To my colleagues and mentors, whose guidance and wisdom have shaped my approach to editing, thank you for your invaluable insights and support.

To my small and extended family and my friends, your unwavering encouragement and belief in me have guided me throughout this process.

And finally, to the readers who will embark on this literary adventure, may these pages ignite your imagination, provoke your thoughts, and touch your hearts.

With deepest gratitude, to my university, King Fahd University of Petroleum and Minerals (KFUPM), for creating a supportive academic environment in many ways of research, learning, and collaboration.

Ibrahim Yahia Yaagoob

About the Editors	<i>xix</i>
List of Contributors	<i>xxi</i>
Preface	<i>xxx</i>
Acknowledgments	<i>xxxiii</i>

1	Scales, Scaling, and Antiscalants: Fundamentals, Mechanisms, and Properties	1
	<i>Valentine Chikaodili Anadebe, Vitalis Ikenna Chukwuike, and Rakesh Chandra Barik</i>	
1.1	Introduction	1
1.2	Scales	2
1.2.1	Calcium Carbonate	3
1.2.2	Calcium Sulfate	3
1.2.3	Calcium Phosphate	4
1.3	Scaling	5
1.3.1	Initiation	5
1.3.2	Transport Phenomenon	5
1.3.3	Adsorption Process	6
1.3.4	Removal	6
1.3.5	Aging	6
1.3.6	Supersaturation	6
1.3.7	Nucleation	7
1.3.8	Contact or Induction Period	7
1.4	Antiscalant/Chemical Treatment	8
1.5	Antiscalant Mechanism	9
1.6	Antiscalant in Industrial Water-Circulating Systems	9
1.7	Antiscalants in Oilfield Environments	10
1.8	Overview of Some Plant-derived and Organic-based Antiscalants	12

1.9	Conclusion and Future Perspectives	14
	Acknowledgments	14
	References	14
2	Traditional and Eco-friendly Antiscalants: Advantages and Disadvantages	18
	<i>Miao-Qing Sheng, Wei-Wei Zhang, Hui-Jing Li, and Yan-Chao Wu</i>	
2.1	Introduction	18
2.2	Formation and Hazards of Scale	19
2.2.1	Scale Inhibition Measures	19
2.2.2	Classification of Scale Inhibitors	20
2.2.2.1	Natural Scale Inhibitors	20
2.2.2.2	Polymer Scale Inhibitors	20
2.2.2.3	Eco-friendly Scale Inhibitor	21
2.2.3	Scale Inhibition Mechanism	22
2.2.3.1	Complex Solubilization	22
2.2.3.2	Dispersion	22
2.2.3.3	Lattice Distortion	23
2.2.3.4	Dissolution Limit Effect	23
2.2.3.5	Strong Polar Group Action	23
2.2.3.6	Regenerative Self-extrication Membrane Hypothesis	23
2.3	Advantages and Disadvantages of Traditional Impedance Agents	24
2.3.1	Scale Inhibitor for Phosphorus-containing Polymers	24
2.3.2	Copolymer Scale Inhibitor	25
2.4	Advantages and Disadvantages of Environmentally Friendly Scale Inhibitors	25
2.4.1	PASP and PESA	26
2.4.2	Plant Extracts	29
2.4.3	Carbon Nanoparticle Scale Inhibitor	30
2.4.3.1	Carbon Nanoparticles	30
2.4.3.2	Carbon Nanotubes (CNTs)	30
2.4.3.3	Carbon Quantum Dots (CQDs)	31
2.5	Future Prospects and Challenges	32
	Acknowledgments	32
	Declaration of Competing Interest	33
	References	33
3	Electrochemistry Basics and Theory of Scaling in Various Electrolytes: Effect of pH and Other Parameters	36
	<i>Abhinay Thakur and Ashish Kumar</i>	
3.1	Introduction to Electrochemistry	36
3.2	Fundamentals of Electrochemistry	38

