for Donna

— Karli Watson

ABOUT THE AUTHORS

KARLI WATSON is consultant at Infusion Development (`www.infusion.com`), a technology architect at Boost.net (`www.boost.net`), and a freelance IT specialist, author, and developer. For the most part, he immerses himself in .NET (in particular C# and lately WPF) and has written numerous books in the field for several publishers. He specializes in communicating complex ideas in a way that is accessible to anyone with a passion to learn, and spends much of his time playing with new technology to find new things to teach people about.

During those (seemingly few) times where he isn't doing the above, Karli will probably be wishing he was hurtling down a mountain on a snowboard. Or possibly trying to get his novel published. Either way, you'll know him by his brightly colored clothes. You can also find him tweeting online at `www.twitter.com/karlequin`, and maybe one day he'll get around to making himself a website. Karli authored chapters 1 through 14, 21, 25 and 26.

CHRISTIAN NAGEL is a Microsoft Regional Director and Microsoft MVP, an associate of Thinktecture, and owner of CN Innovation. He is a software architect and developer who offers training and consulting on how to develop Microsoft .NET solutions. He looks back on more than 25 years of software development experience. Christian started his computing career with PDP 11 and VAX/VMS systems, covering a variety of languages and platforms. Since 2000, when .NET was just a technology preview, he has been working with various .NET technologies to build numerous .NET solutions. With his profound knowledge of Microsoft technologies, he has written numerous .NET books, and is certified as a Microsoft Certified Trainer and Professional Developer. Christian speaks at international conferences such as TechEd and Tech Days, and started INETA Europe to support .NET user groups. You can contact Christian via his web sites, `www.cninnovation.com` and `www.thinktecture.com` and follow his tweets on `www.twitter.com/christiannagel`. Christian wrote chapters 17 through 20.

JACOB HAMMER PEDERSEN is a Senior Application Developer at Elbek & Vejrup. He just about started programming when he was able to spell the word 'BASIC', which, incidentally is the first programming language he ever used. He started programming the PC in the early '90s, using Pascal but soon changed his focus to C++, which still holds his interest. In the mid '90s his focus changed again, this time to Visual Basic. In the summer of 2000 he discovered C# and has been happily exploring it ever since. Primarily working on the Microsoft platforms, his other expertise includes MS Office development, SQL Server, COM and Visual Basic.Net.

A Danish citizen, Jacob works and lives in Aarhus, Denmark. He authored chapters 15, 16, and 22.

JON D. REID is a software engineering manager at Metrix LLC, an ISV of field service management software for the Microsoft environment. He has co-authored a variety .NET books, including *Beginning Visual C# 2008, Beginning C# Databases: From Novice to Professional, Pro Visual Studio .NET,* and many others. Jon wrote chapters 23 and 24.

MORGAN SKINNER began his computing career at a young age on the Sinclair ZX80 at school, where he was underwhelmed by some code a teacher had written and so began programming in assembly language. Since then he's used all sorts of languages and platforms, including VAX Macro Assembler, Pascal, Modula2, Smalltalk, X86 assembly language, PowerBuilder, C/C++, VB, and currently C# (of course). He's been programming in .NET since the PDC release in 2000, and liked it so much he joined Microsoft in 2001. He now works in premier support for developers and spends most of his time assisting customers with C#. Morgan wrapped up the book by authoring chapter 27. You can reach Morgan at `www.morganskinner.com`.

ABOUT THE TECHNICAL EDITOR

A "blue-badge" .NET architect and developer at Intel Corporation since March 2007, **Doug Holland** is part of the Visual Computing Group and is presently working within an advanced tools and development team with an emphasis on chipset and driver testing. Doug Holland holds a Master's Degree in Software Engineering from Oxford University and has been awarded both the Microsoft MVP and Intel Black Belt Developer awards. Outside of work, Doug enjoys spending time with his wife and four children; and is also an officer in the Civil Air Patrol/U.S. Air Force Auxiliary. Beyond architecting and developing software you can often find Doug at the local airport flying Cessnas over the California landscape.

ACKNOWLEDGMENTS

FROM KARLI WATSON: Thanks to all at Wiley for their support and assistance on this project, as well as their understanding and flexibility in dealing with an author who never seems to have enough time to write. Special thanks to my editor for this book, Ami Sullivan, for adding sparkle and making this book shine. Also, thanks to friends, family, and work colleagues for understanding why I haven't have time for much socializing lately, and to Donna, as always, for all her support and for putting up with all the late nights.

FROM CHRISTIAN NAGEL: To my two girls Angela and Stephanie. It's great to have you. Thanks for your great support and the big love you gave me during the hardest time of my life in 2009. Without you I couldn't have made it through. Stephanie, while not born yet, you were my biggest motivation during that time. I love you both!

