EDITED BY
JO ANN ASHER THOMPSON AND NANCY H. BLOSSOM

THE HANDBOOK OF INTERIOR DESIGN

WILEY Blackwell

Table of Contents

- Title page
- Copyright page
- Notes on Contributors
- Preface
- Introduction: The Shaping of Interior Design
  - References
- Section I: Explorations of the History Of Interior Design
  - 1: An Overview of Phenomenology for the Design Disciplines
    - Introduction
    - Phenomenology: A Brief History
    - A Map of Phenomenology for the Design Disciplines
    - Conclusion: Connections between Phenomenology and Current Trends in Design
    - Acknowledgments
    - Notes
    - References
  - 2: Dorothy Draper and the American Housewife: A Study of Class Values and Success
    - Introduction
    - Literature Review
    - Theoretical Framework
    - Draper and the Middle Class
    - Conclusion
    - Notes

References
3: The Political Interior
Politicized Roots
Interiors at the Grass Roots
Significant Constituencies
References
4: Taylorizing the Modern Interior: Counter-Origins
Introduction
Scientific (Office) Management
Counter-Origins
“Negotiations with Modern Life”
Acknowledgments
Notes
References
5: Bringing the Past In: Narrative Inquiry and the Preservation of Historic Interiors
Introduction
Narrative Research: Why Do Stories Matter?
This Inquiry's Methodological Approach
Critical Juncture: Hull House Preservation
Conclusion
Notes
References
Section II: Perspectives on the Practice of Interior Design
6: Aesthetic Coding in Interior Design
Theoretical Outline: Ambience and Understanding
Aspects of Interior Design
Conclusion

Note
References
7: Toward a Creative Ecology of Workplace Design
Introduction
The Evolving Workplace
Adaptability: The Push and Pull of the Creative Individual
Diversity: Maximizing the Interpersonal Side of Creativity
Interrelated: Framing Creativity from an Ecological Perspective
Lessons for a Creative Ecology
References
8: Designing Emotional Connection into the Workplace: A Story of Authentic Leadership
Introduction
Emotion, Meaning, and Motivation at Work
The Emotional Organization: Linking Emotion and Values to Positive Engagement
Artifacts, Aesthetics, and Symbolism: Linking Workplace Design to Emotions and Meaning-Making
Authentic Leadership: Linking Individual Values to Organizational Values
Methodology
Discussion
Conclusion: Beyond Aesthetics and Artifacts to Authenticity and Meaning-Making
Acknowledgments
Note

References
9: Exploring the Schism: Toward an Empathetic Language
Introduction
Theoretical Overview
Meaning in the Built Environment
Society's Edge
Perception and Culture
Methodology
Tools and Techniques of Data Collection
Cognitive Map Analysis
Symbolic Element Analysis
Emergent Themes: Identification and Discussion
Discussion
Bridging the Schism
Future Research and Limitations of the Study
References
10: Ways of Knowing in Design: A Position on the Culture of Interior Design Practice
Introduction
Ways of Knowing: Empiricism or Intuition?
Shifting Practices: Little Reflection
Research Framework
Findings
Implications
Conclusion
Note
References
11: Sustainable Life-Span Design: A New Model

Background
Introduction
Models of Contexts
Values Model: Modal Patterns for the Treatment of the Aged
Person–Environment Interaction Models
Findings/Discussion
Conclusion
Acknowledgments
Notes
References
12: Frameworks for Decision-Making in Design for the Aging
Introduction
A Framework for the Acquisition and Generation of Knowledge in the Conceptual Phase of Design Problem-Solving
Linking Methods and Knowledge within Cognitive Strategies
A Discussion of the Conceptual Phase of Designing for Maturing Populations
The Knowledge Domain of Abilities in Maturing Populations
The Knowledge Domain of the Built Environment: Physical and Social Environments
The Prioritization of Requirements
The Application of Priority-Setting Techniques in Research
Conclusion
References

