About the Editors *xix*

List of Contributors *xxiii*

Preface *xxix*

1 Management Challenges of Water Resources in Sikkim Mountain Regions 1

Anil K. Misra, Om P. Kaptan, Priyanka Kumari, Kriti Rai, Rakesh K. Ranjan, Nishchal Wanjari, and Subash Dhakal

- 1.1 Introduction 1
- 1.1.1 Sikkim State 2
- 1.1.2 Climate 2
- 1.1.2.1 Analysis of Precipitation Indices 3
- 1.1.3 Geology of Sikkim 4
- 1.2 Water Resources in Sikkim 6
- 1.2.1 Water Security Issue 8
- 1.2.2 Management Initiatives 13
- 1.3 Management Challenges 14
- 1.4 Future Adaptation Strategies and Options 16
- References 17

2 Basin-Scale Estimation of Runoff Components Using the SPHY Model: A Case Study of the Koshi River Basin, Central Himalaya 21

Kiran Bishwakarma, Fan Zhang, Jharana Nepal, Guanxing Wang, Yuxuan Xiang, Ramesh R. Pant, and Narayan P. Khanal

- 2.1 Introduction 21
- 2.2 Materials and Methods 23
- 2.2.1 Study Area 23
- 2.2.2 Model Description 24
- 2.2.2.1 Rainfall Runoff 25
- 2.2.2.2 Snow Processes 26
- 2.2.2.3 Glacier Processes 26
- 2.2.2.4 Base Flow Processes 27
- 2.2.2.5 Water Balance 28
- 2.2.3 Mann–Kendall Test 28
- 2.3 Results 29
- 2.3.1 Model Setup and Sensitivity Analysis 29

2.3.2	Water Balance of the Koshi River	29
2.3.3	Total Runoff and Runoff Components	32
2.3.4	Subbasin Variations of the Runoff Component	32
2.4	Discussion	36
2.5	Conclusion	38
	Acknowledgments	38
	References	39

3 Assessment and Prediction of Water Yield in the Chandra Basin, Western Himalaya, India: Using Physical Basis SWAT Model and Machine Learning 43

Sobhana Mummaneni, Vinay K. Gaddam, Gnana S.S.V. Mendu, Nihitha Vemulapalli, Smitha C. Ch, and Sayyad Fazal Rahman Khadri

3.1	Introduction	43
3.2	Study Area	47
3.3	Methodology	49
3.3.1	SWAT Model	49
3.3.1.1	Land Use/Land Cover	51
3.3.1.2	Soil Database	52
3.3.1.3	Weather Datasets	52
3.3.1.4	SWAT Simulation	53
3.3.2	Evaluation of Runoff in the Near Future	54
3.3.2.1	SWAT-Lasso Regression Method	54
3.3.2.2	SWAT-Ridge Regression Method	55
3.3.2.3	SWAT-Elastic-Net Regression Method	55
3.3.3	Performance Metrics	56
3.3.4	Results and Observations	57
3.4	Conclusion(s)	59
	Acknowledgments	60
	Ethical Approval and Responsibilities of Authors	60
	Consent to Participate	60
	Consent to Publish	60
	Funding	60
	Competing Interests	60
	Author(s) Contributions	61
	Availability of Data and Materials	61
	References	61

4 Assessment of Suspended Sediment Properties and Particle Load for Optimal Operation of Hydropower Plants in the Himalayan Region 65

Naman Arora, Arun Kumar, and Sunil K. Singal

4.1	Introduction	65
4.2	Hydropower in India	66
4.3	Challenges of Hydropower Development in the Himalayas	66
4.4	Impact of Sediment on HPP	67

4.5	Alaknanda River Basin	68
4.6	Sutlej River Basin	69
4.7	Suspended Sediment Properties	71
4.7.1	SSC	71
4.7.2	PSD	71
4.7.3	Shape	72
4.7.4	Mineralogy	72
4.7.5	International Standard IEC 62364 (2019)	73
4.8	Conclusion	76
	References	76

