Authors' Biography

Preface

Part i: Introduction

Chapter 1: What is Urban Remote Sensing?

1.1 Introduction

1.2 Remote Sensing and Urban Studies

1.3 Remote Sensing Systems for Urban Areas

1.4 Algorithms and Techniques for Urban Attribute Extraction

1.5 Urban Socioeconomic Analyses

1.6 Urban Environmental Analyses

1.7 Urban Growth and Landscape Change Modeling

Summary and Concluding Remarks

References

**Part ii: Remote Sensing
Systems for Urban Areas**

**Chapter 2: Use of Archival Landsat
Imagery to Monitor Urban Spatial
Growth**

2.1 Introduction

2.2 Landsat Program and Imaging Sensors

*2.3 Mapping Urban Spatial Growth in an
American Metropolis*

2.4 Discussion

Summary and Concluding Remarks

References

**Chapter 3: Limits and Challenges of
Optical Very-High-Spatial-Resolution
Satellite Remote Sensing for Urban
Applications**

3.1 Introduction

3.2 Geometrical Problems

3.3 Spectral Problems

3.4 Mapping Limits and Challenges

*3.5 Adding the Time Factor: VHR and
Change Detection*

3.6 A Possible Way Forward

3.7 Building Damage Assessment

[Conclusions](#)
[References](#)

[Chapter 4: Potential of Hyperspectral Remote Sensing for Analyzing the Urban Environment](#)

[4.1 Introduction](#)

[4.2 Spectral Characteristics of Urban Surface Materials](#)

[4.3 Automated Identification of Urban Surface Materials](#)

[4.4 Results and Discussion of their Potential for Urban Analysis](#)

[References](#)

[Chapter 5: Very-High-Resolution Spaceborne Synthetic Aperture Radar and Urban Areas: Looking into Details of a Complex Environment](#)

[5.1 Introduction](#)

[5.2 Before Spaceborne High-Resolution SAR](#)

[5.3 High-Resolution SAR](#)

[Conclusions](#)

[Acknowledgments](#)

[References](#)

[Chapter 6: 3D Building Reconstruction from Airborne Lidar](#)

Point Clouds Fused with Aerial Imagery

6.1 Lidar-Driven Building Models: Related Work

6.2 Our Building Reconstruction Method

6.3 Results and Discussion

Concluding Remarks

Acknowledgments

References

Part iii: Algorithms and Techniques for Urban Attribute Extraction

Chapter 7: Parameterizing Neural Network Models to Improve Land Classification Performance

7.1 Introduction

7.2 Fundamentals of Neural Networks

7.3 Internal Parameters and Classification Accuracy

7.4 Training Algorithm Performance

7.5 Toward a Systematic Approach to Image Classification by Neural Networks

Future Research Directions

References

Chapter 8: Characterizing Urban Subpixel Composition Using Spectral Mixture Analysis

8.1 Introduction

8.2 Overview of SMA Implementation

8.3 Two Case Studies

Conclusions

Acknowledgments

References

Chapter 9: An Object-Oriented Pattern Recognition Approach for Urban Classification

9.1 Introduction

9.2 Object-Oriented Classification

9.3 Data and Study Area

9.4 Methodology

9.5 Results and Discussion

Conclusion

References

Chapter 10: Spatial Enhancement of Multispectral Images on Urban Areas

10.1 Introduction

10.2 Multiresolution Fusion Scheme

10.3 Component Substitution Fusion Scheme

10.4 Hybrid MRA—Component Substitution Method

10.5 Results

Conclusions

References

Chapter 11: Exploring the Temporal Lag between the Structure and Function of Urban Areas