Also, a big thank you to my co-authors and the team at Wrox/Wiley for getting a great book out.

CONTENTS

INTRODUCTION *xxxiii*

PART I: THE C# LANGUAGE

CHAPTER 1: INTRODUCING C# **3**

What is the .NET Framework? **3**
What's in the .NET Framework? 4
Writing Applications Using the .NET Framework 5
CIL and JIT 5
Assemblies 5
Managed Code 6
Garbage Collection 6
Fitting It Together 7
Linking 8
What is C#? **8**
Applications You Can Write with C# 9
C# in This Book 10
Visual Studio 2010 **10**
Visual Studio 2010 Express Products 11
Solutions 11
Summary **11**

CHAPTER 2: WRITING A C# PROGRAM **13**

The Development Environments **14**
Visual Studio 2010 14
Visual C# 2010 Express Edition 17
Console Applications **18**
The Solution Explorer 22
The Properties Window 23
The Error List Window 23
Windows Forms Applications **24**
Summary **28**

CHAPTER 3: VARIABLES AND EXPRESSIONS **31**

Basic C# Syntax **32**

Basic C# Console Application Structure **34**
Variables **35**
Simple Types 36
Variable Naming 40
Naming Conventions 41
Literal Values 42
String Literals 43
Variable Declaration and Assignment 44
Expressions **45**
Mathematical Operators 45
Assignment Operators 50
Operator Precedence 51
Namespaces 51
Summary **55**

CHAPTER 4: FLOW CONTROL **59**

Boolean Logic **59**
Boolean Assignment Operators 62
Bitwise Operators 64
Operator Precedence Updated 68
The goto Statement **68**
Branching **69**
The Ternary Operator 70
The if Statement 70
Checking More Conditions Using if Statements 73
The switch Statement 74
Looping **77**
do Loops 78
while Loops 80
for Loops 83
Interrupting Loops 87
Infinite Loops 88
Summary **89**

CHAPTER 5: MORE ABOUT VARIABLES **93**

Type Conversion **94**
Implicit Conversions 94
Explicit Conversions 96
Explicit Conversions Using the Convert Commands 99
Complex Variable Types **102**
Enumerations 102

Defining Enumerations 103
Structs 107
Defining Structs 107
Arrays 110
Declaring Arrays 110
foreach Loops 113
Multidimensional Arrays 113
Arrays of Arrays 115
String Manipulation 116
Summary 121

CHAPTER 6: FUNCTIONS 125

Defining and Using Functions 126
Return Values 128
Parameters 130
Parameter Matching 132
Parameter Arrays 132
Reference and Value Parameters 134
Out Parameters 136
Variable Scope 137
Variable Scope in Other Structures 140
Parameters and Return Values versus Global Data 142
The Main() Function 143
Struct Functions 146
Overloading Functions 147
Delegates 149
Summary 152

CHAPTER 7: DEBUGGING AND ERROR HANDLING 155

Debugging in VS and VCE 156
Debugging in Nonbreak (Normal) Mode 157
Outputting Debugging Information 158
Tracepoints 163
Diagnostics Output Versus Tracepoints 164
Debugging in Break Mode 166
Entering Break Mode 166
Monitoring Variable Content 170
Stepping Through Code 172
Immediate and Command Windows 173
The Call Stack Window 174
Error Handling 175
try . . . catch . . . finally 176

Listing and Configuring Exceptions 181
Notes on Exception Handling 182
Summary 183

CHAPTER 8: INTRODUCTION TO OBJECT-ORIENTED PROGRAMMING 185

What Is Object-Oriented Programming? 186
What Is an Object? 187
Properties and Fields 188
Methods 189
Everything's an Object 189
The Life Cycle of an Object 190
Constructors 190
Destructors 191
Static and Instance Class Members 191
Static Constructors 191
Static Classes 192
OOP Techniques 192
Interfaces 193
Disposable Objects 194
Inheritance 194
Polymorphism 196
Interface Polymorphism 197
Relationships Between Objects 198
Containment 198
Collections 199
Operator Overloading 200
Events 200
Reference Types Versus Value Types 201
OOP in Windows Applications 201
Summary 204

CHAPTER 9: DEFINING CLASSES 209

Class Definitions in C# 209
Interface Definitions 212
System.Object 215
Constructors and Destructors 217
Constructor Execution Sequence 218
OOP Tools in VS and VCE 222
The Class View Window 222
The Object Browser 224
Adding Classes 226
Class Diagrams 227

Class Library Projects **229**
Interfaces Versus Abstract Classes **232**
Struct Types **235**
Shallow Copying Versus Deep Copying **237**
Summary **237**

