ISBN: 9780470745205

A catalogue record for this book is available from the British Library.

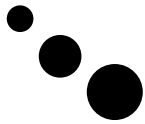

First impression – 2010

To Leslee, my bashert

Michael

To my family with love and thanks for your support and inspiration

Allan

Contents

Preface xxvii

Chapter 1	The Psychiatric Interview	1
	Goals of the psychiatric interview	1
	The psychiatric database	5
	Database components	6
	Identifying data	6
	Chief complaint	6
	History of the present illness	7
	Past psychiatric history	7
	Past medical history	7
	Family history	7
	Personal history	8
	Mental status examination	9
	Conduct of the interview	9
	General features of psychiatric interviews	11
	Setting	11
	Verbal communication	11
	Nonverbal communication	12
	Listening and observation	12
	Attitude and behavior of the interviewer	13
	Structure of the interview	13
Chapter 2	Childhood Disorders: Intellectual Disability	17
	Concept of intellectual disability	17
	Prevalence of intellectual disability	19
	Comorbidity patterns	19
	Approaches to classification of the causation of intellectual disability	20
	Elements of biomedical assessment	20
	First stage work-up	20
	History	21
	Physical examination	22
	Diagnostic studies	22
	Prenatal diagnosis	23
	Differential diagnosis of intellectual disability	23
	Course and natural history of intellectual disability	23
	Habilitation and treatment approaches to intellectual disability	23
	Overall goals of treatment of persons with intellectual disability	25
	Overall principles of treatment of persons with intellectual disability	25
	Normalization principle	25
	Right to community living	25
	Employment of adults in the community according to their abilities	26
	Use of normal community services and facilities	26

Advocacy and appropriate protective measures	26
Prevention of intellectual disability	26
Primary prevention	26
Secondary prevention	26
Tertiary prevention	26
Prevention of psychosocial dysfunction	26
Mental disorders in persons with intellectual disability	26
Behavior disorders	27
Special issues in the psychiatric assessment of persons with intellectual disability	27
Forensic and legal issues in intellectual disability	27
Noncriminal forensic issues	28
Guardianship	28
Parental competency in child protection cases	28
Overall goals of psychiatric treatment of persons with intellectual disability	28
Principles of pharmacological interventions in persons with intellectual disability	29
Psychosocial interventions	29
Programmatic and educational approaches	29
Psychotherapies	30
Comparison of DSM-IV/ICD-10 diagnostic criteria	30

Chapter 3 **Childhood Disorders: Learning and Motor Skills Disorders 31**

Diagnosis	31
DSM-IV-TR criteria	32
Educational criteria	32
The educational curriculum and diagnosis	33
Differential diagnosis	34
Evaluation of the child or adolescent	34
Family evaluation	37
Environmental and cultural assessment	37
Epidemiology	38
Comorbidity patterns	38
Social problems	38
Treatment	38
Educational interventions	38
Educational interventions for developmental coordination disorders	38
Psychotherapeutic interventions	39
Education of the individual and family	39
Individual therapy	39
Family therapy	39
Social skills training	40
Use of medications	40
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	40

Chapter 4 **Childhood Disorders: Communication Disorders 41**

Expressive and mixed expressive–receptive language disorders	41
Diagnosis	41
Treatment	44
Phonological disorder	44
Diagnosis	44
Treatment	46
Stuttering	46

Diagnosis	46
Treatment	47
Communication disorder not otherwise specified	47
Comparison of DSM-IV/ICD-10 diagnostic criteria	47

Chapter 5 **Childhood Disorders: The Pervasive Developmental Disorders 49**

Autistic disorder	49
Diagnosis	50
Treatment	53
Asperger's disorder	55
Diagnosis	55
Treatment	56
Childhood disintegrative disorder	56
Diagnosis	56
Treatment	57
Rett's Disorder	57
Diagnosis	57
Treatment	59
Pervasive developmental disorder not otherwise specified	59
Diagnosis	59
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	59

Chapter 6 **Childhood Disorders: Attention-Deficit and Disruptive Behavior Disorders 61**

