For Dylan. May you stay forever young!

—AMANDA AND SHANE

For the wonderful team at Battelle that helped me get started so many years ago. Cathy, Diana, and Jane, I couldn't imagine getting my start on a better team!

—JENNIFER

For all of my girls; you are growing up to be such smart and amazing little ladies. Thank you for being so sweet and loving. You inspire me every day.

—LAURA

ABOUT THE AUTHORS

AMANDA PERRAN is a seven-time recipient of the Microsoft Most Valuable Professional for Microsoft SharePoint Server, located in St. John's, Newfoundland and Labrador. She has been working as a consultant and trainer with SharePoint for more than 10 years. Amanda is a regular speaker and presenter at user group meetings, webcasts, and conferences, on topics such as Information Architecture, Enterprise Content Management and Governance. She is the co-founder of SharePoint Nation (www.sharepointnation.org), a virtual user group for SharePoint. You can follow her on Twitter as @amandaperran or visit her weblog at www.sharepointmentors.com.

SHANE PERRAN is a five-time recipient of the Microsoft Most Valuable Professional for Microsoft SharePoint Server, located in St. John's, Newfoundland and Labrador. He has been designing online user experiences for more than 15 years. His strong passion for visual presentation, web standards, and usability has paved the way for a successful transition into the SharePoint Products and Technologies space, where, over the past 10 years, Shane has become highly involved and focused in the SharePoint customization space. He is the co-founder of SharePoint Nation (www.sharepointnation.org), a virtual user group for SharePoint. Shane's SharePoint Customization Blog (www.graphicalwonder.com) is a popular stop for customization enthusiasts across the globe. You can follow Shane on Twitter as @shaneperran.

JENNIFER MASON, as a SharePoint Server MVP, has spent the last several years consulting others on best practices for implementing business solutions using SharePoint technologies. She is passionate about SharePoint and loves using out-of-the-box features to bring immediate ROI to her clients. She has worked with a range of companies, leading teams responsible for the design, implantation, and maintenance of SharePoint environments. When she isn't riding the slide at her new company, Rackspace Hosting, Jennifer focuses on strategy, planning, governance, and sharing her knowledge with the SharePoint community. After a recent move to the Lone Star State from Ohio, where she was a founding member of the Columbus, Ohio SharePoint Users Group, Jennifer is learning how to be a true Texan, cowboy boots and all.

You can learn more about Jennifer by viewing her blog at <http://sharepoint911.com/blogs/jennifer>. You can follow Jennifer on Twitter as @jennifermason.

LAURA DERBES ROGERS is a Senior SharePoint Consultant at Rackspace Hosting, and a Microsoft MVP. Her background is in server administration. She has been working with SharePoint implementations, training, customization, and administration since 2004. Her focus is on making the most of SharePoint's out-of-the-box capabilities without writing code. She works extensively with automating business processes with SharePoint Designer workflows and forms. Laura is a regular speaker at several different SharePoint conferences and loves sharing ideas on her blog at www.wonderlaura.com. A graduate of Louisiana State University, Laura currently resides in Birmingham, Alabama with her husband and two daughters. You can follow Laura on Twitter as @WonderLaura.

ABOUT THE TECHNICAL EDITORS

JAVIER BARRERA is a SharePoint Engineer at Rackspace (USA), a premier service leader focusing on a business class audience. He is the Senior Lead Engineer who serves as an architect and administrator to hundreds of enterprise-level SharePoint farms. Javier has delivered more than 30 presentations at SharePoint-focused events, and authored numerous blogs and articles. He is a contributing author to the forthcoming *Professional SharePoint 2013 Administration*. Javier, his beautiful wife, Roxanne, and three children live in San Antonio, Texas. His speaking engagement information and writing references are available at <http://JavierBarrera.com>.

COREY BURKE is a SharePoint Architect at Rackspace (UK). Corey has designed and built farms of more than 100,000 users and uses his experience to give back to the community. He is also a contributing author for *Professional SharePoint 2013 Administration*.

ACKNOWLEDGMENTS

IT IS COMMON FOR AUTHORS to thank their spouses or partners for their understanding and support during the book-writing process. In our case, this was a project by a husband-and-wife team, which meant that the late nights, deadlines, and missed holidays were spent together, side by side, for better or worse. Of course, we would have it no other way.

We would like to thank our families for their love, support, and encouragement throughout this book and all the other challenges and surprises that life can bring.

It is an honor and a pleasure to share a title with talented professionals such as Laura and Jennifer. Thank you again for your excellent work on this book.

As always, we would like to thank Jim Minatel for introducing us to the Wrox team so many years ago. Thank you to Mary E. James for leading this project and for helping us get focused very early in the game. Thank you to John Sleeva for your excellent professionalism and support. It was an extreme pleasure to work with you on this project and we hope our paths cross again. Thank you Javier Barrera, Corey Burke, and Kim Cofer for your diligence and attention to detail throughout the editing process. Each of your talents contributed significantly to this project and we are so very grateful to each of you.

