[Title Page](#)

[Copyright](#)

[Dedication](#)

[Preface](#)

[Acknowledgments](#)

[Part I: The Basics](#)

[Chapter 1: Introduction to Foreign Exchange](#)

[Practical Aspects of the FX Market](#)

[What Do FX Traders Call Different Currency Pairs?](#)

[Chapter 2: Introduction to FX Derivatives](#)

[Vanilla Call and Put Options](#)

[Practical Aspects of the FX Derivatives Market](#)

[Chapter 3: Introduction to Trading](#)

[Bids and Offers](#)

[Market Making](#)

[Price Making and Risk Management Overview](#)

[Practical A: Building a Trading Simulator in Excel](#)

[Task A: Set Up a Ticking Market Price](#)

[Task B: Set Up a Two-Way Price and Price-Taking  
Functionality](#)

[Task C: Introduce Price-Making Functionality](#)

[Extensions](#)

[Chapter 4: FX Derivatives Market Structure](#)

[Client Types](#)

[Bank FX Derivatives Trading Desk Structure](#)

[Tips for a Trading Internship](#)

[Tips for a Junior Trader](#)

[FX Derivatives Interbank Direct Market](#)

[FX Derivatives Interbank Broker Market](#)

## [Chapter 5: The Black-Scholes Framework](#)

[Black-Scholes Stochastic Differential Equation \(SDE\)](#)

[Solving the Black-Scholes SDE](#)

[Calculating Option Values Using Terminal Spot Distributions](#)

[The Black-Scholes Formula](#)

## [Practical B: Building a Numerical Integration Option Pricer in Excel](#)

[Task A: Set Up the Terminal Spot Distribution](#)

[Task B: Set Up the Option Payoff and Calculate the Option Price](#)

[Testing](#)

## [Chapter 6: Vanilla FX Derivatives Greeks](#)

[Option Value](#)

[Delta](#)

[Gamma](#)

[Vega](#)

[Summary](#)

## [Practical C: Building a Black-Scholes Option Pricer in Excel](#)

[Task A: Set Up a Simple Black-Scholes Options Pricer](#)

[Task B: Set Up a VBA Pricing Function](#)

[Task C: Generate First-Order Greeks](#)

[Task D: Plot Exposures](#)

## [Chapter 7: Vanilla FX Derivatives Pricing](#)

[Maintaining Volatility Surfaces](#)

[Vanilla Price Making](#)

## [Chapter 8: Vanilla FX Derivatives Structures](#)

[Straddle](#)

[Strangle](#)

[Butterfly \(Fly\)](#)

[Risk Reversal \(RR\)](#)

[Leveraged Forward](#)

[ATM Calendar Spread](#)

[Call/Put Spreads](#)

[Seagull](#)

## [Chapter 9: Vanilla FX Derivatives Risk Management](#)

[Trading Gamma](#)

[Trading the Short-Date Position](#)

[Trading the ATM Position](#)

[FX Derivatives Trading P&L](#)

[FX Derivatives Market Language](#)

## [Chapter 10: Vanilla FX Derivatives Miscellaneous Topics](#)

[Present Valuing and Future Valuing](#)

[Market Tenor Calculations](#)

[Option Premium Conversions](#)

## [Practical D: Generating Tenor Dates in Excel](#)

## [Part II: The Volatility Surface](#)

### [Chapter 11: ATM Curve Construction](#)

[Variance](#)

[Core ATM Curve Construction](#)

[ATM Curve Construction: Short-Dates](#)

[Practical E: Constructing an ATM Curve in Excel](#)

[Task A: Constructing an ATM Curve Using Interpolation](#)

[Task B: Constructing an ATM Curve Using a Model](#)

[Task C: Adding Weights to an ATM Curve](#)

[Chapter 12: Volatility Smile Market Instruments and Exposures](#)

[Market Instrument Vega Exposures](#)

[Risk Reversal Contract](#)

[Butterfly Contract](#)

[Volatility Smile Risk Management](#)

