About the Authors

James Whitehead II is the author of a number of popular addons for World of Warcraft, including LightHeaded, TomTom, Clique, PerfectRaid, and many other small but useful addons. He has been an active member of both the WoW UI and Lua communities since the World of Warcraft Beta began and has been writing addons ever since. When he actually has time to play the game, you can find him playing one of his many characters on the Emerald Dream (EU) server.

Jim currently resides in Oxford, England where he is pursuing his DPhil (PhD) in Computer Science at the Computing Laboratory. In his spare time he enjoys all things rowing, hacking on his Android phone, knitting, crocheting, and spending time with his friends.

Rick Roe—known in the WoW UI community as the zany goblin tinker Gazmik Fizzwidget—is the author of several popular addons including Feed-O-Matic and FactionFriend, as well as TrackMenu and a couple of others so useful that Blizzard made them obsolete by rolling their functionality into the default UI. When not slaving away for their goblin master, Rick's alter egos can often be found adventuring on Cenarius US.

Rick currently resides in Vancouver, Washington, with his wife and cats. His time outside of Azeroth is split between working to finish a computer science degree at Washington State University and building Mac and iPhone applications as an independent software developer.

About the Technical Editors

Daniel Stephens—more widely known in the WoW addon community as Iriel—was the Blizzard WoW UI Forum's first MVP. He has been helping others develop addons for several years, creating a few of his own along the way. His addons include DevTools (recently rolled into the base WoW UI) and he has made significant contributions to secure handlers and a number of other utilities. As somewhat of an altaholic, he has characters spread all over the realms, but considers Silver Hand (US) his original WoW home.

Daniel lives in the San Francisco bay area with his wife, cats, and camera. He spends his ''not free'' time doing systems design, architecture, and occasionally development work.

Esteban Santana Santana, known online as MentalPower, is both Lead Developer for the Auctioneer AddOns Package and one of the Administrators of Norganna's AddOns. He's been part of the WoW UI community since mid-2005 and has helped many people via the IRC channels and the various game and UI-related forums. When he logs into World of Warcraft, you can find him on the US-Alleria realm trying to level his various characters on the Emerald Dream guild.

Esteban currently resides in Carolina, Puerto Rico, and is a jack-of-all-trades IT person for Liberty Cablevision. In his spare time, he enjoys thrashing his buddies in a good game of Rock Band on the XBox 360.

Acknowledgments

James and Lee Whitehead, thank you for walking alongside your children as we journey down the winding road of life; we're blessed to have the two of you in our lives. Michelle Hastings, thank you for being such a role model of strength and determination for your little brother.

Robert Whitehead, thank you for always being yourself and making sure I don't stray far from who I am. Gregory Whitehead, thank you for being there for me whenever I need to ''geek'' out, I don't know many people that can get as excited as I do about silly things. Tom Harper, thank you for what you give me every single day. Everything about you makes me feel like the luckiest person alive.

Jamie Anderson, Edward Wilman, Amelia Earl, Rhianedd Jewell, Erika Nitsch, Daniel Jordan, and all my other friends at Oxford, thank you for keeping me busy, for helping me make excuses, and for being such a bad influence.

To Karen Hobson and everyone at WowInterface who have put up with me for five years now, thank you for all of your efforts in organizing all three books. To Mike, Kevin, Tom, Jacob, Sam, and everyone at Blizzard, thank you for creating such an amazing game and supporting us in our documentation efforts. To everyone at Wiley who helped bring these books into existence, thank you for your efforts to provide resources for the WoW user interface community. To Rick, thank you for stepping in when we needed you the most; your work has been instrumental in making this book what it is today. To Daniel, Nevin, and Esteban, thank you for all of your help in shaping the edges of this edition.

Finally, thank you to the World of Warcraft user interface community for everything you do.

— Jim

I’d first like to thank my coauthor, Jim, for offering me the opportunity to ‘‘graduate’’ from tech editing on the first edition to authoring on this second version. Crazy as the schedules and deadlines may have been, I’m still happier having been able to write my part instead of worrying about mucking with someone else’s work in order to satisfy my nitpicky tendencies. Thanks also for all your infrastructure work—without your website and database I’d have been a scribe without paper.

To Daniel and Esteban fell the unenviable task of performing the role I did on the first edition—catching all the silly code errors and obtuse explanations we dumb authors make—and with it my sympathy and gratitude. I can but hope I haven’t made your work too hard.

Thanks to Karen for playing den mother to the rowdy WoW UI community and giving us all a place to hook up; if it weren’t for your efforts I’d never have found my way into this project. Thanks as well to Scott, Maryann, and everyone at Wiley for making the project happen!