Finally, to Dylan. We would especially like to thank you for providing an excellent source of motivation and perspective during the entire process. Everything we do and experience in life is made so much better because of you. You are a light like no other.

—AMANDA AND SHANE

WRITING TECHNICAL BOOKS is one of the things that I consider a huge blessing to be able to do. So many people along the way have helped get me to a point where this is possible. It would be impossible to thank them all by name, but it is important to call out some that have specifically helped me with this project.

Cathy, Diane, and Jane, who would have thought that hiring an intern would be such an adventure? I think back very often on the crazy times we had and am thankful that I was able to get my start with such a wonderful team. The time I spent with you was rich in learning and more fun than anyone should have at work! I think of you ladies often and credit many of my successes today on the investments you made in me. I am truly thankful and blessed for the time I was able to work with you!

When Amanda and Shane asked Laura and me to join this project a few years ago, little did I realize the changes it would have on my career. This is one of my proudest accomplishments, and I am so happy to be able to work on such a great team of people! Shane, Amanda, and Laura, I appreciate the long hours and the sacrifices you have put into this project. I couldn't ask for a better team to work with!

To the team at Wrox, especially Mary James and John Sleeva, thank you for all the hard work and effort you put into polishing this work and making it ready for print. I know you have quite a task when you have to deal with authors, and I appreciate all that you do.

Javier Barrera and Corey Burke, thanks so much for all the technical editing you did for this book. Your dedication and hard work has made for a better book. I am lucky to have you two as coworkers and thankful for the fanatical investment you have made for this book.

Jeff DeVerter, this year has been full of changes, and I am thankful for all you have done for me as I have transitioned into my new role at Rackspace. I consider myself lucky to have you as a manager, and this project definitely wouldn't have been possible without you helping me clear my schedule and make time for me to dedicate to the project.

Finally, I want to thank the SharePoint community, without whom none of this would be possible. I appreciate the time we get to spend together, and I consider so many of you close friends. I look forward to a future of learning more things together!

—JENNIFER

WORKING ON THIS BOOK has been quite an experience, and there are several people who I would like to thank. The major influencers in my life exist on both the personal and the professional sides.

First, my husband, Chris, has been wonderful and supportive. His sarcasm and wit have always kept me laughing despite any book-deadline stresses. Speaking of family, I thank my daughters, who are growing up to be so intelligent, lovely, and poised. Also, thanks to my parents and my brother for being such a supportive family.

Thanks to Jennifer Mason and to Shane and Amanda Perran for being so inspiring to work with. I really have enjoyed being a part of this endeavor with all of you. You are outstanding and inspiring, and I look forward to working with you in many future endeavors.

Of course, I would also like to extend my thanks to the Wrox team, especially Mary James and John Sleeva. It has been more than a pleasure working with you on this book. You have been wonderful, professional, and patient, and I sincerely hope that we cross paths again soon.

Lastly, I would like to thank those of you who have been a major part of my path as a SharePoint professional: Shane Young, Todd Klindt, Bill English, Brett Lonsdale, Mark Miller, and Lori Gowin. Thanks to all my colleagues at Rackspace. You are like family to me, and I truly enjoy working with you every day.

—LAURA

APPENDIX A: INSTALLING SHAREPOINT SERVER 2013	599
APPENDIX B: EXERCISE SOLUTIONS	605
INDEX	617

INTRODUCTION

MICROSOFT SHAREPOINT SERVER 2013 has improved and changed dramatically over previous versions of the product, including significant enhancements to the web content management, social media, business connectivity, and search features of the platform. However, the value of this tool to an enterprise depends primarily on the ability of individuals in the organization to understand the features and capabilities of the platform and effectively map those to specific business requirements.

This book is designed to mentor and coach an organization's business and technical thought leaders on the use and configuration of SharePoint to address critical information-management problems. It gives detailed descriptions and illustrations of the product's functionality and includes realistic usage scenarios to provide contextual relevance and a personalized learning experience.

WHO THIS BOOK IS FOR

The mission of this book is to provide extensive knowledge to information workers and site managers that will empower them to become SharePoint application champions in their organizations. This book should be the premier handbook of any active or aspiring SharePoint expert.

To complete the exercises (known as *Try It Outs*) in this book, you should have a basic comfort level using Microsoft Office client applications to create content and a general understanding of how to interact with a website through the browser. This book is intended as a starting point for any SharePoint 2013 user, whether that user has never used SharePoint before or has some familiarity with a previous version and just wants to understand the differences with the new release.

WHAT THIS BOOK COVERS

SharePoint 2013 represents the latest release of Microsoft's portal and collaborative technology platform. This book covers in detail many of the features of Microsoft SharePoint Server 2013 that will assist you in creating an effective collaboration, content management, business intelligence, business process, or social media solution for your organization. It addresses core functionality that has existed in SharePoint within previous versions as well as new concepts that have been introduced in this latest release.

HOW THIS BOOK IS STRUCTURED

This book covers the essential elements of using and configuring SharePoint 2013 as an effective tool for business. Each chapter focuses on a dedicated topic and provides hands-on exercises to assist with your learning experience. The following is a short summary of each chapter of this book.

