

Fifth Edition

Food Allergy

Adverse Reaction to Foods
and Food Additives

Edited by
Dean D. Metcalfe
Hugh A. Sampson
Ronald A. Simon
Gideon Lack

Contents

[Cover](#)

[Title Page](#)

[Copyright](#)

[List of Contributors](#)

[Preface to the Fifth Edition](#)

[Abbreviations](#)

[Part 1: Adverse Reactions to Food
Antigens: Basic Science](#)

[Chapter 1: The Mucosal Immune System](#)

[Introduction](#)

[Mucosal immunity is associated with suppression:
the phenomena of controlled inflammation and
oral tolerance](#)

[The nature of antibody responses in the gut-
associated lymphoid tissue](#)

[The anatomy of the gut-associated lymphoid
tissue: antigen trafficking patterns](#)

[References](#)

Chapter 2: The Immunological Basis of IgE-Mediated Reactions

Introduction

Route of sensitization

Allergen uptake in the intestine

T-cell response in IgE-mediated allergy

B-cell response in IgE-mediated allergy

Allergen-specific IgG and IgA

Genes and environment

Innate immune recognition of allergens

Allergic inflammation

IgE receptors

Mast cells

Basophils

Eosinophils

Conclusion

References

Chapter 3: The Immunological Basis of Non-IgE-Mediated Reactions

Introduction

Development of food allergy

Gut anatomy

Defense mechanisms

Oral tolerance

Antigen transport

Antigen processing and presentation

T cells

Eosinophils

[Food protein-induced enterocolitis and proctocolitis](#)

[Celiac disease](#)

[Allergic eosinophilic esophagitis and gastroenteritis](#)

[Conclusions](#)

[Acknowledgment](#)

[References](#)

[Chapter 4: Food Allergens—Molecular and Immunological Characteristics](#)

[Introduction](#)

[Food allergen protein families](#)

[Food allergens of animal origin \(Table 4.2\)](#)

[Food allergens of plant origin \(Table 4.3\)](#)

[Allergen databases](#)

[What does this mean?](#)

[Acknowledgment](#)

[**References**](#)

[Chapter 5: Biotechnology and Genetic Engineering](#)

[Introduction](#)

[Plant biotechnology](#)

[Roundup Ready soybeans: a case study in food safety assessment](#)

[General assessment strategy for food allergy](#)

[Allergy assessment summary: Roundup Ready soybeans](#)

Trends in the science of risk assessment
Value of measuring allergen expression levels as part of the allergy risk assessment of biotech crops
Removing allergens from foods
International consensus: a common strategy
Conclusion and future considerations
References

Chapter 6: Food Allergen Thresholds of Reactivity*

Definition of threshold
Thresholds for sensitization versus elicitation
Clinical determination of individual threshold doses
Clinical correlates of thresholds of reactivity
MEDs for specific foods
Usefulness of individual thresholds for reactivity
Food industry and regulatory uses of threshold information
Conclusions
References

Chapter 7: Immunological Tolerance

Introduction
Organization of the gastrointestinal immune system

[Gastrointestinal antigen uptake](#)
[Assessment of oral tolerance](#)
[Site of tolerance induction](#)
[Effector mechanisms of oral tolerance](#)
[Gastrointestinal antigen presentation: the role of dendritic cells](#)
[Factors affecting development of oral tolerance](#)
[Conclusion](#)
[References](#)

[Chapter 8: In Vitro Diagnostic Methods in the Evaluation of Food Hypersensitivity](#)

[Introduction](#)
[Food-specific antibody assays](#)
[Indications for allergen-specific IgE testing](#)
[IgG and IgA antibody detection in celiac disease](#)
[Food allergens](#)
[Allergenic food components](#)
[Food allergen epitopes](#)
[Predictive quantitative allergen-specific IgE levels](#)
[Analytes and assays with little or no confirmed value in the diagnosis of food allergy](#)
[Laboratory considerations](#)
[Summary](#)
[References](#)

[Part 2: Adverse Reactions to Food Antigens: Clinical Science](#)

Chapter 9: Theories on the Increasing Prevalence of Food Allergy

Introduction

References

Chapter 10: The Spectrum of Allergic Reactions to Foods

Introduction

IgE-mediated reactions

Non-IgE-mediated reactions

Adverse food reactions associated with eosinophilic disease

Conditions associated with multiple immune mechanisms

Summary

References

Chapter 11: Cutaneous Reactions: Atopic Dermatitis and Other IgE- and Non-IgE-Mediated Skin Reactions

Introduction

Immunopathophysiology of AD

Role of food allergy in AD

Epidemiology of food allergy in AD

Diagnosis of food hypersensitivity in patients with AD

Management

Natural history of food hypersensitivity

[Conclusions](#)