[Volatility Smile Construction Methods](#)

[Practical F: Constructing a Volatility Smile in Excel](#)

[Task A: Set Up the Malz Smile Model](#)

[Task B: Plot Implied Volatility versus Delta and Investigate Parameters](#)

[Task C: Use Black-Scholes to Get Strike from Delta](#)

[Task D: Switch to VBA Functions and Plot Implied Volatility versus Strike](#)

[Task E: Investigate Volatility Smile Strike Placement](#)

[Chapter 13: Probability Density Functions](#)

[Fat-Tailed Distributions](#)

[Confidence Intervals](#)

[Limitations of Volatility Smile Parameterization](#)

[Practical G: Generating a Probability Density Function from Option Prices in Excel](#)

[Part III: Vanilla FX Derivatives Trading](#)

[Chapter 14: Vanilla FX Derivatives Trading Exposures](#)

[Delta](#)

[Gamma and Theta](#)

[Vega and Weighted Vega](#)

[Adapted Greeks](#)

[Zeta](#)

[Interest Rate Risk \(Rho\)](#)

## [Chapter 15: Vanilla FX Derivatives Trading Topics](#)

[Understanding the FX Derivatives Market](#)

[Trading the Overnight](#)

[Gartman's Rules of Trading](#)

[Vega Positioning](#)

[Short-Date Trading: Long ATM versus Short Wings](#)

[Client Option Orders](#)

[Quoting Vanilla Spreads](#)

[Trading Long-Dated FX Derivatives](#)

[Trading Pegged Currency Pairs](#)

[Positive Vanilla Spreads](#)

[Writing-Off Vanilla Risk](#)

[Vanilla Pin Risk](#)

[Low Delta Vanilla Options](#)

[Agreeing Broker Market Data](#)

## [Chapter 16: ATM Volatility and Correlation](#)

[ATM Volatility Triangles](#)

[Dephased Vega](#)

[Managing Cross-Currency Positions](#)

## [Chapter 17: FX Derivatives Market Analysis](#)

[Calculating Breakevens](#)

[Implied versus Realized Analysis](#)

[Market Instrument Analysis](#)

[Carry Trades](#)

[Part IV: Exotic FX Derivatives](#)

[Chapter 18: Exotic FX Derivatives Pricing](#)

[Exotic Pricing Example](#)

[Pricing the Volatility Smile](#)

[VVV Pricing Example: Part 1](#)

[Stopping Time](#)

[VVV Pricing Example: Part 2](#)

[Path Dependence](#)

[Chapter 19: FX Derivatives Pricing Models](#)

[Stochastic Volatility Models](#)

[Local Volatility Models](#)

[Mixed Volatility Models](#)

[Jump Diffusion Models](#)

[Stochastic Interest Rate Models](#)

[Chapter 20: Exotic FX Derivatives Product Classification](#)

[First-Generation Exotics](#)

[Second-Generation Exotics](#)

[Third-Generation Exotics](#)

[Chapter 21: European Digital Options](#)

[European Digital Replication](#)

[European Digital Pricing](#)

[European Digital Bid-Offer Spread](#)

[European Digital Greeks](#)

[European Digital Range](#)

[Chapter 22: European Barrier Options](#)

[European Knock-out Replication](#)

[Intrinsic Value](#)

[European Knock-in Replication](#)

[European Barrier Greeks](#)

[European Barrier Pricing](#)

[European Barrier Bid-Offer Spread](#)

## [Chapter 23: Touch Options](#)

[Delta Risk](#)

[Vega Risk](#)

[Gamma and Pin Risk](#)

[Touch Barrier Delta Gap](#)

[One-Touch Pricing](#)

[One-Touch Variations](#)

[No-Touch Options](#)

## [Chapter 24: American Barrier Options](#)

[Regular American Barrier Options](#)

[Reverse American Barrier Options](#)

[Double American Barrier Options](#)

[Knock-in/Knock-out Option Replication](#)

[Strike-out Options](#)

## [Chapter 25: Exotic FX Derivatives Trading Topics](#)

[Exotic Risk Management Overview](#)

[Exotic Bid-Offer Spreading](#)

[Exotic Interbank Broker Market](#)

[Structured FX Hedging Strategies](#)

[FX Derivatives Investment Products](#)

[Shadow Barriers](#)

[Recycling Exotic Risk](#)

[Why Market Participants Prefer to Sell American Barriers](#)

[Chapter 26: Window Barrier and Discrete Barrier Options](#)

[Front-Window Barrier Options](#)

[Rear-Window Barrier Options](#)

[Generic Window Barrier Options](#)

[Window Barrier Risk Management](#)

[Discrete Barrier Options](#)

[Practical H: Building a Monte Carlo Option Pricer in Excel](#)

[Task A: Set Up the Simulation](#)

[Task B: Set Up a Vanilla Option Payoff and the Monte Carlo Loop](#)

[Task C: Set Up Multiple Payoffs](#)

[Task D: Pricing Barrier Options](#)

[Task E: Multi-Asset Simulation](#)

[Extensions](#)

[Chapter 27: Vanilla Variations](#)

[Late-Delivery Vanilla Options](#)

[American Vanilla Options](#)

[Self-Quanto Vanilla Options](#)

[Chapter 28: Accrual and Target Redemption Options](#)

[Accrual Options](#)

[Target Redemption Options](#)

[Chapter 29: Asian Options](#)

[Average Rate Options](#)

[Average Strike Options](#)

[Double Average Rate Options](#)

## [Chapter 30: Multi-Asset Options](#)

[Multi-Asset Trading Risks](#)

[Multi Asset Bid-Offer Spreading](#)

[Basket Options](#)

[Dual Digital Options](#)

[Best-of and Worst-of Options](#)

[Quanto Options](#)

## [Chapter 31: Miscellaneous Options](#)

[Volatility and Variance Swaps](#)

[Forward Volatility Agreements](#)

[Forward Start Options](#)

[Compound Options](#)

[Further Reading](#)

[About the Companion Website](#)

[Index](#)

[End User License Agreement](#)

## **List of Exhibits**

Chapter 1: Introduction to Foreign Exchange

[Exhibit 1.1 G10 Currencies](#)

[Exhibit 1.2 P&L from long USD10m USD/CAD spot at 0.9780](#)

[Exhibit 1.3 P&L from short USD10m USD/CAD spot at 0.9780](#)

[Exhibit 1.4 P&L from long USD100m USD/JPY spot at 101.00](#)

[Exhibit 1.5 Sample G10 spot rates](#)

[Exhibit 1.6 Selected G10 Currency Pair Names](#)

## [Exhibit 1.7 Exhibit Selected EM Currency Pair Names](#)

### Chapter 2: Introduction to FX Derivatives

[Exhibit 2.1 P&L per apple at maturity from call option with 10p strike](#)

[Exhibit 2.2 P&L per apple at maturity from put option with 10p strike](#)

[Exhibit 2.3 Converting between CCY1 and CCY2 notionals](#)

[Exhibit 2.4 P&L at maturity from long USD10m USD/CAD call option with 0.9780 strike](#)

[Exhibit 2.5 P&L at maturity from long USD10m USD/CAD put option with 0.9780 strike](#)

[Exhibit 2.6 FX derivatives pricing tool showing a USD/JPY vanilla contract](#)

### Chapter 3: Introduction to Trading

[Exhibit 3.1 Apple market order book](#)

[Exhibit 3.2 Trader A two-way price](#)

[Exhibit 3.3 Trader A two-way price in scenario 1](#)

[Exhibit 3.4 Trader A two-way price in scenario 2](#)

[Exhibit 3.5 Trader A two-way price in scenario 3](#)

[Exhibit 3.6 Market two-way price in scenario 3](#)

### Chapter 4: FX Derivatives Market Structure

[Exhibit 4.1 Client requesting prices from banks](#)

[Exhibit 4.2 Interbank broker market interactions](#)

[Exhibit 4.3 Roles on an FX derivatives trading desk](#)

[Exhibit 4.4 Interbank direct call from July 23, 2014](#)

[Exhibit 4.5 Interbank broker structure](#)

[Exhibit 4.6 Trader A requesting a price from their broker](#)

[Exhibit 4.7 Brokers going to the market requesting a price on the contract](#)

[Exhibit 4.8 Brokers collecting prices from the market and reporting the best rate back to trader A](#)

[Exhibit 4.9 The interest negotiating with the trader who made the best price](#)

[Exhibit 4.10 Brokers showing the rate out to the market](#)

[Exhibit 4.11 Brokers printing the trade to the market](#)

## Chapter 5: The Black-Scholes Framework

[Exhibit 5.1 Short-term forward path](#)

[Exhibit 5.2 Long-term forward path](#)

[Exhibit 5.3 USD/TRY model versus market forward path](#)

[Exhibit 5.4 Excel setup for generating a realization of a Wiener process](#)

[Exhibit 5.5 A sample realization of a Wiener process](#)

[Exhibit 5.6 Representation of the Black-Scholes framework](#)

[Exhibit 5.7 Terminal spot distribution at short tenor and low volatility](#)

[Exhibit 5.8 Terminal spot distribution at long tenor and high volatility](#)

[Exhibit 5.9 Sample Implied Volatility Term Structure](#)

[Exhibit 5.10 Realizations of a Wiener process using different implied volatility term structures](#)

[Exhibit 5.11 Valuing vanilla options using the terminal spot distribution](#)

[Exhibit 5.12 Cumulative normal distribution function](#)

## Chapter 6: Vanilla FX Derivatives Greeks

[Exhibit 6.1 Value at maturity of long vanilla call option with 100.00 strike](#)

[Exhibit 6.2 Value at maturity of short vanilla call option with 100.00 strike](#)

[Exhibit 6.3 Total P&L at maturity \(including initial premium\) of long vanilla call option with 100.00 strike](#)

[Exhibit 6.4 Value at maturity of long vanilla put option with 100.00 strike](#)

[Exhibit 6.5 Value at maturity of short vanilla put option with 100.00 strike](#)

[Exhibit 6.6 Value of long vanilla call option with 100.00 strike and 10% volatility](#)

[Exhibit 6.7 Time value of long vanilla call option with 100.00 strike and 10% volatility](#)

[Exhibit 6.8 Value of long vanilla call option with 100.00 strike and 20% volatility](#)

[Exhibit 6.9 Delta of long vanilla call option with 100.00 strike](#)

[Exhibit 6.10 Value of long vanilla put option with 100.00 strike and 10% volatility](#)

[Exhibit 6.11 Delta of long vanilla put option with 100.00 strike](#)

[Exhibit 6.12 Value at maturity of long call option](#)

[Exhibit 6.13 Value at maturity of short forward](#)

[Exhibit 6.14 Value at maturity of long put option](#)

[Exhibit 6.15 Gamma of long vanilla option with 100.00 strike](#)

[Exhibit 6.16 Vega of long vanilla option with 100.00 strike](#)

## Chapter 7: Vanilla FX Derivatives Pricing

[Exhibit 7.1 Example volatility surface](#)

[Exhibit 7.2 Example ATM run](#)

[Exhibit 7.3 Example ATM curve](#)

[Exhibit 7.4 Parallel ATM curve shift](#)

[Exhibit 7.5 Weighted ATM curve shift](#)

[Exhibit 7.6 Example volatility smile](#)

[Exhibit 7.7 Example downward-sloping volatility smile](#)

[Exhibit 7.8 Example upward-sloping volatility smile](#)

[Exhibit 7.9 Example symmetric volatility smile](#)

[Exhibit 7.10 Example extreme volatility smile](#)

[Exhibit 7.11 Changing the ATM curve to match new volatility market information](#)

[Exhibit 7.12 Existing volatility smile plus new volatility market information](#)

[Exhibit 7.14 Changing the ATM to match new volatility market information](#)

[Exhibit 7.13 Changing the wings of the volatility smile to match new volatility market information](#)

[Exhibit 7.15 Changing the skew of the volatility smile to match new volatility market information](#)

[Exhibit 7.16 Standard ATM Bid-Offer Volatility Spreads](#)

[Exhibit 7.17 Standard ATM Bid-Offer Volatility Spreads and Premium Spreads](#)

[Exhibit 7.18 Vega versus put strike delta](#)

[Exhibit 7.19 Volatility spread versus put strike delta](#)

[Exhibit 7.20 Premium spread versus put strike delta](#)

[Exhibit 7.21 Vanilla option pricing with and without delta hedge](#)

[Exhibit 7.22 Traded vanilla option contracts](#)

## Chapter 8: Vanilla FX Derivatives Structures

[Exhibit 8.1 Value at maturity of long 100.00 straddle](#)

[Exhibit 8.2 Vega profile of long 100.00 straddle](#)

[Exhibit 8.3 Value at maturity of long 90.00/110.00 strangle](#)

[Exhibit 8.4 Vega profile of long 90.00/110.00 strangle](#)

[Exhibit 8.5 Value at maturity of long 90.00/100.00/110.00 equal notional butterfly](#)

[Exhibit 8.6 Vega profile of long 90.00/100.00/110.00 vega-neutral butterfly](#)

[Exhibit 8.7 Value at maturity of 90.00/110.00 risk reversal \(buying topside\)](#)

[Exhibit 8.8 Hedging an FX exposure with a collar \(risk reversal\)](#)

[Exhibit 8.9 Vega profile of a 90.00/110.00 risk reversal](#)

[Exhibit 8.10 Bucketed vega profile from long 3mth/6mth vega-neutral ATM calendar spread](#)

[Exhibit 8.11 Value at maturity of long 100.00/110.00 call spread](#)

[Exhibit 8.12 Value at maturity of long 90.00/100.00/110.00 seagull](#)

## Chapter 9: Vanilla FX Derivatives Risk Management

[Exhibit 9.1 Gamma profile of long vanilla option with 100.00 strike](#)

[Exhibit 9.2 Initial EUR/USD spot ladder with long gamma exposure](#)

[Exhibit 9.3 EUR/USD spot ladder with spot higher](#)

[Exhibit 9.4 EUR/USD spot ladder after rebalancing delta](#)

[Exhibit 9.5 EUR/USD spot ladder with spot lower](#)

[Exhibit 9.6 EUR/USD spot ladder after partially rebalancing delta](#)

[Exhibit 9.7 EUR/USD spot ladder at maturity](#)

[Exhibit 9.8 Initial EUR/USD spot ladder with short gamma](#)

[Exhibit 9.9 AUD/USD spot ladder](#)

[Exhibit 9.10 AUD/USD spot ladder with delta jump highlighted](#)

[Exhibit 9.11 AUD/USD trade query](#)

[Exhibit 9.12 AUD/USD strike topography](#)

[Exhibit 9.13 AUD/USD spot ladder with P&L balance highlighted](#)

[Exhibit 9.14 AUD/USD spot ladder with better P&L balance highlighted](#)

[Exhibit 9.15 Vega profile of long vanilla option with 100.00 strike](#)

[Exhibit 9.16 EUR/USD long vega trading position](#)

[Exhibit 9.17 EUR/USD trading position with higher ATM implied volatility](#)

[Exhibit 9.18 EUR/USD trading position with 3mth vega hedge](#)

[Exhibit 9.19 AUD/USD bucketed vega profile](#)

## Chapter 10: Vanilla FX Derivatives Miscellaneous Topics

[Exhibit 10.1 Timeline of the four key dates within market tenor calculations](#)

[Exhibit 10.2 Formulas for converting options premiums](#)

## Chapter 11: ATM Curve Construction

[Exhibit 11.1 ATM curve A defined at market tenors](#)

[Exhibit 11.2 ATM curve A generated using linear volatility interpolation](#)