- **Chapter 1, “Understanding SharePoint”:** This chapter serves as an introduction to SharePoint and lays the foundation for important terminology and concepts explored in the following chapters.
- **Chapter 2, “Working with List Apps”:** This chapter introduces one of the core mechanisms for sharing and organizing content in a SharePoint site. You will review what list apps are and how they are used, and then explore the various types that exist in SharePoint 2013.
- **Chapter 3, “Working with Library Apps”:** After reviewing some of the fundamental concepts relating to lists, this chapter introduces the other major storage mechanism in SharePoint, known as libraries. This chapter discusses some of the various apps that exist for libraries.
- **Chapter 4, “Managing and Customizing Lists and Libraries”:** SharePoint apps for lists and libraries provide a great starting point for collaboration and information sharing. This chapter shows how you can extend these base templates to address an organization’s specific requirements for a collaborative site or information management tool.
- **Chapter 5, “Working with Workflows”:** This chapter discusses the templates that SharePoint provides for workflows and demonstrates how to create custom workflow solutions using the SharePoint Designer application.
- **Chapter 6, “Working with Content Types”:** Most organizations have documents that use consistent templates, processes, and policies each time they are created. Therefore, SharePoint has content types, which allow an organization to package templates and information to ensure that reusable components are rolled out in the organization to enforce consistency and ease of use. This chapter demonstrates what content types are and explores how they can be used through some hands-on examples.
- **Chapter 7, “Working with Web Parts”:** Web parts are an important element in SharePoint because they enable teams to present information on their sites to users in many different ways. This chapter explores the various groups of Web Parts that exist in SharePoint 2013, and gives examples on how specific types of Web Parts can be configured and used to present information in a desired manner.
- **Chapter 8, “Working with Sites”:** The fundamental components of any SharePoint environment are its sites and workspaces. These collaborative work areas contain all the components discussed in previous chapters and represent how each of those items comes together to provide an effective environment for collaboration, communication, and document management. In this chapter, topics such as site templates and features are covered.
- **Chapter 9, “Managing Permissions”:** Effective management of users is of ultimate importance to any information system. The two primary tiers of effective user management are securing content and personalizing information on the portal. This chapter explains in simple terms how to effectively secure a SharePoint environment at the site level, the list or library level, and down to the unique content items stored on a SharePoint site. In addition,

the chapter introduces personalization to ensure that readers understand how to effectively target information to users in a portal.

- **Chapter 10, “Working with Business Intelligence”:** This chapter demonstrates how to improve the overall decision making of an organization, including providing access to important information, using browser-based worksheets and visual indicators of performance information, and building personalized, interactive dashboards.
- **Chapter 11, “Working with Social Features”:** Social networking has been an area of major enhancement in SharePoint 2013. In this chapter, you will learn how to make the most of SharePoint’s social networking, such as My Sites, tags, blogs, wikis, and ratings.
- **Chapter 12, “Managing Forms”:** Microsoft InfoPath is the ideal companion to SharePoint for many business solutions. This chapter introduces readers to creating simple business applications using Microsoft InfoPath, including creating template parts, creating flexible form interfaces, and connecting to business data.
- **Chapter 13, “Working with Access Services”:** This chapter provides an overview of the new and simplified Access application model in SharePoint 2013, which empowers users to create Access applications that leverage SharePoint 2013 as the front end.
- **Chapter 14, “Branding and the User Experience”:** SharePoint 2013 offers a significantly improved experience for changing the look and feel of your site. In this chapter we will take a look at some of these enhancements, including the Design Manager and an improved mobile experience through channels.
- **Chapter 15, “Getting Started with Web Content Management”:** This chapter provides an overview of the web content management capabilities of the system, including the use of publishing sites and features, the automatic provisioning of multilingual content through variations, and the creation of custom page templates known as *page layouts*.
- **Chapter 16, “Managing Records”:** This chapter provides an overview of and introduction to the establishment of a records management practice in your organization using SharePoint 2013. The chapter covers topics including term sets, archive-based records management features, as well as in-place records management features.
- **Chapter 17, “Working with Search”:** An information system is useful to an organization only if stakeholders can easily access and locate the information it contains. This chapter discusses the search engine capabilities of the SharePoint platform, including methods that improve the search experience through the use of effective queries, configurations, and analytics.
- **Chapter 18, “Building Solutions in SharePoint”:** This chapter explores the practical usage of SharePoint 2013, exploring realistic scenarios that leverage SharePoint features to perform critical business functions.

WHAT YOU NEED TO USE THIS BOOK

To complete the examples in this book effectively, you should have access to a Microsoft SharePoint Server 2013 environment or site collection, and have administrative rights to the server. If you do not have administrative rights, your server administrator may have to assist you with some exercises in this book.

You should also have a client computer running either Windows 7 or Windows 8 along with Microsoft Office 2013 Professional or Professional Plus, and SharePoint Designer 2013. Although many exercises can be completed with earlier versions of Office, certain exercises may function better with Office 2013.

The resource files for the samples is available for download from the Wrox website at:
