategy at Sheffield Hallam. She continues to lead on the development and implementation of inclusive teaching and learning policy and practice. She is a Senior Fellow of the Higher Education Academy (HEA).

Lucy Panesar, SFHEA is a Senior Fellow of the Higher Education Academy and since 2022, a Lecturer in Higher Education at the University of Kent, leading two modules on the Postgraduate Certificate in Higher Education. Between 2015 and 2022, Lucy was based at the University of the Arts London, working in partnership with students, staff and external organisations on decolonising arts education across university curricula and public platforms including Wikipedia.

Kathleen M. Quinlan, Ph.D., PFHEA is Professor of Higher Education and Director of the Centre for the Study of Higher Education at the University of Kent, UK. She has held leadership or academic roles at the University of Oxford, Cornell University, and the Australian National University. She has authored more than 50 peer-reviewed journal articles, 10 book chapters, and two books, including *How Higher Education Feels: Commentaries on Poems that Illuminate Emotion in Learning and Teaching (Sense, 2016)*. Her research is broadly in the areas of learning, teaching, assessment, and student engagement in higher education. She

specialises in research on students' holistic development, including the ways in which curriculum and instruction can support students' interest.

Ifrah Salih is a Senior Lecturer in Academic Development and Inclusivity at Sheffield Hallam University. Ifrah has a keen interest in race equity and is the founder of the Nursing and Midwifery Minoritised (NMM) group. Ifrah is currently undertaking a Doctorate to explore the transition experience of ethnically minoritised student nurses into university using Critical Race Theory as the theoretical framework. The passion, enthusiasm, and drive Ifrah has demonstrated through her own self-development in race equity has led her in winning the institutions Student Union Academic Staff of the Year Award, College Outstanding Student Support Award and more recently a finalist in the Student Nursing Times Award for Educator of the Year. Ifrah's work around race equity has led her to work with regional and national groups and is a member of the Council of Deans (Health) Anti-racism Advisory group where she advises the Council of Deans of Health's board and its staff team on anti-racism aspects of its policy work and organisational processes. Currently, Ifrah is leading initiatives to support the dismantling of the degree awarding gap at Sheffield Hallam University. These include the development of minoritised student groups in most department within the institution and has co-produced a suite of workshops titled 'Equity Accomplice' and now supports staff and external stakeholders in developing their awareness of race equity to enhance outcomes for ethnically minoritised students.

Yusra H. Siddiqui, FHEA is a Lecturer in Biomedical Science with international Science Communication experience. She is a Fellow of the Higher Education Academy, and has research interests centred around inclusive education in Biosciences.

Dave S. P. Thomas, Ph.D., SFHEA is an Associate Professor of Inclusive Curriculum and Academic Lead for Learning and Teaching at Solent University, Southampton, UK. He is also an occupational therapist (specialism in Occupational Science), social commentator, and philanthropist. He has authored more than 25 book chapters, over 15 peer-reviewed journal articles and four books, including *Diversity, Inclusion and Decolonisation: Practical tools for improving teaching, research and scholarship* (Bristol University Press, 2024) and *Doing Equity and Diversity for Success in Higher Education: Redressing structural inequalities in the academy*. His research is broadly concerned with exploring

the intersection between race, class, culture, and functional abilities. He specialises in researching, teaching and developing activities that promote educational justice, promote equality and occupational performance.

Ian J. Turner, Ph.D., PFHEA is a Professor of Learning and Teaching at the University of Derby (UK). He is a National Teaching Fellow and Principal Fellow of the Higher Education Academy; he was named Royal Society of Biology Higher Education Lecture of the Year in 2017. His research interests centre around game-based learning and playful pedagogies.

Claire Walsh, Ph.D., SFHEA is a Registered General Nurse and lecturer in healthcare education, with a specialist interest in interprofessional and simulation-based methods. Claire has worked on national projects to inform the interprofessional learning agenda in the UK context and supports the development of new education provision that addresses workforce transformation.
