Part I Social-Ecological Systems in Fisheries

1 Introduction

Rosemary E. Ommer and R. Ian Perry

Reference

**2 Restoring Unity: The Concept of
Marine Social-ecological Systems**

Fikret Berkes

Introduction

**Social-ecological systems concept and
background**

**Complexity, globalization, and social-
ecological systems**

Participatory management and governance

Conclusions

Acknowledgements

References

Part II Modeling

3 Predicting the Impacts and Socio-Economic Consequences of Climate Change on Global Marine Ecosystems and Fisheries: The QUEST fish Framework

Manuel Barange, Icarus Allen, Eddie Allison, Marie-Caroline Badjeck, Julia Blanchard, Benjamin Drakeford, Nicholas K. Dulvy, James Harle, Robert Holmes, Jason Holt, Simon Jennings, Jason Lowe, Gorka Merino, Christian Mullon, Graham Pilling, Lynda Rodwell, Emma Tompkins, and Francisco Werner

Introduction

Framing the problem

Geographical and temporal framework

The role of GCMs and RCMs

Developing physical-biological models for the shelf seas

Estimating potential fish production

Estimating socio-economic consequences

Methodology for national vulnerability assessment

Methodology for global assessment of a marine-based commodity: fishmeal

Opportunities and boundaries of the QUEST_Fish approach

Endnotes

References

4 Fleets, Sites, and Conservation

Goals: Game Theoretic Insights on

Management Options for

Multinational Tuna Fisheries

Kathleen Miller, Peter Golubtsov, and Robert McKelvey

Introduction

Background - Tuna exploitation and management in the Western and Central Pacific

The model

The single-season subgame: The split-stream extensive model

The two-fleet interior game

The RFMO-guided seasonal game between distant-water fleets and coastal countries

Simulations and implications

Game structure of RFMO-sites-fleets interaction

Policy choices for sustaining stocks

Effects of coalition-formation

Climate-related shifts in distribution of stocks

Summary, policy implications and future directions

Acknowledgement

Endnotes

References

5 Fishing the Food Web: Integrated Analysis of Changes and Drivers of Change in Fisheries of the Bay of Biscay

Olivier Thébaud and Fabian Blanchard

Introduction

Patterns of change in fisheries landings by French fleets

Drivers of change

Institutional context: a case of “regulated open access”

Increased competition in markets for fish

Effects of sea warming on the fish community structure

Perspectives

Acknowledgements

Endnotes

References

6 Interdisciplinary Modeling for an Ecosystem Approach to Management

in Marine Social-Ecological Systems
Anthony M. Starfield and Astrid Jarre

Introduction

Focusing attention and setting objectives

A model of a model

Rapid prototyping

The question of balance

Frame-based modeling

People and resources

Concluding remarks

Acknowledgements

References

7 People's Seas: "Ethno-oceanography" as an Interdisciplinary Means to Approach Marine Ecosystem Change

Maria A. Gasalla and Antonio C. S. Diegues

Introduction

Defining "ethno-oceanography"

Ethnoecology approach

The significance of key communication: ethno-oceanography and changes in marine social-ecological systems of Brazil

"Ethno-oceanography" as a framework to approach climate and marine ecosystem change

Looking beyond uncertainty: implications of climate change to fisheries

Redefining the reach of ethno-oceanography: a conceptual approach

Concluding remarks

Acknowledgements

Endnotes

References

Part III Knowledge

8 The Utility of Economic Indicators to Promote Policy-Relevant Science for Climate Change Decisions

Judith Kildow

Introduction

Indicators

Economic indicators: a framework

Economic indicators function in multiple ways

The evidence from society

Conclusion

Endnotes

References

9 Scientific Advice for Fisheries Management in West Africa in the Context of Global Change

Bora Masumbuko, Moctar Bâ, P. Morand, P. Chavance, and Pierre Failler

Introduction

West African context

Method

ECOST/ISTAM survey results

Scientific advice: content and processes

Use and non-use of scientific advice and its implications

Improvement of the quality of scientific advice and its use in the decision process

Discussion

Conclusion

Acknowledgements

Endnotes

References

**10 Knowledge and Research on
Chilean Fisheries Resources:
Diagnosis and Recommendations for
Sustainable Development**

**Eleuterio Yáñez, Exequiel González,
Luis Cubillos, Samuel Hormazábal,
Héctor Trujillo, Lorena Álvarez,
Alejandra Órdenes, Milton Pedraza,
and Gustavo Aedo**

Introduction

Framework

**System structure, elements, interactions,
and knowledge to be considered**

Current status of knowledge

Governance of the fisheries system (a system of problems)

Discussion

Future research path for fisheries management

Endnotes

References

11 Moving Forward: Social-Ecological Interactivity, Global Marine Change and Knowledge for the Future

Barbara Neis

Introduction

Social-ecological knowledge

Knowing where we want to go and finding our way there

Conclusion

Endnote

References

Part IV Values

12 Unaccounted Values: Under-reporting Sardine Catches as a Strategy Against Poverty in the Bali Strait, Indonesia

Eny Anggraini Buchary, Tony J. Pitcher, and Ussif Rashid Sumaila

Introduction

Area description

The Lemuru fishery

Materials and methods

Data collection

Analytical methods

Results and discussion

Fate of landed lemuru and distribution of reported catch

Estimated true catch

Financial insecurity: lending schemes and debt-to-assets ratio

Measuring relative poverty in fisheries

Conclusions

Acknowledgements

Endnotes

References

13 “You Don’t Know What You’ve Got ‘Til It’s Gone”: The Case for Spiritual Values in Marine Ecosystem Management

Nigel Haggan

Introduction

Golden Rule #1: Love your neighbor as yourself

Golden Rule #2: The one with the gold makes the rules

Golden Rule #3: The gold goes where the gold grows

Concepts of value

The roots of whole ecosystem evaluation

Formal frameworks, 1987-1991

Measuring ecosystem value

A bridge between intrinsic and instrumental value

Conclusion

Acknowledgements

Appendix 1: Categories used in total economic value and ecosystem services frameworks

References

14 Social-Ecological Restructuring and Implications for Social Values

Grant Murray

Introduction

Approach and methods

Social-ecological restructuring: putting climate change in context

Changes in social structures and processes

Size and connection with fishing industry

Age structure

Internal stratification

Fishing as a way of life: now and in the future

Discussion

Conclusion

Endnotes

References

**15 Economic Valuation of Mangroves
in the Niger Delta: An
Interdisciplinary Approach**

**Godstime K. James, Jimmy O.
Adegoke, Ekechukwu Saba, Peter
Nwilo, Joseph Akinyede, and
Sylvester Osagie**

Introduction

Study area

**Integration of remote sensing and socio-
economic data**

Economic valuation of mangrove resources

Methodology

Remote sensing analysis

Focus group analysis

Household survey

Empirical data processing

**Estimation of net income from the sale of
mangrove resources**

**Estimation of the mangrove area that supported
mangrove income (A_k).**

**Annual household net income at the community
level**

Results and analysis

**Socio-economic characteristics of household
survey respondents**

**Area of mangrove that support income stream
(A_k).**

Results from the economic valuation

Conclusions

References

16 US Marine Ecosystem Habitat Values

Ussif Rashid Sumaila, Jackie Alder, G. Ishimura, William. W. L. Cheung, L. Dropkin, S. Hopkins, S. Sullivan, and A. Kitchingman

Introduction

Geographical scope of study

Assigning use and non-use values to habitat types

Direct use: Habitat associated commercial values

Direct use: Habitat associated recreational values

Non-use and indirect value: Habitat values based on iconic species

The results

Direct use: Habitat associated commercial values

Direct use: Habitat associated recreational values

Non-use and indirect value: Habitat values based on iconic species

Concluding remarks

Acknowledgements

[22 Building Resilience to Climatic and Global Change in High-Latitude Fishing Communities: Three Case](#)

