[Volume 1](#)

[Chapter 1: Foreword](#)

[**Reference**](#)

[Chapter 2: Polymer Synthesis: An Industrial Perspective](#)

[**2.1 About this Chapter**](#)

[**2.2 Why?**](#)

[**2.3 Thesis: There Are No Limits to the Fantasy of a Synthetic Polymer Chemist**](#)

[**2.4 Antithesis: We May Be Able to Synthesize Millions of New Polymers - But Why Should We Do So?**](#)

[**2.5 Synthesis**](#)

[**2.6 Conclusions**](#)

[**Acknowledgments**](#)

Chapter 3: From Heterogeneous Ziegler – Natta to Homogeneous Single-Center Group 4 Organometallic Catalysts: A Primer on the Coordination Polymerization of Olefins

3.1 Introduction

3.2 Chapter Prospectus

3.3 Fundamentals of Coordination Polymerization

3.4 Homogeneous Single-Center Coordination Polymerization

3.5 Conclusions

Acknowledgments

References

Chapter 4: Cobalt-Mediated Radical Polymerization

4.1 Introduction

4.2 Mechanistic Considerations

4.3 Key Parameters of CMRP

4.4 Macromolecular Engineering

4.5 Cobalt-Mediated Radical Coupling (CMRC)

4.6 Summary and Outlook

Acknowledgments

References

Chapter 5: Anionic Polymerization: Recent Advances

5.1 Background

5.2 Living Anionic Polymerization of Various Monomers

5.3 (Meth)acrylate Derivatives

5.4 Acrylamide Derivatives

5.5 Cyclic Monomers

5.6 Other Monomers

5.7 Reaction of Living Anionic Polymers with Electrophiles: Synthesis of Chain-Functionalized Polymers

5.8 Synthesis of Architectural Polymers via Living Anionic Polymerization

5.9 Anionic Polymerization: Practical Aspects

5.10 Concluding Remarks

References

Chapter 6: Alkyne Metathesis Polymerization (ADIMET) and Macrocyclization (ADIMAC)

6.1 Introduction

6.2 Catalyst Development

6.3 Poly(Phenylene Ethynylene)s via ADIMET

6.4 ADIMAC-Acyclic Diyne Metathesis Macrocyclization

6.5 Conclusions

References

Chapter 7: The Synthesis of Conjugated Polythiophenes by Kumada Cross-Coupling

7.1 Introduction to Polythiophene

7.2 Kumada Cross-Coupling

7.3 Polythiophenes by Kumada Cross-Coupling

7.4 Copolymers

7.5 Summary and Outlook

References

Chapter 8: “Absolute” Asymmetric Polymerization within Crystalline Architectures: Relevance to the Origin of Homochirality

8.1 Introduction

8.2 “Through-Space” Asymmetric Polymerization in Inclusion Complexes and Liquid Crystals

8.3 Isotactic Oligomers Generated within Monolayers at the Air-Water Interface

8.4 “Absolute” Asymmetric Polymerization in 3-D Crystals

8.5 Generation of Isotactic Oligopeptides via Polymerization in Racemic Crystals

8.6 Isotactic Oligopeptides from the Polymerization of Racemic ValNCA or LeuNCA in Aqueous Solution

8.7 Racemic β -Sheets in the Polymerization of α -Amino-Acids in Aqueous Solutions: Homochiral Oligopeptides and Copeptides via the “Ehler-Orgel” Reaction

8.8 Isotactic Oligopeptides from Racemic Thioesters of *DL*-Leu and *DL*-Val

8.9 Conclusions

References

Chapter 9: Synthesis of Abiotic Foldamers

9.1 Introduction

9.2 Phenylene Ethynylene Foldamers

9.3 Helical Aromatic Amides

9.4 Helical Aromatic Ureas

9.5 Helical Aromatic Hydrazides

9.6 Heterocyclic Foldamers

9.7 Conclusions

References

Chapter 10: Cylindrical Polymer Brushes

10.1 Introduction

10.2 Synthesis of CPBs

10.3 Properties of CPBs

10.4 CPBs as a Template for 1-D Inorganic/Hybrid Nanostructures

10.5 Closing Remarks

References

Chapter 11: Block Copolymers by Multi-Mode Polymerizations

11.1 Introduction

11.2 Coupling Methods

11.3 Transformation Reactions

11.4 Dual Polymerizations

11.5 Conclusions

References

Chapter 12: Advances in the Synthesis of Cyclic Polymers

12.1 Introduction

12.2 Bimolecular Approach

12.3 Unimolecular Approach

12.4 Ring-Expansion Approach

12.5 Conclusions

References

Chapter 13: Cyclodehydrogenation in the Synthesis of Graphene-Type Molecules

13.1 Introduction

13.2 Lewis Acid-Catalyzed Oxidative Cyclodehydrogenation (Scholl Reaction)

13.3 Base-Induced Cyclodehydrogenation

13.4 Oxidative Photocyclization (Mallory Reaction)

13.5 Surface-Assisted Cyclodehydrogenation

13.6 Conclusions

References

Chapter 14: Polymerizations in Micro-Reactors

14.1 Introduction

14.2 Polymerization Reactions with Excess Heat Production

14.3 Formation of Uniform Particles

14.4 Scaling-Up

14.5 Conclusions

References

Chapter 15: Miniemulsion Polymerization

15.1 Introduction

15.2 Radical Polymerization

15.3 Controlled Radical Polymerizations

15.4 Radiation-Induced Polymerization

15.5 Metal-Catalyzed Polymerizations

15.6 Ionic Polymerizations

15.7 Polyaddition

15.8 Polycondensation

15.9 Enzymatic Polymerization

15.10 Oxidative Polymerization

15.11 New Synthetic Approaches in Miniemulsion

15.12 Conclusions

References

Chapter 16: New Conjugated Polymers and Synthetic Methods

16.1 Introduction

16.2 New Polymers Prepared via Chain-Growth Methods

16.3 Mechanism

16.4 Remaining Limitations

16.5 Conclusions and Outlook

References

Chapter 17: Polycatenanes

17.1 Introduction

17.2 Main-Chain Polycatenanes

17.3 Side-Chain Polycatenanes

17.4 Polymeric Catenanes

17.5 Catenane Structures in Polymer Networks

17.6 Conclusions and Perspective

Acknowledgments

References

Chapter 18: Multicyclic Polymers

18.1 Introduction

18.2 Ring Polymers with Branches (“Tadpoles”)

18.3 Dicyclic Polymers

18.4 Tricyclic and Tetracyclic Polymers

18.5 Oligocyclic Polymers

18.6 Conclusions and Perspectives

References

Volume 2

Chapter 19: Ring-Opening Metathesis Polymerization

19.1 Introduction to Ring-Opening Metathesis Polymerization (ROMP)

19.2 Well-Defined Transition Metal-Based Initiators for ROMP

19.3 Latent Initiators for ROMP

19.4 “Living” ROMP

19.5 Summary and Outlook

References

Chapter 20: Recent Advances in ADMET Polycondensation Chemistry

20.1 Introduction

20.2 Functionalized Polyethylenes

20.3 Functional Polymers and Materials via ADMET

20.4 Exotic Polymer Structures

20.5 Summary and Outlook

References

Chapter 21: Macromolecular Engineering via RAFT Chemistry: From Sequential to Modular Design

21.1 Introduction
21.2 Sequential Design
21.3 Modular Design
21.4 Conclusions
References

Chapter 22: Suzuki Polycondensation

22.1 Introduction
22.2 General Remarks
22.3 How to Perform SPC, and Aspects of Characterization
22.4 Recent Progress in Broadening the Scope of SPC
22.5 Selected Examples of Polyphenylenes and Related Polymers by SPC
22.6 Conclusions and Outlook
Acknowledgments
References

Chapter 23: Enzymatic Polymerization

23.1 Introduction
23.2 Enzymatic Synthesis of Phenolic Polymers
23.3 Enzymatic Synthesis of Polyesters
23.4 Concluding Remarks
References