Diagnosis	61
Definition and diagnostic/clinical features	61
Associated features and impairment	63
Assessment	63
Epidemiology	64
Comorbidity patterns	65
Course	65
Differential diagnosis	66
Treatment	67
Treatment goals	67
Somatic treatments	67
Psychosocial treatments	68
Comparing response to medication, psychosocial, and combination treatments	69
Treatment algorithms and practice guidelines	71
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	72

Chapter 7 **Childhood Disorders: Feeding and Related Disorders of Infancy or Early Childhood 73**

Feeding disorder of infancy or early childhood	73
Diagnosis	73
Treatment	75
Rumination Disorder	76
Diagnosis	76
Treatment	77
Pica	78
Diagnosis	78
Treatment	79
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	79

Chapter 8	Childhood Disorders: Tic Disorders	81
	Diagnosis	81
	Diagnostic assessment	82
	Course	83
	Comorbidity	83
	Differential diagnosis	84
	Treatment	84
	Psychoeducation	84
	Treatment of co-occurring disorders	84
	The suppression strategies	85
	Clinically complex patients	86
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	86
Chapter 9	Childhood Disorders: Elimination Disorders and Childhood Anxiety Disorders	87
	Enuresis	87
	Definition	87
	Course and natural history	87
	Differential diagnosis	88
	Assessment	89
	Treatment	89
	Assessment and management of diurnal enuresis	91
	Encopresis	91
	Definition	91
	Course and natural history	91
	Epidemiology	92
	Differential diagnosis	92
	Comorbidity	92
	Treatment	93
	Separation anxiety disorder	94
	Definition	94
	Natural history and course	94
	Diagnosis and differential diagnosis	94
	Treatment	95
	Selective mutism	96
	Definition	96
	Epidemiology	96
	Assessment	96
	Treatment	97
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	97
Chapter 10	Stereotypic Movement Disorder and Reactive Attachment Disorder	99
	Stereotypic movement disorder	99
	Diagnosis	99
	Treatment	100
	Reactive attachment disorder	101
	Diagnosis	101
	Treatment	102
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	103
Chapter 11	Delirium, Dementia, and Other Cognitive Disorders	105
	Delirium	105
	Diagnosis	106

Course	107
Differential diagnosis	108
Delirium due to a general medical condition	108
Medication-induced delirium	109
Substance intoxication delirium	110
Substance withdrawal delirium	110
Delirium due to multiple etiologies	110
Treatment	111
Dementia	111
Diagnosis	112
Mental status examination	113
Physical and neurological examinations in dementia	114
Associated features	114
Course	115
Differential diagnosis	115
Treatment	116
Dementia of the Alzheimer's Type (DAT)	118
Diagnosis	118
Laboratory and radiological findings	118
Treatment	119
Vascular Dementia	120
Treatment	121
Dementia due to other medical conditions	121
Dementia due to HIV disease	121
Dementia due to Pick's disease	123
Dementia due to Parkinson's disease	123
Dementia due to Huntington's disease	124
Subacute sclerosing panencephalitis	124
Creutzfeldt-Jakob disease	124
Neurosyphilis	125
Dementia due to head trauma	125
Normal-pressure hydrocephalus	125
Wilson's disease	125
Other medical conditions	126
Substance-induced persisting dementia	126
Diagnosis	126
Treatment	127
Dementia due to multiple etiologies	127
Amnesic disorders	127
Diagnosis	127
Differential diagnosis	128
Selected amnesic disorders	128
Treatment	129
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	129

Chapter 12

Mental Disorders Due to a General Medical Condition 131

Psychotic disorder due to a general medical condition	133
Diagnosis	133
Treatment	135
Mood disorder due to a general medical condition with depressive features	135
Diagnosis	135
Treatment	136

	Mood disorder due to a general medical condition with manic features	136
	Diagnosis	136
	Treatment	138
	Anxiety disorder due to a general medical condition with panic attacks or with generalized anxiety	138
	Diagnosis	138
	Treatment	139
	Anxiety disorder due to a general medical condition with obsessive–compulsive symptoms	139
	Diagnosis	139
	Treatment	140
	Catatonic disorder due to a general medical condition	140
	Diagnosis	140
	Differential diagnosis	141
	Personality change due to a general medical condition	141
	Diagnosis	141
	Differential diagnosis	143
	Treatment	144
	Mental disorder not otherwise specified due to a general medical condition	144
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	144
Chapter 13	General Approaches to Substance and Polydrug Use Disorders	145
	Substance dependence and abuse	145
	Substance intoxication	146
	Substance withdrawal	146
	Diagnosis and assessment	147
	Phenomenology and variations in presentation	147
	Special issues in the psychiatric examination	147
	Physical examination and laboratory findings	149
	Differential diagnosis	149
	Comorbidity patterns	149
	Course and natural history	149
	Treatment	149
	Goals of treatment	149
	Pharmacotherapy	150
	Psychosocial treatments	150
	Treatment of psychiatric comorbidity	150
	Treatment-refractory patients	151
	Other substance use disorders: anabolic steroids and nitrites	152
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	152
Chapter 14	Substance-Related Disorders: Alcohol	153
	Alcohol dependence and abuse	153
	Alcohol intoxication	154
	Alcohol withdrawal	155
	Alcohol-induced persisting amnesic disorder	155
	Alcohol-induced persisting dementia	155
	Alcohol-induced mood disorder	156
	Alcohol-induced anxiety disorder	156
	Alcohol-induced psychotic disorder	156
	Alcohol-induced sleep disorder	156
	Alcohol-induced sexual dysfunction	157

Assessment of alcohol use disorders	157
Screening	157
Psychiatric history and examination	157
Relevant physical examination and laboratory findings	158
Epidemiology	159
Psychiatric comorbidity	160
Course	160
Treatment	161
Treatment goals	161
The management of alcohol withdrawal	163
Therapeutic modalities: nonpharmacological	163
Therapeutic modalities: pharmacological	164
Alcoholics anonymous (AA) and mutual help organizations	165
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	166

Chapter 15	Substance-Related Disorders: Amphetamine	167
	Diagnosis	167
	Amphetamine dependence	167
	Amphetamine abuse	167
	Amphetamine intoxication	167
	Amphetamine withdrawal	168
	Epidemiology	169
	Patterns and routes of use	169
	Medical complications	169
	Treatment	170
	Treatment of ATS intoxication	171
	Treatment of ATS withdrawal	171
	Psychosocial treatments for ATS dependence	172
	Pharmacotherapy for ATS dependence	172
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	172

Chapter 16	Substance-Related Disorders: Caffeine	173
	Caffeine intoxication	173
	Diagnosis	173
	Assessment	173
	Epidemiology	174
	Comorbidity patterns	174
	Course	174
	Differential diagnosis	174
	Treatment	175
	Caffeine withdrawal	175
	Diagnosis	175
	Assessment	176
	Comorbidity patterns	177
	Course	177
	Differential diagnosis	177
	Treatment	177
	Caffeine dependence	177
	Diagnosis	177
	Assessment	178
	Course	178
	Differential diagnosis	178

	Treatment	178
	Caffeine-induced anxiety disorder	179
	Diagnosis	179
	Treatment	179
	Caffeine-induced sleep disorder	180
	Diagnosis	180
	Treatment	180
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	180
Chapter 17	Substance-Related Disorders: Cannabis	181
	Cannabis intoxication	181
	Cannabis abuse	182
	Cannabis dependence	182
	Cannabis Intoxication Delirium	182
	Cannabis-induced psychotic disorder	183
	Cannabis-Induced Anxiety Disorder	183
	Treatment	183
	Psychotherapy	183
	Pharmacotherapy	183
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	183
Chapter 18	Substance-Related Disorders: Cocaine	185
	Epidemiology	185
	Natural history of use	185
	Diagnosis	187
	Cocaine abuse	187
	Cocaine dependence	187
	Cocaine intoxication	188
	Cocaine withdrawal	188
	Other cocaine-induced disorders	188
	Medical complications	188
	Course	189
	Treatment	190
	Psychosocial treatments	191
	Clinician–patient relationship considerations	191
	Pharmacotherapy	191
	Common problems in management	192
	Relapse to cocaine use	192
	Diagnosis of other mental disorders	192
	Comorbid substance use disorders	193
	Premature treatment termination	193
	Treatment refractoriness	193
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	193
Chapter 19	Substance-Related Disorders: Hallucinogens and MDMA	195
	Hallucinogen intoxication	195
	Diagnosis	195
	Assessment	195
	Differential diagnosis	196
	Epidemiology	196
	Comorbidity patterns	196
	Course	196