CHAPTER 10: DEFINING CLASS MEMBERS **241**

Member Definitions **241**
Defining Fields 242
Defining Methods 242
Defining Properties 244
Adding Members from a Class Diagram 249
Adding Methods 250
Adding Properties 251
Adding Fields 252
Refactoring Members 252
Automatic Properties 253
Additional Class Member Topics **253**
Hiding Base Class Methods 254
Calling Overridden or Hidden Base Class Methods 255
The this Keyword 256
Nested Type Definitions 257
Interface Implementation **257**
Implementing Interfaces in Classes 258
Explicit Interface Member Implementation 260
Adding Property Accessors with Nonpublic Accessibility 260
Partial Class Definitions **261**
Partial Method Definitions **262**
Example Application **264**
Planning the Application 264
The Card Class 264
The Deck Class 265
Writing the Class Library 265
Adding the Suit and Rank Enumerations 266
Adding the Card Class 268
Adding the Deck Class 269
A Client Application for the Class Library 272
The Call Hierarchy Window **274**
Summary **275**

CHAPTER 11: COLLECTIONS, COMPARISONS, AND CONVERSIONS **277**

Collections **278**

Using Collections 278
Defining Collections 284
Indexers 286
Adding a Cards Collection to CardLib 288
Keyed Collections and IDictionary 291
Iterators 293
Iterators and Collections 297
Deep Copying 299
Adding Deep Copying to CardLib 301
Comparisons 303
Type Comparisons 303
Boxing and Unboxing 303
The is Operator 305
Value Comparisons 308
Operator Overloading 308
Adding Operator Overloads to CardLib 313
The IComparable and IComparer Interfaces 318
Sorting Collections Using the IComparable and IComparer Interfaces 320
Conversions 324
Overloading Conversion Operators 324
The as Operator 326
Summary 327

CHAPTER 12: GENERICS 331

What Are Generics? 332
Using Generics 333
Nullable Types 333
Operators and Nullable Types 334
The ?? Operator 336
The System.Collections.Generics Namespace 340
List<T> 341
Sorting and Searching Generic Lists 343
Dictionary<K, V> 349
Modifying CardLib to Use a Generic Collection Class 350
Defining Generic Types 351
Defining Generic Classes 351
The default Keyword 354
Constraining Types 354
Inheriting from Generic Classes 361
Generic Operators 362
Generic Structs 363
Defining Generic Interfaces 364
Defining Generic Methods 364

Defining Generic Delegates 366
Variance 366
Covariance 367
Contravariance 368
Summary 369

CHAPTER 13: ADDITIONAL OOP TECHNIQUES 373

The :: Operator and the Global Namespace Qualifier 373
Custom Exceptions 375
Adding Custom Exceptions to CardLib 375
Events 377
What Is an Event? 377
Handling Events 378
Defining Events 380
Multipurpose Event Handlers 385
The EventHandler and Generic EventHandler<T> Types 388
Return Values and Event Handlers 388
Anonymous Methods 389
Expanding and Using CardLib 389
A Card Game Client for CardLib 390
Summary 398

CHAPTER 14: C# LANGUAGE ENHANCEMENTS 401

Initializers 402
Object Initializers 402
Collection Initializers 404
Type Inference 407
Anonymous Types 409
Dynamic Lookup 413
The dynamic Type 414
IDynamicMetaObjectProvider 417
Advanced Method Parameters 418
Optional Parameters 418
Optional Parameter Values 419
Optional Parameter Order 420
Named Parameters 420
Named and Optional Parameter Guidelines 424
Extension Methods 424
Lambda Expressions 429
Anonymous Methods Recap 429
Lambda Expressions for Anonymous Methods 430
Lambda Expression Parameters 434

Lambda Expression Statement Bodies 434
Lambda Expressions As Delegates and Expression Trees 435
Lambda Expressions and Collections 436
Summary 439

PART II: WINDOWS PROGRAMMING

CHAPTER 15: BASIC WINDOWS PROGRAMMING 447

Controls 448
Properties 448
Anchoring, Docking, and Snapping Controls 449
Anchor and Dock Properties 450
Events 451
The Button Control 453
Button Properties 453
Button Events 453
Adding the Event Handlers 455
The Label and LinkLabel Controls 456
The TextBox Control 457
TextBox Properties 457
TextBox Events 458
Adding the Event Handlers 460
The RadioButton and CheckBox Controls 464
RadioButton Properties 465
RadioButton Events 465
CheckBox Properties 466
CheckBox Events 466
The GroupBox Control 466
The RichTextBox Control 470
RichTextBox Properties 470
RichTextBox Events 472
The ListBox and CheckedListBox Controls 477
ListBox Properties 477
ListBox Methods 478
ListBox Events 478
The ListView Control 481
ListView Properties 481
ListView Methods 481
ListView Events 481
ListViewItem 484
ColumnHeader 484
The ImageList Control 484