[Exhibit 11.3 Variance profile for ATM curve A generated using linear volatility interpolation](#)

[Exhibit 11.4 ATM curve B defined at market tenors](#)

[Exhibit 11.5 Variance profile for ATM curve B generated using linear volatility interpolation](#)

[Exhibit 11.6 Daily variance profile for ATM curve B generated using linear volatility interpolation](#)

[Exhibit 11.7 Variance profile for ATM curve B using linear variance interpolation](#)

[Exhibit 11.8 ATM curve B generated using linear variance interpolation](#)

[Exhibit 11.9 ATM curve A generated using linear variance interpolation](#)

[Exhibit 11.10 Daily variance profile for ATM curve A generated using linear variance interpolation](#)

[Exhibit 11.11 Function used within a simple ATM curve model](#)

[Exhibit 11.12 ATM curve output at market tenors](#)

[Exhibit 11.13 Short-date variance examples framework](#)

[Exhibit 11.14 Impact of forward drift on option prices](#)

[Exhibit 11.15 Monday to Friday ATM saw-toothing](#)

[Exhibit 11.16 Stylized intraday hourly realized variance](#)

[Exhibit 11.17 USD/JPY spot over Non-Farm Payroll data release from May 2013](#)

[Exhibit 11.18 Stylized intraday hourly realized variance on Non-Farm Payroll day](#)

[Exhibit 11.19 Average daily spot variance for G10 pairs in 2012](#)

[Exhibit 11.20 Pricing a same-day vanilla option](#)

## Chapter 12: Volatility Smile Market Instruments and Exposures

[Exhibit 12.1 Example EUR/USD market instruments at market tenors](#)

[Exhibit 12.2 Deltas quoted within the volatility smile](#)

[Exhibit 12.3 25 delta market instruments within the volatility smile](#)

[Exhibit 12.4 Volatility smile with zero risk reversal and zero butterfly](#)

[Exhibit 12.5 Volatility smile with zero risk reversal and positive butterfly](#)

[Exhibit 12.6 Volatility smile with positive risk reversal](#)

[Exhibit 12.7 Volatility smile with negative risk reversal](#)

[Exhibit 12.8 Vega profile from long ATM at different implied volatility levels](#)

[Exhibit 12.9 Vanna profile from long ATM](#)

[Exhibit 12.10 Volga profile from long ATM](#)

[Exhibit 12.11 Vega profile from risk reversal \(buying topside\) at different implied volatility levels](#)

[Exhibit 12.12 Vega versus spot profile from risk reversal \(buying downside\)](#)

[Exhibit 12.13 Vega versus log spot profile from risk reversal \(buying downside\)](#)

[Exhibit 12.14 Vanna profile from risk reversal \(buying topside\)](#)

[Exhibit 12.15 Vega profile from long butterfly at different implied volatility levels](#)

[Exhibit 12.16 Volga profile from long butterfly](#)

[Exhibit 12.17 Vega exposures from market instruments](#)

[Exhibit 12.18 AUD/JPY volatility smile](#)

[Exhibit 12.19 1yr interest rate differential versus 1yr 25d risk reversal scatter plot](#)

[Exhibit 12.20 USD/JPY 1yr 25d risk reversals from May 2002 to November 2012](#)

[Exhibit 12.21 25d risk reversal vega profile versus 10d risk reversal vega profile](#)

[Exhibit 12.22 25d and 10d risk reversals on the volatility smile](#)

[Exhibit 12.23 AUD/USD 1yr outright strike vega and 1yr long risk reversal vanna](#)

[Exhibit 12.24 AUD/USD 1yr risk reversal multipliers](#)

[Exhibit 12.25 Broker fly strike placement](#)

[Exhibit 12.26 Pricing tool showing broker fly premiums](#)

[Exhibit 12.27 AUD/JPY Volatility Surface Instruments](#)

[Exhibit 12.28 25d butterfly vega versus 10d butterfly vega profiles](#)

[Exhibit 12.29 25d butterfly volga versus 10d butterfly volga profiles](#)

