About the Authors

Rob Bovey

Rob Bovey is a software developer specializing in Microsoft Office, Visual Basic, and SQL Server applications. He is founder and president of the custom application development firm Application Professionals. Rob developed several Addins shipped by Microsoft for Excel. He also co-authored the Microsoft Excel 97 Developers Kit. Rob earned his Bachelor of Science degree from The Rochester Institute of Technology and his MBA from the University of North Carolina at Chapel Hill. He is a Microsoft Certified Systems Engineer (MCSE) and a Microsoft Certified Solution Developer (MCSD). Microsoft has awarded him the title of Most Valuable Professional each year since 1995.

I would like to thank my wife Michelle for putting up with my insatiable computer habit and my dog Harley for keeping my feet warm while I work.

Stephen Bullen

Stephen Bullen lives and works in Carlow, Ireland and is the father of twins Jane and Katie. After graduating from Oxford University in 1992 with an MA in Engineering, Economics and Management, Stephen joined Price Waterhouse Management Consultants where he spent five years developing Excel applications for a wide range of multinational corporations.

In 1997, Stephen started his own company, Business Modelling Solutions Ltd., specializing in Excel and Access development and consulting. The BMS web site, <http://www.BMSLtd.ie>, contains a large number of examples of his work, including tools and utilities to extend Excel's functionality and many examples of Excel development techniques.

Stephen enjoys helping other Excel users and devotes a lot of his spare time to answering questions in the CompuServe Excel forum and Microsoft's Internet Newsgroups. In recognition of his contributions and knowledge, Microsoft has awarded him the status of Most Valuable Professional every year since 1996.

Stephen can be contacted by e-mail at Stephen@BMSLtd.co.uk, though any Excel support questions should be asked in the newsgroups.

I would like to start by thanking all those who purchased a copy of the Excel 2000 VBA Programmer's Reference and sent e-mails of congratulations and suggestions for this update. It is your support that convinced us to comprehensively update the book for Excel 2002. I'd like to thank John Green for agreeing to co-author the update, Rob Bovey for contributing the ADO chapter, and Robert Rosenberg for taking over the Reference sections. As always, the people at Wrox Press and the book's technical reviewers worked wonders, and it is their contribution that has made this the excellent book that I hope you'll agree it is.

On a personal note, I'd like to dedicate my chapters to the eye specialists, doctors, and nurses at the Temple Street Children's Hospital in Dublin for dealing with Jane's tumour so well, and to everyone in the Ford ProPrima team for their friendship and support over the past year.

John Green

John Green lives and works in Sydney, Australia, as an independent computer consultant, specializing in Excel and Access. With 30 years of computing experience, a Chemical Engineering degree and an MBA, he draws from a diverse background. He wrote his first programs in FORTRAN, took a part in the evolution of specialized planning languages on mainframes and, in the early 80s, became interested in spreadsheet systems including Excel and Lotus 1-2-3.

John established his company, Execuplan Consulting, in 1980, specializing in developing computer-based planning applications and in training. He has led training courses for software applications and operating systems both in Australia and overseas.

John has had regular columns in a number of Australian magazines and has contributed chapters to a number of books including *Excel Expert Solutions* and *Using Visual Basic for Applications 5*, published by Que.

Since 1995 he has been accorded the status of Most Valuable Professional by Microsoft for his contributions to the CompuServe Excel forum and MS Internet newsgroups. Contact him at jgreen@enternet.com.au.

Robert Rosenberg

Robert Rosenberg runs his own consulting business which specializes in Microsoft Office advanced training and custom solutions for numerous entertainment, financial, and legal organizations. As a Microsoft Valuable Professional in Excel, he also continually offers advanced online support on Excel on behalf of Microsoft to users of their Internet newsgroups.

He has also been involved in several other published materials on Excel. He's been the technical editor for all of QUE publishing's intermediate Excel books for the last four years and has been involved in the creation of several training manuals for Excel, PowerPoint, and Word.