Psychosocial factors	197
Treatment	197
Hallucinogen abuse	197
Diagnosis	197
Assessment	197
Epidemiology	197
Comorbidity	197
Course	197
Differential diagnosis	197
Treatment	197
LSD-related psychotic disorders	197
Diagnosis	197
Assessment	198
Epidemiology	198
Comorbidity patterns	198
Course	198
Differential diagnosis	198
Treatment	198
Hallucinogen persisting perception disorder (HPPD)	198
Diagnosis	198
Epidemiology	199
Comorbidity patterns	199
Course	199
Differential diagnosis	199
Treatment	199
MDMA (“Ecstasy”)-related disorders	199
Diagnosis	199
Comorbidity patterns	200
Course	200
Differential diagnosis	200
Acute positive psychological effects	200
Acute adverse psychological effects	200
Physical consequences of MDMA use	200
Social/environmental factors	201
Treatment	201
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	201

Chapter 20	Substance-Related Disorders: Inhalants	203
	Epidemiology	204
	Inhalant use disorders	204
	Inhalant abuse	204
	Inhalant dependence	205
	Inhalant-induced disorders	205
	Psychiatric disturbances associated with abuse of organic solvents	206
	Presentations of Inhalant Abuse	206
	Clinical manifestations after chronic abuse of inhalants	206
	Neurological sequelae of chronic abuse of inhalants	207
	Non-nervous-system toxicity of abuse of inhalants	208
	Neonatal syndrome	208
	Treatment	208
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	209

- Chapter 21 **Substance-Related Disorders: Nicotine 211**
 Diagnosis 211
 Assessment 211
 Epidemiology 213
 Comorbidity patterns 213
 Course 214
 Differential diagnosis 214
 Treatment 214
 Treatment goals 214
 Overall approach to treatment and phases of treatment 215
 Psychiatric medication management issues with abstinence 216
 Psychosocial treatments 217
 Combined psychosocial and psychopharmacological therapies 218
 Problems in management: repeated relapse 219
 Special considerations in treatment 219
 Comparison of DSM-IV-TR/ICD-10 diagnostic criteria 219
- Chapter 22 **Substance-Related Disorders: Opioids 221**
 Opioid-related disorders 221
 Epidemiology of opioid abuse and dependence 222
 Opioid intoxication 222
 Opioid Withdrawal 223
 Opioid Dependence 223
 Opioid Abuse 224
 Assessment and clinical picture 224
 Physical examination 225
 Laboratory findings 225
 Differential diagnosis 225
 Course 226
 Treatment 226
 Detoxification: long-term, short-term, rapid, and ultra-rapid 226
 Opioid agonist pharmacotherapy 227
 Antagonist maintenance 228
 Psychosocial/behavioral treatments 228
 Addressing comorbidity 229
 Harm reduction 230
 Comparison of DSM-IV-TR/ICD-10 diagnostic criteria 230
- Chapter 23 **Substance-Related Disorders: Phencyclidine 231**
 Epidemiology 231
 Tolerance and dependence 231
 Diagnosis 232
 Phenomenology and variations in presentation 232
 Psychiatric presentation 232
 Nonpsychiatric presentation 232
 Assessment 233
 Special issues in examination and history 233
 Relevant physical examination and laboratory findings 233
 Differential diagnosis 233
 Course 234
 Treatment 234
 Treatment goals 234