Thanks (again) to Daniel and Jim not just for your work on the book but for providing development tools without which my tasks would’ve been a whole lot harder. And of course, thanks to my family, Karen, Doug, and Brad, for putting up with me for a couple decades and making me the person I am, and to my wonderful wife Anne: I can’t imagine life without you, much less without the loving support you give for whatever crazy ideas I set myself to.

Finally, a very special thank you to Mike, Jacob, Sam, and Tom at Blizzard, without whose patience and willingness to answer oblique questions outside a normal work schedule we wouldn’t have been able to figure out several important chunks of the API we’re documenting. Next time I’m in SoCal, your drinks are on my tab.

— Rick

Chunks 37
Summary 37

Chapter 3 Basic Functions and Control Structures 39

Using Functions 39
Creating a Function 39
Local Functions 40

Function Arguments and Returns 41
Converting Celsius to Fahrenheit 41
Empty Arguments 42
No Return Values 42
Functions as Lua Values 42
Making Decisions with the if Statement 43
Simple Conditionals 43
Complex Expressions 44
Extended Conditionals 44
Displaying a Personalized Greeting 45
Repeating Actions with the while Statement 46
Computing Factorials 46
Differences Between while and repeat 47
Looping with the Numeric for Statement 48
Computing Factorials 50
Evaluation of Loop Conditions 50
Variable Scope in for Loops 50
Summary 51

Chapter 4 Working with Tables 53
Storing Data Using Tables 53
Creating and Indexing Tables 54
Clearing an Element from a Table 54
Shortcuts for String Keys 55
Creating Populated Tables 55
Using Tables as Arrays 56
Creating an Array 57
Getting the Length of an Array 57
Adding Elements to an Array 58
Removing Elements from an Array 60
Sorting the Elements of an Array 61
Using Tables as Namespaces 61
Creating a Namespace of Utility Functions 62
Adding Functions to a Namespace 62
Storing an Existing Function 62
Defining a New Function 63
Object-Oriented Programming with Tables 63
Creating a Non-Object-Oriented Counter 63
Using Tables as Simple Objects 64
Using : to Call Object Methods 65
Defining Functions Using : 66
Making a Better Counter 67

Extending Tables with Metatables 68
Adding a Metatable 68
Defining Metamethods 69
Defining Basic Arithmetic Using __add, __sub, __mul, and __div 70
Defining Negation Using __unm 71
Creating Meaningful Output with __tostring 71
Concatenating Tables Using __concat 72
Exploring Fallback Tables with __index 72
Catching Creation of Keys with __newindex 74
Bypassing Metatables 75
value = rawget(tbl, key) 75
rawset(tbl, key, value) 76
Summary 76

Chapter 5 Advanced Functions and Control Structures 77
Multiple Return Values 77
Converting Hex to RGB 77
Assigning Multiple Values 78
Missing Return Values? 79
Multiple Return Values in World of Warcraft 79
Using a Dummy Variable 80
Using the select() Function 81
Accepting a Variable Number of Arguments 81
Declaring a Vararg Function 82
Using select() with . . . 83
Generic for Loops and Iterators 84
Syntax of Generic for 84
Traversing the Array Part of a Table 85
Traversing an Entire Table 86
Clearing a Table 86
Using Other Iterators 87
Sorting an Array of Table Data 87
Define Example Data 88
Default Sort Order 88
Creating a Comparison Function 88
Creating a More Complex Sort Function 89
Summary 90

Chapter 6 Lua Standard Libraries 91
Table Library 92
str = table.concat (table [, sep [, i [, j]]]) 92
table.insert (table, [pos,] value) 92
max = table.maxn (table) 93

value = table.remove (table [, pos]) 93
table.sort (table [, comp]) 93
String Utility Functions 94
Formatting New Strings 95
Pattern Matching 98
Character Classes 98
Pattern Items 100
Pattern Captures 101
Pattern Anchors 102
Pattern Examples 102
Pattern Matching Functions 102
string.gmatch(s, pattern) 103
string.gsub(s, pattern, repl [, n]) 103
string.match(s, pattern [, init]) 104
string.find(s, pattern [, init [, plain]]) 104
Math Library 105
World of Warcraft Additions to Lua 108
Function Aliases 109
Summary 110

Chapter 7 Learning XML 111

XML as a Markup Language 111
XML's Relationship to HTML 112
Components of XML 112
XML Tags 113
XML Elements 113
XML Attributes 113
XML Entities 114
Creating Well-Formed XML 114
Validating an XML Document 115