[References](#)

[Chapter 12: Oral Allergy Syndrome](#)

[Introduction](#)

[Epidemiology](#)

[Clinical features](#)

[Molecular basis/pathogenesis](#)

[Allergens](#)

[Pollen-food syndromes](#)

[Diagnosis](#)

[Management](#)

[Future directions](#)

[Conclusions](#)

[References](#)

[Chapter 13: The Respiratory Tract and Food Hypersensitivity](#)

[Introduction](#)

[Epidemiology](#)

[Respiratory presentations of food allergy](#)

[Allergens](#)

[Routes of exposure](#)

[What is the link between the respiratory tract and food hypersensitivity?](#)

[Managing a patient presenting with food-induced respiratory symptom](#)

[Summary and conclusions](#)

[References](#)

Chapter 14: Anaphylaxis and Food Allergy

Introduction

Definitions

Prevalence

Etiology

Diagnosis

Treatment

Prognosis

References

Chapter 15: Infantile Colic and Food Allergy

Introduction

Epidemiology of colic

Infantile and parental factors associated with infantile colic

Infantile colic and gastrointestinal disorders

Dietary treatment of colic

Conclusion

References

Chapter 16: Eosinophilic Esophagitis, Gastroenteritis, and Colitis

Eosinophilic esophagitis

Eosinophilic gastroenteritis (gastroenterocolitis)

Eosinophilic proctocolitis

References

Chapter 17: Gluten-Sensitive Enteropathy

[Introduction](#)

[Etiology](#)

[Epidemiology](#)

[Natural history of celiac disease](#)

[Clinical presentation](#)

[Diagnostic tests for celiac disease](#)

[Treatment](#)

[Prevention](#)

[Mortality in celiac disease](#)

[References](#)

[Chapter 18: Food Protein-Induced Enterocolitis and Enteropathies](#)

[Introduction](#)

[Food protein-induced enterocolitis syndrome](#)

[Food protein-induced enteropathy](#)

[Iron deficiency anemia](#)

[Conclusion](#)

[References](#)

[Chapter 19: Occupational Reactions to Food Allergens](#)

[Introduction](#)

[Definitions/classifications](#)

[Prevalence and incidence](#)

[Risk factors](#)

[Agents associated with allergic occupational diseases of food workers](#)

Relationship of sensitization routes: inhalation at the workplace versus ingestion at home

Diagnosis

Prognosis

Prevention and treatment

Conclusions

References

Part 3: Adverse Reactions to Foods: Diagnosis

Chapter 20: IgE Tests: In Vitro Diagnosis

Introduction

Common diagnostic test methods for the quantitative measurement of food allergen-specific IgE

Total IgE

Component-resolved diagnosis with individual food allergens and allergenic peptides

Food allergen-specific IgE and the atopic march

References

Chapter 21: In Vivo Diagnosis: Skin Testing and Challenge Procedures

Introduction

Skin prick tests

Additional diagnostic steps prior to OFCs

The history and physical examination

Diagnostic elimination diets

[Oral food challenges](#)

[Summary](#)

[**References**](#)

[Chapter 22: Atopy Patch Testing for Food Allergies](#)

[Introduction](#)

[History](#)

[History: atopic dermatitis](#)

[History: eosinophilic esophagitis](#)

[History: food protein-induced enterocolitis syndrome](#)

[Unanswered questions](#)

[Conclusion](#)

[References](#)

[Chapter 23: Elimination Diets and Oral Food Challenges](#)

[Introduction](#)

[Historical background](#)

[Food elimination diets](#)

[Oral food challenges](#)

[Summary](#)

[References](#)

[Chapter 24: General Approach to Diagnosing Food Allergy and the Food Allergy Guidelines](#)

[Why is it important to systematically diagnose food allergy?](#)

[Moving from focused history-taking to focused *in vivo* and *in vitro* testing](#)

[Using skin and blood tests to follow patients over time](#)

[References](#)

[Chapter 25: Hidden and Cross-Reacting Food Allergens](#)

[Introduction](#)

[Hidden food allergens](#)

[Cross-reacting food allergens](#)

[Cross-reactions among specific foods/food families](#)

[Summary and management](#)

[References](#)

[Chapter 26: Controversial Practices and Unproven Methods in Allergy](#)

[Introduction](#)

[Definitions](#)

[“Controversial” tests](#)

[Unproven tests](#)

[Inappropriate tests](#)

[Unproven therapy](#)

[Urine autoinjections](#)

[Inappropriate therapy](#)

[Conclusion](#)

