

Veterinary Allergy

Edited by Chiara Noli, Aiden Foster
and Wayne Rosenkrantz

WILEY Blackwell

Table of Contents

[Dedication](#)

[Title page](#)

[Copyright page](#)

[Acknowledgments](#)

[Contributors](#)

[Foreword](#)

[Introduction: the immunological basis of allergic diseases](#)

[Introduction](#)

[The multifactorial nature of allergy](#)

[Future progress](#)

[Part 1: Canine Allergy](#)

[Section 1: Canine Atopic Dermatitis](#)

[1: Introduction: canine atopic dermatitis as an evolving, multifactorial disease](#)

[2: Canine immunoglobulin E](#)

Introduction

The role of immunoglobulin E in atopic disease

Immunoglobulin E interaction with immune and inflammatory cells

The immunoglobulin E network of soluble receptors and autoantibody complexes

Therapeutic anti-immunoglobulin E

Conclusion

3: The aberrant immune system in atopic dermatitis

Atopic dermatitis as a type I hypersensitivity: the role of mast cells, histamine, IgE, and leukotrienes

The role of dendritic cells

T cells: different populations and cytokine response

Summary of proposed pathogenesis

4: Allergens and environmental influence

Introduction

Sources of allergens

Environment and canine atopic dermatitis

Allergen specificities

Conclusion

5: The genetics of canine atopic dermatitis

Introduction

[Investigating atopic dermatitis-associated genotypes](#)
[Genomic studies in canine atopic dermatitis](#)
[Conclusion](#)
[Glossary](#)

[6: Skin barrier and its role in the pathophysiology of atopic dermatitis](#)

[Introduction](#)
[Methods to determine impairment of barrier function of the canine skin](#)
[Extracellular lipids in the stratum corneum and atopic dermatitis](#)
[Current evidence for aberrant filaggrin expression in dogs with atopic dermatitis](#)
[Other barrier abnormalities in human atopic dermatitis](#)
[Future perspectives for the investigation of cutaneous barrier function in canine atopic dermatitis](#)

[7: The role of bacterial agents in the pathogenesis of canine atopic dermatitis](#)

[Introduction](#)
[Environmental exposure](#)
[The defective skin barrier](#)
[Bacterial virulence and the pathogenesis of canine pyoderma](#)
[Conclusion](#)

8: The role of fungal agents in atopic dermatitis

Introduction

Overview of fungi in human and canine atopic dermatitis

Environmental fungal allergens in human atopic dermatitis

Environmental fungal allergens in canine atopic dermatitis

Dermatophytosis in human and canine atopic dermatitis

Malassezia yeasts in human atopic dermatitis

Malassezia yeasts in canine atopic dermatitis

Conclusion

9: Clinical signs of canine atopic dermatitis

Signalment of CAD dogs

History of canine atopic dermatitis dogs

Clinical signs of canine atopic dermatitis

Breed-associated phenotypes

10: Diagnosis of canine atopic dermatitis

The approach to the chronic pruritic dog

Establishing the diagnosis of CAD

Determining environmental allergens for CAD

Conclusion

11: Allergen avoidance

The role of indoor allergens

[The role of outdoor allergens](#)
[Conclusion](#)

[12: Allergen-specific immunotherapy](#)

[Introduction](#)

[Mechanism of action](#)

[Selection of allergens](#)

[Conventional allergen-specific immunotherapy](#)

[Rush immunotherapy](#)

[Intralymphatic immunotherapy](#)

[Sublingual immunotherapy](#)

[Allergen-specific immunotherapy and concurrent drug therapy](#)

[13: Guidelines for symptomatic medical treatment of canine atopic dermatitis](#)

[An integrated approach to treatment](#)

[Managing acute flares of canine atopic dermatitis](#)

[Long-term management of chronic atopic dermatitis](#)

[14: Non-conventional treatments](#)

[Introduction](#)

[Pentoxifylline](#)

[Tacrolimus](#)

[Misoprostol](#)

[Chinese herbal medicine](#)

[Capsaicin](#)

[Leukotriene inhibitors](#)

Serotonin uptake inhibitors and tricyclic antidepressants

Probiotics

Therapy with helminths

Interferon- γ

Hardy kiwi preparation

Heat-killed *Mycobacterium vaccae*

Conclusion

Section 2: Food Hypersensitivity

15: The pathogenesis of food allergy

Introduction: lessons from human food allergy

What do we know about canine food allergy?