13: Designing More Successful Social Spaces: Lessons Learned from a Continuing Care Retirement Community Study
- Introduction
- Designing and Building to Suit People throughout Life
- The Importance of Social Interaction at Any Age
- The Challenge of Affordable Social Space Square Footage
- Why Interaction with Friends Is Particularly Valuable
- The Role of Place in Social Relationships
- Types of Engagement that Occur in Retirement Community Social Spaces
- Defining Social Space Success
- The Social Lives of Retirement Community Residents
- How Well Spaces are “Liked” and “Used”
- Case Study: Oakwood Village Retirement Community
- Discussion and Lessons Learned
- Practice Implications from This Study
- Conclusion
- References

14: Developing a Person-Centric Design Philosophy
- Introduction
- Developing a Person-Centric Philosophy
- Framing the Question: The Needs of the Disadvantaged

A Case for the Intentional Person-Centric Philosophical Framework
The Personal Nature of a Person-Centric Framework
What is Humanistic Psychology?
The Person-Centric Framework: Two Examples of Its Application in Design Research
Conclusions and Recommendations
References
15: In Support of Contemporary Identity: The Modern Palestinian Home
Introduction
The Cultural Context
The Historical Context
Home and Identity
Revisiting the Palestinian Home
Towards the Future: A Model for a Contemporary Palestinian Home
Conclusion
References
16: Creativity in Interior Design: Cross-Cultural Practitioners' Reviews of Entry-Level Portfolios
Global Attention to Creativity
Creativity in Design
Problem Statement
Relevant Studies on Creative Design Products
Introduction to the Study
Methodology
Research Findings
Interpretation of Results

Conclusions
References
17: Human Responses to Water Elements in Interior Environments: A Culture and Gender Comparison
Background and Contextual Information
Overview of the Relationship between Water and Humans
Gender Considerations
Culture Considerations
Methodology
Sample
Findings and Analysis
Conclusions
Implications for Future Study
References
18: Concerns with Daylight and Health Outcomes
Introduction
Why Daylight?
Daylight and Visual Performance
Daylight and View
The Human Circadian System, Seasonal Affective Disorder (SAD), and Mood
Daylight and Biological Functions
Daylight and Performance
Conclusions
References
19: Healthy Interiors for the Visually Impaired
Introduction
Understanding the Problem

Understanding the Condition
Understanding the Client
Understanding the Environment
The Environment
Understanding Environmental Design
Discussion
Key Terms
References
20: Interior People Places: The Impact of the Built Environment on the Third Place Experience
Introduction
Overview
Literature Review
Research Overview
The Studies
References
21: Places in the Virtual and Physical Continuum: Examining the Impact of Virtual Behaviors on Place Attributes of Wireless Coffee Shops
Introduction
Virtuality and Physicality
Critique of Physical Rootedness
The Virtual–Physical Continuum
Emerging Place-Types in the Virtual–Physical Continuum
Place Attributes and Their Measurement
Methodology
Analysis and Findings
Conclusion

Notes
Acknowledgments
References
22: The Relationship between Historic Preservation and Sustainability in Interior Design
Introduction
The Palimpsest Approach
The Intersection of Sustainability and Historic Preservation Work for the Interior: A New Framework
Action Outline for a New Palimpsest Framework
Sustainability: What Historic Buildings Can Teach Us
Learning from History: Net Zero Housing
Conclusion
References
23: Forging Empathetic Connections to Create Compatible Designs in Historic Buildings
Introduction
New Designers in Old Buildings
Compatibility
Sense of Connectedness
Compatibility through Connectedness Framework: Unifying the Literature
Key Terms
References
Section III: Considerations of Education in Interior Design
24: The Phenomenological Contribution to Interior Design Education and Research: Place,

Environmental Embodiment, and Architectural Sustenance
- Origins of Phenomenology
- Phenomenological Assumptions
- A Phenomenology of Place
- A Phenomenology of Environmental Embodiment
- Architectural Sustenance
- Shaping Worlds
- Notes
- References

25: Testing a Culture-Based Design Pedagogy: A Case Study
- Introduction
- A Cultural Framework of Five Constructs
- Abstract Construct 1: Social Dynamics
- Abstract Construct 2: Juxtaposition of Traditional and Contemporary Culture
- Concrete Construct 1: Visual and Performance Arts
- Concrete Construct 2: Elements and Principles of Design
- Concrete Construct 3: Sustainability
- Case Study 1: Nigerian and South African Design Project
- Case Study 2: Native American Community College Library Project
- Conclusion
- References