11.1 Introduction

11.2 Micro and Macro Urban Remote Sensing

11.3 The Temporal Lag Challenge

11.4 Structural-Functional Links

11.5 Temporal-Structural-Functional Links

11.6 Empirical Measurement of Temporal Lags

Conclusions

References

Part iv: Urban Socioeconomic Analyses

Chapter 12: A Pluralistic Approach to Defining and Measuring Urban Sprawl

12.1 Introduction

12.2 The Diversity of Definitions of Sprawl

12.3 Historic Forms of “Urban Sprawl”

12.4 Qualitative Dimensions of Sprawl and Quantitative Variables for Measuring Them
Conclusion
References

Chapter 13: Small Area Population Estimation with High-Resolution Remote Sensing and Lidar

13.1 Introduction
13.2 Study Sites and Data
13.3 Methodology
13.4 Results
Discussion and Conclusions
Acknowledgments
References

Chapter 14: Dasymetric Mapping for Population and Sociodemographic Data Redistribution

14.1 Introduction
14.2 Dasymetric Maps, Dasymetric Mapping, and Areal Interpolation
14.3 Application Example: Metropolitan Atlanta, Georgia
Conclusions
Acknowledgments
References

**Chapter 15: Who's in the Dark—
Satellite based Estimates of
Electrification Rates**

15.1 Introduction

15.2 Methods

15.3 Results

15.4 Discussion

Conclusion

Acknowledgments

References

**Chapter 16: Integrating Remote
Sensing and GIS for Environmental
Justice Research**

16.1 Introduction

16.2 Environmental Justice Research

**16.3 Remote Sensing for Environmental
Equity Analysis**

**16.4 Integrating Remotely Sensed and
Other Spatial Data Using GIS**

**16.5 Case Study: Vegetation and
Socioeconomic Character in Philadelphia,
Pennsylvania**

Conclusion

References

**Part v: Urban Environmental
Analyses**

Chapter 17: Remote Sensing of High Resolution Urban Impervious Surfaces

17.1 Introduction

17.2 Impervious Surface Estimation

17.3 Pixel-Based Models for Estimating High-Resolution Impervious Surface

17.4 Object-Based Models for Estimating High-Resolution Impervious Surface

Conclusions

References

Chapter 18: Use of Impervious Surface Data Obtained from Remote Sensing in Distributed Hydrological modeling of urban areas

18.1 Introduction

18.2 Spatially Distributed Hydrological Modeling

18.3 Impervious Surface Mapping

18.4 The WetSpa Model

18.5 Impact of Different Approaches for Estimating Impervious Surface Cover on Runoff Calculation and Prediction of Peak Discharges

Conclusions

Acknowledgments

References

Chapter 19: Impacts of Urban Growth on Vegetation Carbon Sequestration

19.1 Introduction

19.2 Vegetation Productivities and Estimation

19.3 Data and Analysis

19.4 Results

19.5 Discussion

Conclusions

Acknowledgments

References

Chapter 20: Characterizing Biodiversity in Urban Areas Using Remote Sensing

20.1 Introduction

20.2 Remote Sensing Methods in Urban Biodiversity Studies

20.3 Hierarchical Levels and Definitions of Urban Ecosystems

20.4 Using Remote Sensing to Interpret Effects of Urbanization on Species Distribution

20.5 Long-term Monitoring of Biodiversity in Urban Green Areas—Methodology Development

20.6 Applications in Urban Planning and Management

Conclusions

[Acknowledgments](#)
[References](#)

The publisher is not associated with any product or vendor mentioned in this book. This publication is designed to provide accurate and authoritative information

in regard to the subject matter covered. It is sold on the understanding that the publisher is not engaged in rendering professional services. If professional advice or other expert assistance is required, the services of a competent professional should be sought.

***Library of Congress Cataloging-in-Publication Data
applied for.***

A catalogue record for this book is available from the British Library

This book is published in the following electronic format:
ePDF:9780470979570, Wiley Online: 9780470979563, ePub:
9780470979891

This book is dedicated to the memory of Dr. Chor-Pang (C.P.) Lo (1939–2007), whose creative and groundbreaking work in urban remote sensing inspires a new generation of scholars working for a better understanding of the complex, dynamic urban environment.
