# Preface

This report is a partial result of the “China Quarterly Macroeconomic Model (CQMM),” a project of the Center for Macroeconomic Research (CMR) at Xiamen University. The CMR is one of the Key Research Institutes of Humanities and Social Sciences of the Ministry of Education of China. The research is funded by the Key Project of the National Social Science Fund of China (13&ZD029), the Key Projects of Philosophy and Social Sciences Research of the Ministry of Education of China (Grant No. 14JZD011), the Major Project for Humanities and Social Sciences Key Research Institutes of the Ministry of Education of China (14JJD790007, 13JJD790026, 13JJD790025), the Youth Project of the National Social Science Foundation of China (13CJL017, 11CJY073), and the Postdoctoral Science Foundation of China (2014 M560526).

Since the launch of CQMM 9 years ago, 17 forecast reports with policy simulations and 9 essay collection books on China’s macroeconomic analysis have been published. This is the 18th forecast report, which is a summary of forecast results released at the “China Macroeconomic Advanced Forum (Spring 2015), CQMM Press Conference for Economic Projections for 2015–2016.” The forum was jointly organized by the Center for Macroeconomic Research, Xiamen University, and the Economic Information Daily, Xinhua News Agency, in Beijing on March 1, 2015.
