Acknowledgments

This book was compiled within the project “Adaptive Management of Climate-induced Changes of Habitat Diversity in Protected Areas” (HABIT-CHANGE). We thank the European transnational funding programme INTERREG IV B Central Europe for co-funding this project (reference number 2CE168P3). Although the ideas and messages included in this book remain as straightforward clues for the managers and scientists involved in conservation of wetlands and floodplains, they crystallized from the broad, multi-aspect approach of managers, specialists and scientists of different backgrounds and experiences.

First and foremost, we thank Dr. Marco Neubert and Dr. Sven Rannow for their efficient supervision and guidance of the HABIT-CHANGE project that made the implementation process an unforgettable experience that consisted of multiple lessons of the research efficiency and a strict yet keen project management of big international research undertakings. We thank all project partners whose dedication and accuracy allowed the HABIT-CHANGE to be implemented and finalized. We thank the Director and the staff of the Biebrza National Park for their keen attitude towards the researchers and outstanding assistance with the project implementation. We are grateful for the professional advice by Prof. Tomasz Okruszko that allowed us to go smoothly through the book preparation process. We thank the reviewers of the book—Dr. Dorota Pusłowska-Tyszewska, Dr. hab. Piotr Banaszuk, Prof. PB and Mgr Grzegorz Wierzbicki, whose valuable advice and critical reviews allowed to assure the high scientific standard of the presented contributions. We thank all the authors for the amount of work they put in the preparation of particular chapters. We thank Mrs. Anna Dziembowska for her permanent assistance and patience in the whole process of the book preparation. We also thank the editor team of the Springer series “GeoPlanet: Earth and Planetary Sciences”.

Warsaw, October 2014

Contents

1 Wetlands and Water Framework Directive: Protection, Management and Climate Change	1
S. Ignar and M. Grygoruk	
2 Synergies and Conflicts Between Water Framework Directive and Natura 2000: Legal Requirements, Technical Guidance and Experiences from Practice	9
Georg A. Janauer, Juliane Albrecht and Lars Stratmann	
3 Can Natura 2000 Sites Benefit from River Basin Management Planning Under a Changing Climate? Lessons from Germany	31
Lars Stratmann and Juliane Albrecht	
4 Do Water Management and Climate-Adapted Management of Wetlands Interfere in Practice? Lessons from the Biebrza Valley, Poland	53
Mateusz Grygoruk and Tomasz Okruszko	
5 Wetlands in River Valleys as an Effect of Fluvial Processes and Anthropolpression	69
Andrzej Strużyński, Leszek Książek, Wojciech Bartnik, Artur Radecki-Pawlik, Karol Plesiński, Jacek Florek, Maciej Wyrębek and Mateusz Strużyński	
6 New Vision of the Role of Land Reclamation Systems in Nature Protection and Water Management	91
Wiesław Dembek
