Preface I

This report is partial results of the “China Quarterly Macroeconomic Model (CQMM)”, a project of the Center for Macroeconomic Research (CMR), Xiamen University. The CMR is one of the Key Research Institutes of Humanities and Social Sciences of the Ministry of Education of China. The research is supported by the fund of Key Research Institutes of Humanities and Social Sciences of the Ministry of Education (10JJD790001), the National Social Science Foundation of China (08&ZD034), and the National Natural Science Foundation of China (71073130).

Since the launch of CQMM 7 years ago, 13 forecast reports with policy simulations and 6 essay collection books on China’s macroeconomic analysis have been published. This is the 14th forecast report, and it is a summary of forecast results released on the “China Macroeconomic Advanced Forum, CQMM (Spring) Press Conference for Economic Projections for 2013–2014 and a Book Launch of ‘China Macroeconomic Outlook’”, which was jointly organized by the Center for Macroeconomic Research, Xiamen University, and the Economic Information Daily, Xinhua News Agency, on February 23, 2013 in Beijing. Since the fall of 2012, Springer began to publish this economic report series in the English version “China Macroeconomic Outlook” twice a year.

We are grateful to all the speakers for their valuable comments at the press conference, and we revised the report based on their comments. We also appreciated strong supports from Economic Information Daily, Xinhua News Agency. We thank the media for reporting the conference. Of course, we are fully responsible for all possible mistakes.