26: Connecting the Scholarship of Teaching and Learning to the Discipline of Interior Design

Introduction
A Perspective on Interior Design Pedagogy
A Common Ground: Scholarship of Teaching and Learning
Two Courses, Two Pedagogical Pathways
Case Study 1: Interior Design Studio
Case Study 2: Portfolio Design Class
Relationship to Interior Design Pedagogy and Profession
Final Words
Acknowledgements
Note
References
27: Engaging Voices within a Dynamic Problem-Based Learning Context
Introduction
Rehabilitation Living Lab: Creating Inclusive Environments for Persons with Disabilities
Understanding Voice
The Research Approach
The Phenomenological Walkabouts in the Living Lab
The Social Construction of Space and Subsequent Experiences
Problem-Based and Project-Based Learning in Design
The Design Project
Discussion of the Pedagogy
Discussion
Conclusion

Notes
References
28: Aesthetic Theory and Interior Design Pedagogy
Introduction
Background
Aesthetic Theory and the Design Disciplines
Shifting Norms of Aesthetic Judgment
A Research Study on the Pedagogy of Aesthetics in the Design Studio
The Nature of Aesthetics: Subjective vs. Objective and Visual vs. Experiential
Aesthetic Education in the Design Studio: A Place Open to New Aesthetics
Lessons: Implications for Design Educators
Last Words

Notes on Contributors

Abimbola O. Asojo, PhD, Associate Professor of Interior Design, University of Minnesota, studied in the US, the UK, and Nigeria. Her research includes cross-cultural design issues, African architecture, computing and design, lighting design, and global design issues. She has published in *the Journal of Interior Design*, *Traditional Dwellings and Settlements Review*, *Designing for the 21st Century* journal, and the *Journal of Design Communication.*

Janice Barnes, PhD, is the Global Discipline Leader, Principal, Planning+Strategies for the design firm Perkins+Will. With nearly twenty-five years of experience in design practice and research, the focus of Janice's work is on work practices. By bringing practical experience together with empirical research, Janice recognizes the critical aspects of business processes and links these to appropriate organizational responses.

Mary Anne Beecher, PhD, heads the Department of Design at the Ohio State University. She holds a doctoral degree in American studies (with an emphasis in material culture studies) from the University of Iowa, and interior design degrees from Iowa State University. Her research explores the evolution of interior space in the 20th century through the influence of design and culture. She has taught in the United States and Canada.

Nichole M. Campbell, PhD, is an Assistant Professor in Department of Interior Design at the University of Florida. She holds degrees from the University of Wisconsin-Madison, Illinois State University, and DePauw University. Her teaching foci are environment and behavior theory and interior design studio. Current research interests are on

the design and construction of buildings that optimize health and wellness, with a particular emphasis on elderly inhabitants and supportive social interaction through the built environment.

Ji Young Cho, PhD, Leed-AP, is an Assistant Professor at the Interior Design Program in the College of Architecture and Environmental Design, Kent State University. She received her PhD in architectural studies from the University of Missouri, Columbia, and Bachelor's and Master's degrees in architecture from the Pusan National University in South Korea. Her research interests include pedagogy of design education, design cognition and process, and environment–behavior relations. As a designer for 10 years, she has completed more than 50 projects in South Korea. In 2008 one of her projects received first place in the Interior Design Educators Council Creative Scholarship category.

Stephanie A. Clemons, PhD, is Professor and Coordinator of the Interior Design Program at Colorado State University. She holds degrees from Colorado State University, Utah State University, and Michigan State University, and is certified by the National Council of Interior Design Qualifications (NCIDQ) as a professional interior designer. Her research interests are K-12 linkages with interior design, third places, and sense of self and place. She has served in several leadership roles including president of the Interior Design Educators Council and president of the American Society of Interior Designers.