5 Hydrochemistry and Quality Assessment of High-Altitudinal Kareri Lake, Northwest Himalaya, Himachal Pradesh, India 85

Pawan Kumar, Ambrish K. Mahajan, Deepak Kumar, and Anil Kumar

5.1	Introduction	85
5.2	Information of the Study Site	87
5.3	Methodology	88
5.4	Results and Discussion	89
5.5	Hydrochemistry of the Lake	89
5.6	Qualitative Characteristics of Lake	92
5.7	Pearson Correlation Coefficient	92
5.8	Comparison of Different Parameters of Kareri with Other Himalayan Lakes	93
5.9	Conclusion	93
	References	96

6 Water Quality Assessment of Lakes in Mountain Region with Spatial Reference to Amarkantak, Madhya Pradesh, India 99

Piyali Sabui, Shakshee Soni, Ayushii Yadav, and Pallavi Das

6.1	Introduction	99
6.1.1	Sources of Pollution in Mountain Lakes	100
6.1.1.1	Geological Processes	101
6.1.1.2	Vegetation Decay	101
6.1.1.3	Wildlife Activities	101
6.1.1.4	Wildfires	101
6.1.1.5	Natural Erosion	102
6.2	Study Area and Site Description	102
6.2.1	Materials and Methods	102
6.2.2	Water Quality Index (WQI)	103
6.3	Results and Discussion	104
6.3.1	Water Quality Index (WQI)	106
6.4	Conclusion	108
	Acknowledgement	109
	References	109

7 Hydrogeochemical Evaluation of Groundwater Quality in Leh Town, Trans-Himalaya, India Using Entropy Water Quality Index 113

Lobzang Chorol and Sunil K. Gupta

- 7.1 Introduction 113
- 7.2 Materials and Methods 115
 - 7.2.1 Study Area Profile 115
 - 7.2.2 Sampling and Analytical Methods 115
 - 7.2.3 Entropy Water Quality Index 117
 - 7.2.4 Evaluation Groundwater Quality for Irrigation 118
 - 7.2.5 Statistical Analysis 118
 - 7.2.6 Evaluation of Deterministic Potential Risks to Human Health 120
- 7.3 Results and Discussions 121
 - 7.3.1 Assessing the Suitability of Groundwater for Drinking 121
 - 7.3.2 Entropy Water Quality Index modelling 123
 - 7.3.3 Potability of Groundwater for Irrigation 123
 - 7.3.4 Classification of Water 124
 - 7.3.4.1 Hydrochemical Facies 124
 - 7.3.4.2 Mechanism Controlling the Hydrochemistry 124
- 7.3.5 Statistical Analysis 126
 - 7.3.5.1 Pearson Correlation 126
 - 7.3.5.2 Principal Component Analysis 126
- 7.3.6 Deterministic Health Risk 128
- 7.4 Conclusions 129
- Acknowledgment 129
- References 130

8 Revival of Drying Springs in Mountainous Regions of the Himalayas – Inferences from an Isotope Hydrochemical Study 135

Tirumalesh Keesari, Diksha Pant, Hemant Mohokar, and Vinod Khatti

- 8.1 Introduction 135
- 8.2 Study Area 136
 - 8.2.1 General Geology 136
- 8.3 Rainfall and Climate 137
 - 8.3.1 Isala 137
 - 8.3.2 Kakodakhal 139
- 8.4 Sampling and Analytical Techniques 139
- 8.5 Chemical Species 140
- 8.6 Stable Isotopes ($\delta^2\text{H}$, and $\delta^{18}\text{O}$) 140
- 8.7 Radioactive Isotope (^3H) 141
- 8.8 Results and Discussion 141
- 8.9 Discharge Rate Analysis 141
 - 8.9.1 Isala 141
 - 8.9.2 Kakodakhal 145
- 8.10 Hydrochemistry 146
 - 8.10.1 Isala 146