References

Part 4: Adverse Reactions to Food Additives

Chapter 27: Asthma and Food Additives

Introduction

Evaluating asthma studies

Conclusions

References

Chapter 28: Urticaria, Angioedema, and Anaphylaxis Provoked by Food Additives

Mechanisms of additive-induced urticaria, angioedema, and anaphylaxis

Study design for food additive challenges in patients with urticaria/angioedema

Individual additives in acute urticaria: description, challenges, and testing

Food additive sensitivity in chronic idiopathic urticaria/angioedema

Recommendations for food additive challenge protocols in patients with urticaria, angioedema, and/or anaphylaxis

Conclusion

References

Chapter 29: Sulfites

Introduction

Clinical manifestations of sulfite sensitivity

Prevalence

Mechanisms

Diagnosis

Treatment

Food and drug uses

Fate of sulfites in foods

Likelihood of reactions to sulfited foods

Avoidance diets

Conclusion

References

Chapter 30: Monosodium Glutamate

The fifth taste: L-glutamate

Monosodium glutamate and neurotoxicity

MSG symptom complex

MSG and the FDA

Conclusion

References

Chapter 31: Tartrazine, Azo, and Non-Azo Dyes

Urticaria/angioedema reactions associated with tartrazine and other dyes

Asthma associated with tartrazine and other dyes

Anaphylaxis from ingestion of dyes

Atopic dermatitis and cutaneous reactions to tartrazine

Contact dermatitis to tartrazine and azo dyes

Other cutaneous reactions to tartrazine and azo dyes

Hyperkinesia and tartrazine

Conclusions

References

Chapter 32: Adverse Reactions to the Antioxidants Butylated Hydroxyanisole and Butylated Hydroxytoluene

Toxicology

Asthma/rhinitis

Urticaria

Dermatitis

Mechanisms

Unsubstantiated effects

Summary

References

Chapter 33: Adverse Reactions to Benzoates and Parabens

Benzoates and parabens as food and beverage additives

Benzoates, parabens, and associations with chronic urticaria-angioedema

Benzoates, parabens, and associations with asthma

Benzoates, parabens, and anaphylaxis

Benzoates, parabens, and dermatitis

Miscellaneous reactions

[Summary and conclusions](#)
[References](#)

[Chapter 34: Food Colorings and Flavors](#)

[Food colorings](#)
[Food flavorings](#)
[Summary](#)
[References](#)

[Part 5: Contemporary Topics in Adverse Reactions to Foods](#)

[Chapter 35: Pharmacologic Food Reactions](#)

[Introduction](#)
[Vasoactive amines](#)
[Monoamines](#)
[Methylxanthines](#)
[Capsaicin](#)
[Ethanol](#)
[Myristicin](#)
[Psoralen](#)
[Solanine and chaconine](#)
[Glycyrrhetic acid](#)
[Oleocanthal](#)
[References](#)

[Chapter 36: The Management of Food Allergy](#)

[Introduction](#)

[Allergen avoidance](#)
[Allergen identification](#)
[Label reading](#)
[Cross-contact](#)
[Cooking](#)
[Psychosocial impact](#)
[Teens and young adults: high-risk patients](#)
[Management of food allergy at school](#)
[Eating away from home](#)
[Special occasions](#)
[References](#)

[Chapter 37: The Natural History of Food Allergy](#)

[Introduction](#)
[Studies on the development of food allergy](#)
[Studies on the loss of food allergy](#)
[Milk allergy](#)
[Egg allergy](#)
[Peanut allergy](#)
[Tree nuts allergy](#)
[Other foods](#)
[Food allergy in adults](#)
[Follow-up of the food-allergic child](#)
[Conclusions](#)
[References](#)

[Chapter 38: Prevention of Food Allergy](#)

[Introduction](#)

Methodological challenges

Onset of sensitization and food allergy

Maternal diet (during pregnancy and/or breast-feeding) and the prevention of food allergy

Complementary infant feeding and the prevention of food allergy

Combined maternal and infant dietary measures and the prevention of food allergy

Routes of sensitization, cross sensitization, and oral tolerance induction

Unpasteurized milk, probiotics, and prebiotics

Nutritional supplements

Conclusions

References

Chapter 39: Diets and Nutrition

Introduction

Label reading

Food preparation safety

Resources

Nutrition

Dietary reference intakes

Baked milk and egg

Summary

References

Chapter 40: Food Toxicology

Intoxications caused by synthetic chemicals in foods

[Intoxications caused by naturally occurring chemicals in foods](#)

[Metabolic food disorders](#)

[References](#)

[Chapter 41: Seafood Toxins](#)

[Introduction](#)

[Background](#)

[Common intoxications associated with fish](#)

[Common intoxications associated with shellfish](#)

[Conclusions](#)