3.2.1	Electrochemical Processes: Chemical–Electrical Interplay	39
3.2.2	Electrode Potentials and Their Significance	39
3.2.3	Nernst Equation: Linking Potential and Concentration	40
3.2.4	Faraday’s Laws and Their Role in Quantitative Electrochemistry	41
3.2.5	Electrolysis Principles	42
3.3	Scaling Phenomena in Electrolytic Systems	43
3.3.1	Understanding Scaling and Its Multifaceted Effects	43
3.3.2	pH as a Key Driver of Scaling: Mechanisms and Implications	45
3.3.3	Temperature’s Role in Scaling: Thermal Dynamics and Consequences	49
3.3.4	Impact of Ionic Strength on Scaling and Electrochemical Behavior	53
3.4	pH’s Influence on Scaling and Electrochemical Processes	54
3.4.1	pH’s Influence on Electrode Kinetics and Reaction Rates	54
3.4.2	pH’s Influence on Reaction Rates	54
3.4.3	Proton Activity as a Determinant of Pace	55
3.4.4	The Nernst Equation: Linking pH and Electrode Potential	55
3.4.5	Ion Mobility Variations with pH and Their Electrochemical Consequences	55
3.4.6	pH-Dependent Deposition Dynamics: Growth, Morphology, and Effects	56
3.5	Temperature and Ionic Strength Effects on Scaling	57
3.5.1	Thermal Variability and Scaling Phenomena	57
3.5.2	Role of Ionic Strength in Modulating Scaling	58
3.6	Electrode Material and Its Influence on Scaling	59
3.6.1	Electrode Materials: Selection, Properties, and Impacts	59
3.6.2	Material-Induced Scaling Effects: Challenges and Solutions	59
3.7	Electrolyte Composition and Current Density: Scaling Implications	60
3.7.1	Electrode Materials: Selection, Properties, and Impacts	60
3.7.2	Material-Induced Scaling Effects: Challenges and Solutions	61
3.8	Integrative Understanding of Electrochemical Processes	62
3.8.1	Synthesizing Insights from pH, Temperature, and Key Parameters	62
3.8.2	Synergies and Interactions: A Holistic View of Scaling Phenomena	62
3.9	Conclusion and Future Prospects	63

About the Editors

Dr. Ibrahim Yahia Yaagoob is a postdoctoral fellow in the Department of Chemistry, King Fahd University of Petroleum and Minerals (KFUPM), Dhahran, Saudi Arabia. Dr. Yaagoob obtained his BSc and MSc Degrees from Sudan University of Science and Technology (SUST), KRT, Sudan. He earned a PhD for his thesis “Synthesis of a Novel Class of Ionic Polymers and Their Applications” in Both Scale and Corrosion Inhibitors from the Department of Chemistry, King Fahd University of Petroleum and Minerals (KFUPM), Dhahran, Saudi Arabia. He is a member of the American

Chemical Society (ACS). His research is directed at synthesizing and developing new smart organic and polymeric materials used for water treatment to mitigate organic pollutants and toxic metals and develop corrosion inhibitors. Dr. Yaagoob is the author of several research articles in international peer-reviewed journals such as ACS, Springer, Elsevier, RSC, and Wiley. Dr. Yaagoob has received international and national awards such as Graduate Scholarship for Distinguished Graduate Applicants (MSc and PhD). Also, the Sudan Institute for Natural Sciences (SIFNS-2006) awarded him the Ministry of Higher Education and Scientific Research Prize for Outstanding Students for his excellent academic performance in chemistry during all the terms.

Dr. Chandrabhan Verma works at the Department of Chemical Engineering, Khalifa University of Science and Technology, Abu Dhabi, United Arab Emirates. Dr. Verma obtained BSc and MSc degrees from Udai Pratap Autonomous College, Varanasi (UP), India. He received his PhD in Corrosion Science and Engineering from the Department of Chemistry, Indian Institute of Technology (Banaras Hindu University) Varanasi, under the supervision of Prof. Mumtaz A. Quraishi. He is a member of the American Chemical Society (ACS) and a lifetime member of the World

Research Council (WRC). He is a reviewer and Editorial Board member of various internationally recognized ACS, RSC, Elsevier, Wiley, and Springer platforms. Dr. Verma is serving as Editor-in-Chief in the journal of Sustainable Chemical Engineering. Dr. Verma published numerous research and review articles in different areas of science and engineering with international publishers such as ACS, Elsevier, RSC, Wiley, and Springer. His current research focuses on designing and developing industrially applicable corrosion inhibitors. Dr. Verma edited a few books for the ACS, Elsevier, RSC, Springer, and Wiley. Dr. Verma has received several awards for his academic achievements, including a gold medal in MSc (Organic Chemistry, 2010) and Best Publication awards from the Global Alumni Association of IIT-BHU (Second Prize, 2013).