8.10.2	Kakodakhal	147
8.11	Environmental Isotopes	147
8.11.1	Isala	147
8.11.2	Kakodakhal	150
8.12	Isotopic Inferences and Recommendations	152
8.13	Impact of Artificial Recharge Measures	154
8.14	Conclusions	154
	Acknowledgment	158
	References	158
9	Biogeochemical Characterization of Water Resources in the Indian Himalayan Regions	161
	<i>Sayantan Das, Aman Verma, Saurabh K. Sharma, and Nidhi Verma</i>	
9.1	Introduction	161
9.2	Factors Impacting Water Resources	162
9.2.1	Biological Factors	162
9.2.2	Chemical Factors	163
9.2.3	Geological Factors	164
9.3	Monitoring, Assessment, Management, and Treatment	165
9.3.1	Monitoring and Assessment	165
9.3.2	Management and Treatment	165
9.4	Case Studies	168
9.4.1	Evaluation of the Biotic and Abiotic Condition of the Alaknanda River in Uttarakhand (Biological)	168
9.4.2	Pollution of Heavy Metals at Kameng River in Arunachal Pradesh (Chemical)	169
9.4.3	Ritualistic Practices and Pollution of the Tawi River in Jammu District (Geological)	170
9.4.4	Water Conservation and Management Practices in the Duga Region in Sikkim (Management)	171
9.5	Conclusion	172
9.6	Future Directions	172
	References	173
10	Mountainous Water Resources: Understanding Microbial Dynamics, Ecological Resilience, and Sustainable Management Strategies amidst Climatic Challenges	181
	<i>Deepansha Raina, Devansh Kumar, Ashita S. Khata, Mohit Marwah, Sunila Hooda, and Shalini Swami</i>	
10.1	Introduction	181
10.1.1	Exposition of Mountainous Water Resources	181
10.1.2	Imperative of Microbial Dynamics in Environmental Ecosystem	182
10.1.3	A Brief Account of Challenges Climate Change Poses to Mountainous Water Coffers	182
10.2	Microbial Dynamics and Mountainous Water Resources	182

10.2.1	Inquisition of the Significance of Microbial Ecosystems in Mountainous Water Systems	182
10.2.2	Interaction Between Microbial Communities and Climatic Variables	183
10.2.3	Essence of Microbial Retorts for Ecological Stability in Mountainous Regions	183
10.3	Climatic Challenges and Extreme Climatic Affairs	184
10.3.1	Situations Leading to Changes in Ecosystem and Microbial Group Dynamics	184
10.3.1.1	Temperature Fluctuations	184
10.3.1.2	UV Radiation Exposure	184
10.3.1.3	Oxygen Levels	184
10.3.1.4	Extreme Weather Events	185
10.3.1.5	Nutrient Limitation	185
10.3.1.6	Seasonal Changes	185
10.3.2	Investigation of Climatic Challenges Encountered by Water Resources in Mountainous Regions	185
10.3.3	Influence of Extreme Weather Occurrences, Including Precipitation and Heat Waves, on Microbial Communities	186
10.3.4	Interaction Between Microbial Dynamics, Climate-Related Issues, and Ecosystem Health	186
10.3.4.1	Microbial Dynamics	187
10.3.4.2	Climate-Related Issues	187
10.3.4.3	Interaction	187
10.4	Mountainous Ecological Resilience	187
10.4.1	Exploring the Notion of Ecological Resilience in Mountain Regions	187
10.4.1.1	Sensitivity to Environmental Changes	187
10.4.1.2	Biodiversity as a Resilience Indicator	187
10.4.1.3	Altitude Gradients and Microclimates	187
10.4.1.4	Soil Stability and Water Dynamics	188
10.4.1.5	Interconnectedness of Ecosystem Components	188
10.4.2	Contribution of Microbial Dynamics to Ecological Resilience	188
10.4.3	Case Studies Exhibiting Thriving Ecological Resilience in Mountains	188
10.4.3.1	The Bhutanese Himalayas	188
10.4.3.2	The Swiss Alps	188
10.5	Strategies for Sustainable Management	188
10.5.1	Significance of Sustainable Management Tactics to Safeguard Water Resources in the Mountains	188
10.5.1.1	Ecosystem Health and Biodiversity Preservation	189
10.5.1.2	Downstream Water Supply	190
10.5.1.3	Climate Regulation and Adaptation	190
10.5.1.4	Prevention of Soil Erosion	190
10.5.1.5	Hydroelectric Power Generation	190
10.5.1.6	Balancing Water Use for Agriculture	190
10.5.1.7	Promotion of Transboundary Water Cooperation	190
10.5.2	Discussion on Contemporary Challenges and Voids in Sustainable Management for Mountains	190