[Acknowledgment](#)

[Animal models of IgE-mediated food allergy](#)

[Experimental approaches using human specimens](#)

[Conclusions](#)

References

Chapter 44: Food Allergy: Psychological Considerations and Quality of Life

Introduction

Psychological impact and quality of life

Psychosocial support of patients and families with food allergy

Food allergy and psychological disorders

Approach to the patient with psychological symptoms attributed to food allergy

References

Chapter 45: Foods and Rheumatologic Diseases

Introduction

Rheumatoid arthritis

Diet in the etiology of RA

Genetics in the etiology of RA—the potential interaction with food

Food allergy/intolerance in RA

Potential mechanisms of food intolerance/allergy. RA

Dietary omega-3 supplementation and RA

Probiotics for the treatment of arthritis

Summary

Appendix

References

Chapter 46: Approaches to Therapy in Development

Immunotherapeutic approaches for treating food allergy

Allergen-specific immunotherapy

Oral immunotherapy

Immunotherapy with modified recombinant engineered food proteins

Allergen-nonspecific therapy

Conclusions

References

List of Contributors

Maria Laura Acebal, JD

Board Director and Former CEO

FARE: Food Allergy Research and Education (formerly The Food Allergy & Anaphylaxis Network (FAAN))

Washington, DC, USA

Shradha Agarwal, MD

Assistant Professor of Medicine

Division of Allergy and Clinical Immunology

Icahn School of Medicine at Mount Sinai

New York, NY, USA

Katrina J. Allen, MD, PhD

Professor of Paediatrics

Murdoch Childrens Research Institute;

The University of Melbourne Department of Paediatrics;

Department of Allergy and Immunology

Royal Children's Hospital

Melbourne, VIC, Australia

Matthew Aresery, MD

Allergist

Maine General Medical Center

Augusta, ME, USA

James L. Baldwin, MD

Associate Professor

Division of Allergy and Clinical Immunology

University of Michigan

Ann Arbor, MI, USA

Gary A. Bannon, PhD

Global Regulatory Sciences and Affairs
Monsanto
St Louis, MO, USA

Joseph L. Baumert, PhD

Assistant Professor Co-Director
Food Allergy Research and Resource Program
Department of Food Science and Technology
Food Allergy Research and Resource Program
University of Nebraska
Lincoln, NE, USA

M. Cecilia Berin, PhD

Associate Professor of Pediatric Allergy and Immunology
Icahn School of Medicine at Mount Sinai
New York, NY, USA

Kirsten Beyer, MD

Professor of Experimental Pediatrics
Charité Universitätsmedizin Berlin
Klinik für Pädiatrie m.S. Pneumologie und Immunologie
Berlin, Germany

Stephan C. Bischoff, MD

Professor of Medicine
Director, Institute of Nutritional Medicine and Immunology
University of Hohenheim
Stuttgart, Germany

John V. Bosso, MD

Affiliate Faculty Member
Columbia University College of Physicians and Surgeons;
Chief, Allergy and Immunology
Nyack Hospital
Nyack, NY, USA

Heimo Breiteneder, PhD

Professor of Medical Biotechnology
Department of Pathophysiology and Allergy Research
Medical University of Vienna
Vienna, Austria

A. Wesley Burks, MD

Curnen Distinguished Professor and Chairman
Department of Pediatrics
University of North Carolina
Chapel Hill, NC, USA

Robert K. Bush, MD

Emeritus Professor
Division of Allergy, Immunology, Pulmonary, Critical Care,
and Sleep Medicine
Department of Medicine
University of Wisconsin School of Medicine and Public
Health
Madison, WI, USA

André Cartier, MD

Clinical Professor of Medicine
Université de Montréal
Hôpital du Sacré-Coeur de Montréal
Montreal, QC, Canada

Soheil Chegini, MD

Attending Physician
Exton Allergy and Asthma Associates
Exton, PA, USA

Leslie G. Cleland, MD, FRACP

Director of Rheumatology
Rheumatology Unit
Royal Adelaide Hospital
Adelaide, SA, Australia

Ma. Lourdes B. de Asis, MD

Allergy and Asthma Consultants of Rockland and Bergen
West
Nyack, NY, USA

Raymond C. Dobert, PhD

Global Regulatory Sciences and Affairs
Monsanto, St. Louis, MO, USA

George Du Toit, MD

Consultant in Paediatric Allergy
King's College London
Clinical Lead for Allergy Service
Guy's and St Thomas' NHS Foundation Trust
St Thomas' Hospital
London, UK

John M. Fahrenholz, MD

Division of Allergy, Pulmonary and Critical Care Medicine
Vanderbilt University Medical Center
Nashville, TN, USA