	Standard approaches to treatment	234
	Somatic treatments	234
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	234
Chapter 24	Substance-Related Disorders: Sedatives, Hypnotics, and Anxiolytics	235
	Sedative-, hypnotic-, and anxiolytic-related disorders	235
	Sedative, hypnotics, anxiolytics and GABA receptors	235
	Abuse and abuse potential	236
	Barbiturates	237
	Methaqualone	237
	Benzodiazepines	237
	Nonbenzodiazepine hypnotics	237
	Polydrug use/abuse	238
	Acute intoxication with sedatives, hypnotics, or anxiolytics	238
	Dependence	238
	Withdrawal	238
	Iatrogenic dependence	238
	Diagnosis and differential diagnosis	239
	Psychiatric comorbidity	239
	Types of withdrawal syndrome	239
	High-dose withdrawal syndrome	239
	Low-dose withdrawal syndrome	239
	Prolonged withdrawal syndrome	240
	Evaluation	240
	Drug use history	240
	Comorbidity	241
	Physical findings	241
	Laboratory tests	241
	Treatment	241
	High-dose withdrawal	242
	Psychosocial treatment	243
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	243
Chapter 25	Schizophrenia and Other Psychoses	245
	Schizophrenia	245
	Diagnosis	245
	DSM-IV-TR subtypes of schizophrenia	246
	Mental status examination in schizophrenia	247
	Physical examination	251
	Additional testing	251
	Epidemiology	251
	Differential diagnosis	252
	Course	254
	First episode schizophrenia	254
	Treatment	255
	Clinician–patient relationship	255
	Psychopharmacological treatment	255
	Acute treatment	258
	Maintenance treatment	260
	Depression and schizophrenia	261
	Risks and side effects of FGAs	262
	Side effects of SGAs	263

Treatment resistance and negative symptoms	264
Nonpharmacological treatment of schizophrenia	265
Combining pharmacological and psychosocial treatments	268
Self-directed treatment	268
Schizoaffective disorder	268
Diagnosis	268
Course	269
Differential diagnosis	270
Treatment	270
Brief psychotic disorder	271
Diagnosis	271
Course	272
Differential diagnosis	272
Treatment	272
Schizophreniform disorder	273
Diagnosis	273
Specifiers for prognostic features	273
Course	273
Differential diagnosis	274
Treatment	274
Delusional disorder	274
Subtypes	275
Course	276
Treatment	276
Shared psychotic disorder	277
Diagnosis	277
Course	277
Differential diagnosis	277
Treatment	278
Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	278

Chapter 26	Mood Disorders: Depressive Disorders	279
	Diagnosis	279
	Comorbidity	281
	Course	281
	Subtypes and specifiers	281
	Severity specifiers	282
	Psychotic features	282
	Catatonic features	282
	Melancholic features	282
	Atypical features	283
	Seasonal pattern	283
	Differential diagnosis	283
	Gender-related differences	284
	Depression in children and adolescents	284
	Depression in the elderly	284
	Treatment	284
	Treatment goals: response, remission, recovery	284
	Acute treatment	284

	The role of therapeutic drug monitoring	286
	Continuation and maintenance treatment	286
	Continuation treatment	287
	Prophylaxis of new episodes	287
	Somatic treatments	288
	Management of medication side effects	290
	Treatment-emerging suicide and suicidality	292
	Treatment-refractory depression	292
	Psychopharmacological strategies in case of nonresponsiveness to antidepressant treatments	293
	Nonpharmacological somatic treatments	296
	Psychosocial treatments	297
	Treatment of depression during pregnancy, postpartum depression, and breast-feeding	299
	Treatment of depression in children and adolescents	299
	Treatment of depression in the elderly	300
	Dysthymic Disorder	300
	Diagnosis	300
	Treatment	302
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	302
Chapter 27	Mood Disorders: Premenstrual Dysphoric Disorder	303
	Diagnostic features	303
	Course	304
	Differential diagnosis	304
	Treatment	305
	Somatic treatments	305
	Lifestyle modifications and psychosocial treatments	307
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	308
Chapter 28	Mood Disorders: Bipolar Disorder	309
	Diagnosis	309
	Diagnosis of mood episodes	310
	Additional specifiers: psychosis and rapid cycling	312
	Assessment	313
	Comorbidity	313
	Course	313
	Differential diagnosis	314
	Treatment	315
	Somatic treatments	315
	Balancing risks and benefits of antidepressant treatment	319
	Guiding principles for managing side effects	319
	Psychosocial treatments	320
	Treatment of bipolar disorder in childhood and adolescence	321
	Treatment during pregnancy	321
	Comparison of DSM-IV-TR/ICD-10 diagnostic criteria	321
Chapter 29	Anxiety Disorders: Panic Disorder With and Without Agoraphobia	323
	Diagnosis	323
	Assessment	324
	Comorbidity patterns	325
	Course	327
	Differential diagnosis	327