Special Combat Events 395
Unit GUIDs 396
Format of GUIDs 397
Unit Flags 398
COMBATLOG_OBJECT_TYPE_MASK 398
COMBATLOG_OBJECT_CONTROL_MASK 398
COMBATLOG_OBJECT_REACTION_MASK 399
COMBATLOG_OBJECT_AFFILIATION_MASK 399
COMBATLOG_OBJECT_SPECIAL_MASK 399
Using CombatLog_Object_IsA 400
Writing CombatStatus 401
Creating the Basic Addon Structure 401
Initializing CombatStatus 402
Updating Pet Mappings 405
Storing Damage and Healing Information 405
Taking ‘‘Snapshots’’ of Damage and Healing 407

Writing an OnUpdate Function 408
Responding to Events 408
COMBAT_LOG_EVENT_UNFILTERED 409
PARTY_MEMBERS_CHANGED 409
UNIT_PET 409
PLAYER_REGEN_DISABLED 409
PLAYER_REGEN_ENABLED 410
Creating the Frame Display 410
Updating the Frame Display 410
Future Additions 412
Summary 412

Chapter 22 Creating Scroll Frames 413
Using Scroll Frames 414
Adding a Scroll Child 415
Manipulating a ScrollFrame 416
Adding Scroll Bars 417
Creating Faux Scroll Frames 419
Adding Scroll Bars 422
Scrolling with the Mouse Wheel 423
Problems with Slider Precision 423
Summary 424
The Code 424
ScrollFrameTest 424
MacroIconTest 426

Chapter 23 Creating Dropdown Menus 431
Creating a Basic Dropdown 431
Adding a Toggle Button 432
Creating a Dropdown Frame 433
Initializing the Dropdown 433
Adding Buttons to the Dropdown 433
Calling UIDropDownMenu_Initialize() 434
Toggling the Dropdown Menu 434
Testing the Dropdown 435
Creating Multilevel Dropdowns 436
Adding Functionality to Dropdowns 437
Customizing Text Elements 438
Function Menu Items 440
CheckButton Menu Items 440
ColorPicker Menu Items 441
Using Dropdowns for Selection 443
Automating Menu Creation with EasyMenu 445
Creating Dynamic Menus 447
Summary 449

Chapter 24 **Scanning and Constructing Tooltips** **451**
Understanding the Tooltip System 451
Different Types of Tooltips 452
Contextual Tooltips 452
Static Tooltips 453
Tooltip Contents 453
Custom Text in a Tooltip 453
Game Element Tooltips 455
Adding Information to the Tooltip 458
Loading the Tooltip with Item Information 458
Getting Information from Tooltips 460
Accessing Individual Tooltip Lines 460
Checking Soulbound Status 461
Using Global Strings for Localization 461
Replacing a Script Instead of Hooking a Script 461
Summary 462

Chapter 25 **Taking Protected Action in Combat** **463**
Snippets: The Basis of Secure Action 463
How Can Addon Code Be Secure? 463
Writing a Snippet 464
Secure Handler Frames 464
Handler Template Reference 466
Integrating a Click Handler with a Secure Action Button 468
Preserving State and Controlling Information 473
Private Global Environments 474
Secure API Functions 475
The control Object 476
Frame Handles 477
Allowed Actions 479
Additional or Changed Actions 479
Wrapping Frame Scripts 482
A Simple Click Wrapper 483
Using a Post-Hook 484
Script Wrapper Reference 485
Triggered Changes 486
State Drivers 486
State Responders 487
Responding to Show/Hide 487
Responding to Attribute and State Changes 488
State Conditionals 490
Target Specifiers and Unit Conditions 491
State Variables 492
Unit Conditions 492
General Conditions 493

Summary 496
The Code 496
BlessedMenus 496

Chapter 26 Creating Unit Frames with Group Templates 501

Configuring a SecureGroupHeader 501
Configuration Options 502
Initial Configuration Function 505
Creating SquareUnitFrames 506
Constructing the Template 506
Creating a Header Template 508
Setting Name and Status Bars 509
Nudging Frame Levels 511
Responding to Events and Clicks 511
Targeting the Unit on Left-Click 511
Moving the Header 512
Health Update Events 513
Power Update Events 514
Responding to Name Changes 516
Enhancing SquareUnitFrames 516
Highlighting Units on Mouseover 516
Showing the Targeted Unit 517
Displaying Threat Levels 518
Showing Dead Players 519
Displaying Unit Names 521
Adding Pets to SquareUnitFrames 523
Creating a SecureGroupPetHeaderTemplate 526
Summary 526
The Code 526
SquareUnitFrames 526

Part IV Reference 537