## Chapter 13: Probability Density Functions

[Exhibit 13.1 Volatility smile with flat 10% implied volatility](#)

[Exhibit 13.2 Probability density function from flat 10% volatility smile](#)

[Exhibit 13.3 Volatility smiles with flat 10% and flat 15% implied volatility](#)

[Exhibit 13.4 Probability density functions from flat 10% and flat 15% volatility smiles](#)

[Exhibit 13.5 Volatility smiles with flat 10% and positive wing implied volatility](#)

[Exhibit 13.6 Probability density functions from flat 10% and positive wing volatility smiles](#)

[Exhibit 13.7 Volatility smiles with flat 10% and negative skew implied volatility](#)

[Exhibit 13.8 Probability density functions from flat 10% and negative skew volatility smiles](#)

[Exhibit 13.9 USD/JPY realized versus theoretical log daily change distribution \(2003 to 2013\)](#)

[Exhibit 13.10 USD/JPY realized versus theoretical log daily change distribution \(2003 to 2013/log scale\)](#)

[Exhibit 13.11 Three-state volatility model pdfs](#)

[Exhibit 13.12 Three-state volatility model average pdf](#)

[Exhibit 13.13 GBP/USD confidence intervals](#)

[Exhibit 13.14 EUR/CHF spot in 2011 and 2012](#)

[Exhibit 13.15 EUR/CHF 1mth and 1yr Market Instruments at June 1, 2011](#)

[Exhibit 13.16 EUR/CHF 1yr implied volatility smile and pdf at June 1, 2011](#)

[Exhibit 13.17 EUR/CHF 1yr intuitive pdf](#)

[Exhibit 13.18 EUR/CHF 1mth and 1yr Market Instruments at June 1, 2012](#)

[Exhibit 13.19 EUR/CHF 1yr actual and intuitive pdfs at June 1, 2012](#)

## Chapter 14: Vanilla FX Derivatives Trading Exposures

[Exhibit 14.1 Long vanilla call delta \(premium paid in CCY2\) with 1.0000 strike](#)

[Exhibit 14.2 Long vanilla call option premium with 1.0000 strike](#)

[Exhibit 14.3 Long vanilla call option delta \(premium paid in CCY1 or CCY2\) with 1.0000 strike](#)

[Exhibit 14.4 Long vanilla put option delta \(premium paid in CCY1 or CCY2\) with 1.0000 strike](#)

[Exhibit 14.5 Vanilla call option delta with 100.00 strike over time](#)

[Exhibit 14.6 Long vanilla option with 100.00 strike theta over time](#)

[Exhibit 14.7 ATM curve roll](#)

[Exhibit 14.8 Stylized P&L/theta distribution from long gamma position](#)

[Exhibit 14.9 Stylized P&L/theta distribution from short gamma position](#)

[Exhibit 14.10 AUD/JPY ATM vega](#)

[Exhibit 14.11 Weighted Vega Multipliers \(1mth reference\)](#)

[Exhibit 14.12 Adapted delta finite difference calculation shown on volatility smile](#)

[Exhibit 14.13 Symmetric volatility smile](#)

[Exhibit 14.14 Adapted gamma finite difference calculation for a symmetric volatility smile](#)

[Exhibit 14.15 Adapted gamma versus Black-Scholes gamma in a symmetric volatility smile](#)

[Exhibit 14.16 Maximum curvature points for symmetric and non-symmetric volatility smiles](#)

[Exhibit 14.17 Adapted gamma versus Black-Scholes gamma profiles for a non-symmetric volatility smile](#)

[Exhibit 14.18 Gamma adaption effect profile for a non-symmetric volatility smile](#)

[Exhibit 14.19 Volatility smile adjustment at higher ATM volatility](#)

[Exhibit 14.20 Spot ladder from selling USD/JPY 1yr risk reversal \(Black-Scholes exposures\)](#)

[Exhibit 14.21 Spot ladder from selling USD/JPY 1yr risk reversal \(adapted exposures\)](#)