	Treatment	328
	Treatment goals	328
	Psychosocial treatments	328

Preface

The publication of DSM-III in 1980 revolutionized psychiatry. Among its many accomplishments (e.g., increased diagnostic reliability), it provided a common language for naming, describing, and identifying the complete range of mental disorders seen in clinical practice, as well as an organizational plan embodied in the diagnostic groupings contained in the DSM-III classification (i.e., grouping together Organic Mental Disorders, Psychotic Disorders, Mood Disorder, Anxiety Disorders, etc.). Its appeal is several-fold: 1) it is *authoritative*: the information contained in the DSM is authored by the leading experts in psychiatry and psychology; 2) it is *comprehensive*: all disorders seen by mental health professionals practice are covered in the DSM; 3) it is *clinically useful*: material included in the DSM is intended to be of practical use in making psychiatric diagnoses; 4) it is *educational*: material is included also for the purpose of educating the reader about mental disorders, such as how they present, sex ratio, prevalence rates; and 5) it is *relatively concise*: all the information is contained in a single volume, of around 900 pages in length.

Although the DSM is indispensable in the evaluation and treatment of patients with mental disorders, arriving at a psychiatric diagnosis is only the first step in the process. Once the clinician determines the diagnosis, he or she must then choose from among a range of available treatment options. Certainly the biggest limitation of the DSM-IV-TR is its omission of any information about the management and treatment of psychiatric patients. DSM-IV-TR users must turn elsewhere for information about which treatment to choose—either to books written specifically about the treatment of a disorder or books covering psychiatric treatment in general. In editing this book, *Clinical Guide to the Diagnosis and Treatment of Mental Disorders*, we have adapted material from the “Disorders” section of the two-volume textbook *Psychiatry*, 3rd Edition (edited by Tasman, Kay, Lieberman, First, and Maj) which was published in May 2008. Like its original source, it covers all of the disorders included the DSM-IV-TR but the content has been edited to meet the clinical needs of the readership. Rather than producing a reference book about mental disorders, we see this book as an accessible and brief clinical guide to diagnosis and treatment. As such, the “Etiology” sections from the original book have been eliminated and the “Diagnosis” and “Treatment” sections have been condensed with the goal of retaining only information which is clinically relevant. In addition, details of studies establishing the epidemiology of the disorders or the efficacy of treatments have been removed, as have all of the references. Readers interested in this information should refer to the corresponding chapters in the original book.

The organization of the chapters in this book closely parallels the layout of disorders in the DSM-IV-TR. The amount of space allocated to each disorder in this book varies according to clinical importance. Thus, unlike DSM-IV-TR, in which all of the anxiety disorders are covered in the same chapter, the book splits up the major anxiety disorders among several different chapters. Within each chapter, this book for the most part follows a consistent structure. The “Diagnosis” section for each disorder begins with introductory material describing the features of the disorder and includes information about assessment issues, comorbid conditions, course (which includes age at onset, prognosis and outcome), and differential diagnosis. The “Treatment” sections summarize the available treatments for the disorders, and often are broken down into “Somatic Treatments” and “Psychosocial Treatments” for ease of reference.

We would like to acknowledge the excellent contributions made by the original contributors to these chapters, who are listed in the front of each chapter. We would also like to express our gratitude to Fiona Woods and Joan Marsh at John Wiley and Sons for their help in the editing and production of this book.