The TabControl Control **491**
TabControl Properties 491
Working with the TabControl 492
Summary **494**

CHAPTER 16: ADVANCED WINDOWS FORMS FEATURES **497**

Menus and Toolbars **498**
Two Is One 498
Using the MenuStrip Control 498
Creating Menus Manually 499
Properties of the ToolStripMenuItem 501
Adding Functionality to Menus 501
Toolbars **503**
ToolStrip Properties 504
ToolStrip Items 504
Adding Event Handlers 507
StatusStrip 509
StatusStripStatusLabel Properties 510
SDI and MDI Applications **512**
Building MDI Applications **513**
Creating Controls **522**
Adding Properties 524
Adding the Event Handlers 525
Debugging User Controls 527
Extending the LabelTextbox Control 527
Adding More Properties 528
Adding More Event Handlers 529
Adding a Custom Event Handler 529
Summary **530**

CHAPTER 17: DEPLOYING WINDOWS APPLICATIONS **533**

Deployment Overview **533**
ClickOnce Deployment **534**
Creating the ClickOnce Deployment 534
Installing the Application with ClickOnce 543
Creating and Using Updates of the Application 545
Visual Studio Setup and Deployment Project Types **546**
Microsoft Windows Installer Architecture **547**
Windows Installer Terms 548
Advantages of the Windows Installer 549
Creating an Installation Package for the MDI Editor **550**
Planning the Installation 550

Creating the Project 552
Project Properties 553
Packaging 553
Prerequisites 554
Setup Editors 556
File System Editor 556
Adding Items to Special Folders 557
File Properties 557
File Types Editor 559
Create Actions 560
Launch Condition Editor 561
User Interface Editor 561
Additional Dialogs 563
Building the Project 565
Installation 566
Welcome 566
Read Me 566
License Agreement 567
Optional Files 568
Select Installation Folder 568
Disk Cost 568
Confirm Installation 569
Progress 570
Installation Complete 571
Running the Application 571
Uninstall 571
Summary 571

PART III: WEB PROGRAMMING

CHAPTER 18: ASP.NET WEB PROGRAMMING 577

Overview of Web Applications 578
ASP.NET Runtime 578
Creating a Simple Page 578
Server Controls 587
ASP.NET Postback 588
ASP.NET AJAX Postback 593
Input Validation 597
State Management 600
Client-Side State Management 601
View State 601
Cookies 602

Server-Side State Management 603
Session 603
Application 605
Cache 605
Styles 606
Master Pages 611
Site Navigation 616
Authentication and Authorization 619
Authentication Configuration 619
Using Security Controls 623
Reading from and Writing to a SQL Server Database 626
Summary 634

CHAPTER 19: WEB SERVICES 637

Where to Use Web Services 637
A Hotel Travel Agency Application Scenario 638
A Book Distributor Application Scenario 638
Client Application Types 639
Application Architecture 639
Web Services Architecture 640
Calling Methods and the Web Services Description Language 640
Calling a Method 641
WS-I Basic Profile 642
Web Services and the .NET Framework 642
Creating a Web Service 643
WebService Attribute 643
WebMethod Attribute 643
WebServiceBinding Attribute 644
Client 645
SoapHttpClientProtocol 645
Alternative Client Protocols 645
Creating a Simple ASP.NET Web Service 645
Adding a Web Method 648
Testing the Web Service 649
Implementing a Windows Client 649
Calling the Service Asynchronously 655
Implementing an ASP.NET Client 658
Passing Data 659
Summary 662

CHAPTER 20: DEPLOYING WEB APPLICATIONS 665

Internet Information Services 665

IIS Configuration **666**
Copying a Website **669**
Publishing a Web Application **672**
Windows Installer **675**
Creating a Setup Program 675
Installing the Web Application 677
Summary **678**

PART IV: DATA ACCESS

CHAPTER 21: FILE SYSTEM DATA **683**

Streams **683**
The Classes for Input and Output **684**
The File and Directory Classes 686
The FileInfo Class 687
The DirectoryInfo Class 689
Path Names and Relative Paths 690
The FileStream Object 690
File Position 691
Reading Data 692
Writing Data 695
The StreamWriter Object 697
The StreamReader Object 699
Reading Data 701
Delimited Files 702
Reading and Writing Compressed Files 706
Serialized Objects **710**
Monitoring the File System **715**
Summary **722**

CHAPTER 22: XML **725**

XML Documents **726**
XML Elements 726
Attributes 727
The XML Declaration 728
Structure of an XML Document 728
XML Namespaces 729
Well-Formed and Valid XML 730
Validating XML Documents 730
DTDs 730
Schemas 731
Using XML in Your Application **734**