Chapter 24: Hyperbranched Polymers: Synthesis and Characterization Aspects

24.1 Introduction

24.2 Synthetic Methodologies

24.3 Characterization Aspects

24.4 Separation Techniques for hb Polymers

24.5 Size Determination and Scaling

Parameters of hb Polymers

24.6 Conclusions

References

Chapter 25: Emulsion Polymerization

25.1 Introduction

25.2 Molecular Description of Emulsion Polymerization

25.3 Radical Polymerization Kinetics in Emulsion Polymerization

25.4 Conclusion

Acknowledgments

References

Chapter 26: Carbocationic Polymerization

26.1 Introduction

26.2 Mechanistic and Kinetic Details of Living Cationic Polymerization

26.3 Living Cationic Polymerization

26.4 Functional Polymers by Living Cationic Polymerization

26.5 Telechelic Polymers

26.6 Macromonomers

26.7 Linear Diblock Copolymers

26.8 Linear Triblock Copolymers

26.9 Block Copolymers with Nonlinear Architecture

26.10 Branched and Hyperbranched Polymers

26.11 Surface Initiated Polymerization — Polymer Brushes

26.12 Conclusions

References

Chapter 27: From Star-Like to Dendrimer-Like Polymers

27.1 Introduction

27.2 Essential Features and Properties of Stars and Dendrimer-Like Polymers

27.3 General Methods for the Synthesis of Star Polymers

27.4 General Methods for the Synthesis of Dendrimer-Like Polymers

27.5 Conclusions

References

Chapter 28: Two-Dimensional Polymers

28.1 Introduction

28.2 Why 2-D Polymers?

28.3 What Is Not Considered a 2-D Polymer?

28.4 General Considerations on Rational 2-D Polymer Synthesis

28.5 Approaches to 2-D Polymers and Related Structures

28.6 Conclusions and Outlook

References

Chapter 29: Poly(*para*-Phenylene Vinylene)s

29.1 Introduction

29.2 Step-Growth Syntheses of PPVs

29.3 Chain-Growth Syntheses of PPVs

29.4 Conclusions and Outlook

Acknowledgments

References

Chapter 30: “Click” Chemistry in Polymer Science: CuAAC and Thiol–Ene Coupling for the Synthesis and Functionalization of Macromolecules

30.1 Introduction and Perspective

30.2 Polymers from “Click” Chemistry

30.3 Summary and Conclusions

References

Chapter 31: Carbenes in Polymer Synthesis

31.1 Introduction to Carbenes

31.2 Carbenes as Structural Components of Macromolecules

31.3 Carbene-Based Polymerization Catalysts

31.4 Conclusions

References

Chapter 32: Polymerization in Confined Geometries

32.1 Introduction

32.2 Polymer Synthesis in Organic Hosts

32.3 Polymerization in Inorganic Hosts

32.4 Polymer Synthesis in Organic-Inorganic Hybrid Hosts

32.5 Summary and Conclusions

References

Chapter 33: Accelerated Approaches to Dendrimers

33.1 Introduction

33.2 Classification and Synthesis

33.3 Accelerated Synthesis of Dendrimers

33.4 Summary and Conclusions

References

Chapter 34: Supramolecular Polymers

34.1 Introduction

34.2 Supramolecular Chemistry

34.3 Supramolecular Polymerization Mechanisms

34.4 Examples of Supramolecular Polymers

34.5 Supramolecular Polymeric Materials

34.6 Future Perspectives

References

Chapter 35: Nucleic Acid Polymers and DNA Synthetic Polymer Hybrid Materials Generated by Molecular Biology Techniques

35.1 Introduction

35.2 DNA Hydrogels Mediated by the Action of DNA Ligases

35.3 DNA Block Copolymers and DNA Networks Generated by the Polymerase Chain Reaction

35.4 Generating DNA-Synthetic Polymer Hybrids with DNA Polymerases

35.5 Plasmids and Catenated Nucleic Acid Architectures from Circular DNA Molecules

35.6 Conclusions

References

Chapter 36: Cyclodextrin-Based Polyrotaxanes

36.1 Rotaxanes

36.2 Polyrotaxanes

36.3 Rotaxanes Containing CDs

36.4 Polyrotaxanes Containing CDs

36.5 Formation of Gel by Mixing Host Polymers and Guest Polymers

36.6 Tubular Polymers