Conclusion

16: Cutaneous manifestations of food hypersensitivity

Historical perspective

Epidemiology

Sex, age (at onset), and breed predilection

Pruritus

Lesions and pattern of distribution

Otitis externa

Secondary skin diseases

Particular and rare dermatological signs

Gastrointestinal signs in dogs with skin disease

Other non-dermatological signs associated with skin disease

17: Adverse reactions to food: a gastroenterologist's perspective

Adverse food reactions

Epidemiology of adverse food reactions

Clinical presentation

Differential diagnoses

Diagnosis

18: Diagnostic workup of food hypersensitivity

Hypoallergenic diets

In vivo tests: intradermal testing and gastroscopy

In vitro tests

19: Long-term management of food hypersensitivity in the dog

Abbreviations

Introduction

Pragmatic considerations about diets for food hypersensitivity

Non-allergen aspects of the diet associated with clinical improvement

Alternative non-dietary treatments of food hypersensitivity

Sensitization to novel proteins

Eventual restoration of tolerance to allergens

Conclusions and recommendations

Section 3: Flea Bite Allergy

20: Flea biology and ecology

Introduction

Morphology

Distribution

Life cycle

Veterinary importance

Conclusion

21: The pathogenesis of flea bite allergy in dogs

Introduction

The flea allergen

The immunopathogenesis of FAD

Conclusion

22: Clinical signs of flea allergy dermatitis in dogs

Introduction

Is flea infestation easy to diagnose?

Is there a season for flea allergy dermatitis?

No epidemiological clues!

'Classical lesions' of flea allergy dermatitis

Pyotraumatic dermatitis

Urticaria

Atopic dermatitis flares

Fibropruritic nodules

Microbial infections

Differential diagnoses

23: Diagnostic investigation of canine flea bite allergy

Live flea challenge test

Intradermal testing

Serological testing

Histopathology

Conclusion

24: Implementing an effective flea control programme

Introduction

General control strategies and integrated flea control

Perceptions of reduced efficacy

Conclusion

25: Symptomatic relief for canine flea bite hypersensitivity

Antimicrobial agents

Glucocorticoids

Other systemic antipruritic drugs

Topical therapy

Immunotherapy

Conclusion

Section 4: Complicating Infections in Allergic Dogs

26: Complicating microbial skin infections in allergic dogs

Importance and prevalence

Pathogens

Clinical manifestations

Diagnostic approach

Therapy

Prevention

27: Otitis in the allergic dog

Introduction

The relationship of otitis to allergy

Clinical features of otitis in allergy

Management of otitis in allergic patients

Conclusion

Section 5: Other Allergic Diseases in Dogs

28: Contact allergy

Is it a rare disease?

Causes of contact allergy

Pathogenesis

Clinical presentation

Diagnosis

Management

29: Venomous insect hypersensitivity

Introduction

Pathogenesis

Treatment

30: Canine urticaria and angioedema

Introduction

Aetiology

Pathogenesis

History, clinical signs, and differential diagnosis

Diagnostic evaluation

Treatment

Part 2: Feline Allergy

Section 1: Cutaneous Allergy in Cats

31: Pathogenesis—immunopathogenesis

Genetic background

Feline skin barrier and exposure to allergens

Antigen-specific immunoglobulin E

Dendritic cells

T cells

Eosinophils

Mast cells

Role of microbial factors

32: Clinical presentations and specificity of feline manifestations of cutaneous allergies

Classical presentations of feline atopic-like disease and cutaneous adverse reactions to food:

eosinophilic dermatitis, miliary dermatitis, self-induced alopecia, and head and neck pruritus
Signalment and history of cats with atopic-like disease and/or cutaneous adverse reactions to food

Classical presentations of atopic-like disease and cutaneous adverse reactions to food

Distribution patterns

Other signs

Specificity of reaction patterns

The specificity of feline manifestations of cutaneous allergy

33: Complications of cutaneous skin allergies (skin infections)

Introduction

Superficial bacterial infections

Superficial fungal infections

Viral infections

34: Diagnostic investigation of the allergic feline

Introduction

Key aspects of the history

Environmental allergy

35: Symptomatic treatments

Managing secondary pruritic conditions

Allergen avoidance

Medical management of cutaneous allergy

36: Allergen-specific immunotherapy

Principles and considerations for allergen-specific immunotherapy

Options for allergen-specific immunotherapy

Section 2: Feline Asthma

37: Feline asthma

Introduction

Immunopathology

Clinical presentation

Diagnosis

Treatment

Section 3: Flea Bite Allergy

38: Pathogenesis

Flea saliva

Allergenicity of flea saliva

Immune responses to flea saliva in cats and other species

39: Clinical presentations

Miliary dermatitis

Symmetrical alopecia

Head and neck excoriations

Eosinophilic granuloma complex

Other signs

40: Diagnostic workup

Live flea challenge test

Intradermal testing

Serological testing

Functional *in vitro* test

Histopathology

41: Therapy

Introduction

Main difficulties and pitfalls

Active ingredients and formulations

Recommendations

Section 4: Mosquito Bite Allergy

42: Mosquito bite

Pathogenesis

Clinical features

Diagnostic tests

Treatment

Part 3: Equine Allergy

Section 1: *Culicoides* Hypersensitivity and Other Insect Allergies

43: Pathogenesis and epidemiology of *Culicoides* hypersensitivity

Introduction

Epidemiology

Culicoides characteristics, life cycle, and breeding sites

Pathogenesis

Culicoides allergens

44: Equine immunoglobulin E

Structure and function of IgE

Antibodies for detection of equine IgE

IgE in *Culicoides* hypersensitivity

Conclusion

45: Clinical manifestations of *Culicoides* hypersensitivity

46: *Culicoides* hypersensitivity: diagnosis

Introduction

Allergy testing

Serum testing

Intradermal testing

Allergens sources

47: *Culicoides* hypersensitivity: therapy

Prevention of *Culicoides* hypersensitivity

Vaccinations

Environmental control

[Insect control](#)