Shauna Corry Hernandez, PhD, is an Associate Professor and Chair of the Interior Design Program at the University of Idaho. She received her PhD and MA from Washington State University and has taught at the University of Idaho and North Dakota State University where she served as Interior Design and Facility Management Program

Coordinator. She has been with the University of Idaho since 2001, and enjoys teaching history of interiors and design studios. Her research focuses on universal design, social justice issues, and cultural responsibility in design. She has been recognized for her prowess in the classroom as the recipient of the Alumni Awards of Excellence for mentorship and the Hoffman Teaching Excellence Award.

Erin Cunningham, PhD, is an Assistant Professor in the Interior Architecture Program at the University of Oregon. She holds degrees from the University of Florida, the University of Manitoba, and the University of Victoria. Her research focuses on the history and preservation of 19th- and 20th-century interior spaces. Her research interests include social settlement houses, vernacular architecture, and public housing interiors. Erin's current work also explores the development of a social welfare focus in the interior design profession, and the application of narrative methodology to the study of historic spaces. In both her research and teaching, Erin explores interior space from a socio-historical perspective, concentrating on issues of race, gender, and class. She has presented on her research at conferences and the Vernacular Architecture Forum, and recently published " 'Renovating an Industry': The Expanding Role of Interior Design in Times of Recession" in *Interiors: Design, Architecture, Culture*.

Ronn M. Daniel, M.Arch., is the Interior Design Program Coordinator at James Madison University in Harrisburg, Virginia, where he teaches design theory, design history, and interior design studios. His research explores the intersections between interior space, technological modernization, and social and ideological change in the 20th century.

Sheila Danko, Professor and Chair of the Department of Design and Environmental Analysis at Cornell University,

has a multi-disciplinary design background with training in architecture, industrial, graphic, and interior design. Professor Danko has received the honor of being named a J. Thomas Clark Professor of Entrepreneurship for her research entitled *Values-Led Entrepreneurship by Design*.

Halime Demirkan holds a PhD from the Middle East Technical University in computer-aided architectural design and now serves and the Chairperson and Associate Dean of the Department of Interior Architecture and Environmental Design at Bilkent University, one of Turkey's leading research universities. She is an industrial engineer and experienced as an instructor at the Middle East Technical University and as a researcher at the Scientific and Technical Council of Turkey. Her current research and teaching include design education, universal design, and ergonomics.

Newton D'Souza is a Professor in the Department of Architectural Studies at the University of Missouri, Columbia where he teaches design studio, environment behavior, and design research. He holds a PhD from the University of Wisconsin-Milwaukee and has an academic and practice background as an architect and design researcher in the US, Singapore, and India. Over the past 10 years, intrigued by his own experience as an architect, he has conducted research in design process, learning environments, creativity research, and the use of new media in design education. His current work includes research in the potential of virtual reality for design education and the use of multiple intelligences among architectural designers.

Jessica Goldsmith holds a PhD in design, construction, and planning from the University of Florida. She is an Assistant Professor at Radford University in Valdosta, Georgia, and is certified by the National Council for

Interior Design Certification (NCIDQ) as a professional interior designer. Her research focus is on student learning and historic preservation.

Mads Nygaard Folkmann is an Associate Professor in the field of design studies and design culture in the Department of Design and Communication at the University of Southern Denmark. His research interests are design culture, aesthetics, and symbolism in design. His work has been published in Danish and English in journals such as *Design Issues* and *Design and Culture*.

Kathleen Gibson is an Associate Professor of Interior Design at Cornell University. She is also the Director of Undergraduate Studies for the Department of Design and Environmental Analysis. Her research focuses on computer-aided design (CAD) where she investigates the effect of digital media on creativity, studio processes, and decision-making. Gibson practices interior design and has achieved national publication and award recognition for her work.

Amber Joplin, D. Des., completed her doctoral degree at the Interdisciplinary Design Institute at Washington State University. Prior to completing her degree she assisted in the WSU GIS and Simulation Lab and participated in research on pedestrian accessibility and public transportation modeling. Her dissertation research involves developing, and testing with GIS, a matrix for sustainable aging that includes individual, social, material support and natural systems.

Siriporn Kobnithikulwong, PhD, serves as Department Chair and Head of the Interior Design Master's Program for the Department of Interior Architecture at the Thammsat University, Thailand. Thammsat is the second-oldest institution of higher education and known as one of the most prestigious universities in Thailand. She holds a