10.5.3	Investigating Efficacious Strategies and Approaches for the Sustainable Management of Water Resources in Mountainous Regions	191
10.5.3.1	Watershed Management Programs	191
10.5.3.2	Afforestation and Reforestation	191
10.5.3.3	Sustainable Agricultural Practices	191
10.5.3.4	Community-Based Water Management	191
10.5.3.5	Smart Technologies for Monitoring	192
10.5.3.6	Indigenous Water Governance	192
10.6	Vulnerability and Adaptability	192
10.6.1	Investigation of Mountainous Water Resources' Vulnerability to Climatic Challenges	192
10.6.1.1	Melting of Glaciers and Snowpacks	192
10.6.1.2	Altered Precipitation Patterns	192
10.6.1.3	Increased Evaporation Rates	192
10.6.1.4	Changing Ecosystems	192
10.6.2	Analysis of Strategies for Adaptation Employed by the Ecological System in Mountains	193
10.6.2.1	Elevation Migration	193
10.6.2.2	Phenotypic Plasticity	193
10.6.2.3	Microclimate Exploitation	193
10.6.2.4	Conservation of Genetic Diversity	193
10.6.2.5	Adaptive Management Practices in Agriculture and Forestry	193
10.6.2.6	Climate-Resilient Infrastructure	193
10.6.3	Comprehending the Vulnerability for Acquiring Effective Adaptation Strategies	193
10.7	Case Reports and Best Practices	195
10.7.1	Case Studies Exhibiting Mountainous Region's Ecological Resilience, Microbial Dynamic, and Sustainable Management	195
10.7.1.1	The Rocky Mountains—Microbial Dynamics in Alpine Soils	195
10.7.1.2	The Andes – Water Management and Sustainable Practices	195
10.7.1.3	The Tibetan Plateau – Grazing Practices and Ecosystem Health	195
10.7.2	Insight from Successful Initiatives and Identification of the Most Promising Approaches	196
10.7.3	Application-Based Findings for a Global and Diverse Form of Mountain Ecosystems	196
10.7.3.1	Enhanced Ecosystem Services through Biodiversity Conservation	196
10.7.3.2	Sustainable Agricultural Practices	197
10.7.3.3	Community-based Natural Resource Management (CBNRM)	197
10.7.3.4	Innovative Water Management Solutions	197
10.8	Potential for Research and Future Routes	197
10.8.1	Understanding Lacunae of Ecological Resilience, Microbial Dynamics in Water Resources of Mountains	197
10.8.2	Exploration of Potential Research Opportunities and Avenues	198
10.8.3	Significance of Ongoing Research in Managing Future Strategies	198
10.9	Conclusion	198

About the Editors

(1) Dr. Virendra Bahadur Singh

Dr. Virendra Bahadur Singh is presently working as an Assistant Professor in the Department of Environmental Studies, Ram Lal Anand College, University of Delhi, New Delhi, India. He has also worked as a Dr. D. S. Kothari Postdoctoral Fellow (DSKPDF) in the Department of Geology, University of Delhi, Delhi, India. He has worked in the Department of Civil Engineering, Indian Institute of Technology Delhi, New Delhi, India as National Postdoctoral Fellow (NPDF). He has obtained his doctoral degree from the School of Environmental Sciences, Jawaharlal Nehru University, New Delhi, India. He has also received a very prestigious Commonwealth Split-site Scholarship tenable at the University of Bristol, United Kingdom, awarded by the Commonwealth Scholarship Commission, UK. He has also participated as a Scientist in the Indian Arctic Expedition, fifth batch at the Indian Scientific Station “Himadri,” Ny-Ålesund, Norway.