[Kairomones](#)

[Topical non-insecticide therapy](#)

[Systemic therapy](#)

[Conclusion](#)

[48: Other biting insect allergies](#)

[Introduction](#)

[Allergen material sources and characterization](#)

[Pathogenesis of biting insect hypersensitivity](#)

[Clinical signs](#)

[Differential diagnosis](#)

[Diagnosis](#)

[Diagnostic confirmation](#)

[Treatment](#)

[Selected biting Diptera](#)

[Section 2: Atopic Disease in Horses— Atopic Dermatitis and Food Hypersensitivity](#)

[49: Equine atopic dermatitis: pathogenesis](#)

[Defining atopic dermatitis](#)

[The evidence for atopic dermatitis in horses](#)

[Food allergy in horses as part of atopic diathesis](#)

[50: Clinical aspects of equine atopic disease](#)

[Introduction](#)

[History and signalment](#)

[Clinical lesions](#)

[Concurrent diseases](#)

[51: Equine urticaria](#)

[Overview](#)

[Mast cell degranulation](#)

[Acute versus chronic urticaria](#)

[Potential causes for and recommended approach to chronic or recurrent urticaria](#)

[Treatment of urticaria](#)

[52: Equine headshaking syndrome](#)

[Clinical syndrome](#)

[Causes of headshaking syndrome](#)

[53: Diagnostic workup of equine atopic disease](#)

[Introduction](#)

[Dermatopathology](#)

[IgE testing](#)

[Serum *in vitro* testing](#)

[Intradermal testing](#)

[Adverse food reaction testing](#)

[54: Equine atopic disease symptomatic therapy and allergen-specific immunotherapy](#)

[Introduction](#)

Avoidance
Elimination diet trials
Topical therapy
Systemic therapy

Section 3: Recurrent Airway Obstruction and Inflammatory Airway Disease

55: Recurrent airway obstruction and inflammatory airway disease

Pathogenesis
Clinical aspects and diagnosis
Further diagnostic investigation
Therapy

Section 4: Contact and Other Allergic Diseases

56: Equine allergic contact dermatitis

Pathogenesis
Clinical features
Diagnosis
Photohypersensitivity

Part 4: Allergy in Other Domestic Species

57: Immunopathogenesis of allergic skin disease in livestock

Introduction

The innate response

The adaptive response

58: *Psoroptes ovis*

Incidence and importance

Clinical signs

Pathology of primary infestations

Challenge infestations

Overview, including molecular aspects, of the immunopathogenesis of sheep scab

Diagnosis

Treatment and prevention

59: Allergic diseases of livestock species

Introduction

Camelids

Cattle

Goats

Pigs

Sheep

Flea bite hypersensitivity in livestock species

60: Allergies in birds

Feather-picking

Allergen testing in avian species

Treatment options

61: Allergic diseases in other pets (rodents, rabbits, and ferrets).

Respiratory disease

Gastrointestinal disease

Dermatological disease

Index

In memory of my dear colleague and friend Stefano Toma,
who is greatly missed. (CN)

I dedicate this book to Susan Shaw in recognition of her
great enthusiasm and ability to share with me, as for many
vets, her considerable knowledge and understanding of
veterinary medicine and dermatology. (AF)

To my cherished friend and mentor, Peter Ihrke, who first
introduced me to this wonderful specialty and continues to
be an inspiration to all. (WR)

Veterinary Allergy

Edited by

Chiara Noli (canine) (Italy)

Aiden Foster (feline, large animals, exotics) (UK)

Wayne Rosenkrantz (equine) (USA)

Acknowledgments

We are grateful to Wiley for taking on this publishing project and for bringing it to fruition so quickly and efficiently. We are particularly grateful to Rupert Cousens, Jessica Evans and Nancy Turner for setting up and running the project; to Elizabeth Paul and Ruth Swan for sorting out the production issues including copyediting and typesetting.

A book project of this size is time consuming for all concerned and as editors we have been delighted at the speed and enthusiasm of authors to provide their chapters and agree to revisions and changes. Inevitably the editing has taken us away from our families and everyday work, and we are grateful to our spouses for their support and understanding and to our colleagues for their patience and advice.

It has taken three years to bring the original concept to print, and we hope that readers will find this book useful; as editors it has been an enjoyable learning experience, working together and with the authors.