[Exhibit 14.22 AUD/JPY 1yr volatility smile](#)

[Exhibit 14.23 AUD/JPY 1yr zeta profile](#)

[Exhibit 14.24 Volatility smile with positive wings and no skew](#)

[Exhibit 14.25 Zeta profile for volatility smile with positive wings and no skew](#)

[Exhibit 14.26 Long 1yr call option with 1.3100 strike rho](#)

[Exhibit 14.27 Long 1yr call option with 1.3100 strike forward delta](#)

[Exhibit 14.28 Long 1yr call option with 1.3100 strike rho over time](#)

[Exhibit 14.29 Long 1yr put option with 1.3100 strike rho](#)

[Exhibit 14.30 Long 1yr ATM straddle with 1.3100 strike rho](#)

[Exhibit 14.31 Long 1yr ATM straddle with 1.3100 strike rho at different implied volatility levels](#)

## Chapter 15: Vanilla FX Derivatives Trading Topics

[Exhibit 15.1 USD/KRW spot and implied volatility from 2006 to 2009](#)

[Exhibit 15.2 P&L from buying topside call option](#)

[Exhibit 15.3 Inception trading position from buying O/N topside call option](#)

[Exhibit 15.4 Trading position from long topside call option on expiry date](#)

[Exhibit 15.5 Inception trading position from selling topside call option and buying spot](#)

[Exhibit 15.6 Trading position from short topside call option and long delta on expiry date](#)

[Exhibit 15.7 P&L profiles from different trading strategies](#)

[Exhibit 15.8 Trading position from buying 1yr ATM and selling a gamma-neutral amount of 3mth ATM](#)

[Exhibit 15.9 USD/TRY volatility smile pre- and post-spot jump](#)

[Exhibit 15.10 Trading position from long ATM and short wings](#)

[Exhibit 15.11 Trading position containing short downside wing strike](#)

[Exhibit 15.12 Trading position containing short downside wing strike and a long strike in front](#)

[Exhibit 15.13 Pricing tool showing low delta 1wk EUR/USD vanilla option](#)

## Chapter 16: ATM Volatility and Correlation

[Exhibit 16.1 Cosine rule triangle](#)

[Exhibit 16.2 ATM implied volatility triangle](#)

[Exhibit 16.3 Realized AUD/USD versus USD/CAD historical spot correlation](#)

[Exhibit 16.4 ATM implied volatility with zero correlation](#)

[Exhibit 16.5 Correlation and inverse cosine function](#)

[Exhibit 16.6 ATM implied volatility triangle with correlation above zero](#)

[Exhibit 16.7 ATM implied volatility triangle with 100% correlation](#)

[Exhibit 16.8 ATM implied volatility triangle with correlation below zero](#)

[Exhibit 16.9 ATM implied volatility triangle with -100% correlation](#)

[Exhibit 16.10 Cross-currency ATM volatility versus correlation profile](#)

[Exhibit 16.11 ATM implied volatility triangle](#)

[Exhibit 16.12 1yr ATM implied volatility triangle containing EUR, USD, and CNH](#)

[Exhibit 16.13 Dephased vegas from a 1yr EUR/CNH vega exposure](#)

## Chapter 17: FX Derivatives Market Analysis

[Exhibit 17.1 Call option breakeven](#)

[Exhibit 17.2 Call option breakevens](#)

[Exhibit 17.3 ATM straddle option breakeven](#)

[Exhibit 17.4 Realized volatility versus implied volatility](#)

[Exhibit 17.5 Realized volatility versus implied volatility in early January](#)

[Exhibit 17.6 High-frequency AUD/USD spot trades](#)

[Exhibit 17.7 AUD/USD daily spot samples](#)

[Exhibit 17.8 AUD/USD daily spot log returns](#)

[Exhibit 17.9 AUD/USD 6mth realized spot volatility](#)

[Exhibit 17.10 1mth realized volatility with an extreme spot jump](#)

[Exhibit 17.11 EWMA weights](#)