He enjoys computers (of course), golf, bowling, and still plays hockey. Robert can be contacted at rosenberg@r-cor.com. Visit his website at <http://www.r-cor.com>.

I'd like to thank John Green, Stephen Bullen, and Rob Bovey for allowing me on the same project as three of the most brilliant minds in Excel today. It was an honor to take up the challenge. Special thanks goes to Rob Bovey, my mentor, who has always been there for me, answered all of my annoying questions, taught me countless techniques, and provided me with this opportunity.

To my best friend and brother Elliot, who has stuck by me through thick and thin.

And finally, for my Mom and Dad, their love never stops.

Table of Contents

Chapter 1: Introduction to Excel	1
Early Spreadsheet Macros	1
The XLM Macro Language	2
Excel 5	2
Excel 97	3
Excel 2000	4
Excel 2002	4
Excel 2002 VBA Programmer's Reference	5
Version Issues	5
What You Need to Use this Book	6
Conventions Used	6
In Case of a Crisis...	6
Feedback	7
Questions?	7
Chapter 2: Primer in Excel VBA	9
Using the Macro Recorder	10
Recording Macros	10
The Personal Macro Workbook	12
Running Macros	13
Shortcut Keys	13
Absolute and Relative Recording	14
The Visual Basic Editor	15
Code Modules	16
Procedures	17
The Project Explorer	17
The Properties Window	18
Other Ways to Run Macros	18
Worksheet Buttons	19
Forms Toolbar	19
Control Toolbox Toolbar	20
Toolbars	22
Event Procedures	23
Removing an Attached Toolbar	24

Table of Contents

User Defined Functions	24
Creating a UDF	25
Direct Reference to Ranges	27
What UDFs Cannot Do	28
The Excel Object Model	28
Objects	28
Collections	29
Properties	30
Methods	31
Events	32
Getting Help	33
The Object Browser	34
Experimenting in the Immediate Window	35
The VBA Language	36
Basic Input and Output	36
Parameters Specified by Position	37
Parameters Specified by Name	37
Constants	39
Return Values	39
InputBox	40
Calling Functions and Sub Procedures	41
The Call Statement	42
Parentheses and Argument Lists	42
Without the Call Statement	42
With the Call Statement	43
Variable Declaration	44
Option Explicit	45
Scope and Lifetime of Variables	46
Variable Type	47
Declaring Variable Type	49
Declaring Function and Parameter Types	49
Constants	49
Variable Naming Conventions	50
Object Variables	51
With...End With	52
Making Decisions	53
If Statements	53
Block If	53
Select Case	54
Looping	56
Do...Loop	56
For...Next Loop	58
For Each...Next Loop	59
Arrays	60
Multi-Dimensional Arrays	61
Dynamic Arrays	62

Caller	80
Summary	81
Chapter 4: Workbooks and Worksheets	83
The Workbooks Collection	83
Getting a FileName from a Path	84
Files in the Same Directory	87
Overwriting an Existing Workbook	87
Saving Changes	88
The Sheets Collection	89
Worksheets	89
Copy and Move	91
Grouping Worksheets	93
The Window Object	94
Synchronizing Worksheets	96
Summary	97
Chapter 5: Using Ranges	99
Activate and Select	99
Range Property	100
Shortcut Range References	101
Ranges on Inactive Worksheets	102
Range Property of a Range Object	103
Cells Property	103
Cells used in Range	105
Ranges of Inactive Worksheets	105
More on the Cells Property of the Range Object	105
Single-Parameter Range Reference	107

Table of Contents

Offset Property	108
Resize Property	109
SpecialCells Method	111
Last Cell	111
Deleting Numbers	113
CurrentRegion Property	113
End Property	115
Referring to Ranges with End	115
Summing a Range	116
Columns and Rows Properties	117
Areas	118
Union and Intersect Methods	119
Empty Cells	120
Transferring Values between Arrays and Ranges	122
Deleting Rows	124
Summary	127
Chapter 6: Using Names	129
Naming Ranges	130
Using the Name Property of the Range Object	131
Special Names	131
Storing Values in Names	132
Storing Arrays	133
Hiding Names	134
Working with Named Ranges	134
Searching for a Name	135
Searching for the Name of a Range	137
Determining which Names Overlap a Range	138
Summary	140
Chapter 7: PivotTables	143
Creating a PivotTable Report	144
Excel 2000	146
Excel 97	147
PivotCaches	148
PivotTables Collection	148
PivotFields	149
CalculatedFields	152

PivotItems	153
Grouping	153
Visible Property	156
CalculatedItems	157
PivotCharts	158
External Data Sources	159
Summary	161
Chapter 8: Filtered Lists	163
Structuring the Data	163
Data Form	164
AutoFilter	165
Custom AutoFilter	165
Adding Combo Boxes	166
Date Format Problems	168
Getting the Exact Date	169
Copying the Visible Rows	170
Finding the Visible Rows	171
Advanced Filter	172
Summary	174
Chapter 9: Generating Charts	177
Chart Sheets	177
The Recorded Macro	179
Adding a Chart Sheet Using VBA Code	179
Embedded Charts	180
Using the Macro Recorder	180
Adding an Embedded Chart Using VBA Code	181
Editing Data Series	182
Defining Chart Series with Arrays	185
Converting a Chart to use Arrays	187
Determining the Ranges used in a Chart	188
Chart Labels	189
Summary	190
Chapter 10: Event Procedures	193
Worksheet Events	193
Enable Events	194
Worksheet Calculate	195

Table of Contents

Chart Events	196
Before Double Click	196
Workbook Events	198
Save Changes	200
Headers and Footers	200
Summary	201
Chapter 11: Adding Controls	203
The Toolbars	203
ActiveX Controls	204
Forms Toolbar Controls	207
Dynamic ActiveX Controls	210
Controls on Charts	212
Summary	214
Chapter 12: Office Files and Folders	217
FileSearch	218
FoundFiles	220
PropertyTests	220
FileTypes	222
SearchScopes	223
ScopeFolder	224
SearchFolders	226
FileDialog	228
FileDialogFilters	229
FileDialogSelectedItem	230
Dialog Types	230
Execute Method	230
MultiSelect	230
Summary	232
Chapter 13: UserForms	235
Displaying a UserForm	235
Creating a UserForm	237
Directly Accessing Controls in UserForms	239
Stopping the Close Button	243
Maintaining a Data List	243
Modeless UserForms	249
Progress Indicator	250

Variable UserForm Name	251
Summary	251
Chapter 14: Command Bars	253
<hr/>	
Toolbars, Menu Bars, and Popups	253
Excel's Built-In Command Bars	256
Controls at All Levels	258
Facelds	261
Creating New Menus	263
The OnAction Macros	265
Passing Parameter Values	265
Deleting a Menu	266
Creating a Toolbar	267
Pop-Up Menus	270
Showing Pop-Up Command Bars	272
Disabling Command Bars	274
Disabling Shortcut Access to Customize	275
Table-Driven CommandBar Creation	276
Summary	287
Chapter 15: Class Modules	289
<hr/>	
Creating Your Own Objects	290
Property Procedures	291
Creating Collections	292
Class Module Collection	293
Encapsulation	295
Trapping Application Events	295
Embedded Chart Events	297
A Collection of UserForm Controls	299
Referencing Classes Across Projects	301
Summary	302
Chapter 16: Addins	305
<hr/>	
Hiding the Code	305

Table of Contents

Creating an Addin	306
Closing Addins	307
Code Changes	308
Saving Changes	308
Interface Changes	309
Installing an Addin	311
AddinInstall Event	312
Removing an Addin from the Addins List	313
The Code for Addin1.xla	314
Summary	314
Chapter 17: Automation Addins and COM Addins	317
Automation Addins	317
A Simple Addin – Sequence	317
Registering Automation Addins with Excel	319
Using Automation Addins	320
The IDTExtensibility2 Interface (Introduction)	321
A Complex Addin – RandUnique	324
COM Addins	328
The IDTExtensibility2 Interface (Continued)	328
Registering a COM Addin with Excel	329
The COM Addin Designer	331
Linking to Excel	332
Using the COM Addin from VBA	335
Linking to Multiple Office Applications	337
Summary	339
Chapter 18: SmartTags	341
The FileName SmartTag	342
Anatomy of a SmartTag	343
The SmartTag Unique Identifier	343
The SmartTag Recognizer class	345
The SmartTag Actions class	349
Registering SmartTags	355
Using the FileName SmartTag	356
Controlling SmartTags with VBA	357
Check if a Recognizer is Active	358
Remove a Tag from a Range	358
Add a Tag to a Range	359
The Problems with SmartTags	360
The Recognize Method	360
Coverage	361
Summary	361

Chapter 19: Interacting with Other Office Applications	363
Establishing the Connection	364
Late Binding	364
Early Binding	366
Opening a Document in Word	367
Accessing an Active Word Document	368
Creating a New Word Document	369
Access and DAO	370
Access, Excel and, Outlook	372
When is a Virus not a Virus?	374
Summary	376
Chapter 20: Data Access with ADO	379
An Introduction to Structured Query Language (SQL)	379
The SELECT Statement	380
The INSERT Statement	382
The UPDATE Statement	382
The DELETE Statement	383
An Overview of ADO	384
The Connection Object	385
Connection Object Properties	386
Connection Object Methods	387
Connection Object Events	389
Connection Object Collections	389
The Recordset Object	389
Recordset Object Properties	389
Recordset Object Methods	391
Recordset Object Events	393
Recordset Object Collections	393
The Command Object	394
Command Object Properties	394
Command Object Methods	394
Command Object Collections	395
Using ADO with Microsoft Access	396
Connecting to Microsoft Access	397
Retrieving Data from Microsoft Access Using a Plain Text Query	397
Retrieving Data from Microsoft Access Using a Stored Query	399
Inserting, Updating, and Deleting Records with Plain Text SQL in Microsoft Access	400
Using ADO with Microsoft SQL Server	402
Connecting to Microsoft SQL Server	402
Microsoft SQL Server Stored Procedures	404
Multiple Recordsets	407
Disconnected Recordsets	409
Using ADO with Non-Standard Data Sources	411
Querying Microsoft Excel Workbooks	411
Inserting and Updating Records in Microsoft Excel Workbooks	413
Querying Text Files	414
Summary	415

Chapter 21: Excel and the Internet	417
So What's all the Hype About?	418
Using the Internet for Storing Workbooks	418
Using the Internet as a Data Source	419
Opening Web Pages as Workbooks	419
Using Web Queries	420
Parsing Web Pages for Specific Information	422
Using the Internet to Publish Results	423
Setting Up a Web Server	423
Saving Worksheets as Web Pages	424
Adding Interactivity with the Web Components	425
Using the Internet as a Communication Channel	426
Communicating with a Web Server	427
Sending Data from the Client to the Server Application	427
Sending Data from the Server Application to the Client	428
A Web Server Application – Error Logging	428
XML	435
XML Vocabularies	436
The XML-SS Schema	437
Using XSLT to Transform XML	439
Summary	443
Chapter 22: International Issues	445
Changing Windows Regional Settings and the Office XP UI Language	445
Responding to Regional Settings and the Windows Language	446
Identifying the User's Regional Settings and Windows Language	446
VBA Conversion Functions from an International Perspective	447
Implicit Conversion	447
Date Literals	448
The IsNumeric and IsDate Functions	449
The CStr Function	449
The CDbI, CSng, CLng, CLnt, CByte, CCur, and CDec Functions	449
The CDate and DateValue Functions	449
The CBool	449
The Format Function	449
The FormatCurrency, FormatDateTime, FormatNumber, and FormatPercent Functions	450
The Str Function	450
The Val Function	451
Application.Evaluate	451
Interacting with Excel	452
Sending Data to Excel	452
Reading Data from Excel	455
The Rules for Working with Excel	455

Interacting with Users	455
Paper Sizes	456
Displaying Data	456
Interpreting Data	456
