Chapter 19: Some Impressions of, and Questions about, the WISC-V

What Does the Term *Full Scale IQ* Mean, and What Should a General Estimate of Intelligence Encompass?

Why Are Some Indexes Primary, Some Ancillary, Some Complementary, and Some Nonexistent?

Why Does the Test Include Subtests that Do Not Contribute to Any Index?

What's the Difference between an Ability and a Process?

Is Cognition the Same Thing as Intelligence, and if They Are Not the Same, Which One Is the WISC-V Measuring?