Dr. Singh's research work mainly focuses on glaciology, hydrology, hydro-meteorological correlation, meteorology, suspended sediment transport, hydrogeochemistry, water stable isotopes, mass balance, glacier retreat, biogeochemistry, water pollution, and climate change. He has worked in the fields of glaciology, hydrology, hydrogeochemistry, and water resources in the mountainous environment for the past 15 years. He has published 36 research papers in various peer-reviewed national and international journals. He has also edited three books published by international publishers such as Wiley and Elsevier. He has reviewed many research papers published by various high-impact international journals such as *Nature Communications*; *Journal of Hydrology*; *Science of the Total Environment*; *Hydrological Processes*; *CATENA*; *Environment, Development and Sustainability*; *Applied Geochemistry*; *Polar Science*; *Groundwater for Sustainable Development*; *Environmental Processes*; and *Sustainable Water Resources Management*.

(2) Dr. Sughosh Madhav

Dr. Sughosh Madhav is presently a Dr. D. S. Kothari Postdoctoral Fellow (DSKPDF) in the Department of Civil Engineering, Jamia Millia Islamia, New Delhi, India. He has obtained his master's degree from the Department of Environmental Science, Banaras Hindu University, Varanasi, India. He earned his doctorate from the School of Environmental Sciences, Jawaharlal Nehru University, New Delhi, India.

Dr. Madhav's research work mainly focuses on hydro-geochemistry, water resources, water pollution, river water, wetland, water quality, climate change, disaster management, chemical weathering, biogeochemistry, wastewater treatment, bioremediation, trace elements contamination, urban water crisis, and soil contamination. He has published 25 research papers in various national and international journals. He has also edited 12 books published by various international publishers, such as Wiley, Springer, and Elsevier, on different environmental issues.

(3) Professor Rakesh Kumar Gupta

Professor Rakesh Kumar Gupta is the Principal of Ram Lal Anand College, University of Delhi, New Delhi, India, and a Professor in the Department of Microbiology, Ram Lal Anand College, University of Delhi, New Delhi, India. He obtained his Ph.D from the National Dairy Research Institute (ICAR), Karnal, Haryana, India. He has also worked as a Postdoctoral Research Fellow at the Center for Environmental Biotechnology and the Department of Microbiology, University of Tennessee, Knoxville, TN, USA.

His research work mainly focuses on applied microbiology, water quality management, molecular biology, detection of heavy metal ions, environmental metagenomics, etc. Professor Gupta has two US Patents and two International Patent Publications. He has developed a whole cell biosensor for real-time detection of estrogen in natural water bodies. He has received various national and international prestigious fellowships such as the United Nations Development Program (UNDP) Fellowship and the National Dairy Research Institute Fellowship. Professor Gupta has associations with various professional bodies such as the Association of Microbiologists of India and the Biotechnology Research Society of India. He has published more than 50 research publications in various national and international journals and has also published eight books and book chapters.

(4) Professor Prerna Diwan

Professor Prerna Diwan is a Professor in the Department of Microbiology, Ram Lal Anand College, University of Delhi, New Delhi, India. She has obtained her Ph.D from the Department of Microbiology, University of Delhi, New Delhi, India. She has postdoctoral research experience at the Korea Research Institute of Bioscience and Biotechnology, South Korea, and the Department of Biochemistry, University of Alberta, Canada.

Professor Diwan's research focuses on water and air metagenomics, AMR, bioremediation of heavy metals, and oral microbiome studies in the field of microbiology.

She has published more than 20 research papers in various high-impact national and international journals and has also published eight book chapters.

(5) Dr. Amit Kumar

Dr. Amit Kumar is a Scientist at the Wadia Institute of Himalayan Geology (WIHG), Dehradun, Uttarakhand, India, specializing in glaciology and hydrology of the Himalaya-Karakoram region. He holds a PhD in Geology from Panjab University, Chandigarh, India, and a Master's from Banaras Hindu University, Varanasi, India.

Since joining WIHG's Centre for Glaciology in 2009, he has led multiple projects sponsored by the Department of Science and Technology (DST), Government of India, on glacier monitoring and associated hazards. With over a decade of fieldwork and research, Dr. Kumar has

advanced techniques in glacier monitoring and glacier hydrology, earning accolades like the Young Scientist Award from the Department of Science and Technology (DST), Government of India, in 2014. His research focuses on water resource management and mitigating glacier and climate-driven hazards, particularly flash floods, contributing to numerous peer-reviewed publications. His ongoing efforts aim to establish integrated multi-hazard early warning systems for vulnerable regions in the Himalayas.