Studies from Iceland and Alaska

James R. McGoodwin

Introduction

Impacts that are forecast for marine ecosystems and the world's coastal fishing communities

Case studies from three high-latitude fishing communities

Case Study 1: Heimaey, Iceland

Case Study 2: Dillingham, Southwest Alaska

Case Study 3: The Yup'ik community, Southwest Alaska

Conclusion: recommendations for increasing the resilience of the three high-latitude coastal fishing communities

Recommendations for Heimaey, Iceland

Recommendations for Dillingham, Southwest Alaska

Recommendations for the Yup'ik community, Southwest Alaska

General recommendations

Regarding ordinary climatic variability

Regarding severe coastal storms and extreme weather events, sea-level rise, and saltwater intrusion

Regarding changes in marine ecosystem compositions

Regarding building the capacity of fisheries-management systems to more effectively deal with global warming and change

Regarding future fisheries research

Regarding regional fisheries management organizations

World Fisheries

A Social-Ecological Analysis

Fish and Aquatic Resources Series

Series Editor: Tony J. Pitcher

Professor of Fisheries Policy and Ecosystem Restoration in Fisheries, Fisheries Centre, Aquatic Ecosystems Research Laboratory, University of British Columbia, Canada

The *Wiley-Blackwell Fish and Aquatic Resources Series* is an initiative aimed at providing key books in this fast-moving field, published to a high international standard.

The Series includes books that review major themes and issues in the science of fishes and the interdisciplinary study of their exploitation in human fisheries. Volumes in the Series combine a broad geographical scope with in-depth focus on concepts, research frontiers, and analytical frameworks. These books will be of interest to research workers in the biology, zoology, ichthyology, ecology, and physiology of fish and the economics, anthropology, sociology, and all aspects of fisheries. They will also appeal to non-specialists such as those with a commercial or industrial stake in fisheries.

It is the aim of the editorial team that books in the *Wiley-Blackwell Fish and Aquatic Resources Series* should adhere to the highest academic standards through being fully peer reviewed and edited by specialists in the field. The Series books are produced by Wiley-Blackwell in a prestigious and distinctive format. The Series Editor, Professor Tony J. Pitcher, is an experienced international author, and founding editor of the leading journal in the field, *Fish and Fisheries*.

The Series Editor, and Publisher at Wiley-Blackwell, Nigel Balmforth, will be pleased to discuss suggestions, advise on

scope, and provide evaluations of proposals for books intended for the Series. Please see contact details listed below.

Titles currently included in the Series

1. *Effects of Fishing on Marine Ecosystems and Communities* (S. Hall) 1999
2. *Salmonid Fishes* (Edited by Y. Altukhov *et al.*) 2000
3. *Percid Fishes* (J. Craig) 2000
4. *Fisheries Oceanography* (Edited by P. Harrison and T. Parsons) 2000
5. *Sustainable Fishery Systems* (A. Charles) 2000
6. *Krill* (Edited by I. Everson) 2000
7. *Tropical Estuarine Fishes* (S. Blaber) 2000
8. *Recreational Fisheries* (Edited by T. J. Pitcher and C. E. Hollingworth) 2002
9. *Flatfishes* (Edited by R. Gibson) 2005
10. *Fisheries Acoustics* (J. Simmonds and D. N. MacLennan) 2005
11. *Fish Cognition and Behavior* (Edited by C. Brown, K. Laland and J. Krause) 2006
12. *Seamounts* (Edited by T. J. Pitcher, T. Morato, P. J. B. Hart, M. R. Clark, N. Haggan and R. S. Santos) 2007
13. *Sharks of the Open Ocean* (Edited by M. D. Camhi, E. K. Pikitch and E. A. Babcock) 2008
14. *World Fisheries* (Edited by R. E. Ommer, R. I. Perry, K. Cochrane and P. Cury) 2011
15. *Fish Cognition and Behavior, Second Edition* (Edited by C. Brown, K. N. Laland and J. Krause) 2011
